p. 14-104

p. 14-105

actively engaged in the member's business with respect to each aspect of the member firm's investment banking and securities business. [427] Large firms have many supervisory and management level personnel registered as principals. Principals must be responsible for supervision, solicitation, conduct of business and training. The firm's chief financial officer (or an individual with equivalent responsibilities) must take and pass the Financial and Operations Principal Examination ("Series 27") and register as the member's financial and operations principal (commonly referred to as a "FinOp"). [428] FINRA also requires a member to designate a chief compliance officer and for that officer to be Series 24-licensed. [429] In addition, depending upon the nature of its business, a FINRA member may be required to have other "limited principals"; for example, "registered options and security futures principals" are required if the FINRA member engages in an options or security futures business with the public. [430]

Each associated person of a FINRA member generally must individually register with FINRA by having the member complete Form U4. [431] The form requires information concerning the position that the associated person will have with the broker-dealer, the person's employment and personal history for the past ten years and whether the person has ever been charged or involved with an investment-related crime or comparable crime involving personal dishonesty or is otherwise subject to "statutory disqualification." [432] The required registration of associated persons allows FINRA to serve as the central depository for information on associated persons of its members. [433]

In addition to completing Form U4, the associated persons of a broker-dealer generally must pass one or more qualifying examinations, depending on the types of securities business or investment banking in which they are involved and the level of their responsibilities. Despite certain efforts to ease the burden of the examination process and the number of qualifications necessary to operate

p. 14-105

p. 14-106

across international borders, preparation for these examinations can be time-consuming and thus personnel of foreign broker-dealers have in many instances been discouraged from taking the examinations and qualifying as employees of a U.S. broker-dealer. [434]

All registered broker-dealer personnel are also required to complete a two-part continuing education program. [435] The program, which has been approved by the SEC, focuses on current compliance, regulatory, ethical and sales-practice standards. FINRA administers the industry-wide regulatory element of the program *via* computer-based training to broker-dealer personnel in their second year of registration and every three years thereafter, while each broker-dealer is required to implement an ongoing in-house education program to keep its employees up to date on job and product-related subjects. [436] While broker-dealer personnel are not subject to grades or examination with respect to this program, failure to complete the regulatory element of the continuing education program may result in an associated person's FINRA registration being terminated. In addition, failure by a broker-dealer or individual employee to comply with the education program may subject such broker-dealer or employee to disciplinary action. [437]

p. 14-106

p. 14-107

When terminating an associated person of a FINRA member, broker-dealers are required to file a Form U5 (Uniform Termination Notice for Securities Industry Registration). This form requires broker-dealers to state the reason for the employee's termination, and if the termination is for misconduct, the broker-dealer must give details regarding this misconduct. [438] Broker-dealers that, in accordance with this requirement, candidly state the basis of dismissal have, however, faced legal actions by dismissed employees for libel or other torts, leading some broker-dealers to support legislation that would grant legal immunity from such claims for broker-dealers acting in good faith. [439] In 2007, the New York Court of Appeals ruled that an employer's statements on a Form U5 are protected by an absolute privilege in defamation lawsuits. [440]

[4] Anti-Money Laundering Compliance Obligations

SEC-registered broker-dealers are subject to a variety of anti-money laundering (or "AML") compliance obligations under the Bank Secrecy Act of 1970 (the "BSA"), [441] as amended by the USA PATRIOT Act (the "PATRIOT Act") [442] and as implemented in regulations adopted by the Financial Crimes Enforcement Network ("FinCEN") (in some cases jointly with the SEC) [443] and in rules adopted by SROs. This section briefly summarizes the most noteworthy of these compliance obligations.

[a] Background

Before the PATRIOT Act was enacted, U.S. broker-dealers that were not affiliates of banking organizations were not subject to the core AML compliance obligations that applied to commercial banks and their affiliates under the BSA.

p. 14-107

p. 14-108

Although many other countries with leading financial centers applied AML compliance obligations to investment banking firms, it was unclear to what extent U.S. broker-dealers were vulnerable to money laundering. Most broker-dealers do not regularly accept cash or other monetary instruments, and many broker-dealers have policies against accepting cash. [444]

At the same time, broker-dealers were subject to criminal money laundering laws and to BSA reporting requirements relating to large currency transactions. Broker-dealers also were permitted to file suspicious activity reports ("SARs") under the BSA on a voluntary basis (and many large broker-dealers routinely did so). As a result, many large broker-dealers had adopted AML programs before they were required to do so under the PATRIOT Act.

[b] Anti-Money Laundering Program Requirements

Under § 352 of the PATRIOT Act, all SEC-registered broker-dealers must establish an AML program. [445] Under FinCEN's regulations implementing § 352, a broker-dealer is deemed to be in compliance with § 352 if it complies with the AML requirements of an applicable SRO. [446] Accordingly, FINRA adopted Rule 3310, which requires its broker-dealer members to develop and implement AML programs that contain the key elements identified in § 352. [447] A broker-dealer subject to the AML program requirements of FINRA must adopt written policies and procedures reasonably designed to ensure that it not be used to launder money. The broker-dealer also is required under FINRA Rule 3310 to provide for

p. 14-108

p. 14-109

periodic independent testing of its AML program, designate an AML compliance officer and provide ongoing training to employees. [448]

[c] Suspicious Activity Reporting Requirements

As required by the PATRIOT Act, FinCEN has promulgated suspicious activity reporting requirements for registered broker-dealers. [449] Broker-dealers currently are required to file SARs on FinCEN Form 111 for any transaction conducted or attempted by, at or through a broker-dealer involving at least $5,000, where the broker-dealer knows, suspects or has reason to suspect that the transaction (or pattern of transactions): (i) involves funds derived from illegal activity or is intended or conducted in order to hide or disguise funds or assets derived from illegal activity as part of a plan to violate or evade any federal law or regulation or transaction reporting requirement, (ii) is designed to evade BSA regulatory requirements, (iii) has no business or apparent lawful purpose, or is not the type of activity in which the particular customer would normally be expected to engage and for which the broker-dealer upon examination knows of no reasonable explanation, or (iv) involves use of the broker-dealer to facilitate criminal activity. [450]

A broker-dealer that files a SAR is generally prohibited from disclosing the fact that a SAR was filed, or any information that would reveal the existence of a SAR, to any person, including any person involved in the reported transaction. [451] This confidentiality requirement does not, however, prevent broker-dealers from sharing SARs with their parent companies and with other affiliates that are also subject to SAR regulation and a written confidentiality agreement with respect to maintaining the confidentiality of SARs. [452] In addition, under the

p. 14-109

p. 14-110

BSA, broker-dealers benefit from a general safe harbor from liability (*e.g.*, defamation liability) for filing a SAR. [453] Although at least one court has suggested that this safe harbor requires that the reporting institution have a "good faith suspicion," [454] the weight of judicial authority has rejected this requirement. [455]

[d] Customer Identification Programs

As part of their broader AML program, registered broker-dealers are required to adopt a written Customer Identification Program ("CIP"). [456] A CIP must include procedures for (i) verifying the identity of any person seeking to open an account, to the extent reasonable and practicable, (ii) maintaining records of the information used to verify the person's identity, including name, address, and other identifying information, and (iii) determining whether the

p. 14-110

p. 14-111

person appears on any lists of known or suspected terrorists or terrorist organizations provided to the broker-dealer by any governmental agency. [457] These procedures are not required for certain classes of customers, such as financial institutions (as defined in the BSA) that have a federal functional regulator (or, in the case of state banks, a state regulator), entities with publicly traded shares and certain governmental entities. [458] The CIP rules that apply to broker-dealers, issued jointly by FinCEN and the SEC, contain specific requirements relating to permissible documentary and nondocumentary methods for verifying a customer's identity, recordkeeping requirements, procedures for checking customer names against government lists, and providing notice to customers regarding the collection of identifying information. [459]

The CIP rule for broker-dealers permits broker-dealers to rely on certain types of BSA-regulated financial institutions (including affiliates) to perform the procedures required under the broker-dealer's CIP. Such reliance must be "reasonable under the circumstances," and only BSA-regulated financial institutions that are required to adopt an AML program under § 352 of the PATRIOT Act are eligible. [460] In addition, the financial institution must enter into a contract requiring it to certify annually to the broker-dealer that the financial institution has

p. 14-111

p. 14-112

implemented its AML program, and that it (or its agent) will perform specified requirements of the broker-dealer's CIP. [461]

[e] Customer Due Diligence

In May 2016, FinCEN issued a final rule (the "Final CDD Rule") formalizing regulatory expectations regarding customer due diligence and introducing a new requirement for broker-dealers to identify and verify the identity of the beneficial owners of their legal entity customers. [462] Specifically, the Final CDD rule will impose a requirement on broker-dealers to identify and verify the identity of certain of their legal entity customers' "beneficial owners," defined as: (i) each individual directly or indirectly owning 25% or more of the entity's equity interests, and (ii) a single individual with significant responsibility to control, manage or direct a legal entity customer. [463] The deadline for compliance with the requirements of the Final CDD Rule is May 2018. [464]

The Final CDD Rule includes certain exemptions and exclusions, including not requiring beneficial ownership diligence for certain types of publicly traded companies, pooled investment vehicles, regulated financial institutions and trusts. [465] FinCEN has also indicated that, to the extent that existing guidance allows a broker-dealer to treat an intermediary (and not the intermediary's customers) as its customer for CIP purposes, the broker-dealer should treat the intermediary as its legal entity customer for purposes of the beneficial ownership requirement. [466] For example, a broker-dealer that appropriately maintains an omnibus account for an intermediary may treat the intermediary, and not the

p. 14-112

p. 14-113

underlying clients, as its legal entity customer for purposes of the beneficial ownership requirement. [467] Additionally, when the Final CDD Rule applies to a broker-dealer's relationship with a legal entity customer, formal reliance on another financial institution to perform the beneficial ownership diligence is possible under the same conditions that apply to reliance for CIP purposes. [468]

[f] Information Sharing Requirements

FinCEN's rule implementing § 314(a) of the PATRIOT Act (the "Information Sharing Rule") gives FinCEN the power to request, on its own behalf and on behalf of federal, state, local and certain foreign law enforcement authorities, information regarding suspected terrorists or money launderers from broker-dealers and other BSA-regulated financial institutions. [469] A financial institution that receives such a request is required to search its records to determine whether it maintains or has maintained any account (within the last 12 months) or has engaged in certain transactions (within the last 6 months) for or on behalf of the named subject or subjects of the request. [470] The Information Sharing Rule clarifies that a financial institution need not take further action with respect to an account or transaction that may be related to a suspected money launderer and that, unless otherwise specified, information requests are not continuing in nature.

The Information Sharing Rule also implements § 314(b) of the PATRIOT Act, which permits financial institutions to share information with each other regarding known and suspected terrorists and money launderers, upon prior

p. 14-113

p. 14-114

notice to FinCEN (which notice is effective for one year, subject to renewal). Before sharing information under the Information Sharing Rule, a financial institution must take reasonable steps to verify that the other financial institution with which it intends to share information has submitted its own notice to FinCEN under § 314(b). [471] Section 314(b) and the Information Sharing Rule also provide a safe harbor protecting financial institutions from liability under U.S. federal, state and local law for sharing information or failing to notify the subject of the shared information. [472]

[g] Private Banking and Correspondent Account Due Diligence

Under § 312 of the PATRIOT Act, [473] broker-dealers and other BSA-regulated financial institutions are required to perform due diligence, and in some cases enhanced due diligence, on non-U.S. persons for whom the financial institution "establishes, maintains, administers, or manages" a "private banking account" in the United States. [474] The financial institution is required to take reasonable steps to ascertain the identity of the nominal and beneficial owners of, and sources of funds deposited into, the account. In addition, the financial institution is required to conduct enhanced scrutiny of any account requested or maintained by or on behalf of a senior foreign political figure (also referred to as a "politically exposed person" or "PEP"), or any of his or her immediate family members or close associates in order to detect and report transactions that may involve the proceeds of foreign corruption.

Under § 312, broker-dealers and other BSA-regulated financial institutions are also required to perform due diligence, and in some cases enhanced due diligence, with respect to "correspondent accounts" for non-U.S.

persons. [475] The definition of "correspondent account" for purposes of the PATRIOT Act is extremely broad—far exceeding any conventional understanding of the term

p. 14-114
p. 14-115

"correspondent banking account." [476] "Correspondent account" is defined to mean "an account established for a foreign financial institution to receive deposits from, or to make payments or other disbursements on behalf of, the foreign financial institution, or to handle other financial transactions related to such foreign financial institution." [477] The term "account" in the definition of "correspondent account" is defined for broker-dealers to mean "any formal relationship established with a broker or dealer in securities to provide regular services to effect transactions in securities, including, but not limited to, the purchase or sale of securities and securities loaned and borrowed activity, and to hold securities or other assets for safekeeping or as collateral." [478]

In 2005, FinCEN adopted final rules implementing § 312 of the PATRIOT Act, replacing the interim rule that had been in effect since 2002. [479] FinCEN adopted the statutory definition of "correspondent account," but modified the due diligence requirement to be more risk-based. Under the final rule for correspondent accounts for foreign financial institutions and private banking accounts, broker-dealers must establish a due diligence program that includes appropriate, specific, risk-based and, where necessary, enhanced policies, procedures and controls reasonably designed to detect and report known or suspected money laundering activity through or involving any correspondent account or private banking account. [480]

In August 2007, FinCEN adopted rules requiring "enhanced" due diligence for correspondent accounts of foreign banks operating under (i) an offshore banking license, (ii) a license issued by a country designated as noncooperative with international AML principles by an intergovernmental group or organization of which the United States is a member and with which designation the U.S. representative to the group or organization concurs or (iii) a license issued by a country designated by the U.S. Treasury Department as warranting special measures due to money laundering concerns. [481]

[h] Foreign Shell Bank Prohibition and Correspondent Account Recordkeeping Requirements

p. 14-115
p. 14-116

Registered broker-dealers are prohibited under § 313(a) of the PATRIOT Act [482] from establishing, maintaining, administering or managing a correspondent account in the United States for or on behalf of any "foreign shell bank" (*i.e.*, a foreign bank that does not have a physical presence in any jurisdiction), unless the foreign bank is a so-called "regulated affiliate." [483] Broker-dealers also must take "reasonable steps" to ensure that a correspondent account maintained for a foreign bank is not used by the foreign bank indirectly to provide banking services to a foreign shell bank (other than a regulated affiliate).

Under § 319(b) of the PATRIOT Act, registered broker-dealers must maintain records identifying the owners and designated U.S. agents for service of process of foreign banks for which they maintain a correspondent account. Records regarding the foreign bank's owners are not required for foreign banks whose shares are publicly traded or that report ownership information to the Board on Form FR Y-7 (which thus excludes most foreign banks with U.S. banking operations). [484]

FinCEN has not mandated a specific method by which broker-dealers must comply with the shell bank prohibition or the correspondent account recordkeeping requirements of the PATRIOT Act. However, FinCEN has promulgated a form of certification that can be used as a safe harbor for compliance with these provisions. In order to satisfy the safe harbor, the certification must be renewed every three years. [485]

[5] Research Analysts and Research Reports

FINRA Rule 2241 addresses the publication of research reports analyzing equity securities by FINRA members and the conduct of research analysts responsible for preparing such reports. The rule requires members to establish, maintain and enforce written policies and procedures reasonably designed to identify and effectively manage conflicts of interest related to the preparation,

p. 14-116

p. 14-117

content and distribution of research reports, public appearances by research analysts and the interaction between research analysts and nonresearch personnel. Among other things, these policies and procedures must:

- prohibit prepublication review, clearance or approval of research reports by persons engaged in investment banking services and restrict such review by personnel not responsible for their preparation, content and distribution;
- restrict input by the investment banking department into research coverage decisions to ensure that research management independently makes final decisions regarding research coverage;
- prohibit persons engaged in investment banking activities from supervising or controlling research analysts, retaliating against them as a result of unfavorable research reports or public appearances, directing them to engage in sales or marketing efforts related to an investment banking services transaction, or directing them to engage in any communication with a current or prospective investment banking customer; [486]
- limit determination of the research department budget to senior management (excluding management engaged in investment banking activities) and prohibit compensation based on specific investment banking transactions or contributions to investment banking activities; [487]
- establish information barriers or other institutional safeguards reasonably designed to ensure that research analysts are insulated from the review, pressure or oversight by persons engaged in investment banking activities or other persons (including sales and trading personnel) who might be biased in their judgment or supervision;
- define periods during which the member must not publish research reports or allow public appearances by research analysts, including a minimum of ten days following the date of any initial public offering by the subject company if the member participated as underwriter or dealer in the offering and a

p. 14-117

p. 14-118

  minimum of three days following the date of any secondary offering if the member acted as manager or co-manager of the offering; [488]
- restrict or limit research analyst trading in securities covered by the research analyst (and any derivatives or funds whose performance is materially dependent on the performance of such securities), including ensuring that research analysts and related personnel do not benefit from knowledge of the content or timing of the research report before the intended recipients have a reasonable opportunity to act on the information in the report, prohibiting research analyst accounts from trading in a manner inconsistent with a research report or recommendation and prohibiting research personnel from purchasing or receiving pre-IPO securities from issuers engaged in the business that the research analyst follows;
- prohibit explicit or implicit promises of favorable research, recommendations or specific research content as an inducement for the receipt of business or compensation;
- restrict or limit activities by research analysts that can reasonably be expected to compromise their objectivity, such as participation in pitches or other solicitations of investment banking services, participation in road shows or other marketing on behalf of an issuer related to an investment banking services transaction; and

- prohibit prepublication review of a research report by a subject company (*i.e.*, a company whose equity securities are the subject of the report) for purposes other than verification of facts.

In addition to requiring members to identify and manage conflicts of interest, Rule 2241 requires FINRA members to establish, maintain and enforce written policies and procedures reasonably designed to ensure that purported facts in research reports are based on reliable information and any recommendation, rating or price target has a reasonable basis and is accompanied by a clear explanation of the valuation method used and a fair presentation of the risks that may impede its achievement. Equity research reports are also required to include:

- specific information regarding the member firm's rating system;
- graphical representations of the member's historic rating or price target for the subject company and subject company's share price;

p. 14-118
p. 14-119

- disclosure regarding any financial interest the research analyst or any member of the analyst's household has in the subject company;
- disclosure if the research analyst received any compensation based on the member's investment banking revenue;
- disclosure if the member or its affiliates managed or co-managed a public offering for the subject company in the last twelve months, received any investment banking or other compensation from the subject company in the last twelve months or expects to receive investment banking compensation from the subject company in the next three months;
- disclosure if the member or its affiliates beneficially own 1% or more of any class of common equity of the subject company or if the member is making a market in the subject company's securities;
- disclosure if the research analyst received any compensation from the subject company in the previous twelve months;
- disclosure of any other material conflict of interest of the research analyst, member firm or any associated person of the member with the ability to influence the content of the research report. [489]

These disclosures must either appear on the front page of the research report or the front page must refer to the page on which they can be found (although compendium reports covering six or more companies may direct the reader in a clear manner to where they can be found). [490]

If a FINRA member distributes [491] research reports prepared by a person other than the member (including research reports prepared by a foreign affiliate of the member), Rule 2241 provides that each such third-party research report:

p. 14-119
p. 14-120

- must be reviewed and approved by a registered principal or supervisory analyst;
- may not be distributed if the FINRA member knows or has reason to know the research is not objective or reliable;
- unless it is an independent third party research report, [492] must be reviewed in accordance with policies and procedures reasonably designed to ensure that that the third-party research report does not contain any untrue statement of material fact or other false or misleading information that should be known from reading the report or is known based on information otherwise possessed by the FINRA member;
- is accompanied by disclosure of any material conflict of interest that can be reasonably be expected to have influenced the choice of third-party research provider or the subject company of the report; and
- is clearly labeled as a third-party research report so that there is no confusion on the part of the recipient

as to the person or entity that prepared the research report. [493]

Finally, Rule 2241 requires FINRA members to notify its customers if it intends to terminate its research coverage of a company and to accompany that notice by a final research report (or its reasons for terminating coverage if providing a final research report is impractical). [494]

p. 14-120

p. 14-121

Any associated person of a FINRA member who functions as a research analyst must pass the Research Analyst Qualification ("Series 86/87") Examination or qualify for an exemption or waiver therefrom. [495] Research analysts must be supervised by a research principal who, in addition to passing the General Securities Principal ("Series 24") Examination, also must have passed either Part II of the Research Analyst ("Series 87") Exam-Regulation or the NYSE Supervisory Analyst ("Series 16") Examination. [496]

Effective in early 2016, new FINRA Rule 2242 applies to debt research many of the same requirements that apply to equity research. There are, however, several important differences between FINRA's debt and equity research rules. Most significantly, Rule 2242 exempts from many of its requirements debt research reports that a FINRA member provides solely to certain institutional investors who have consented to receiving institutional research that is not subject to the independence and disclosure standards applicable to debt research reports provided to retail investors. In addition, Rule 2242 extends many provisions of Rule 2241 designed to address conflicts of interest with the member's investment banking department to also apply to the principal trading and sales and trading departments. Finally, the research analyst qualification and registration requirements currently apply only to equity research analysts, although FINRA is considering whether debt research analysts should be subject to the same or similar requirements.

[a] SEC Regulation AC

In 2003, the SEC adopted Regulation Analyst Certification ("Regulation AC"). [497] Regulation AC requires that research analysts make certain certifications with respect to the views expressed by them in research reports and public

p. 14-121

p. 14-122

appearances relating to both debt and equity securities. In particular, a research analyst is required to certify in a research report distributed to U.S. persons that (i) the views expressed in the research report accurately reflect the analyst's personal views on any and all subject securities or issuers discussed therein, and (ii) either (a) no part of the analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views contained in the research report ("related compensation"), or (b) all or part of the analyst's compensation consists of related compensation. If the analyst received any related compensation, the research report must also disclose the amount, source and purpose of that compensation and include cautionary language that the receipt of related compensation could influence the recommendation. [498]

A record containing similar disclosures must also be maintained by the broker-dealer employing the analyst (or circulating to U.S. persons research reports prepared by the analyst) in connection with any public appearances made by the analyst during the prior quarter. [499] In cases where the analyst does not provide, or is unable to make, certifications of the type set forth in clauses (i) and (ii)(a) in the preceding paragraph with respect to public appearances, the broker-dealer must notify its designated examining authority of that fact and include, for 120 days after the notification is made, disclosure in research reports prepared by the analyst that the analyst did not provide the required certifications. [500]

[b] Other Developments

In October 2003, a settlement agreement was entered by the U.S. District Court for the Southern District of New York with respect to enforcement actions by the SEC, NYSE, NASD, NASAA, the Attorney General of the State of New York and various state securities regulators (collectively, the "Regulators") against ten of the largest investment banking firms (the "settling firms") (the "Global Research Settlement"). The Global Research Settlement relates to charges by the regulators that the settling firms were engaged in acts and practices that created or maintained inappropriate influence by investment banking

p. 14-122

p. 14-123

personnel over equity research analysts, which created conflicts of interest that were not adequately managed or disclosed. While neither admitting nor denying the allegations made, the settling firms agreed to pay the regulators an aggregate of approximately $1.4 billion, a portion of which is comprised of civil penalties and disgorgement in connection with prior activities and the remainder of which was to be used to fund investor education programs and to pay for the procurement of independent research. [501]

In addition, the settling firms (i) agreed to (a) comply with significant restrictions relating to the interaction between the investment banking and equity research departments of their respective firms, (b) make certain additional disclosures to research recipients regarding (among other things) potential conflicts of interest resulting from investment banking activities, and (c) procure and make available to U.S. customers independent, third-party research on the common stock of certain issuers (collectively, the "forward-looking aspects of the Global Research Settlement"), [502] and (ii) entered into a voluntary agreement restricting allocations of securities in so-called "hot IPOs" (*i.e.*, those initial public offerings where the securities begin trading at a premium in the secondary market) to executive officers and directors of public companies (the "IPO Allocation Initiative").

The forward-looking aspects of the Global Research Settlement and the IPO allocation restrictions agreed to by the settling firms have had a significant impact on the way securities offerings are conducted, even for those firms not

p. 14-123

p. 14-124

party to the Global Research Settlement or the IPO Allocation Initiative. In particular, these requirements have served as a basis for additional rulemaking by the SEC and the SROs. [503] Moreover, many firms not parties to the Global Research Settlement have concluded that it is appropriate, from a "best practices" point of view, to adopt many, if not all, of the forward-looking aspects of the Global Research Settlement and the IPO allocation restrictions in order to minimize the likelihood of future regulatory action or civil litigation in connection with their own research analyst and investment banking practices. In addition, certain local governmental and municipal authorities and institutional investors with fiduciary obligations (*e.g.*, pension plans) have insisted that other firms comply with some or all of the forward-looking aspects of the Global Research Settlement and the IPO Allocation Initiative as a condition of doing business with them. [504] The Global Research Settlement and SRO research rules also focused renewed attention on the relationship between issuers and analysts. [505]

It is also important to view the structural reforms and other forward-looking aspects of the Global Research Settlement in the context of the other

p. 14-124

p. 14-125

existing and proposed regulations regarding research analyst conflicts of interest discussed above. The Global Research Settlement requirements are in addition to, and do not replace, these other regulations and, in the event of any inconsistency, the more restrictive provision (or relevant part of the provision) will control. The Global Research Settlement does, however, provide that if the SEC adopts a rule or approves an SRO rule or interpretation with the stated intent to supersede any of the provisions of the Global Research Settlement, that rule or interpretation will govern and will supersede the relevant settlement provision. [506] To date, no such rule or interpretation has been adopted; instead, the SEC has reinforced the continuing applicability of the Global Research Settlement. [507]

It is also important to note that not all aspects of the Global Research Settlement are still in place. The settling firms' obligation to make available independent, third-party research was subject to a five-year limitation and expired on July 31, 2009. The settlement also contains a provision that allows the parties to modify the order, subject to court approval, unless the SEC believes such a modification to be against the public interest. In 2010, the settling firms and the SEC agreed to a proposal that, among other things, would have removed the firewall between research analysts and investment bankers, permitting communication between the two groups without the presence of legal counsel. The district court approved some of the proposal, but rejected the modification that would have removed the firewall. [508]

[6] Margin Rules—Restrictions on Lending and Borrowing

p. 14-125

p. 14-126

[a] Regulation T

The Exchange Act provides that broker-dealers and members of a national securities exchange may not "extend or maintain credit or arrange for the extension … of credit to or for any customer … on any security" (other than an exempted security or a security futures product) in contravention of such rules as are adopted by the Board. [509]

The basic purpose of this provision and the Board's rules thereunder (which are known as the "margin regulations") [510] is to control the amount of credit available in the economy for financing transactions in securities. The margin regulations stem from the belief that an excessive injection of credit had contributed to the stock market run-up that preceded the 1929 stock market crash. It was also thought that an excessive amount of loans used to finance securities dealings had diverted capital from other more productive sectors of the economy. Margin regulations may also protect individual investors against securities speculation in excess of their resources and deter lenders, especially broker-dealers, from imprudent credit practices. [511] However, these were

p. 14-126

p. 14-127

secondary considerations, if not incidental results, in the adoption of these regulations. [512]

The Board margin regulation applicable to broker-dealers is Regulation T. [513] Regulation T imposes initial margin requirements for all "purpose credit" (defined as credit used to purchase, carry or trade in any security, whether debt or equity and whether publicly or privately traded) and specifies the collateral that may be used to satisfy such margin requirements (generally either exempted securities or "margin securities" [514]). In addition, Regulation T establishes payment rules in connection with securities transactions. Pursuant to amendments adopted by the Board in 1996, Regulation T also permits broker-dealers to arrange for the extension or maintenance of credit to or for any customer by third parties, provided the broker-dealer does not willfully arrange credit that violates margin regulations applicable to such third-party lenders or the customer (*i.e.*, Regulations U and X). [515]

[i] *Account Structure*

Regulation T requires that all transactions between a broker-dealer and a customer [516] be recorded in one of the broker-dealer's Regulation T "accounts." More specifically, Regulation T requires that each transaction be recorded in the

p. 14-127

p. 14-128

broker-dealer's "margin account" [517] unless it is eligible for one of three special purpose accounts.

Loans to customers that are used to finance the purchase, trading or carrying of equity securities generally are recorded in the margin account. The rule of lending in the margin account, very simply stated, is that a broker-dealer may not extend credit to a customer unless the loan value of the customer's securities (as determined in accordance with Regulation T) in the margin account is sufficient to secure the amount of the credit.

Regulation T imposes only an initial margin requirement. In other words, no matter how low the value of the customer's securities collateralizing the broker-dealer's loan falls after the extension of the loan, no additional margin is required. [518] The requirements for credit used to finance a long position in a security in the margin account are summarized below:

Security	***Required Margin***
Marginable equity securities	50% of market value
Exempted and other nonequity securities	“Good faith”
Exchange-traded and OTC options	Determined by relevant options exchange or SRO
Other securities	100% of market value

Regulation T also prescribes margin requirements for short positions in a security: 100% of the market value of the security sold short plus any "good faith margin" in the case of an exempted security or other nonequity security; 150% of the market value in the case of equity securities; and the amount specified by the relevant options exchange or SRO in the case of exchange-traded and OTC options, respectively. [521]

p. 14-128

p. 14-129

Generally, to extend credit and to determine a customer's position in a margin account, freely convertible foreign currency may be treated at its U.S. dollar equivalent, provided that the currency is marked to market daily. [522] To the extent that there is a margin deficiency in a foreign currency/foreign securities position, it may be aggregated with the remainder of the customer's account.

A "margin call" on a customer generally must be satisfied within one "payment period" [523] after any deficiency in the customer's margin account is created or increased by new transactions. [524] If the customer does not make up the deficiency in the allotted time, the broker-dealer is required to cure the deficiency by selling securities in the account, subject to a *de minimis* exception. [525]

In addition to the margin account, Regulation T provides for three special purpose accounts in which certain transactions can be recorded: a "cash account," a broker-dealer credit account and a "good faith account." [526] Securities may be purchased in the customer's cash account if the customer has the funds needed to pay for the securities in the account or the customer agrees to make promptly full cash payment for the security before selling it and does not contemplate selling the security before making such payment. [527] A broker-dealer is generally required to obtain full cash payment for securities purchased in a cash account within one payment period, but a customer may be allowed a longer

p. 14-129

p. 14-130

period to pay in certain special circumstances. Up to 35 calendar days is allowed to pay for securities purchased in a delivery versus payment (commonly known as "DVP") transaction, provided that delivery is delayed beyond one payment period because of the mechanics of the transactions (and not because of the customer's unwillingness or inability to pay for the purchased securities). [528] Another special circumstance applies to customer purchases of foreign securities in a foreign market. A customer is generally not required to pay for a foreign security purchased in a cash account until one day after the date on which settlement is required to occur by the rules of the relevant foreign securities market, provided that this period does not exceed 35 calendar days. [529]

Securities may be sold in a customer's cash account (or purchased by a broker-dealer from a customer) only if the security is held in the account at the time of sale or if the broker-dealer accepts in good faith the customer's statement that the customer owns the security and will "promptly" (which is generally understood to mean within one payment period) deposit it in the account. As a result, short sales cannot be effected in the cash account.

The good faith account may be used, among other purposes, to finance transactions in securities entitled to "good faith" margin and to extend nonpurpose credit. A written statement of the customer's intent on Board Form T-4 that discloses the specific reason for the borrowing must be obtained prior to any extension of nonpurpose credit other than to finance commodities and foreign exchange transactions. Broker-dealers may also use the good faith account to borrow and lend securities entitled to "good faith" margin (such as nonequity securities). In contrast, equity securities generally may be borrowed or loaned under Regulation T only with a "permitted purpose" unless the lending entity is an "exempted borrower." [530]

[ii] *Margin Securities*

Historically, "margin securities" (*i.e.*, those securities, other than exempted securities, that a broker-dealer is permitted to accept as collateral satisfying a margin requirement for a purpose loan) were largely limited to securities registered under the Securities Act or the Exchange Act and publicly traded in the United States. [531] However, in recent years the Board has gradually broadened the definition of "margin security," particularly with respect to nonequity and foreign securities. In the amendments to Regulation T adopted by the Board in 1997

p. 14-130

p. 14-131

(the "1997 Regulation T Amendments"), [532] for example, the Board amended the definition of "margin security" to include any nonequity security. The 1997 Regulation T Amendments also discontinued the Board's previous practice of qualifying over-the-counter stocks as margin securities through inclusion in a periodically published list of "OTC margin stocks," replacing it with a simple test under which any security listed on the Nasdaq Stock Market is deemed to be a margin security. [533] Further, in an effort to facilitate participation by U.S. broker-dealers in international securities transactions, Regulation T includes in the definition of "margin security" certain "foreign margin stocks" issued outside the United States that are deemed to have a "ready market" for purposes of the SEC's net capital rule. [534]

[iii] *Exempted Borrowers*

In accordance with the amendments made by the NSMIA to §§ 7 and 8 of the Exchange Act, Regulation T 's scope provisions now exclude credit extended by one broker-dealer to another where the creditor broker-dealer has made a good faith determination that the borrower is an "exempted borrower." [535] A broker-dealer is an "exempted borrower" if a substantial portion of its business consists of transactions with persons other than brokers or dealers. [536] "Exempted borrower" status may be established, among other things, by qualifying for one or more of three nonexclusive safe harbors based on the broker-dealer's number of active customer accounts and gross revenues from customer business. [537] A similar amendment to the scope provision of Regulation U also excludes from Regulation

p. 14-131

p. 14-132

U credit extended to an exempted borrower. [538] The effect of these changes, taken as a whole, has been to allow broker-dealers that qualify as exempted borrowers to borrow against any securities from any lender, without regard to the Board's margin requirements (which otherwise may be 50% or higher). [539]

[iv] *Portfolio Margining*

In the 1997 Regulation T Amendments, the Board amended Regulation T 's scope provision to allow compliance with any portfolio margining system approved by the SEC as an alternative to compliance with Regulation T. [540] Provisions for portfolio margining systems have been adopted by FINRA and the Chicago Board Options Exchange ("CBOE"). [541] Instead of specifying a fixed margin percentage for individual securities positions, portfolio margining assesses initial and maintenance margin levels based on the risk of a portfolio of positions related to the same underlying instrument, taken as a whole, using theoretical pricing models approved by the SEC [542] and certain assumed fluctuations in the market price of the underlying instrument. This calculation allows qualifying accounts to recognize offsets between positions within each portfolio, possibly reducing margin requirements substantially. [543]

[b] SRO Margin Rules

p. 14-132

Broker-dealers must comply not only with Regulation T, but also with the margin requirements of any SRO of which they are members. The principal SRO margin requirements are contained in FINRA Rule 4210.

One major difference between Regulation T and the margin rules of the SROs, including FINRA Rule 4210, is that the SROs' rules impose a maintenance margin requirement, whereas Regulation T prescribes only an initial margin requirement. [544] In addition, the margin rules of the SROs impose substantially higher margin requirements on certain securities and are in certain other respects more restrictive than those that apply under Regulation T. For example, FINRA Rule 4210 generally imposes a margin requirement of 6% on U.S. Treasury securities with 20 years or more to maturity, whereas Regulation T requires only "good faith" margin. [545] This and similar SRO margin requirements have been a significant factor in motivating U.S. broker-dealers to arrange securities financing for their customers with a foreign affiliate rather than extending credit directly, although the increased level of leverage available in portfolio margin accounts has reduced the level of arranged financing activity.

[c] Credit in Connection with a Distribution

Section 11(d)(1) of the Exchange Act generally prohibits a broker-dealer participating in the "distribution" [546] of a "new issue" [547] of securities from

lending against such securities until 30 days after the completion of the broker-dealer's participation in the distribution. [548] This restriction is intended to manage the potential conflict of interest that may arise if a broker-dealer makes credit available to induce a person to whom it has a fiduciary obligation (*i.e.*, its customer) to purchase securities that the broker-dealer has a significant interest in selling. [549] One result of this restriction is that, without special relief from the SEC, partly paid securities cannot be publicly offered in the United States in a primary offering, or, in some cases, in a secondary offering. [550]

Footnotes

273 In addition, the SEC has promulgated rules pursuant to the GLB Act regarding the privacy of consumer financial information to which registered broker-dealers and certain other entities regulated by the SEC must adhere. *See* SEC Release No. 34-42974 (June 22, 2000, amended by SEC Release No. 34-50781 (Dec. 2, 2004)) (adopting Privacy of Consumer Financial Information (Regulation S-P)) and SEC Division of Investment Management Staff Responses to Questions About Regulation S -P (Jan. 23, 2003); *see also* SEC Release No. 34-61003 (Nov. 16, 2009) (adopting a safe harbor model privacy form to provide disclosures under the GLB Act privacy rules).

274 *See generally* § 11.

275 Transactions in security futures products are also subject to the antifraud and antimanipulation provisions of the CEA. *See* U.S. REGULATION OF THE INTERNATIONAL SECURITIES AND DERIVATIVES MARKETS, TWELFTH EDITION, DERIVATIVES MARKETS, § 4.02[4][a].

276 Broker-dealers are subject to sanctions for fraudulent acts under a number of federal statutes in addition to the Exchange Act, including the Securities Act, the mail fraud sections of the U.S. criminal code and the Racketeer Influenced and Corrupt Organizations Act ("RICO"). *See*, *e.g.*, *Escott v. Barchris Construction*, 283 F. Supp. 643 (S.D.N.Y. 1968) (relating to liability under the Securities Act); *United States v. Newman*, 664 F.2d 12 (2d Cir. 1981), *aff'd after remand*, 722 F.2d 729 (2d Cir.) (unpublished order), *cert. denied*, 464 U.S. 863 (1983) (relating to mail fraud charge against the employee of a registered broker-dealer); *Shearson/American Express Inc. v. McMahon*, 482 U.S. 220, *reh'g denied*, 483 U.S. 1056 (1987) (relating to RICO claims brought against registered broker-dealer). *See generally* § 11.

277 *See* Rule 10b-10 under the Exchange Act.

278 *See* Rule 15c1-8 under the Exchange Act. Mark-ups over 10% are considered, absent adequate disclosure,

per se fraudulent by the SEC and lower mark-ups may be fraudulent in certain circumstances. *See In the Matter of Ernest E. Suwara Thomas W. Carpenter Dean Witter Reynolds, Inc.*, SEC Release No. 34-18623 (Apr. 6, 1982). FINRA rules require members to charge fair prices and commissions and a FINRA policy guideline provides that mark-ups in excess of 5% are generally not permitted and mark-ups lower than 5% may also, depending on the circumstances, be deemed excessive. *See* FINRA Rule 2121 and supplemental material thereto, FINRA MANUAL (discussed at § 14.07[3][a][i]). The SEC has stated that FINRA's "5% mark-up policy" is not applicable in determining whether a mark-up violates § 10(b) of the Exchange Act. *See*, *e.g.*, *In re D.E. Wine Investments, Inc.*, SEC Release No. 34-43929 (Feb. 6, 2001); *In re Lehman Brothers Inc.*, SEC Release No. 34-37673 (Sept. 12, 1996).

279 *See*, *e.g.*, *Clark v. John Lamella & Co.*, 583 F.2d 594 (2d Cir. 1978).

280 *See*, *e.g.*, *Costello v. Oppenheimer & Co.*, 711 F.2d 1361 (7th Cir. 1983); *Newburger v. Gross*, 563 F.2d 1057 (2d Cir. 1977). Rule 15c1-7 under the Exchange Act specifically characterizes as fraudulent and manipulative the execution of transactions that are "excessive in size or frequency in view of the financial resources and character" of a customer's discretionary account. Further, successful claims have been brought against broker-dealers for churning even nondiscretionary accounts over which they were found to have exercised substantial *de facto* control. *See*, *e.g.*, *Eros v. SEC*, 742 F.2d 507 (9th Cir. 1984).

281 *See* Rules 15g-1 through 15g-9 under the Exchange Act.

282 *See*, *e.g.*, *Charles Hughes & Co. v. SEC*, 139 F.2d 434 (2d Cir. 1943), *cert. denied*, 321 U.S. 786 (1944); *In re Trots & Co.*, 12 S.E.C. 531, 535 (1942). *But see* Definition of the Term ''Fiduciary''; Conflict of Interest Rule—Retirement Investment Advice, 81 Fed. Reg. 20,946 (Apr. 8, 2016) (discussed below).

283 *See*, *e.g.*, *In re Trots & Co.*, 12 S.E.C. 531 (1942); *see also In re Duke & Duke*, 6 S.E.C. 386, 388–89 (1939); *Charles Hughes & Co. v. SEC*, 139 F.2d 434, 435 (2d Cir. 1943). *See generally Hanly v. SEC*, 415 F.2d 589, 596 (2d Cir. 1969); Randall W. Quinn, *Deja Vu All Over Again: The SEC's Return to Agency Theory in Regulating Broker-Dealers*, 1990 COLUM. BUS. L. REV. 61.

284 *See* § 16.09 for a more detailed discussion of soft dollar arrangements in the context of the regulation of investment advisers. While the issues that arise in connection with soft dollar arrangements are generally in the first instance the concern of investment advisers, a broker-dealer involved in impermissible soft dollar arrangements, in circumstances where the broker-dealer should have been alerted to a possible violation by the adviser of its fiduciary duties, may risk liability under general antifraud principles. *Cf.*, *e.g.*, SEC Release No. 34-16679 (Mar. 19, 1980) ("aiding and abetting" liability); *see also* § 11.04[2][b].

In 2006, the SEC issued an interpretive release that circumscribes the use of soft dollars and reflects changes in industry practice and technology. The release states that the analysis of permissible brokerage and research services under the "soft dollars" safe harbor of § 28(e) of the Exchange Act requires a three-step process, involving (i) the application of eligibility criteria, (ii) the investment adviser's lawful and appropriate use of the brokerage and research services, and (iii) the investment adviser's good-faith determination that the commissions paid are reasonable in the light of the value of the services received. *See* SEC Release No. 34-54165 (July 18, 2006).

285 In situations in which the relevant account is that of a pension plan subject to ERISA, each of these commission arrangements may raise significant questions thereunder. *See* § 16.09 for a description of directed brokerage arrangements. Directed brokerage also raises in the first instance issues not for the broker-dealer but for the fiduciary directing a customer's account. As with soft dollar arrangements, broker-dealers that participate in directed brokerage arrangements that are not permissible, where they should have been alerted by the circumstances to possible fraud, may risk liability under general antifraud principles. Further, the registered broker-dealer is also responsible for adequate disclosure of such arrangements to its customers (*i.e.*, that a portion of compensation being paid by the customer is being passed on by the broker-dealer), as well as for assuring that the broker-dealer's books and records adequately reflect the directed brokerage arrangements.

286 *See generally* SEC Release No. 34-34902 (Oct. 27, 1994) (requiring certain disclosures to customers in connection with payment for order flow arrangements).

287 *See* Letter from Harvey L. Pitt, Chairman, SEC, to Salvatore F. Sodano, Chairman, AMEX (Jan. 24, 2003).

288 § 15(k) and (m) of the Exchange Act; *see also*, § 913 of the Dodd-Frank Act.

289 § 15(k) of the Exchange Act; *see also* § 913 of the Dodd-Frank Act. Section 913 of the Dodd-Frank Act also required the SEC to conduct a study on the effectiveness of existing legal standards of care for brokers, dealers and investment advisers in connection with providing personalized investment advice to retail customers, and whether to impose a uniform federal fiduciary standard of care on broker-dealers and investment advisers. § 913 of the Dodd-Frank Act. The completed study (submitted to Congress, as required, on January 21, 2011) recommended the adoption of a uniform federal fiduciary standard for brokers and advisers providing personalized investment advice about securities to retail customers "no less stringent than the standard currently applied to investment advisers" under §§ 206(1) and 206(2) of the Advisers Act and suggested that broker-dealers and advisers be required "to act in the best interest of the customer" and to eliminate or disclose all conflicts of interest. STUDY ON INVESTMENT ADVISERS AND BROKER-DEALERS AS REQUIRED BY SECTION 913 OF THE DODD-FRANK WALL STREET REFORM AND CONSUMER PROTECTION ACT, SEC (Jan. 21, 2011). In 2013, the SEC released a request for data and other information relating to the duties of brokers, dealers and investment advisers. *See* SEC Release No. 34-69013 (Mar. 1, 2013). In its request for data, the SEC noted that the SEC staff had recommended rulemaking in its 2011 study, but that the SEC had not yet determined whether to commence a rulemaking. *See* 78 Fed. Reg. 14,848, 14,850 (Mar. 7, 2013). ("The [SEC] recognizes that Section 913 of the Dodd-Frank Act does not mandate that we undertake any such rulemaking, and the [SEC] has not yet determined whether to commence a rulemaking. We expect that the data and other information provided to us in connection with this request will assist us in determining whether to engage in rulemaking, and if so, what the nature of that rulemaking ought to be.").

290 SEC Release No. 34-69013 (Mar. 1, 2013).

291 In testimony before the House Financial Services Committee on November 15, 2016, Chair Mary Jo White indicated she did not expect further action by the SEC during the remainder of her tenure. (On November 14, 2016, Chair White announced her plans to resign at the end of the Obama Administration.) *See* http://financialservices.house.gov/calendar/eventsingle.aspx? EventID=401173. Chair White has suggested it is unlikely the SEC will issue a fiduciary rule proposal prior to her departure. *See* Mark Schoeff Jr., *SEC Chairwoman Mary Jo White Says Agency Mulling Fiduciary Duty*, INVESTMENTNEWS (Sept. 12, 2016), http://www.investmentnews.com/article/20160912/FREE/160919991/sec-chairwoman-mary-jo-white-says-agency-mulling-fiduciary-duty.

292 Definition of the Term ''Fiduciary''; Conflict of Interest Rule—Retirement Investment Advice, 81 Fed. Reg. 20946 (Apr. 8, 2016).

293 Definition of the Term ''Fiduciary''; Conflict of Interest Rule—Retirement Investment Advice, 81 Fed. Reg. 20946 (Apr. 8, 2016).

294 In 2000, the SEC adopted Regulation FD, SEC Release No. 33-7881 (Aug. 15, 2000), which applies to communications with market professionals including broker-dealers and focuses on the problem of selective disclosure. Also in 2000, the SEC adopted Rule 10b5-1 under the Exchange Act, which clarifies that trading while in possession of inside information is presumed to be a violation of § 10(b) of the Exchange Act regardless of actual use of such information. The rule states the general principle that insider trading liability arises when a person trades while aware of material nonpublic information and provides two affirmative defenses to liability when it is clear that a trade was not made on the basis of the material nonpublic information. One defense is available if an entity can show that the individual making decisions to trade on behalf of the entity was not aware of the material nonpublic information and that the entity had implemented reasonable policies and procedures, such as information barriers and restricted lists, to prevent insider trading. The other defense is available in those situations in which a contract to trade is entered into before the person becomes aware of the material nonpublic information. SEC Release No. 33-7881 (Aug. 15, 2000). *See* § 4.10[6] regarding Regulation FD and § 11.05[2] regarding Rule 10b5-1 under the Exchange Act and other insider trading rules.

295 *See*, *e.g.*, *Slade v. Shearson, Hammill & Co.*, Fed. Sec. L. Rep. (CCH) ¶¶94,329, 94,439 (S.D.N.Y.), *remanded* 517 F.2d 398 (2d Cir. 1974), for an illustration of the various conflicts of interest that may arise when a firm acts as investment banker, market-maker and broker for the securities of a single company.

296 When securities are placed on a "restricted list," a firm's activities with respect to such securities are curtailed. Generally, this may mean that the firm ceases trading for its own account in such securities, does not trade for discretionary customer accounts or solicit customer trades, does not issue research reports regarding the securities and orders its employees not to trade for their own accounts in the securities or to advise or cause others to do so. Securities may be restricted for reasons not related to concerns regarding insider trading, such as, for example, the restrictions imposed on distribution participants by Regulation M under the Exchange Act. *See* § 3.02[9].

297 A firm does not typically suspend its ordinary trading activity with respect to securities placed on a "watch list" and, in fact, such lists ordinarily would not be widely disseminated within the firm. Rather, the firm's compliance department will monitor and investigate unusual trading activity in securities that had been placed on the list. A firm also may maintain a "rumor list" made up of issuers involved in recently announced transactions, or which have been the subject of rumors of a transaction, with which the firm is not involved. After placing a security on the rumor list, the firm's compliance department generally would conduct a review of recent activity in the issuer's securities to uncover unusual activity prior to the rumor becoming generally known.

298 Among the procedures that may be adopted in connection with the establishment of information barriers are: the use of project code words, control over distribution of draft documents relating to prospective transactions including the numbering of all such documents, restrictions on access to computer systems and to office communications systems such as fax machines, locked offices and file storage areas and personnel education regarding prohibitions on insider trades and the related sanctions.

299 *See* SEC Release No. 34-17120 (Sept. 4, 1980); § 11.06[4]. The SEC's move to making procedures to prevent insider trading mandatory was a step toward reversing its previous failure to obtain an injunction against a broker-dealer that did not have such procedures in place. *See SEC v. Geon Industries, Inc*., 531 F.2d 39 (2d Cir. 1976); *see also SEC v. Lum's Inc.*, 365 F. Supp. 1046 (S.D.N.Y. 1973).

300 Rule 14e-3(b)(2) under the Exchange Act.

301 Insider Trading and Securities Fraud Enforcement Act of 1988, Pub. L. No. 100-704, 102 Stat. 4677 (1988); *see* § 11.05[2] for further discussion on insider trading.

302 § 15(g) of the Exchange Act.

303 § 21A(b)(1) of the Exchange Act. Persons liable may be required to pay a penalty of three times the profit gained or loss avoided by the insider trading or $1 million, whichever is greater. § 21A(a)(3) of the Exchange Act.

In 2006, the SEC brought settled administrative proceedings against Morgan Stanley & Co. Inc. and Morgan Stanley DW Inc. (collectively, "Morgan Stanley") fining them $10 million for a failure to maintain and enforce adequate written policies and procedures to prevent the misuse of material nonpublic information. Morgan Stanley failed to conduct surveillance of a large number of employee accounts held at the firm, as well as trading in certain securities in those and other accounts. In addition, Morgan Stanley's written policies did not provide adequate guidance to personnel charged with conducting surveillance and it used inadequate controls with respect to surveillance of its "watch list." *In re Morgan Stanley & Co. Inc.*, SEC Release No. 34-54047 (June 27, 2006); *see also In re Merrill Lynch, Pierce, Fenner & Smith Inc.*, SEC Release No. 34-59555 (Mar. 11, 2009); *In re A. Carlos Martinez*, SEC Release No. 34-57755 (May 1, 2008); *SEC v. Chanin Capital LLC*, SEC Litigation Release No. 20551 (May 1, 2008).

304 § 15(g) of the Exchange Act.

305 SEC, Division of Market Regulation, BROKER-DEALER POLICIES AND PROCEDURES DESIGNED TO SEGMENT THE FLOW AND PREVENT THE MISUSE OF MATERIAL NONPUBLIC INFORMATION (Mar. 1990) ("1990 Information Barrier Report"); *see also* SEC, Division of Market Regulation, BROKER-DEALER INTERNAL CONTROL PROCEDURES FOR HIGH YIELD SECURITIES (Oct. 1993) (separate review of broker-dealers' information barrier

procedures relating to noninvestment grade securities).

306 Nonetheless, the 1990 Information Barrier Report indicated that the SEC would engage in rulemaking were its recommendations with respect to information barrier procedures not implemented by broker-dealers.

307 1990 Information Barrier Report.

308 NYSE Information Memo 91-22 (June 28, 1991); NASD Notice to Members 91-45 (July 1991).

309 The NYSE and the NASD endorsed the SEC's warning in the 1990 Information Barrier Report against the use of a "loose mixture of internal memoranda, excerpts from employee manuals and certifications." 1990 Information Barrier Report at 38; NYSE Information Memo 91-22 (June 28, 1991); NASD Notice to Members 91-45 (July 1991).

310 For example, the NASD Conduct Rules provide that an associated person of a FINRA member may not open a trading account with another member (the "executing member") without informing the executing member of his association with another FINRA member and providing his employer (the "employing FINRA member") with notice of the account. At the request of the employing FINRA member, the executing member must provide the employing FINRA member with a record of all trades in the account. NASD Rule 3050, FINRA MANUAL; NASD Notice to Members 91-27 (May 1991); *see also* Incorporated NYSE Rule 407, FINRA MANUAL.

311 For example, full-service firms that participate in securities markets and the credit markets often have access to nonpublic information (*e.g.*, "syndicate information") about companies to whom they have extended loans or whose loans they have acquired. Such firms should have policies and procedures in place to assure that such nonpublic information is not misused in their securities trading activities, a particularly acute concern for firms that hedge their credit exposures with securities transactions, or security-based swap agreements subject to the insider trading prohibitions of the Securities Act and the Exchange Act. Industry groups have provided recommendations regarding policies and procedures relating to material nonpublic information received by credit market participants. *See*, *e.g.*, Loan Syndication and Trading Association ("LSTA"), Statement of Principles for the Communication and Use of Confidential Information by Loan Market Participants (Dec. 2006); Joint Market Practices Forum ("JMPF"), Statement of Principles and Recommendations Regarding the Handling of Material Nonpublic Information by Credit Market Participants (Oct. 2003; European Supplement, May 2005); *see also* Joint Statement Regarding the Communication and Use of Material Nonpublic Information (Dec. 2006) (12 trade associations reaffirm their commitment to fair and competitive markets in which inappropriate use of material nonpublic information is not tolerated, referencing the LSTA and JMPF, and others', statements of principles). *See also* SEC Office of Compliance Inspections and Examinations, STAFF SUMMARY REPORT ON EXAMINATIONS OF INFORMATION BARRIERS: BROKER-DEALER PRACTICES UNDER SECTION 15(G) OF THE SECURITIES EXCHANGE ACT OF 1934 (Sept. 27, 2012).

312 *See* § 14.07[1].

313 A "short sale" is "any sale of a security which the seller does not own or any sale which is consummated by the delivery of a security borrowed by, or for the account of, the seller." Rule 200(a) of Regulation S HO under the Exchange Act.

314 *See* SEC Release No. 34-54891 (Dec. 7, 2006).

315 *See* SEC Release No. 34-55970 (June 28, 2007).

316 *See* SEC Release No. 34-61595 (Feb. 26, 2010); Rule 201 of Regulation S HO under the Exchange Act.

317 Rules 200–203 of Regulation S HO under the Exchange Act.

In addition, Rule 105 of Regulation M specifically addresses manipulative short selling in connection with a public offering by prohibiting persons who effected short sales during a specified period prior to the pricing of a registered offering from purchasing securities in the offering, subject to certain enumerated exceptions. *See* §§ 3.02[9][d] and 11.05[3][c]; *see also* SEC Release No. 34-56206 (Aug. 6, 2007) (adopting amendments to Rule 105 to eliminate the former "covering" component of the rule and to make certain other changes).

318 Abusive "naked" short selling generally refers to selling short without having stock available for delivery and intentionally failing to deliver stock within the standard settlement cycle. *See* SEC Release No. 34-56212 (Aug. 7, 2007). In 2008, the SEC adopted a "naked" short selling antifraud rule under which it is unlawful for "any person to submit an order to sell an equity security if such person deceives a broker or dealer, a participant of a registered clearing agency, or a purchaser about its intention or ability to deliver the security on the date delivery is due, and such person fails to deliver the security on or before the date delivery is due." SEC Release No. 34-58774 (Oct. 14, 2008); Rule 10b-21 under the Exchange Act.

319 Large and persistent failures by sellers of securities to deliver the securities they have sold on the scheduled settlement date (referred to as "fails to deliver") may have a negative effect on the market for the relevant securities by depriving shareholders of certain benefits of ownership, such as voting and lending, effectively converting without the consent of the buyer a contract for delivery within the standard settlement cycle into an undated futures-type contract, damaging the reputation of the relevant securities and potentially enabling manipulative conduct. *See* SEC Release No. 34-56212 (Aug. 7, 2007).

320 Although Regulation S HO imposes this requirement on broker-dealers, broker-dealers often contractually require customers to inform them whether a sell order is long or short.

321 Rule 200(g) of Regulation S HO under the Exchange Act; *see also* SEC Release No. 34-61595 (Feb. 26, 2010) (addressing when a broker-dealer may mark qualifying sell orders as "short exempt").

322 Rule 203(a)(1) of Regulation S HO under the Exchange Act. Rule 203(a)(2) provides for exceptions to this general requirement for certain good-faith mistakes and where the broker-dealer knows, or has been reasonably informed by the seller, that the seller owns the security and would deliver it prior to the scheduled settlement but the seller failed to do so. The SEC has noted that it may be unreasonable for a broker-dealer to accept the customer's assurances where it has been repeatedly required to use borrowed shares to make delivery on sales marked "long." *See* SEC Release No. 34-50103 (July 28, 2004).

323 Rule 203(b)(1) of Regulation S HO under the Exchange Act. Under Rule 203(b)(2) of Regulation S HO under the Exchange Act, this "locate" requirement generally does not apply to orders from other broker-dealers (provided the broker-dealer accepting the order has not agreed to be responsible for obtaining a "locate"), sales of securities the seller owns and intends to deliver as soon as all restrictions on delivery have been removed (although securities must be borrowed or the short position closed out if the securities are not received within 35 days after the trade date), or sales by a market-maker in connection with *bona fide* market-making activities in the security sold.

324 Rule 204 of Regulation S HO under the Exchange Act. Rule 204 provides several limited exceptions to this "close-out" requirement, including a three-settlement-day grace period for fail to deliver positions attributable to *bona fide* market-making activities by a registered options market maker and fail to deliver positions that the clearing agency participant reasonably allocates to another registered broker-dealer for which it clears (in which case the close-out and pre-borrow obligations are imposed on such other registered broker-dealer). In addition, there is an extended grace period of 35 settlement days where the fail to deliver position is in a security sold pursuant to Rule 144 under the Securities Act, in order to allow additional time for the mechanics of effecting the transfer of the security. *See* SEC Release No. 34-60388 (July 27, 2009).

325 Rule 204(b) of Regulation S HO under the Exchange Act. This "pre-borrowing" requirement applies to any broker-dealer for which the clearing agency participant clears and, unlike the locate requirement of Rule 203(b)(1), does not have an exception for short sales in connection with market-making activities.

326 "Customers," in the context of the financial responsibility rules, generally are those persons who deposit funds or securities with a broker-dealer in the course of the broker-dealer's securities business. For the various ways in which the term "customer" is defined in some of the relevant provisions, *see* Rule 15c3-3(a)(1) under the Exchange Act (customer protection rule), Rule 15c3-1(c)(6) under the Exchange Act (net capital rule) and § 16(2) of the Securities Investor Protection Act, Pub. L. No. 91-598, 84 Stat. 1636 (1970) ("SIPA").

327 These requirements and protections (including the net capital rule and SIPA) generally do not apply to

FCMs that have notice-registered as broker-dealers for the limited purpose of trading security futures products. *See* § 15(b)(11)(B) of the Exchange Act. In addition, limited purpose broker-dealers who restrict their securities activities to dealings in OTC derivative products are subject to a customized regime that includes a variety of exemptions from, among other rules, rules under § 15(c)(3) of the Exchange Act. *See* Rule 15a-1 under the Exchange Act.

328 § 15(c)(3)(A) of the Exchange Act.

329 The rules under § 15(c)(3) are not the only measures the SEC has instituted to assure the solvency of broker-dealers. The extensive books and records requirements contained in Rules 17a-3 and 17a-4 under the Exchange Act arose out of the "paperwork crisis" of 1967–1970 in which broker-dealers' back offices were unable to keep accurate records of their trades. The inability of individual broker-dealers to track, and thus to fulfill, their trade obligations led to a series of broker-dealer failures. Similarly, Rule 17a-13 under the Exchange Act requires quarterly securities examinations, counts, verifications of securities inventories, comparisons between these inventories and the records that the broker-dealer keeps and the recording of any differences between the inventories and the records. Rules 17f-1 and 17f-2 under the Exchange Act, which deal with the problem of securities theft (including the question of just what securities are in inventory), also supplement the explicitly financial rules. *See generally*, SEC, REPORT OF SPECIAL STUDY OF SECURITIES MARKETS, Part I, Chapter 3 (1963) (describing the regulatory framework for broker-dealers and highlighting areas in which investors need additional protection).

330 *See*, *e.g.*, Statement of Richard Breeden, Chairman, SEC, before Senate Comm. on Banking, Housing & Urban Affairs, Concerning the Bankruptcy of Drexel Burnham Lambert Group Inc. (Mar. 12, 1990).

331 *See generally* § 14.07[2][c] (discussing SIPA).

332 *See generally* SEC Release No. 34-9882 (Nov. 21, 1972), 37 Fed. Reg. 25,224, 25,226 (Nov. 29, 1972); SEC Release No. 34-70072 (July 30, 2013), 78 Fed. Reg. 51,824 (Aug. 21, 2013). For a more detailed discussion of the customer protection rule, *see* Michael P. Jamroz, *The Customer Protection Rule*, 57 BUS. LAW. 1069 (May 2002). Pursuant to § 15C of the Exchange Act, registered government securities broker-dealers and government-noticed financial institutions are subject to customer protection rules generally identical to those applicable to registered broker-dealers. *See* Treas. Reg. § 403.4 (regulations applicable to registered government securities broker-dealers); Treas. Reg. §§ 403.5 and 450.4 (regulations applicable to financial institutions that are government securities broker-dealers).

333 The rule designates (or provides that the SEC may upon application designate) certain locations, including overseas locations, other than in the actual physical possession of the broker-dealer, as acceptable control locations. Rule 15c3-3(c) under the Exchange Act; *see also* SEC Release No. 34-10429 (Oct. 12, 1973) (acceptable control locations for foreign securities).

334 "Excess margin securities" are those securities purchased by a customer with a loan from a broker-dealer that are more than the amount of securities that the broker-dealer is permitted to use to obtain funding for such loan. Generally speaking, securities with a market value in excess of 140% of a broker-dealer's loan to its customer are "excess margin securities." Rule 15c3-3(a)(5) under the Exchange Act.

335 Special rules apply to securities borrowed from customers and securities subject to "hold in custody" repurchase agreements. *See* Rule 15c3-3(b)(3) and (4) under the Exchange Act.

Rule 15c3-3(b)(3) specifies conditions under which a broker-dealer is not required to maintain possession or control of fully-paid or excess margin securities borrowed from any person under written agreements, including that the broker-dealer provides to the lender eligible collateral, marks to market the securities borrowed and collateral posted on a daily basis and provides additional collateral if the value of the collateral held by the lender is less than the value of the securities borrowed, and includes in the agreement a prominent notice that SIPA may not protect the lender. Prior to 2003, Rule 15c3-3(b)(3) required broker-dealers to collateralize securities loans with cash, US treasury securities or irrevocable letters of credit (although SEC interpretations and no-action letters had permitted some additional flexibility). In 2003, the SEC amended Rule 15c3-3(b)(3) to permit it to expand, by order, the categories of collateral a broker-dealer may post when borrowing securities from a customer and issued an order under the amended rule permitting a wider range of collateral to be posted by broker-dealers. SEC Release No. 34-47480 (Mar. 11, 2003) (amending Rule 15c3-3(b)(3)); SEC Release No. 34-47683 (Apr. 16, 2003) (order expanding the types of permitted collateral).

Rule 15c3-3(b)(4) allows a broker-dealer that has custody of securities subject to a repurchase agreement not to maintain possession or control of the securities subject to the repurchase agreement during the trading day if the broker-dealer provides certain specified notices and warnings to its counterparty (including that the Securities Investor Protection Corporation has taken the position that SIPA does not protect the counterparty) and follows the procedural requirements of the rule.

336 *See* SEC Release No. 34-70072 (July 30, 2013), 78 Fed. Reg. 51,830 (Aug. 21, 2013); SEC Release No. 34-70701 (Oct. 17, 2013), 78 Fed. Reg. 62,930 (Oct. 22, 2013) (extending effective date of certain amendments).

337 "Fails to receive" are securities that a broker-dealer should have received on the settlement date for a transaction (which for most securities transactions in the United States is generally three business days after the trade date) but did not. *See generally* Rule 15c6-1 under the Exchange Act (providing for settlement of securities transactions no later than three business days with specific exceptions); SEC Release No. 34-35750 (May 22, 1995) (exemption from three business day settlement convention in connection with certain transactions involving foreign securities).

338 Rule 15c3-3(d)(2) under the Exchange Act. For government securities that are mortgage-backed securities, the broker-dealer is not required to take action until the securities are on its books as fails to receive for more than 60 days. Treas. Reg. § 403.4(h).

339 *See Securities Industry Association* (avail. July 16, 1988).

340 *See FINRA Interp. Handbook*, SEA Rule 15c3-3(a)(1) /04.

341 The Reserve Formula is set forth in Exhibit A to Rule 15c3-3a under the Exchange Act.

342 The Reserve Formula also takes securities fails to deliver and fails to receive into account and so serves as a mechanism to encourage a broker-dealer to maintain its securities delivery and inventory systems in good order.

343 "Qualified securities" are securities issued by the United States or in respect of which the principal and interest are guaranteed by the United States. By interpretation, broker-dealers are also permitted (subject to certain limits) to use qualifying certificates of deposit to satisfy their reserve account deposit obligations. *See FINRA Interp. Handbook* at 2023, SEA Rule 15c3-3(a)(6)/012.

344 The bank at which the reserve accounts are maintained must provide the broker-dealer with a written agreement, the minimum terms of which are specified in the customer protection rule, stating that the funds in the reserve account are being kept for the exclusive benefit of the broker-dealer's customers or the PAB account holders, as applicable. Rule 15c3-3(f). Broker-dealers must maintain these reserve accounts at unaffiliated banks and limit the deposit at any bank to 15% of the bank's equity capital as reported by the bank in its most recent Call Report. Rule 15c3-3(e)(5). *See also* SEC, Division of Trading and Markets, Frequently Asked Questions Concerning the Amendments to Certain Broker-Dealer Financial Responsibility Rules (Mar. 6, 2014) (noting that the definition of "affiliated" is that contained in Rule 15c3-3(a)(13)). The Call Reports for U.S. branches of foreign banks do not contain an equity capital line item, and therefore, in order to maintain a reserve account at such a branch, the broker-dealer needs to request exemptive relief from the SEC. *See* SEC Release No. 34-70072 (July 30, 2013), 78 Fed. Reg. 51,834–35 (Aug. 21, 2013); *Kris Dailey* (avail. Feb. 26, 2014) (providing no-action relief where a foreign bank has an exemptive request pending on or before March 3, 2014 and the broker-dealer uses the foreign bank's equity capital, as reported in the foreign bank's most recent financial statement, in lieu of a Call Report, to calculate the 15% bank equity capital threshold).

345 For a more detailed discussion of the net capital rule, *see* Michael P. Jamroz, *The Net Capital Rule*, 47 BUS. LAW. 863 (May 1992). At the time he wrote the article, Mr. Jamroz was one of the SEC staff members primarily responsible for the rule's interpretation.

346 Broker-dealers that hold customer funds or securities are required to maintain at least $250,000 in net capital. Those that clear customer transactions but do not hold customer funds or securities are subject to a $100,000 minimum net capital requirement; all other broker-dealers are required to maintain either $5,000, $25,000 or $50,000 in net capital, depending on whether they receive securities and the type of securities business in which they are engaged. In addition, broker-dealers that act as market-makers are subject to additional capital requirements. *See* Rule 15c3-1(a)(2) under the Exchange Act; SEC Release No. 34-31511 (Nov. 24, 1992); *see also* SEC Release No. 34-31512 (Nov. 24, 1992) (increasing minimum net capital requirements imposed on broker-dealers to the levels described above). The stated dollar amounts of minimum capital that a broker-dealer is required to maintain can be misleading in that the net capital rule requires substantial deductions from a broker-dealer's net worth in determining its regulatory capital, as discussed at § 14.07[2][b][i].

Treasury's version of the net capital rule, applicable to registered government securities broker-dealers, the "liquid capital rule," was designed with special consideration of the financings customary in the government securities market. For example, as compared to the nonexempt securities market, there is a greater use in the government securities market of hedging devices and of repurchase and reverse repurchase agreements. A major GAO report on the regulation of government securities broker-dealers found that the differences between the two rules were of little practical effect. GAO/GGD 90-114, U.S. GOVERNMENT SECURITIES: MORE TRANSACTION INFORMATION AND INVESTOR PROTECTION MEASURES ARE NEEDED at 43 (Sept. 1990). In 1995, Treasury adopted several amendments to the "liquid capital rule" to parallel amendments to the net capital rule adopted or proposed by the SEC. *See* Amendments to Regulations for the Government Securities Act of 1986, Treas. Reg. § 402.2(b)(1).

347 In 2004, the SEC adopted amendments to the net capital rule that permit certain broker-dealers to apply to the SEC for a conditional exemption from the net capital rule to use a risk-based method for calculating deductions from net capital for market and derivatives-related credit risk. Broker-dealers obtaining such exemptions are subject to additional minimum capital requirements. *See* § 14.07[2][b][iii].

348 In 2013, the Division of Trading and Markets stated that it is considering recommending that the SEC propose an amendment to the net capital rule that would prohibit a broker-dealer that carries customer accounts from having a ratio of total assets to regulatory capital in excess of a certain level. SEC, Broker-Dealer Leverage Ratio, RIN: 3235-AL50 (Fall 2013), *available at* http://www.reginfo.gov/public/do/eAgendaViewRule?pubId=201310&RIN=3235-AL50 (last visited Oct. 11, 2016).

349 A newly registered broker-dealer must maintain net capital equal to at least one-eighth of its aggregate indebtedness for the first year of its business. Or, if the broker-dealer is also registered as an FCM under the CEA, the broker-dealer must not allow the funds required to be segregated pursuant to the CEA to be greater than 25 times its net capital. *See* Rule 15c3-1(a)(1) under the Exchange Act. SROs often impose more restrictive requirements in connection with the approval of membership of new broker-dealers.

350 *See* SEC Release No. 34-18417 (Jan. 13, 1982); *see also* Statement of Richard Breeden, then-Chairman, SEC, before Senate Comm. on Banking, Housing & Urban Affairs, Concerning the Bankruptcy of Drexel Burnham Lambert Group Inc. at 10 (Mar. 12, 1990). Although a broker-dealer may initially elect either method of calculation, it may not thereafter switch without the SEC's permission.

351 However, the assets and liabilities of a related entity of the broker-dealer generally are not taken into account in computing net capital. The primary exception to this rule is where a broker-dealer guarantees the liabilities of a related entity (which is generally a subsidiary that is also an SEC-registered broker-dealer). In that situation, the broker-dealer consolidates its own assets and liabilities with those of the related entity. If the consolidation decreases net capital, the lower net capital figure is used. If the consolidation increases the broker-dealer's net capital, the increase can be taken into account only if the broker-dealer provides its designated examining authority and the SEC with assurance that the net assets of the guaranteed entity can be quickly distributed to the broker-dealer in the event of the broker-dealer's liquidation.

352 Generally, a satisfactory subordination agreement must provide as follows: the lender acknowledges that its loan is subordinate to the claims of all present and future creditors, including customers; the broker-dealer may use the cash freely as part of its business and is subject to the general risks of the business; the payment obligation of the broker-dealer is suspended if, after any such payment, the broker-dealer's aggregate indebtedness would exceed 12 times its net capital; and the loan is for a term of at least one year. The minimum one-year term does not apply to properly subordinated revolving loans. In addition, in connection with underwritings or other "extraordinary activities," a broker-dealer may, three times during any 12-month period, enter into subordination agreements that have a term of not more than 45 days. Except in the case of certain subordinated loans from its partners or shareholders (which must have a term of at least three years), not more than 70% of a broker-dealer's regulatory capital may consist of subordinated loans. *See* Rule 15c3-1(d) under the Exchange Act.

All subordination agreements must be approved by the broker-dealer's designated examining authority and may not be terminated or modified without that SRO's approval. FINRA makes available standardized subordinated loan agreements that are required to be used by its members in order to accelerate the approval process.

353 These various required deductions make it relatively expensive for a broker-dealer to engage in any substantial business other than buying and selling readily marketable securities, as the assets associated with other businesses generally have no value for net capital purposes. This is one reason many broker-dealers operate as part of a holding company structure, where other affiliates engage in businesses (*e.g.*, nonsecurities activities) that do not require broker-dealer registration or compliance with broker-dealer net capital requirements.

354 Rule 15c3-1(c)(2)(vii) under the Exchange Act. "Ready market" is defined at Rule 15c3-1(c)(11) under the Exchange Act; *see also* SEC Release No. 33-6862 (Apr. 23, 1990) (capital treatment of Rule 144A-eligible securities).

In 1996, a no-action letter was issued to the Securities Industry Association (the "SIA") (which in 2006 combined with The Bond Market Association to form the Securities Industry and Financial Markets Association ("SIFMA")) permitting broker-dealers to apply haircuts of less than 100% to proprietary positions in certain "restricted securities" (as defined in Rule 144(a)(3) under the Securities Act) that cannot be publicly offered or sold, such as certain nonconvertible debt securities, convertible debt, convertible preferred stock, preferred stock, commercial paper and securities freely convertible into publicly traded securities or securities with registration rights that provide for an exchange offer. *See Securities Industry Association* (avail. Mar. 30, 1996) (the "1996 SIA Letter"). Similarly, in 2000, the SEC provided the SIA with no-action relief permitting broker-dealers to apply haircuts of less than 100% to certain single-rated investment-grade asset-backed debt securities. *See Securities Industry Association* (avail. July 27, 2000).

The SEC also has to some degree liberalized its prior very conservative approach to the valuation of foreign securities for purposes of the net capital rule. The GAO in 1992 published a report criticizing the SEC for its then-existing policy in this regard. *See* GAO/GGD-92-41, SECURITIES MARKETS: CHALLENGES TO HARMONIZING INTERNATIONAL CAPITAL STANDARDS REMAIN at 8 (Mar. 1992). Shortly after this GAO report, the SEC issued a no-action letter to the SIA, in response to an SIA request that had been sent to the SEC almost two years earlier that expanded the types of foreign convertible and nonconvertible debt securities, preferred stock and sovereign-issued debt securities that broker-dealers are permitted to treat as having a "ready market." *See Securities Industry Association* (avail. June 12, 1992); *see also Sanwa-BGK Securities* (avail. Feb. 27, 1992) (capital treatment of certificates of deposit issued by banks organized in the Cayman Islands). Subsequently, the SEC staff issued a letter treating foreign equity securities listed on the Financial Times-Actuaries World Indices (now known as the FTSE World Index) as having a ready market. *See Securities Industry Association* (avail. Aug. 13, 1993). The 1996 SIA Letter expanded the category of foreign securities entitled to a capital charge of less than 100% to include (i) convertible and nonconvertible debt and preferred stock if the issuer has issued common stock included in the Financial Times-Actuaries World Indices and (ii) certain investment-grade commercial paper.

In 2012, the SEC staff issued a no-action letter to FINRA expanding the types of equity securities of a foreign issuer that can be considered as having a ready market. *See Grace B. Vogel* (avail. Nov. 28, 2012). In particular, the SEC staff said that an equity security of a foreign issuer can be considered as having a ready market under Rule 15c3-1(c)(11) if (1) it is listed for trading on a foreign exchange located in a country that is recognized on the FTSE World Index, where the security has been trading on that exchange for at least the previous 90 days; (2) daily quotations for bid and ask or last sale prices for the security provided by the foreign securities exchange on which the security is traded are continuously available to broker-dealers in the United States through an electronic quotations system; (3) the median daily trading volume (calculated over the preceding 20 business day period) of the security on the foreign securities exchange is at least 100,000 shares or $500,000; and (4) the aggregate unrestricted market capitalization in shares of such security exceeds $500 million over each of the preceding 10 business days. *See Grace B. Vogel* (avail. Nov. 28, 2012).

355 The net capital rule also provides for "concentration charges" if a broker-dealer's net capital before haircuts includes securities of a single class or series of an issuer that have a market value of more than 10% of such net capital.

356 Rule 15c3-1(c)(2)(vi)(A) and (C) under the Exchange Act.

357 For debt securities generally, the haircuts are intended to take into account market risk, credit risk, price volatility and the liquidity of the particular debt instruments. Reduced haircuts are permitted for certain debt securities positions that are hedged by other positions in debt securities, options or other market instruments within certain maturity parameters. In 1997, the SEC proposed to modify the haircuts applicable to most interest rate instruments, including government securities, investment-grade nonconvertible debt securities, pass-through mortgage-backed securities and interest rate swaps, but thus far no additional action has been taken with respect to this proposal. *See* SEC Release No. 34-39455 (Dec. 17, 1997), which was incorporated into SEC Release No. 34-39704 (Feb. 27, 1998). In order to be able to deduct a haircut for commercial paper, nonconvertible debt securities and preferred stock, a broker-dealer must be able to determine that such securities represent only a minimal amount of credit risk in accordance with policies and procedures that consider a variety of different risk factors. *See* Rule 15c3-1(c)(2)(vi)(E), (F), (H) and (I). Prior to 2014, a broker-dealer could rely instead on credit ratings issued by nationally recognized statistical rating organizations to make this credit determination. However, the SEC amended these provisions to require an internal credit determination, implementing Section 939A of the Dodd-Frank Act, which requires all federal agencies to eliminate references to ratings as standards of creditworthiness. *See* SEC Release No. 34-71194 (Jan. 8, 2014).

358 Rule 15c3-1(c)(2)(viii)–(ix) under the Exchange Act.

359 In 1997, the SEC issued a concept release seeking comment on how the net capital rule could be modified to incorporate the evolving risk management techniques being utilized in the securities markets, in particular, the extent to which securities firms should be permitted to use statistical models to calculate their net capital requirements. SEC Release No. 34-39456 (Dec. 17, 1997), which was incorporated into SEC Release No. 34-39704 (Feb. 27, 1998). Similarly, the SEC's adopting release regarding the establishment of a new broker-dealer registration category for so-called "OTC derivatives dealers" (a regime sometimes referred to as "BD Lite") states that such entities will, subject to SEC approval, be permitted to calculate their net capital using proprietary "value-at-risk" or other statistical models. SEC Release No. 34-40594 (Oct. 23, 1998); *see* § 14.09. In 2004, the SEC adopted amendments to the net capital rule that permit certain broker-dealers to apply to the SEC for a conditional exemption from the net capital rule to use a risk-based method for calculating deductions from net capital for market and derivatives-related credit risk. *See* § 14.07[2][b][iii].

360 *See*, *e.g.*, Rules 15c3-1(e) and 17a-11 under the Exchange Act. Rule 17a-11 under the Exchange Act requires that a broker-dealer notify the SEC and its designated examining authority if its net capital falls below specific levels. The SRO that is the broker-dealer's designated examining authority may, among other things, require the broker-dealer to restrict further development, contract its activities or transfer its public customer accounts. *See*, *e.g.*, FINRA Rule 4120, FINRA MANUAL.

361 Rule 15c3-1(e)(2) under the Exchange Act.

362 *See* SEC Release No. 34-28927 (Feb. 28, 1991); *see also* SEC Release No. 34-28347 (Aug. 15, 1990).

363 The SEC issued only one order under Rule 15c3-1(e)(3)—to limit withdrawals from REFCO Securities, LLC and REFCO Clearing, LLC, after their parent company announced that its financial statements could no longer be relied upon and had ceased all activities for a 15-day period. *See* SEC Release No. 34-52606 (Oct. 13, 2005).

364 Rule 15c3-1(e)(3)(i).

365 Rule 15c3-1(e)(4)(iv) under the Exchange Act.

366 *See* Rule 15c3-1(c)(2)(i)(G); SEC Release No. 34-70072 (July 30, 2013), 78 Fed. Reg. 51,830 (Aug. 21, 2013)

367 "Tentative net capital" means the net capital of the broker-dealer before deductions for market and credit risk, increased by the balance sheet value (including counterparty net exposure) resulting from transactions in derivative instruments that otherwise would be required to be deducted. Tentative net capital includes securities for which there is no ready market if the value of the securities is computed using mathematical models the SEC has approved for computing capital deductions for the securities. *See* Rule 15c3-1(c)(15) under the Exchange Act.

368 SEC Release No. 34-49830 (June 8, 2004); *see also* SEC Release No. 34-55559 (Mar. 29, 2007) (approving amendments to the NYSE's net capital and early warning rules (Rules 325 and 326) adopting relevant thresholds for broker-dealers calculating their net capital according to the alternative risk-based method).

369 Goldman Sachs, Merrill Lynch, Pierce, Fenner & Smith Incorporated ("Merrill Lynch") and Morgan Stanley were the other three CSE investment bank holding companies. JP Morgan and Citigroup were the two CSE bank holding companies.

370 *See* Press Release, SEC, Chairman Cox Announces End of Consolidated Supervised Entities Program (Sept. 26, 2008) (announcing the end of the CSE Program). The extent to which the 2004 net capital rule change and the CSE Program contributed to the 2007–2009 financial crisis has been the subject of much debate. *Compare* Stephen Labaton, "*Agency's '04 Rule Let Banks Pile Up New Debt*," N.Y . TIMES, Oct. 3, 2008, p. A1, *with* THE FINANCIAL INQUIRY CRISIS REPORT (Jan. 2011) at 153–54 (noting that CSE holding companies were actually more highly leveraged in the 1990s than they were after the 2004 rule change).

371 *See* Chairman Mary Schapiro, Testimony Concerning the Lehman Brothers Examiner's Report, Before the House Financial Services Comm., Apr. 20, 2010, at 11.

372 Rule 15c3-1(a). *See* SEC Release No. 34-70073 (July 30, 2013), 78 Fed. Reg. 51,824, 51,855 (Aug. 21, 2013).

373 For a general discussion of the liquidation procedures applicable to a failed broker-dealer, *see* Stephen P. Harbeck, *Stockbroker Bankruptcy: The Role of the District Court and the Bankruptcy Court under the Securities Investor Protection Act*, 56 AM. BANKR. L.J. 277 (1982). *See also* SIPA, TRUSTEE'S GUIDE (a manual distributed to trustees of broker-dealers being liquidated in accordance with SIPA); COLLIER ON BANKRUPTCY ¶¶741–52 (16th ed. 2009).

374 Customers of a registered government securities broker-dealer are not eligible for SIPC insurance. Customers of a government-noticed financial institution likewise do not receive SIPC insurance but are eligible to receive FDIC insurance. *See generally* GAO/GGD 90-114 U.S. GOVERNMENT SECURITIES: MORE TRANSACTION INFORMATION AND INVESTOR PROTECTION MEASURES ARE NEEDED at 61–63, (Sept. 1990) (discussing SIPC insurance and recommending that Congress expand SIPC coverage to all government securities brokers and dealers).

375 *See* § 3(a)(2) of SIPA. Certain broker-dealers with limited activities, including OTC derivatives dealers, are excluded from membership in SIPC. While any broker-dealer that has more than half its business outside the United States appears to be excluded from SIPC membership by the express language of the act (*see* § 3(a)(2)(A)(i) of SIPA), the SEC likely takes the position that virtually every broker-dealer with any U.S.

customers must become a SIPC member. Telephone conversation with Michael Don, Deputy General Counsel and Secretary of SIPC, Aug. 24, 1990. Rule 10b-10(a)(9) under the Exchange Act requires broker-dealers to disclose, in a written confirmation to the customer at or before completion of a transaction, that the broker-dealer is not a SIPC member, if such is the case.

376 § 4(c) of SIPA. SIPC is required to assess its member broker-dealers when the balance in the SIPC fund falls below $100 million and has discretion as to whether to impose assessments otherwise. From 1996 through early 2009, SIPC imposed an annual assessment of $150 on each member broker-dealer. *See* SIPC 2006 Annual Report at 8.9. Since April 2009 annual assessments have been based on one-quarter of 1% of the net operating revenues of SIPC members. *See* SIPC News Release, SIPC to Reinstitute Assessments of Member Firms' Operating Revenues (Mar. 2, 2009); *see also* SIPC, Assessment Rate, *available at* http://www.sipc.org/for-members/assessment-rate (last visited Oct. 11, 2016).

377 § 8 of SIPA. SIPA defines a "customer" as "any person (including any person with whom the [failed broker-dealer] deals as principal or agent [*i.e.*, another broker-dealer]) who has a claim on account of securities received, acquired, or held by the [failed broker-dealer] in the ordinary course of its business as a broker or dealer … [including any person who has deposited cash with the [failed broker-dealer] for the purpose of purchasing securities]… and any person who has a claim … arising out of sales or conversions of securities.…" § 16(2) of SIPA. "Customer name securities" are those securities that are registered (or in the process of being registered) in the particular customer's name and are not transferable by the broker-dealer by delivery, power of attorney or otherwise. § 16(3) of SIPA; *See* Collier on Bankruptcy ¶6741.03 (16th ed. 2009); *see also In re Bevill, Bressler & Shulman, Inc.*, 59 B.R. 353 (D.N.J. 1986). "Customer property" generally includes all property (other than customer name securities) received, acquired, or held by a failed broker-dealer that was, or should have been, set aside for customers. § 16(4) of SIPA.

378 § 9(a) and (d) of SIPA. The cash must have been on account for the purpose of purchasing securities or as a result of a sale of securities. *See* SEC Release No. 34-18262 (Nov. 17, 1981). Section 929H of Title IX of the Dodd-Frank Act raised the cash limit from $100,000 to $250,000.

379 *See* § 9(a)(5) of SIPA.

380 *See* § 9(a)(5) of SIPA.

381 *See*, *e.g.*, § 6 of the Exchange Act (registration of the national securities exchanges) and § 15A of the Exchange Act (registration of national securities associations, *i.e.*, FINRA). Most of the provisions giving the SEC extensive regulatory authority over the SROs and setting the standards that the SROs must follow in proceedings involving their own members were adopted in 1975 amendments to the Exchange Act. *See* Securities Acts Amendments of 1975, Pub. L. No. 94-29, § 16, 89 Stat. 97, 147–48 (1975). In 2004, the SEC proposed new rules and rule amendments relating to the governance, administration, transparency and ownership of SROs, the periodic reporting of information by SROs regarding their regulatory programs, and the listing and trading by the SROs of their own or affiliated securities. *See* SEC Release No. 34-50699 (Nov. 18, 2004). The comment period with respect to these proposals was extended to March 8, 2005, *see* SEC Release No. 34-51019 (Jan. 11, 2005), but the proposed rule was withdrawn in 2011.

Pursuant to amendments codified in the Commodity Futures Modernization Act of 2000, Pub. L. No. 106-554 (Appendix E), 114 Stat. 2763, 2763A-365 (2000) (hereinafter the "CFMA"), § 2(a)(1)(D) of the CEA and § 6(h) of the Exchange Act require that security futures products be traded on exchanges that are registered under both the CEA and the Exchange Act. Accordingly, futures exchanges may register as national securities exchanges for the limited purpose of trading security futures products, and *vice versa*. *See* § 6(g) of the Exchange Act. In addition, CFTC-registered futures associations (such as the National Futures Association) are considered to be registered national securities associations for the limited purpose of supervising FCMs that notice register as broker-dealers for purposes of security futures product trading. *See* § 15A(k) of the Exchange Act. Such notice-registrants are exempt from certain of the requirements otherwise applicable to national securities exchanges and national securities associations. §§ 6(g)(4), 15A(k)(3) and (4) of the Exchange Act. *See generally* U.S. Regulation of the International Securities and Derivatives Markets, Twelfth Edition, Derivatives Markets, Chapter 4.

382 § 19(b) of Exchange Act; *see also* Rule 19b-4 under the Exchange Act.

383 § 19(c) of the Exchange Act. However, the SEC cannot require the SROs to adopt rules that go beyond the SEC's own proper purposes under the Exchange Act. *See Business Roundtable v. SEC*, 905 F.2d 406 (D.C. Cir. 1990).

384 § 19(g) of Exchange Act. This obligation is subject to enforcement by the SEC. In 2013, for example, the Chicago Board Options Exchange settled a proceeding brought by the SEC alleging failure to enforce or even fully comprehend rules to prevent abusive short selling, pursuant to which the CBOE was fined $6 million. *See* SEC Charges CBOE for Regulatory Failures, SEC Press Release 2013-107 (June 11, 2013).

385 *See*, *e.g.*, §§ 6(d) and 15A(h) of the Exchange Act.

386 *See* § 19(d) and (e) of the Exchange Act and Rule 19d-3 thereunder.

387 FINRA in particular is required under the Exchange Act to adopt rules intended to prevent fraudulent and manipulative acts. *See* § 15A(b)(6) of the Exchange Act.

388 FINRA Rule 2010, FINRA MANUAL.

389 These exchanges are Bats BYX Exchange, Inc. (formerly BATS Y-Exchange, Inc.), Bats BZX Exchange, Inc. (formerly BATS Exchange, Inc.), Bats EDGA Exchange, Inc. (formerly EDGA Exchange, Inc.), Bats EDGX Exchange, Inc. (formerly EDGX Exchange, Inc.), BOX Options Exchange LLC, C2 Options Exchange, Chicago Board Options Exchange, Chicago Stock Exchange, International Securities Exchange, LLC, ISE Gemini, ISE Mercury, Miami International Securities Exchange, NASDAQ BX, Inc. (formerly NASDAQ OMX BX, Inc.; Boston Stock Exchange), NASDAQ PHLX LLC (formerly NASDAQ OMX PHLX, LLC; Philadelphia Stock Exchange), National Stock Exchange, Inc., New York Stock Exchange, NYSE MKT LLC (formerly NYSE AMEX and the American Stock Exchange), the Investors Exchange LLC, the Nasdaq Stock Market LLC, As previously noted, FINRA is the only registered national securities association.

As noted in *supra* Note 381, futures exchanges and registered futures associations may notice register as limited-purpose national securities exchanges and national securities associations in connection with the trading of security futures products.

Following the SEC's adoption in 1998 of Regulation ATS, certain electronic trading systems have registered as for-profit national securities exchanges, such as NYSE Arca and the Nasdaq Stock Market. *See* §§ 14.10 and 3.01, Note 4; SEC Release No. 34-53128 (Jan. 13, 2006).

390 *See supra* Note 280 and accompanying text.

391 *See* § 14.07[1][a]. Guidance for FINRA Rule 2111 states in part:

> Implicit in all member and associated person relationships with customers and others is the fundamental responsibility for fair dealing. Sales efforts must therefore be undertaken only on a basis that can be judged as being within the ethical standards of FINRA's rules, with particular emphasis on the requirement to deal fairly with the public. The suitability rule is fundamental to fair dealing and is intended to promote ethical sales practices and high standards of professional conduct.

FINRA Rule 2111 (Suitability), Supplementary Material.01 (General Principles), FINRA MANUAL.

392 FINRA Rule 5110, FINRA MANUAL; *See* SEC Release No. 34-30587 (Apr. 15, 1992); FINRA Regulatory Notice 08-57 (Oct. 2008); *see also* FINRA Rule 5121, FINRA MANUAL, which contains special rules regarding offerings by a member of its own or its affiliates' securities.

393 FINRA Rule 5130, FINRA MANUAL. Rule 5130 is intended to ensure that FINRA members make a *bona fide*

public offering of new issues of equity securities at the public offering price. FINRA Rule 5130 replaced the NASD's prior interpretation, issued under Rule 2110 of the NASD Conduct Rules (now FINRA Rule 2010), prohibiting "free-riding" and "withholding" in connection with the underwriting of "hot issues." FINRA Rule 5130 is limited in its application to initial public offerings of equity securities, but applies to all such offerings regardless of whether they constitute "hot issues." *See* NASD Notice to Members 03-79 (Dec. 2003); FINRA Regulatory Notice 08-57 (Oct. 2008); *see also* § 3.06[2][a].

394 FINRA Rule 5131, FINRA MANUAL; *see also* § 3.06[2][b].

395 FINRA Rule 5141 FINRA MANUAL; *see* § 3.06[3]. FINRA Rule 5141 replaced the set of rules and interpretations commonly known as the Papilsky Rules, and like its predecessor, in some circumstances at least, permits tiered pricing for volume purchases where the pricing structure is disclosed in the offering prospectus.

396 FINRA Rules 2341, 5141, FINRA MANUAL.

397 FINRA Rule 2111, FINRA MANUAL. FINRA Rule 2111(b) incorporated earlier NASD interpretive guidance as to the manner in which a broker-dealer may satisfy its suitability obligation with respect to institutional customers. *See* FINRA Rule 2111, FINRA MANUAL; FINRA Regulatory Notice 13-31 (Sept. 2013) . In addition, to address concerns over the increasing use of the Internet by broker-dealers to provide information to prospective investors, FINRA issued a policy statement regarding the application of the suitability rule to online communications. The policy statement does not alter member obligations under the suitability rule, but provides "guidelines to assist members in evaluating whether a particular communication could be viewed as a 'recommendation.'" *See* NASD Notice to Members 01-23 (Apr. 2001). FINRA has also provided guidance regarding the applicability of NASD Rule 2310 (now FINRA Rule 2111) to recommendations of structured products. *See* NASD Notice to Members 05-59 (Sept. 2005). In addition, the Department of Labor's 2016 rulemaking expanded fiduciary duties for financial institutions engaged in advising employee benefit plans under ERISA. *See* 81 Fed. Reg. 68, 20946 (Apr. 8, 2016); § 14.07[1][a].

398 FINRA Rule 5310, FINRA M ANUAL. FINRA amended NASD Rule 2320 (now FINRA Rule 5310) to expressly provide that the duty of best execution applies to any transaction for or with a customer or a customer of another broker-dealer, resolving an ambiguity about the application of the rule where a broker-dealer receives a customer order from another broker-dealer for the purpose of order handling or execution. (The duty of best execution does not apply, however, when another broker-dealer is simply executing a customer order against the broker-dealer's quote.) SEC Release No. 34-54339 (Aug. 21, 2006). In 2015, FINRA issued guidance regarding the duty of best execution in which it noted that developments in order routing technology makes order-by-order review of execution quality possible for equity securities and standardized options and then identified large-sized orders and internally executed orders as two situations in which order-by-order (as opposed to regular and rigorous) review may be required. FINRA Regulatory Notice 15-46 (Nov. 2015).

399 FINRA Rule 2121, FINRA MANUAL.

400 FINRA Rule 2122, FINRA MANUAL.

401 SEC Release No. 34-43590 (Nov. 17, 2000). Pursuant to Rule 11Ac1-5 under the Exchange Act (redesignated as Rule 605 of Regulation NMS), market centers that trade national market system securities are required to make publicly available monthly electronic reports that include uniform statistical measures of execution quality. Under Rule 11Ac1-6 (redesignated as Rule 606 of Regulation NMS), broker-dealers that route customer orders in equity and option securities are required to make publicly available quarterly reports that identify venues to which customer orders are routed for execution. Broker-dealers are also required to disclose to customers, upon request, the venue to which their individual orders were routed. The SEC staff has addressed frequently asked questions about Rule 11Ac1-5 in SEC, Division of Corporation Finance, Staff Legal Bulletin No. 12A (Sept. 6, 2001), Fed. Sec. L. Rep. (CCH) ¶60,012, and about Rule 11Ac1-6 in SEC, Division of Corporation Finance, Staff Legal Bulletin No. 13A, Fed. Sec. L. Rep. (CCH) ¶60,013 (Oct. 16, 2001).

402 FINRA Rule 2121, Supplementary Material.01 (Mark-Up Policy) and.02 (Additional Mark-Up Policy For

Transactions in Debt Securities, Except Municipal Securities), FINRA MANUAL. *See generally* NASD Notice to Members 92-16 (Apr. 1992); NASD Notice to Members 07-28 (June 2007). Supplementary Material.02(b)(9) provides for an exception to Rule 2121 (and the interpretations thereunder) for transactions with qualified institutional buyers ("QIBs") purchasing or selling noninvestment grade debt securities when the broker-dealer has determined that the QIB has the capacity to evaluate independently the investment risk and in fact is exercising independent judgment in deciding to enter into the transaction.

403 FINRA Rule 4210, FINRA MANUAL.

404 FINRA Rules 2210 and 2220, FINRA MANUAL.

405 FINRA Rule 2300 series and Rule 2216, FINRA MANUAL.

406 FINRA Rule 5320, FINRA MANUAL.

407 FINRA Rule 5280, FINRA MANUAL.

408 FINRA Rule 5210, FINRA MANUAL; *see also* FINRA Notice 14-28 (June 2014).

409 *See* FINRA Rules 6000 through 14,000 series, FINRA MANUAL

410 *See* § 14.07[2][b].

411 FINRA provides that a member whose aggregate indebtedness is more than ten times net capital must notify FINRA and may not grow its business further if such condition continues to exist for more than 15 consecutive business days. Additionally, if a FINRA member's aggregate indebtedness rises above 12 times its net capital, the member must actively reduce its liabilities. *See*, *e.g.*, FINRA Rules 4120(a)(1)(B), 4120(c)(1)(B), FINRA MANUAL. FINRA rules similarly have more stringent requirements for member firms that adopt the alternative method for calculating net capital.

412 *See* FINRA Rule 4210, FINRA MANUAL; *see also* § 14.07[6].

413 *See infra* Note 602.

414 *See* FINRA Rule 3270, FINRA MANUAL. It was relatively unusual for the NYSE to disapprove of a person's proposed outside activities.

415 *See* § 14.07[3][b] below.

416 For this purpose, a "control person" is a person who has the power to direct the management or policies of a company through ownership of securities, by contract, or otherwise. Control is presumed to exist if, before the transaction, the person has the right to vote or the power to sell or direct the sale of 25% or more of a class of voting securities or in the case of a partnership or limited liability company has the right to receive upon dissolution, or has contributed, 25% or more of the capital. A "privately-held company" is one that does not have any class of securities registered, or required to be registered, with the SEC under § 12 of the Exchange Act or with respect to which the company files, or is required to file, periodic information, documents, or reports under § 15(d) of the Exchange Act. FINRA CAB Rule 016(c)(1)(F), FINRA MANUAL.

417 FINRA CAB Rule 016(c), FINRA MANUAL.

See supra § 14.03[h] for discussion of the no-action letters referenced in item (G).

Because a CAB's activities must be limited to this list, a broker cannot register as a CAB if it carries or acts as an introducing broker with respect to customer accounts, holds or handles customer funds or securities, accepts orders from customers to purchase or sell securities either as principal or as agent for the customer (except as permitted by items (F) and (G) of this list), has investment discretion on behalf of any customer, engages in proprietary trading of securities or market-making activities, or participates in or maintains an online platform in connection with offerings of unregistered securities pursuant to Regulation Crowdfunding or Securities Act Regulation A, or effects securities transactions that would require the broker or dealer to report the transaction under the FINRA's trade reporting rules.

418 FINRA CAB Rule 201, FINRA MANUAL.

419 FINRA Rule 2210(d)(1)(F), with limited exceptions, prohibits member communications that "predict or project performance, imply that past performance will recur or make any exaggerated or unwarranted claim, opinion or forecast." The parallel provision of FINRA CAB Rule 221 only prohibits member communications

that "imply that past performance will recur or make any exaggerated or unwarranted claim, opinion or forecast."

420 FINRA CAB Rules 300, 313, FINRA MANUAL.

421 FINRA CAB Rule 238, FINRA MANUAL.

422 *See also* § 14.08[1].

423 NASD Membership and Registration Rules, Rules 1020 and 1030, FINRA MANUAL. In addition, FINRA has issued interpretations, modeled after Rule 206(4)-3 under the Advisers Act, that regulate the involvement of registered broker-dealers with foreign "finders" of business. *See* NASD Membership and Registration Rules, Rule 1060(b), FINRA MANUAL; Incorporated NYSE Rule Interpretations, Rule 345(a)(i)/Interpretation 03, FINRA MANUAL.

424 For purposes of FINRA's rules, "associated person of a member" generally includes any registered natural person (or applicant for registration), sole proprietors, partners, officers, directors and branch managers of the member firm, any natural person occupying a similar status or performing similar functions, any natural person engaged in the investment banking or securities business who is directly or indirectly controlling or controlled by a member (whether or not such person is registered or exempt from registration). FINRA By-Laws, Art. I, Paragraph (rr), FINRA MANUAL. Note that this is not the same as the definition of "associated person of a broker or dealer" under the Exchange Act, *see* § 3(a)(18) of the Exchange Act, nor is it the same as the definition of "associated person" in NASD Rule 1011, which is applicable solely for purposes of the Rule 1010 Series (Membership Proceedings).

425 NASD Membership and Registration Rules, Rule Series 1020 and 1030 and Rule 1050, FINRA MANUAL (registration of principals, representatives and research analysts). Rule 1030 permits associated persons who act as representatives in certain limited areas to take a more focused examination than the Series 7 and receive a limited representative registration.

426 FINRA Rule 1230(b)(6), FINRA MANUAL.

427 NASD Rule 1021(e), FINRA MANUAL.

428 NASD Rule 1022(b), FINRA MANUAL.

429 NASD Rule 1022(d), FINRA MANUAL.

430 NASD Rule 1022(f), FINRA MANUAL.

431 NASD Rule 1013(a)(2), FINRA MANUAL. Certain associated persons of government-noticed financial institutions must file Form G-FIN-4 with the appropriate regulatory agency.

432 "Statutory disqualification" is defined in § 3(a)(39) of the Exchange Act.

433 FINRA has developed a centralized computer tracking system of all registered representatives and broker-dealers against whom actions have been taken or complaints have been made; access to such system is available to all SROs, broker-dealers, investors and the SEC. *See* § 14.08[1]. In addition, FINRA permits retail investors to review information on the professional background, business practices, and conduct of FINRA member firms and their associated persons through its BrokerCheck service. Member firms are required to include a "readily apparent reference and hyperlink"on their websites to BrokerCheck. FINRA Rule 2210, FINRA Manual; FINRA Regulatory Notice 15-50 (Dec. 2015).

434 FINRA allows a qualified registered representative in good standing with the Securities Association of the United Kingdom to become qualified as a general securities representative in the United States by passing a modified general securities representative examination (the Series 17 examination). NASD Notice to Members 90-69 (Oct. 1990). A modified version of the general securities representative examination has also been developed by the NYSE for qualified representatives in good standing with Canadian and Japanese securities regulators. *See* SEC Release Nos. 34-37112 (Apr. 12, 1996) (Japan), 34-36825 (Feb. 9, 1996) (Canada), 34-36708 (Jan. 11, 1996) (Japan).

In 2005, the NASD, the NYSE, and the Securities & Investment Institute (the United Kingdom's principal financial services qualifications provider) announced their agreement to create the Global Capital Markets Qualification (GCMQ) examination, a common qualifications test for capital market professionals that would allow such professionals to operate more easily in both the United States and in the United Kingdom. *See* Press Release, NASD, NASD, NYSE Regulation and U.K.'s Securities & Investment Institute Agree to Create New, International Securities Qualification Exam (July 26, 2005). Although the original press release predicted a late 2006 launch, thus far there have been no subsequent announcements or further developments after the consolidation of the NASD and NYSE into FINRA.

435 *See* Incorporated NYSE Rule 345A FINRA MANUAL; FINRA Rule 1250, FINRA MANUAL; SEC Release No. 34-35341 (Feb. 8, 1995) (order approving proposed rule changes of SROs relating to a continuing education requirement for registered persons); *see also* SEC Release No. 34-50456 (Sept. 27, 2004) (order approving amendments to rule changes of SROs eliminating all currently effective exemptions from the Regulatory Element of the Continuing Education Program).

436 *See* SEC Release No. 34-35341 (Feb. 8, 1995); SEC Release No. 34-50456 (Sept. 27, 2004); FINRA Regulatory Notice 11-33 (July 2011).

437 *See* SEC Release No. 34-35341 (Feb. 8, 1995); SEC Release No. 34-50456 (Sept. 27, 2004); FINRA Regulatory Notice 11-33 (July 2011).

438 FINRA By-Laws, Art V, Sec. 3(a); NASD Notice to Members 04-09 (Feb. 2004); *see also* FINRA Regulatory Notice 10-39 (Sept. 2010) (reminding members of their obligation to provide timely, complete and accurate information on Form U5).

439 A proposal by FINRA to provide its members with qualified immunity in arbitration proceedings for statements made in good faith in certain disclosure on Forms U4 and U5 ended when FINRA withdrew the proposed rule in 2005. *See* SEC Release No. 34-39892 (Apr. 21, 1998) (giving notice of the proposed rule); NASD, Withdrawal of Proposed Rule Change (Oct. 4, 2005).

440 *Rosenberg v. MetLife, Inc.*, 866 N.E.2d 439 (N.Y. 2007). *But see Moreland v. Perkins, Smart & Boyd*, 240 P.3d 601, 637 (Kan. Ct. App. 2010) (disagreement with *Rosenberg* and holding that statements on a Form U5 are subject only to a qualified privilege).

441 Bank Secrecy Act of 1970, Pub. L. No. 91-508, 84 Stat. 1118 (1970).

442 USA PATRIOT Act, Pub. L. No. 107-56, 115 Stat. 272 (2001). The full name of the PATRIOT Act is the "Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001."

443 In 2010, the BSA regulations administered by FinCEN were transferred from 31 C.F.R. Part 103 to 31 C.F.R. Chapter X. *See* 75 Fed. Reg. 65,806 (Oct. 26, 2010).

444 *See* GAO-02-11-1, ANTI-MONEY LAUNDERING: EFFORTS IN THE SECURITIES INDUSTRY (Oct. 2001).

445 *See* 31 U.S.C. § 5318(h); § 352 of the PATRIOT Act. In April 2016, FinCEN proposed a rule that would include funding portals that are involved in the offering or selling of crowdfunding securities pursuant to § 4(a)(6) of the Securities Act in the definitions of ''broker or dealer in securities'' and ''broker-dealer'' under the regulations implementing the BSA in order to subject such funding portals to the AML program and other AML requirements currently applicable to SEC-registered broker-dealers. *See* Amendments to the Definition of Broker or Dealer in Securities, 81 Fed. Reg. 19,086 (Apr. 4, 2016).

446 *See* 31 C.F.R. § 1023.210(b)(1); *see also* 67 Fed. Reg. 21,110, 21,111 (Apr. 29, 2002).

447 *See* FINRA Rule 3310, FINRA MANUAL; *see also* NASD Notice to Members 02-78 (Nov. 2002); NASD Notice to Members 02-21 (Apr. 2002); NYSE Information Memo 02-16 (Apr. 12, 2002); 74 Fed. Reg. 47,630 (Sept. 16, 2009) (adopting NASD Rule 3011 as FINRA Rule 3310 (without substantive changes). *See generally* FINRA, AML FAQs, *available at* http://www.finra.org/industry/faq-anti-money-laundering-faq (last visited Sept. 9, 2016); SEC, AML Source Tool, *available at* http://www.sec.gov/about/offices/ocie/amlsourcetool.htm (June 20, 2012) (last visited Sept. 9, 2016); SIFMA Anti-Money Laundering and Financial Crimes Committee, 2008 Guidance for Deterring Money Laundering and Terrorist Activity (Feb. 2008).

448 Firms that elect to be treated as "capital acquisition brokers" will be subject to a rule requiring them to implement a written AML program, similar to FINRA Rule 3310, but which will permit such firms to conduct

the required independent testing every two years rather than every year as required by FINRA Rule 3310. *See* FINRA Regulatory Notice 16-37 (Oct. 2016).

449 *See* 31 U.S.C. § 5318(g), PATRIOT Act § 356 (requiring adoption of final regulations applying BSA suspicious activity reporting requirements to broker-dealers); 31 C.F.R. § 1023.320; *see also* NASD Notice to Members 02-47 (Aug. 2002).

450 31 C.F.R. § 1023.320(a)(2). In promulgating its SAR Rule for broker-dealers, FinCEN clarified how introducing and clearing brokers may coordinate the filing of a single SAR for a reportable transaction. *See* 67 Fed. Reg. 44,048, 44,051–52 (July 1, 2002). *See also* FinCEN, Guidance to Financial Institutions in Filing SARs Regarding the Proceeds of Foreign Corruption (Apr. 17, 2008).

451 31 U.S.C. § 5318(g)(2); 31 C.F.R. § 1023.320(e); 75 Fed. Reg. 75,593, 75,595 (Dec. 3, 2010).

452 In 2006, FinCEN and the federal banking agencies issued guidance clarifying that financial institutions (including broker-dealers) may share SARs with their head offices or controlling companies (subject to certain requirements) but may not share SARs "horizontally" with other affiliates. *See* FinCEN, Interagency Guidance on Sharing Suspicious Activity Reports with Head Offices and Controlling Companies (Jan. 20, 2006). In 2010, FinCEN adopted rules clarifying that the SAR confidentiality requirement extends to the SAR and "any information that would reveal the existence of a SAR," which would include all material prepared in connection with detecting and reporting suspicious activity whether or not a SAR was ultimately filed, but does not include "the underlying facts, transactions, and documents upon which a SAR is based." 75 Fed. Reg. 75,593, 75,595 (Dec. 3, 2010). The rules further provide that SARs or any information that would reveal the existence of a SAR may not be disclosed to any person, other than as specifically authorized, which for broker-dealers, would, so long as no person involved in the transaction is notified, permit sharing with (1) FinCEN, (2) any federal, state or local law enforcement agency, (3) any federal regulatory authority that examines the broker-dealer for BSA compliance, (4) any SRO that examines the broker-dealer for SAR rule compliance at the request of the SEC, (5) other financial institutions in connection with preparing a joint SAR, (6) in connection with certain employment references or termination notices or (7) within the broker-dealer's corporate organizational structure for purposes consistent with Title II of the BSA. 31 C.F.R. § 1023.320(e); *see also* 75 Fed. Reg. 75,593, 75,595 (Dec. 3, 2010). Additional guidance released by FinCEN in 2010 clarified that certain financial institutions (including broker-dealers) may share SARs that it has itself filed "horizontally" with certain affiliates that are also subject to a SAR regulation, subject to written confidentiality agreements with the affiliates agreeing to protect the confidentiality of SARs. *See* FinCEN, Guidance on Sharing Suspicious Activity Reports by Securities Broker-dealers, Mutual Funds, Futures Commission Merchants, and Introducing Brokers in Commodities with Certain U.S. Affiliates (Nov. 23, 2010).

453 31 U.S.C. § 5318(g)(3); 31 C.F.R. § 1023.320(f).

454 *Lopez v. First Union Nat'l Bank*, 129 F.3d 1186, 1192–93 (11th Cir. 1997).

456 *See* 31 C.F.R. § 1023.220; 68 Fed. Reg. 25,133 (May 9, 2003); *see also* Joint Press Release, Department of Treasury, FinCEN and federal financial regulators, Treasury and Federal Financial Regulators Issue Final PATRIOT Act Regulations on Customer Identification (Apr. 30, 2003); FinCEN and other federal financial regulators, Interagency Interpretive Guidance on Customer Identification Program Requirements under Section 326 of the USA PATRIOT Act (Apr. 28, 2005); SEC, Guidance from the Staffs of the Department of the Treasury and the SEC: Questions and Answers Regarding the Broker-Dealer Customer Identification Program Rule (Oct. 1, 2003), *available at* http://www.sec.gov/divisions/marketreg/qa-bdidprogram.htm (last visited Sept. 9, 2016).

457 In its first enforcement action under the PATRIOT Act, in May 2006, the SEC sanctioned broker-dealer Crowell, Weedon & Co. for failing to document properly its actual customer identity verification procedures in its CIP. *See In the Matter of Crowell, Weedon & Co.*, SEC Release No. 34-53847 (May 22, 2006); *see also* FinCEN, FIN-2008-G002, Customer Identification Program Rule No-Action Position Respecting

Broker-Dealers Operating Under Fully Disclosed Clearing Agreements According to Certain Functional Allocations (Mar. 4, 2008) (FinCEN stating that it will take no action against a clearing firm not complying with the CIP rule with respect to a customer introduced pursuant to a clearing agreement with an introducing broker that allocates the functions of opening and approving customer accounts and directly receiving and accepting orders from the introduced customer exclusively to the introducing firm).

458 *See* 31 C.F.R. § 1023.100(d).

459 *See* 31 C.F.R. § 1023.220(a).

460 31 C.F.R. § 1023.220(a)(6); *see also Securities Industry and Financial Markets Association* (avail. Jan. 9, 2015) extending, until the earlier of (i) January 9, 2017 or (ii) the date upon which an AML program rule for investment advisers becomes effective, a no-action position first taken in *Securities Industry Association* (avail. Feb. 12, 2004) (SEC staff no-action position indicating that a broker-dealer may rely on a registered investment adviser to perform elements of the broker-dealer's CIP with respect to shared customers).

In 2010, FINRA recognized that there are limited "legitimate business arrangements" pursuant to which the identities of the beneficial owners of multiple sub-accounts to a master account may not be disclosed to the broker-dealer and, therefore, the broker-dealer may rely on information provided by others as to whether to treat a master/sub-account as having a single beneficial owner. For example, when a registered broker-dealer procures clearing services pursuant to an omnibus clearing arrangement on a basis in which the sub-account owners' identities are not disclosed to the clearing broker, the clearing broker may rely on information provided by the registered broker-dealer, absent actual or inquiry notice. FINRA Regulatory Notice 10-18 (Apr. 2010). *See also* Guidance from the Staffs of the Department of the Treasury and the SEC, Question and Answer Regarding the Broker-Dealer Customer Identification Program Rule (Oct. 1, 2003), *available at* http://www.sec.gov/divisions/marketreg/qa-bdidprogram.htm (last visited Sept. 9, 2016).

461 *See* 31 C.F.R. § 1023.220(a)(6); *see also Securities Industry and Financial Markets Association* (avail. Jan. 9, 2015).

462 *See* Customer Due Diligence Requirements for Financial Institutions, 81 Fed. Reg. 29,397 (May 11, 2016); 31 C.F.R. § 1010.230. *See also* FinCEN, FIN-2016-G003, Frequently Asked Question Regarding Customer Due Diligence Requirements for Financial Institutions (July, 19, 2016). The Final CDD Rule applies to a set of financial institutions that is generally consistent with the scope of financial institutions currently subject to BSA CIP requirements (*i.e.*, banks, broker-dealers, mutual funds, futures commission merchants and introducing brokers in commodities). The Final CDD Rule amends the rules implementing the AML program requirement for all such financial institutions to expressly codify the existing "four pillars" of BSA AML programs (internal controls, independent testing, BSA compliance officer and training) and to add a new fifth pillar requiring appropriate risk-based procedures for conducting ongoing customer due diligence. *See*, *e.g.*, 31 C.F.R. 1023.210.

463 *See* Final CDD Rule, 81 Fed. Reg. 29,397, 29,409 (May 11, 2016); 31 C.F.R. § 1010.230.

464 Final CDD Rule, 81 Fed. Reg. 29,397, 29,398 (May 11, 2016).

465 *See* Final CDD Rule, 81 Fed. Reg. 29,397, 29,412 (May 11, 2016); 31 C.F.R. 1010.230(e).

466 *See* Final CDD Rule, 81 Fed. Reg. 29,397, 29,415-16 (May 11, 2016).

467 *See* Guidance from the Staffs of the Department of the Treasury and the SEC, Question and Answer Regarding the Broker-Dealer Customer Identification Program Rule (Oct. 1, 2003). Other financial institutions subject to the Final CDD Rule would also be able to rely on existing guidance that applies for CIP purposes. *See also, e.g.*, Guidance from the Staffs of the Department of the Treasury and the SEC, Questions and Answers Regarding the Mutual Fund Customer Identification Rule (Aug. 11, 2003); FinCEN, FIN-2006-G004, Frequently Asked Question regarding Customer Identification Programs for Futures Commission Merchants and Introducing Brokers (Feb. 14, 2006); FinCEN, FIN-2006-G009, Application of the Regulations Requiring Special Due Diligence Programs for Certain Foreign Accounts to the Securities and Futures Industries (May 10, 2006).

468 *See* 31 C.F.R. § 1020.220(a)(6).

469 31 C.F.R. § 1010.520. In 2008, the Agreement on Mutual Legal Assistance between the United States and the European Union was ratified, giving EU member states access to the FinCEN 314(a) program. *See* 75 Fed. Reg. 6560 (Feb. 10, 2010); *see also* FinCEN, FinCEN's 314(a) Fact Sheet (Oct. 25, 2016) (describing the success of the FinCEN program). In 2010, the Information Sharing Rule was amended to include state, local and foreign (to the extent necessary to satisfy reciprocal treaty obligations) law enforcement agencies. 75 Fed. Reg. 6560 (Feb. 10, 2010).

470 *See* FinCEN Press Releases dated Apr. 2, 2003 (responding to industry comments regarding the information sharing process, and Dec. 17, 2004 (describing law enforcement-related results of the information sharing process under § 314(a)); *see also* GAO 10-622T, BETTER COMMUNICATIONS COULD ENHANCE THE SUPPORT FINCEN PROVIDES TO LAW ENFORCEMENT (Apr. 2010).

471 Financial institutions wanting to share such information with one another may satisfy the notice requirement by filing a standard 314b registration form with FinCEN, enabling the submission of such information through use of electronic mail. *See* FinCEN, Financial Institution Notification Form, *available at* http://www.fincen.gov/statutes_regs/patriot/section314b.html (last visited Sept. 9, 2016).

472 *See* 31 C.F.R. § 1010.540; § 314(b) of the PATRIOT Act.

473 31 U.S.C. § 5318(i); § 312 of the PATRIOT Act.

474 31 U.S.C. § 5318(i). Section 312 of the PATRIOT Act defines the term "private banking account" as an account (or combination of accounts) that (i) requires a minimum aggregate deposit of funds or other assets of not less than $1 million, (ii) is established on behalf of one or more individuals who have a direct or beneficial ownership in the account and (iii) is assigned to, or is administered or managed, in whole or in part, by an officer, employee or agent of a financial institution acting as a liaison between the financial institution and the direct or beneficial owner of the account. *See* 31 U.S.C. § 5318(i)(4)(B).

475 *See also* 31 C.F.R. § 1010.610.

476 A "correspondent banking account" is commonly understood to mean a deposit account established by one bank for another bank to receive deposits and make payments.

477 31 C.F.R. § 1010.605(c)(1)(i); *see also* 31 U.S.C. § 5318A(e)(1)(B) (similarly defining "correspondent account" for banks).

478 31 C.F.R. § 1010.605(c)(2)(ii).

479 *See* 71 Fed. Reg. 496 (Jan. 4, 2006); 71 Fed. Reg. 16,040 (Mar. 30, 2006).

480 31 C.F.R. §§ 1010.610(a) and 620(a); *see also* FinCEN Guidance, FIN-2006-G009, Application of the Regulations Requiring Special Due Diligence Programs for Certain Foreign Accounts to the Securities and Futures Industries (May 10, 2006).

481 72 Fed. Reg. 44,768 (Aug. 9, 2007); 31 C.F.R. § 1010.610(b); *see also* FinCEN, FIN-2010-G001, Interagency Guidance on Obtaining and Retaining Beneficial Ownership Information (Mar. 5, 2010).

482 31 U.S.C. § 5318(j), *amended by* § 313(a) of the PATRIOT Act.

483 31 C.F.R § 1010.630. The prohibition on dealings with foreign shell banks also applies to U.S. banks and U.S. branches and agencies of foreign banks, but does not apply to other categories of BSA-regulated financial institutions.

The term "regulated affiliate" includes any foreign shell bank that (i) is an affiliate of a depository institution, credit union or foreign bank that maintains a physical presence in the United States or a foreign jurisdiction and (ii) is subject to supervision by a banking authority in the jurisdiction regulating such affiliated depository institution, credit union or foreign bank. *See* 31 C.F.R. § 1010.605(n).

484 31 C.F.R. § 1010.630(a)(2).

485 31 C.F.R. § 1010.630(b).

486 This does not prevent a research analyst from attending a pitch meeting in connection with an initial public offering of an "emerging growth company" ("EGC") that is also attended by investment banking personnel, provided that the research analyst does not engage in otherwise prohibited conduct during such meetings,

including efforts to solicit investment banking business. FINRA Rule 2241.01(b), FINRA MANUAL. FINRA members subject to the 2003 Global Research Settlement (described in §14.07[5][b] below) remain prohibited from participating in EGC pitch meetings.

487 In addition, compensation of any research analyst primarily responsible for the preparation of a research report must be reviewed and approved at least annually by a committee that reports to a member's board and that does not have any representation by the member's investment banking department. FINRA Rule 2241(b)(2)(F), FINRA MANUAL.

488 These prohibitions are not required with respect to "emerging growth companies," and may have exceptions for significant news or events occurring during these periods. FINRA Rule 2241(b)(2)(I), FINRA MANUAL.

489 FINRA Rule 2241(c), FINRA MANUAL.

In public appearances, a research analyst must similarly disclose if the analyst (or any member of the analyst's household) has a financial interest in the subject company's securities, if the member or its affiliates beneficially owns 1% or more of any class of the subject company's common equity, if the analyst knows or has reason to know the member or its affiliates received any compensation from the company or the subject company was a client of the member in the preceding twelve months, any other material conflict of interest of the research analyst or member that the research analyst knows or has reason to know. FINRA Rule 2241(d), FINRA MANUAL.

These disclosures in research reports or public appearances are not required to the extent they would reveal material non-public information regarding specific potential future investment banking transactions. FINRA Rule 2241(c)(5), (d)(2), FINRA MANUAL.

490 FINRA Rule 2241(c)(6), (7), FINRA MANUAL.

491 A FINRA member is not considered to have distributed an independent third-party research report that is made available on request, through a member-maintained website, or to a customer in connection with a solicited order in which a registered representative informed the customer of the availability of independent research and the customer requests such independent research.

492 An "independent third-party research report" is a research report produced by a person with no affiliation or business or contractual relationship with the FINRA member or its affiliates that is reasonably likely to inform the content of its research reports and makes content determinations without any input from the distributing member or its affiliates. FINRA Rule 2241(a)(3), FINRA MANUAL.

493 In March 2004, the NASD and NYSE issued a joint memorandum that provided interpretive guidance regarding the research analyst and research reports rules (the "2004 Joint Memorandum"). *See* NASD Notice to Members 04-18 (Mar. 2004) and NYSE Information Memo 04-10 (Mar. 9, 2004). Among other things, the 2004 Joint Memorandum stated that if a broker-dealer distributes a "globally branded" research report that was prepared by an affiliate but that uses a single marketing identity encompassing the broker-dealer, then all of the analyst conflict rules would apply to that report. In addition, under certain circumstances, foreign-based analysts employed by a foreign affiliate of the member may be viewed by the NASD and NYSE as "associated persons" of the member requiring, among other things, licensing and member-firm supervision. *See* NASD Notice to Members 04-18 (Mar. 2004) and NYSE Information Memo 04-10 (Mar. 9, 2004). These statements regarding globally branded research and foreign-based analysts engendered considerable controversy within the industry. In 2008, FINRA responded by creating an exemption from the research analyst qualification requirements for certain foreign-based analysts who contribute only to globally branded or foreign affiliate research reports. *See* NASD Rule 1050, FINRA M ANUAL; Incorporated NYSE Rule Interpretation 344/02, FINRA MANUAL; SEC Release No. 34-57278 (Feb. 6, 2008).

494 FINRA Rule 2241(f), FINRA MANUAL.

495 *See* NASD Notice to Members 04-25 (Mar. 2004). A research analyst employed by a foreign broker-dealer affiliate of the FINRA member is not required to register as a research analyst and pass the examination unless the research analyst is also an associated person of the FINRA member. *See* NASD Notice to

Members 04-25 (Mar. 2004).

496 *See* NASD Notice to Members 04-81 (Nov. 2004).

497 *See* SEC Release No. 34-47384 (Feb. 20, 2003). Regulation AC applies to both U.S. and foreign broker-dealers (subject to the limited exception noted below) and certain of their affiliates in respect of research reports prepared by research analysts that have been distributed to U.S. persons. Regulation AC, however, does not apply to those affiliates with respect to which the broker-dealer has established and enforced information barriers and other appropriate policies and procedures reasonably designed to prevent the broker-dealer from influencing the affiliate or the content of research reports prepared by the affiliate or its personnel (this provision is intended to prevent the broker-dealer from doing indirectly through an affiliate what it could not do directly without complying with the certification requirements of the regulation). In addition, Regulation AC includes certain exemptions related to (i) the distribution by a broker-dealer or other covered person of third-party research, (ii) offshore appearances by research analysts employed outside the United States by a non-U.S. entity, (iii) activities of the news media, (iv) activities of investment advisers not required to register under the Advisers Act, and (v) research reports on foreign securities prepared by a foreign broker-dealer that is not affiliated with an SEC-registered broker-dealer and that provides such research reports to major U.S. institutional investors in accordance with Rule 15a-6(a)(2) under the Exchange Act. *See also* SEC, Division of Trading and Markets, Responses to Frequently Asked Questions Concerning Regulation Analyst Certification (rev. Apr. 26, 2005), in which the SEC staff clarifies a number of issues regarding Regulation AC, including the general application of Regulation AC to foreign broker-dealers and the circumstances under which foreign broker-dealers that are not associated with SEC-registered broker-dealers may disseminate research reports to U.S. investors without becoming subject to the requirements of Regulation AC.

498 Rule 501 of Regulation AC.

499 Rule 502(a) of Regulation AC.

500 Rule 502(b) of Regulation AC.

501 The ten settling firms were: Bear, Stearns & Co. Inc.; Credit Suisse First Boston LLC; Goldman, Sachs & Co.; Lehman Brothers Inc.; J.P. Morgan Securities Inc.; Merrill Lynch; Morgan Stanley & Co. Inc.; Citigroup Global Markets Inc. (formerly, Salomon Smith Barney Inc.); UBS Warburg LLC; and U.S. Bancorp Piper Jaffray Inc. *See* SEC Litigation Release No. 18438 (Oct. 31, 2003).

Two other firms involved in related enforcement actions, *Deutsche Bank Securities Inc.*, SEC Litigation Release No. 18854, and *Thomas Weisel Partners LLC*, SEC Litigation Release No. 18855, reached a settlement with the Regulators on August 26, 2004 and agreed to pay a total of $87.5 million and $12.5 million, respectively. The terms of these two settlement agreements were substantially the same as the settlements entered into with the other ten firms and, for purposes of the remainder of this discussion, the terms "Global Research Settlement" and "settling firms" include these two additional firms. In March 2007, Banc of America Securities LLC reached a similar settlement with the Regulators and became subject to many of the same requirements as the other firms with respect to the separation of research and investment banking operations. *See* SEC Release No. 34-55466 (Mar. 14, 2007).

502 The settling firms and the Regulators agreed to amend certain provisions of the forward-looking aspects of the Global Research Settlement, which amendments were entered by the district court on September 24, 2004. On November 2, 2004, the staff of the SEC's Division of Market Regulation (since renamed the Division of Trading and Markets) issued an interpretive letter to Cleary, Gottlieb, Steen & Hamilton, acting on behalf of the settling firms, which addressed a number of questions regarding the forward-looking aspects of the Global Research Settlement. *See* Letter, dated Nov. 2, 2004, to Dana G. Fleischman of Cleary, Gottlieb, Steen & Hamilton re: Global Research Settlement. Further information with respect to the Global Research Settlement may be found on the SEC website, at www.sec.gov/spotlight/globalsettlement.htm.

503 For example, the NASD and NYSE revised their rules to incorporate certain of the Global Research Settlement's requirements, including the prohibition on research analysts' participation in certain company-

sponsored or investment banking-sponsored roadshows. *See* SEC Release No. 34-51593 (Apr. 21, 2005). Further, in recognition of the IPO Allocation Initiative and following through with certain suggestions made in the IPO Task Force Report, FINRA adopted Rule 5131, which addresses quid pro quo allocations, spinning and flipping. *See* FINRA Rule 5131, FINRA MANUAL. For further information with regard to the IPO Task Force Report, *see* § 3.06[2][b].

In addition, the SEC has published an interpretation of Regulation M highlighting certain prohibited attempts to induce aftermarket purchases during the restricted period. SEC Commission Guidance Regarding Prohibited Conduct in Connection with IPO Allocations, SEC Release No. 34-51500 (Apr. 7, 2005); *see also* § 3.02[9].

504 For example, the Treasurer of the State of California, one of the nation's largest bond issuers and a major investor *via* its pension funds, announced that new conflict of interest and disclosure standards (the "Investment Protection Standards") would be imposed on investment banks that do business with the state, which standards largely mirror the terms of the Global Research Settlement. *See* News Release, California State Treasurer Phil Angelides, Treasurer Angelides Announces Tough New Requirements for Investment Banks That Do Business With State of California (May 8, 2003). The California Public Employees Retirement System and the California State Teachers Retirement System (the nation's largest and third largest public pension funds, respectively) also voted to impose the Investment Protection Standards on those investment banks that do business with them. *See* Gilbert Chan, *Pension Fund Calls for Reforms*, THE SACRAMENTO BEE, Aug. 19, 2003; News Release, California State Treasurer Phil Angelides, Treasurer Angelides Wins CalSTRS Approval of Key Shareholder Protection Initiatives (July 9, 2003).

505 *See*, *e.g.*, CFA Institute Best Practice Guidelines Governing Analyst/Corporate Issuer Relations (Nov. 12, 2004), a joint product of the CFA Institute (formerly known as the Association for Investment Management and Research) and the National Investor Relations Institute, which addresses such issues as analyst independence as it applies to analysts' relationships with corporate issuers, access to corporate executives, retaliation by issuers against analysts, pre-publication review of analyst research reports by the issuer and issuer-paid research.

506 Because of the global nature of the operations of the settling firms, the settling firms (and their affiliates) may also be subject to requirements regarding research analyst conflicts of interest and related matters in other jurisdictions (both outside the United States and within the United States under state or local law). For example, the Financial Conduct Authority of the United Kingdom (the "FCA") takes a principles-based approach, which requires regulated firms to develop and publish policies to ensure that their research analysts do not compromise their objectivity. *See* Business Standards, Conduct of Business Sourcebook, COBS 12, FCA HANDBOOK (Jan. 2013); *see also* Hong Kong Securities and Futures Commission, CODE OF CONDUCT FOR PERSONS LICENSED BY OR REGISTERED WITH THE SECURITIES AND FUTURES COMMISSION, paragraph 16 (Mar. 2014); International Organization of Securities Commissions, IOSCO STATEMENT OF PRINCIPLES FOR ADDRESSING SELL-SIDE SECURITIES ANALYST CONFLICTS OF INTEREST (Sept. 2003).

507 *See*, *e.g.*, SEC, Jumpstart Our Business Startups Act, Frequently Asked Questions About Research Analysts and Underwriters (Aug. 22, 2012), *available at* https://www.sec.gov/divisions/marketreg/tmjobsactresearchanalystsfaq.htm (last visited Dec. 19, 2016).

508 *See*, *e.g.*, Susanne Craig & Kara Scannell, *SEC Tried to Ease Curbs*, WALL STREET J. (Mar. 17, 2010).

509 § 7(c)(1) of the Exchange Act. Section 7(d) of the Exchange Act empowers the Board to impose restrictions on securities-related lending by lenders other than broker-dealers and certain of their associated persons and § 7(f) authorizes restrictions on borrowers. Section 7(c)(2) of the Exchange Act makes it unlawful for a broker-dealer or member of a national securities exchange to extend or maintain credit or collect margin in connection with any security futures product except in compliance with regulations promulgated by the Board or by the SEC and CFTC jointly pursuant to authority delegated by the Board. The Board has delegated margin-setting authority in connection with security futures products to the SEC and CFTC jointly. *See* Letter of the Board, dated March 6, 2001, to James E. Newsome, then-Acting Chairman of the CFTC, and Laura S. Unger, then-Acting Chairman of the SEC. Margin requirements in connection with

security futures products are required to be consistent with the margin requirements for comparable exchange-traded options and in particular, initial and maintenance margin levels may not be lower than the lowest level of margin, exclusive of premium, required for comparable exchange-traded options. § 7(c)(2)(B) of the Exchange Act. In 2002, the SEC and the CFTC adopted rules to establish margin requirements for security futures. *See* SEC Release No. 34-46292 (Aug. 1, 2002).

510 A customer who purchases securities "on margin" pays only a portion of the purchase price and receives an extension of credit for the remainder. The margin regulations, among other things, specify the minimum amount of cash or margin the purchaser must put up as collateral in connection with a transaction involving borrowing on securities.

511 The credit practices of broker-dealers received increased attention with the expansion of prime brokerage services and the proliferation of hedge funds. *See*, *e.g.*, *Hedge Funds and Systemic Risk: Perspectives of The President's Working Group on Financial Markets: Hearing before the House Financial Services Comm.*, 110th Cong. (July 11, 2007) (testimony regarding SEC initiatives by Erik R. Sirri, Director, SEC Division of Market Regulation); Annette L. Nazareth, SEC Commissioner, Remarks Before the PLI Hedge Fund Conference (June 6, 2007); Ben S. Bernanke, Chairman, Federal Reserve Board, Hedge Funds and Systemic Risk, Remarks at the Federal Reserve Bank of Atlanta's 2006 Financial Markets Conference (May 16, 2006).

512 *See* H. Rep. No. 1383, 73d Cong., 2d Sess. (1934); 78 CONG. REC. 7703 (Apr. 30, 1934).

513 12 C.F.R. Part 220. Regulation T also applies to certain associated persons of broker-dealers, including their subsidiaries (broker-dealers and other persons covered by Regulation T are known as "creditors"). Regulation U (12 C.F.R. Part 221) governs securities-related lending by banks and certain other lenders not subject to Regulation T. Regulation X (12 C.F.R. Part 224) governs U.S. persons, and certain foreign persons controlled by U.S. persons, who borrow outside the United States to finance a purchase of securities of U.S. issuers and, in some cases, who borrow in the United States to finance a purchase of any securities.

514 *See* § 14.07[6][a][ii].

515 *See* 12 C.F.R. § 220.3(g). Prior to the 1996 amendments to Regulation T, a broker-dealer generally could not (except in certain limited circumstances) arrange for an extension of credit by a third party to a customer on terms better than Regulation T would allow the broker-dealer to extend directly. *See* 61 Fed. Reg. 20,386 (May 6, 1996). Note, however, that there continues to be an "arranging prohibition" in Regulation U. *See* 12 C.F.R. § 221.3(a)(3). For a discussion of restrictions on lending in connection with a distribution by broker-dealer participants, *see* § 14.07[6][c].

516 For purposes of Regulation T, a "customer" of a "creditor," *see supra* Note 513, is defined as (i) any person or persons, other than an "exempted borrower," to or for whom the creditor extends, arranges, or maintains any credit or who would be considered a customer of the creditor according to the ordinary usage of the trade, (ii) any partner of the creditor who would be considered a customer absent the partnership relationship, and (iii) any joint venture in which the creditor participates which would be considered a customer if the creditor were not a participant. 12 C.F.R. § 220.2.

517 12 C.F.R. § 220.4.

518 In contrast, FINRA imposes "maintenance" margin requirements on its members. *See* § 14.07[6][b].

521 12 C.F.R. § 220.12.

522 12 C.F.R. § 220.3(i).

523 A "‘payment period" is defined in Regulation T (12 C.F.R. § 220.2) as the standard securities settlement cycle in the United States plus two business days. Effective June 7, 1995, the standard settlement cycle was reduced from five business days to three, at which time a "payment period" was correspondingly reduced from seven business days to five. *See* SEC Release No. 34-33023 (Oct. 6, 1993); *see also* SEC Release No. 34-34952 (Nov. 9, 1994).

524 12 C.F.R. § 220.4(c)(3)(i).

525 12 C.F.R. § 220.4(d).

526 12 C.F.R. § 220.8 (cash account); 12 C.F.R. § 220.7 (broker-dealer credit account) 12 C.F.R. § 220.6 (good faith account).

The "broker-dealer credit account" may be used for certain transactions with other broker-dealers. For example, the account may be used for purchase and sale transactions between two self-clearing broker-dealers acting for their own behalf if the seller will promptly deliver the securities against payment of the purchase price. *See* Fed. Res. Reg. Serv. ¶5-615.78 (staff opinion, Jan. 28, 1998). The account may also be used to effect and finance transactions for another SEC-registered broker-dealer that gives written instructions that all transactions in the account will be for such broker-dealer's customers.

In addition to these three special purpose accounts, Regulation T provides for a "special memorandum account" that is linked to the customer's margin account. 12 C.F.R. § 220.5. It is used to hold customer funds not required by Regulation T to be maintained in the margin account (such as margin excess, interest or dividend payments, and funds deposited to satisfy a maintenance margin call under SRO rules or the broker-dealer's "house" requirements) and has the effect of preserving a customer's ability to use or withdraw such funds. No securities are purchased in a special memorandum account; instead, the purchase is recorded in the margin account and funds can be transferred from the special memorandum account to the margin account to satisfy the Regulation T margin requirement.

527 12 C.F.R. § 220.8(a)(1).

528 12 C.F.R. § 220.8(b)(2).

529 12 C.F.R. § 220.8(b)(1)(ii).

530 12 C.F.R. § 220.10(a); *see also infra* § 14.07[6][a][iii].

531 The types of securities defined as "margin securities" are specified at 12 C.F.R. § 220.2.

532 *See* 63 Fed. Reg. 2806 (Jan. 16, 1998).

533 *See* 63 Fed. Reg. 2806, 2815 (Jan. 16, 1998); 12 C.F.R. § 220.2. This provision became obsolete on August 1, 2006, when the Nasdaq Stock Market began operating as a national securities exchange.

534 12 C.F.R. § 220.2. Securities deemed to have a "ready market" for purposes of the SEC's net capital rule include equity securities of foreign issuers that are listed on the FTSE World Index and certain other equity securities listed for trading on a foreign exchange located in a country recognized on the FTSE World Index. *See FINRA Interp. Handbook* Rule 15c3-1(c)(11)(i) Interpretation/02; *Grace B. Vogel* (avail. Nov. 28, 2012); *William Wollman* (Feb. 9, 2016). Technically, "foreign margin stock" also includes equity securities that appear on a List of Foreign Margin Stock published by the Federal Reserve Board, but that list has not been published since 2004. FRB Press Release (Mar. 3, 2004).

535 *See* 12 C.F.R. § 220.1(b)(3)(ii); *see also* 12 C.F.R. § 220.10(c) (expressly permitting exempted borrowers to lend securities without regard to Regulation T and broker-dealers to borrow securities from an exempted borrower without regard to Regulation T).

536 *See* 12 C.F.R. § 220.2.

537 Under the safe harbor provided in 12 C.F.R. § 220.2, exempted borrowers include any registered broker-dealer that:

- Maintains at least 1000 active accounts on an annual basis for persons other than brokers, dealers, and persons associated with a broker or dealer;
- Earns at least $10 million in gross revenues on an annual basis from transactions with persons other than brokers, dealers, and persons associated with a broker or dealer; or
- Earns at least 10 percent of its gross revenues on an annual basis from transactions with persons other than brokers, dealers, and persons associated with a broker or dealer.

538 *See* 12 C.F.R. §§ 221.1(b)(3) and 221.2.

539 SRO margin requirements may still apply to certain loans by a member to an exempted borrower and

capital charges or "haircuts" may need to be taken to the extent those loans are not adequately margined. *Cf. FINRA Interp. Handbook* Rule 15c3-1(c)(2)(iv)(B) Interpretation/093 (requiring broker-dealers, including exempted borrowers, engaged in "nonpurpose" securities borrowing transactions solely for the purpose of financing positions of another broker-dealer to maintain equity at least equal to the haircut deduction required under the SEC's Net Capital Rule or take a charge against its own capital for any deficiency).

540 FINRA Rule 4210(g), FINRA MANUAL; CBOE Rule 12.4.

541 *See* SEC Release No. 34-54918 (Dec. 12, 2006) (NYSE); SEC Release No. 34-54919 (Dec. 12, 2006) (CBOE); SEC Release No. 34-55471 (Mar. 14, 2007) (NASD).

542 Currently, the only model that has been approved by the SEC is The Options Clearing Corporation's Theoretical Intermarket Margining System ("TIMS").

543 Before implementing portfolio margining for any customer, a firm must receive approval from its designated examining authority and establish a comprehensive risk analysis methodology. The firm must maintain a separate securities account for portfolio margining, and only certain equity securities and futures are eligible for portfolio margin treatment. *See generally* FINRA Rule 4210(g), FINRA MANUAL. Significant regulatory uncertainty remains as to how accounts that hold both securities and futures will be handled. *See* Cleary Gottlieb Steen & Hamilton LLP, *SEC Approves Amendments to NYSE and CBOE Margin Rules that Substantially Expand Portfolio Margining*, at 23-25 (Jan. 3, 2007) (on file with the Business Development Department of Cleary Gottlieb Steen & Hamilton LLP). However, in a 2012 no-action letter, the SEC staff stated that it would not recommend enforcement action if a broker-dealer, when calculating its net capital using a theoretical option pricing, groups a U.S.-listed security futures contract on individual stocks with equity options on, and positions in, the same underlying instrument. *See FINRA* (avail. May 4, 2012).

544 The Board has authority to prescribe maintenance margin requirements but generally has not done so.

The SRO margin rules also supplement Regulation T in a variety of other ways, such as providing detailed margin requirements for options, *see* FINRA Rule 4210(f)(2), FINRA MANUAL, and specific requirements for day trading, *see* FINRA Rule 4210(f)(8)(B), FINRA MANUAL and § 14.10[4].

545 *See* FINRA Rule 4210(e)(2)(A), FINRA MANUAL.

546 The Exchange Act does not define the circumstances under which a broker-dealer will be deemed to have participated in a "distribution" for purposes of § 11(d)(1). Several SEC no-action letters have found that certain traditional private placements under § 4(2) (now § 4(a)(2)) of the Securities Act were not subject to § 11(d)(1). *See*, *e.g.*, *Synergia Resources XX* (avail. Mar. 20, 1986); *Brandywine Associates II* (avail. Nov. 12, 1973). Although the SEC has not expressed a view on whether §11(d)(1) applies to Rule 144A offerings generally, the SEC staff has issued no-action letters to that effect in particular circumstances. *See*, *e.g.*, *Ontala Forest Products Inc.* (avail. Dec. 14, 1994) (§ 11(d) of the Exchange Act does not apply to a Rule 144A offering to a limited number of qualified institutional buyers); Suncor Inc. (avail. Feb. 25, 1992).

547 A secondary offering of securities can in some circumstances constitute a new issue for purposes of § 11(d) of the Exchange Act. *See*, *e.g.*, *Oakwood Homes* (avail. Oct. 11, 1978).

548 The SEC has taken the position that for purposes of § 11(d)(1), shares of registered investment companies and unit investment trusts, including most mutual funds and exchange-traded funds ("ETFs"), are distributed in a continuous manner. Broker-dealers selling such securities are therefore deemed to be participating in a "distribution" of a new issue, and thus require an exemption from § 11(d)(1) to provide financing on such securities. Rule 11d1-2 under the Exchange Act provides an exemption for credit on securities issued by a registered open-end investment company or unit investment trust that have been owned by the borrower for more than 30 days or purchased pursuant to a plan for the automatic reinvestment of the dividends on such security. The SEC has also provided exemptive relief allowing broker-dealers involved in the issuance of ETF shares to extend credit on those shares without violating § 11(d)(1), subject to certain conditions. These conditions include a broad prohibition on compensation to the broker-dealer from the ETF or other persons associated with the ETF to promote or sell ETF shares, a requirement that the relevant ETF shares be issued by a "qualifying ETF," and the passage of a 30-day start-up period for the ETF. *See Derivative Products Committee of the Securities Industry Association*

(avail. Nov. 21, 2005) (This no-action letter addresses additional topics that may be of concern to broker-dealers trading or financing ETF shares, such as describing significant restrictions on the ability of broker-dealers to receive compensation (including "12b-1 fees") from the ETF or any related parties to promote or sell such ETF shares.). In 2012, the SEC staff clarified that the broker-dealer would be eligible for the relief even if it receives payment in-kind, such as the donation of experts from an ETF research team to speak at a webcast, from ETF sponsors, advisers or service providers to fund educational and training programs for clients and investment professionals. *See Elliott R. Curzon* (avail. Aug. 23, 2012).

549 *See* H. Rep. No. 1383, 73d Cong., 2d Sess. 22 (1934) (§ 11(d) of the Exchange Act strikes at "one of the greatest potential evils inherent in the combination of the broker and dealer function in the same person, by assuring that he will not induce his customers to buy on credit securities which he has undertaken to distribute to the public").

550 *See supra* Note 547. The SEC, however, has exempted certain "direct participation programs" (*see* Rule 3a12-9 under the Exchange Act), and granted no-action or exemptive relief in a number of cases to permit broker-dealers to effect installment sales, or other sales of partly-paid securities, to U.S. persons in connection with global offerings. *See*, *e.g.*, *Cleary Gottlieb Steen & Hamilton LLP* (avail. Sept. 12, 2006) (up to 40% of global offering sold within the United States to qualified institutional buyers under Rule 144A); *Telecom Corp. of New Zealand* (avail. Feb. 25, 1998) (up to 20% of global offering publicly offered in the United States).

U.S. Regulation of the International Securities and Derivatives Markets, § 14.08, INTERNAL PROCEDURES

U.S. Regulation of the International Securities and Derivatives Markets
1 Edward F. Greene, Alan L. Beller, Edward J. Rosen, Leslie N. Silverman, Daniel A. Braverman, Sebastian R. Sperber, Nicolas Grabar & Adam E. Fleisher, U.S. Regulation of the International Securities and Derivatives Markets § 14.08 (11th and 12th Editions 2014-2017)
11th and 12th Editions

Click to open document in a browser

p. 14-135

To assure compliance with applicable rules and regulations, registered broker-dealers are required to follow detailed procedures with respect to a number of their internal practices, including hiring, supervisory procedures and recordkeeping. [551]

[1] Hiring

A broker-dealer's compliance responsibilities for its employees [552] and other associated persons begin in the hiring process. A broker-dealer is required to obtain from an employment applicant the information specified in FINRA's Form U-4. [553] The broker-dealer must affirmatively verify the information that an applicant provides. [554] All of the required information must be kept current after the applicant becomes an employee. Failure to register personnel with FINRA is a violation of Rule 15b7-1 under the Exchange Act. [555]

As a result of increasing concern regarding sales practice abuses by broker-dealer employees who are able to obtain new employment despite past misconduct, the staff of the SEC, in coordination with the NASD and NYSE, made a number of recommendations to improve employee monitoring and reporting procedures. [556] In addition to recommending that broker-dealers improve their compliance procedures and monitoring and recording of data on employees generating regulatory actions, complaints and arbitration damages, the SEC staff

p. 14-135

p. 14-136

has also recommended that broker-dealers increase the frequency and scope of their reports to SROs regarding such employees. [557]

To assist in the hiring and supervising processes, FINRA maintains a centralized, industry-wide computer tracking system of all employees and broker-dealers against whom actions have been taken or complaints have been made; access to such system is available to all SROs, broker-dealers, investors and the SEC. [558] In connection with the expanded monitoring and access to records of such employees and broker-dealers, the staff of the SEC recommended that broker-dealers more rigorously screen employees with histories of misconduct by, among other things, involving the legal and compliance departments in hiring, providing written justification when an applicant is hired against the advice of such departments and encouraging SROs to sanction broker-dealers who hire recidivist problem employees. [559] The SEC also announced that a registered representative against whom it imposed an unqualified bar (*i.e.*, one that does not allow for reapplication after a specified time period) permanently excluding such representative from participation in the securities industry will be, absent extraordinary circumstances, unable to successfully petition for reentry. [560]

[2] Supervision

A broker-dealer is liable for any violation of the securities laws committed by any of its associated persons unless the broker-dealer can establish a defense that: (i) the broker-dealer "established procedures and a system for applying such procedures" that could reasonably be expected to "prevent and detect" a violation, (ii) the procedures were properly performed, and (iii) the supervisor had no reason to suspect any violation. [561]

p. 14-136
p. 14-137

In 1992, the SEC for the first time fined and suspended persons that had been executive officials, including the former chief executive officer of a broker-dealer, for their failure to provide adequate supervision of employees, which failure was, in the SEC's view, compounded by the officials' failure to report prior securities law violations to government authorities. [562] The Supervisory Release announcing the fines and suspensions was intended by the SEC to serve as a significant statement of its policies regarding supervision, and to put officers of broker-dealers generally on notice of the SEC's views. [563] The Supervisory Release states that the federal securities laws "require a vigorous response even to indications of wrongdoing." It continues by stating that even if supervisory knowledge "is limited to ‘red flags' or ‘suggestions' of irregularity," a supervisor cannot discharge his responsibilities by relying on employees' unverified statements denying wrongdoing; instead, a supervisor must independently "follow-up and review" the irregularity. Further, where more than one supervisor is involved in considering the actions to be taken in response to possible misconduct, there must be a "clear assignment" of follow-up responsibilities to particular individuals, with the chief executive officer of the broker-dealer bearing "ultimate responsibility." [564]

The Supervisory Release also states that a broker-dealer's in-house lawyers or compliance personnel who do not have actual supervisory authority over an individual engaged in wrongdoing may be found to be "supervisors" where the lawyer or compliance officer has the "requisite degree of responsibility, ability, or authority to affect the conduct of the employee whose behavior is at issue." Where the lawyer or compliance officer takes "appropriate steps but management fails to act," the lawyer or compliance officer "should consider" disclosure of the matter to the broker-dealer's board of directors, resignation or disclosure to regulatory authorities. [565]

Like the SEC, FINRA does not prescribe any particular system of supervision or specific procedures that must be implemented. This is left to the individual broker-dealer and is expected to vary with the size of and activities

p. 14-137
p. 14-138

engaged in by the broker-dealer. FINRA does, however, provide certain minimum standards for a system of internal supervision. [566] Each broker-dealer is required to (i) "establish and maintain a system [of written procedures] to supervise the activities of each associated person that is reasonably designed to achieve compliance with applicable securities laws and regulations, and with applicable FINRA and Municipal Securities Rulemaking Board ("MSRB") rules," [567] (ii) have in place mandatory cycles of independent inspections for its supervisory branch offices, nonsupervisory branch offices and unregistered locations, [568] (iii) designate and specifically identify to FINRA one or more principals charged with establishing, maintaining and enforcing a system of "supervisory control policies and procedures" that test, verify and, where necessary, create additional or amended supervisory procedures of the member broker-dealer, [569] (iv) designate and specifically identify to FINRA a principal to serve as chief compliance officer [570] and (v) have its chief executive officer execute an annual compliance and supervision certification with respect to the member broker-dealer's written compliance policies and supervisory procedures. [571]

[3] Recordkeeping and Financial Reporting

[a] Reports Concerning the Broker-Dealer

The Exchange Act's extensive books and records requirement [572] serves to assist the SEC and SROs in enforcing the Exchange Act's substantive regulatory requirements. [573] For example, the books and records requirement is an important

p. 14-138
p. 14-139

adjunct to the financial responsibility rules. [574] In addition, the records that a broker-dealer keeps of its own trades allow the SEC and the SROs to audit the broker-dealer's compliance with the trading, anti-manipulative and antifraud restrictions of the securities laws. [575] Moreover, the records that a broker-dealer keeps of employment applications allow the SEC to verify that the broker-dealer is in compliance with the rules related to associated persons.

Rules 17a-3 and 17a-4 are the most significant Exchange Act provisions regarding broker-dealer recordkeeping. [576] The records required by Rule 17a-3 include, in addition to ordinary balance sheets, a "blotter" [577] of all purchases and sales of securities, blotters for securities and cash received and disbursed, customer ledgers, records of every confirmation sent with respect to a securities transaction, records of every purchase and sale for the account of the broker-dealer and records of every brokerage order or other instruction given or received for the purchase or sale of securities, whether or not executed. Rule 17a-4 provides that a registered broker-dealer must, among other things, maintain its checkbooks, bank statements, bills, originals of all communications received and copies of all communications sent (including inter-office memoranda and communications) relating to its business and all written business agreements, as well as a description of the broker-dealer's procedures concerning its handling of fully paid and excess margin securities. The SEC has stated that the records required to be maintained under Rule 17a-4 are not limited to physical documents, and that internal (or "intra-office") electronic communications relating to a broker-dealer's "business as such" are covered by the rule. [578] The location in which and

p. 14-139

p. 14-140

the length of time for which a broker-dealer must keep records are also set out in Rule 17a-4. [579]

The financial statements and reports that must be prepared by a broker-dealer are described in Rule 17a-5, which was substantially amended in 2013. [580] Prior to 2013, the rule required, among other things, the preparation of an annual audited financial statement that included the following: (i) statement of financial condition, (ii) statement of income (loss), (iii) statement of cash flows, (iv) statement of changes in stockholders' equity, and (v) statement of changes in liabilities subordinated to claims of general creditors. [581]

Pursuant to the 2013 amendments, with respect to fiscal years ending on or after June 1, 2014, a broker-dealer must file certain annual reports within 60 calendar days of the end of its fiscal year. [582] Pursuant to the amended rule, all registered broker-dealers are required to file with the SEC an annual financial report containing the same types of information included in the financial statements required prior to the 2013 amendments (as described in the paragraph above). [583] Further, a PCAOB-registered independent public accountant must prepare a report based on an examination of the broker-dealer's financial report in

p. 14-140

p. 14-141

accordance with PCAOB standards. [584] In addition, a broker-dealer is required to file either a "compliance report" (if it holds customer funds or securities) or an "exemption report" (if it does not hold customer funds or securities) and a PCAOB-registered independent accountant must prepare a report based on an examination of certain statements in the broker-dealer's compliance report or exemption report. [585] All reports must be filed with the SEC and, if the broker-dealer is a member of SIPC, with SIPC. [586] The broker-dealer must also file a supplemental report on the status of its membership in SIPC (including a report of an independent public accountant that covers the SIPC annual general assessment reconciliation or exclusion from membership forms). [587]

The compliance report must contain (1) a statement as to whether the broker-dealer has established and maintained internal controls providing it with reasonable assurance that non-compliance with the financial responsibility rules will be prevented or detected on a timely basis, (2) a statement as to whether the internal controls were effective during the most recent fiscal year, [588] (3) a statement as to whether the controls were effective as of the end of the most recent fiscal year, (4) a statement as to whether the broker-dealer is in compliance with Rule 15c3-1 and Rule 15c3-3(e) as of the end of the most recent fiscal year, and (5) a statement as to whether the information the broker-dealer used to state whether it was in compliance with Rule 15c3-1 and Rule 15c3-3(e) was derived from the books and records of the broker-dealer. [589]

The exemption report must include, to the best knowledge and belief of the broker-dealer, (1) a statement that identifies the provision in Rule 15c3-3(k) under which the broker-dealer claimed an exemption from Rule 15c3-3, (2) a statement that the broker-dealer met the identified exemption provisions in Rule 15c3-3(k) throughout the most recent fiscal year without exception or that it met them as described in the report, and (3) if applicable, a statement that identifies each exception during the most recent fiscal year in meeting the identified provision in Rule 15c3-3(k) and that describes the nature of each exception. [590]

p. 14-141

p. 14-142

If the independent accountant determines during the course of preparing its reports that the broker-dealer is not in compliance with the financial responsibility rules or if it determines any material weakness exists in a broker-dealer's internal control over compliance with the financial responsibility rules, the accountant must immediately notify the broker-dealer, and if the notification concerns compliance with the financial protection rules, the broker-dealer must file a notification with the SEC and its designated examining authority. [591]

In addition, pursuant to the 2013 amendments, a broker-dealer is required to file a "Form Custody" with its designated examining authority within 17 business days after the end of each calendar quarter and within 17 business days after the end of the broker-dealer's fiscal year where that date was other than the end of a calendar year. [592] The Form contains nine categories of questions about the broker-dealer's custodial activities. [593]

Broker-dealers are also generally required to file with the SEC or with their designated examining authority certain financial statements (commonly known as "FOCUS Reports") at the end of each month and additional reports quarterly. [594] Within 105 days of the end of its fiscal year, a broker-dealer must provide each of its customers with an audited statement of financial condition and related notes. [595] A broker-dealer also has to provide each customer with an unaudited mid-year statement of financial condition. [596] If, in connection with its most recent annual reports, the report of the accountant covering the broker-dealer's compliance report identified a material weakness, the broker-dealer must include with its statement of financial condition a statement that one or more material weaknesses have been identified and that a copy of the accountant's report is available for the customer's inspection at the SEC's Washington, D.C. office and the regional office for the region where the broker-dealer has its principal place of business. [597]

[b] Reporting Rules Concerning Affiliates

p. 14-142

p. 14-143

Until 1992, the SEC's regulation of broker-dealers had been only of the registered entity and, through the NASD and other SROs, of its officers and employees. [598] SEC regulation of affiliated persons other than employees was generally limited to ensuring that the registered broker-dealer was not associated with or controlled by persons or entities deemed unfit for involvement in the securities business, such as persons who had been convicted of securities law violations.

In 1990, Congress adopted § 17(h) of the Exchange Act providing for maintenance of records and filing with the SEC of information to be specified by the SEC regarding affiliates of registered broker-dealers. [599] The records to be kept by the registered entity and the information to be filed relate to the activities of the affiliates and the resulting risks to, and potential impact on, the financial and operational condition of the registered broker-dealer. In mid-1992, the SEC adopted "Final Temporary" rules under § 17(h) that require registered broker-dealers to make and preserve records and to file quarterly reports with the SEC concerning certain of their affiliated entities. [600]

Rules 17h-1T and 17h-2T require a registered broker-dealer to maintain and file with the SEC reports concerning each of its "material associated persons" ("MAPs"), [601] a term that includes any associated person (other than a natural person) of a broker-dealer whose "business activities are reasonably likely to have material impact on the financial and operational conditions of the broker-dealer." [602]

The required information concerning MAPs falls into two broad categories: (i) organizational and risk management policies and information and (ii) financial information. The first category of required information includes an organizational chart of the holding company structure (showing all MAPs, as well as other associated persons), records regarding material legal or arbitration proceedings and copies of written policies governing such matters as credit controls, sources of funding and trading risks. Required financial information includes, for each MAP, its aggregate securities and commodities positions, positions in certain financial instruments involving off-balance sheet risk, its short-term borrowing positions (which is an area of particular SEC concern) and its real estate activities. In addition, consolidating and consolidated balance sheets and income and cash flow statements are required for the broker-dealer and the broker-dealer's ultimate holding company parent. Entities using a set of accounting principles other than U.S. GAAP are required to disclose and explain the type of accounting principles employed, but do not need to reconcile their financials to U.S. GAAP. With respect to MAPs that are subject to regulation by a foreign financial regulatory authority, the broker-dealer is required to maintain and to file with the SEC only the reports that the MAP files with its foreign regulator. [603] With respect to certain MAPs that are themselves regulated by U.S. banking or insurance authorities or by the CFTC, broker-dealers are required to file with the SEC only certain of the reports that the MAP files with its U.S. regulator and are not required to generate any additional reports to satisfy the requirements of Rule 17h-1T or 17h-2T. [604] Information reported to the SEC pursuant to Rules 17h-1T and 17h-2T is not publicly available, but is available to Congress and to U.S. and foreign regulators.

p. 14-144

p. 14-145

While the focus of § 17(h) of the Exchange Act and the rules thereunder has been the potential impact on registered broker-dealers of their affiliates' activities, the GAO has issued a report recommending that the SEC also use its authority under § 17(h) to gather any information necessary to determine whether regulation by the SEC of the unregulated affiliates of broker-dealers is warranted. [605] The GAO report notes, by way of example, that U.S. banking regulation applies not only to entities that are banks but to all of the companies in a bank holding company group. The SEC, in a letter responding to the GAO, said it did not believe that the SEC should expand its regulatory reach beyond broker-dealers, as this would impose unnecessary costs on broker-dealers and entangle the SEC in the regulation of nonsecurities activities. Nonetheless, the SEC stated that it would use the information that it gathers concerning broker-dealer affiliates to determine whether any such regulation might be useful. [606]

In 1999, Congress adopted § 17(i) of the Exchange Act to create a regulatory framework under which a holding company of a broker-dealer may voluntarily be supervised by the SEC as a "supervised investment bank holding company" ("SIBHC"). [607] In 2004, the SEC adopted rules implementing § 17(i). [608] Under these rules, an "investment bank holding company" that met certain requirements could have elected to become a SIBHC by filing a notice of intention with the SEC. [609] A SIBHC must comply with a number of requirements including requirements related to its group-wide internal risk management control system, recordkeeping and periodic reporting. The reporting requirements include a requirement to report consolidated computations of allowable capital and risk allowances consistent with the standards published by the Basel Committee on Banking Supervision. Because certain of the SIBHC requirements would duplicate requirements under the risk assessment rules, the SEC provided

p. 14-145

p. 14-146

an exemption from Rules 17h-1T and 17h-2T for a broker-dealer that is affiliated with a SIBHC. [610]

In 2010, the Dodd-Frank Act deleted § 17(i) of the Exchange Act, terminating the SIBHC program and replacing it with a new regulatory framework for voluntary supervision of securities holding companies (*i.e.*, nonbank companies owning one or more registered broker-dealers) by the Board. This supervisory framework is intended to satisfy requirements that securities holding companies be subject to comprehensive consolidated supervision in the United States. [611] Consequently, the SEC rescinded its rules implementing § 17(i) of the Exchange Act and providing exemptions from Rules 17h-1T and 17h-2T. [612] Upon registering with the Board, the supervised securities holding companies ("SSHCs") would become subject to all of the examination, supervision and enforcement regulations applicable to registered bank holding companies, other than the restrictions on nonbanking activities set forth in § 4 of the Bank Holding Company Act.

In June 2012, the Board issued a final rule implementing the new SSHC regime and, in particular, outlining the requirements that an SSHC must satisfy to make an effective registration. [613] The rule requires a company electing to be a "securities holding company" [614] to submit a form containing organizational information, financial reports and income statements, a description of the methods used to monitor and control its operations, a description of the bank regulatory systems existing in the home country of any of its foreign bank subsidiaries and a description of any other regulatory capital framework to which

p. 14-146

p. 14-147

the company is subject. [615] Upon effective registration, an SSHC is supervised and regulated as if it were a bank holding company (*e.g.*, submitting the same reports and subject to the same examination procedures, supervisory guidance and capital standards), except that the nonbanking restrictions contained in § 4 of the Bank Holding Company Act will not apply to SSHCs. [616]

[c] Large Trader Reporting Rules and Electronic Submission of Trading Data

In 2000, the SEC adopted Rule 17a-25 under the Exchange Act, which is intended to codify the SEC's electronic submission requirements with respect to trading data and enhance the SEC's ability to monitor the securities activities of large traders. [617] Rule 17a-25 requires registered broker-dealers to submit electronically to the SEC, upon request, certain information with respect to customer and proprietary securities trading. Among other things, the rule requires that broker-dealers electronically provide information regarding prime brokerage identifiers, average price account identifiers and identifiers used by depository institutions in order to enable the SEC to identify double reporting and create uniformity in reporting.

In 2011, the SEC, in acknowledging the "increasingly prominent role in the securities markets" of large traders, declared Rule 17a-25 ineffective and inadequate at monitoring large trader activity, specifically faulting the current system for its time delays and inability to identify and track large traders, [618] and adopted Rule 13h-1 under the Exchange Act. Among other things, Rule 13h-1 requires a U.S.-registered broker-dealer to maintain specified account and transaction records for persons (including foreign entities) who have identified themselves as "large traders" or persons whom the broker-dealer has "reason to know" are large traders based upon the aggregate transactions that the trader has effected through the broker-dealer. [619] Rule 13h-1 is intended to enable the SEC to collect market information necessary to reconstruct the activities of large traders during

p. 14-147

p. 14-148

periods of market stress, such as the rapid declines in the U.S. securities markets during October of 1987 and 1989 and to support the SEC's investigative and enforcement activities. [620]

The rule requires U.S.-registered broker-dealers to record and report electronically to the SEC all transactions effected directly or indirectly by or through accounts of large traders if the trading activity for a particular day equals or exceeds the "reporting activity level" of 100 shares. [621] In addition, broker-dealers must monitor each person whom the broker-dealer "knows or has reason to know" is a large trader where such person has not identified itself as such to the SEC in compliance with the large trader requirements of Rule 13h-1. Such a determination may be based solely by taking into account the transactions of such person in NMS securities effected by or through such broker-dealer. A broker-dealer may rely on its conclusion that it does not know or have reason to know that person is a large trader so long as the broker-dealer (i) has no reason to expect that any of its customers' transactions approach the identifying activity level or does not have actual knowledge that a person is a large trader and (ii) has implemented policies and procedures "reasonably designed to identify customers whose transactions at the broker-dealer equal or exceed the identifying activity level." Absent these circumstances, the broker-dealer is obligated to notify such person that it may be a large trader and its potential reporting obligations under the rule. [622]

Footnotes

551 *See*, *e.g.*, § 14.07[1][b] regarding the special procedures broker-dealers are required to establish to prevent insider trading. SEC-registered broker-dealers must also have detailed anti-money laundering compliance procedures. *See* § 14.07[4].

552 Although, for convenience, the term "employee" is sometimes used in this section, the Exchange Act and FINRA rules generally use the term "associated persons." Persons who are not employees in the labor law sense of that term (such as independent contractors) may be deemed "employees" or "associated persons" of a broker-dealer. *See*, *e.g.*, NASD Membership and Registration Rules, Rules 1021 and 1031, FINRA MANUAL.

553 *See* § 14.07[3][b]. In addition, Rule 17f-2 under the Exchange Act contains a requirement, subject to certain exceptions, that employees of a broker-dealer be fingerprinted and their fingerprints submitted to the U.S. Attorney General.

554 *See*, *e.g.*, SEC Release No. 34-6872 (Aug. 8, 1962) (casual interviews and a perfunctory telephone call to a former employer are not evidence of "reasonable care" in hiring); *see also* Remarks of Mary L. Schapiro, then-Commissioner of the SEC, Investor Protection: The Role of the SEC, the SROs, and the Industry in Preventing Sales Practice Abuses (Oct. 9, 1992) (broker-dealer hiring procedures "should be designed to uncover and disqualify from employment" individuals having a bad disciplinary history).

570 FINRA Rule 3130(a), FINRA MANUAL.

571 FINRA Rule 3130(b), FINRA MANUAL.

572 Certain of these requirements may not apply to FCMs that have notice-registered as broker-dealers for the limited purpose of trading security futures products. *See* §§ 15(b)(11)(B) and 17(b)(4) of the Exchange Act; U.S. REGULATION OF THE INTERNATIONAL SECURITIES AND DERIVATIVES MARKETS, TWELFTH EDITION, DERIVATIVES MARKETS, § 4.07[2].

573 The SEC may prescribe the books and records that a broker-dealer is required to keep. *See* § 17(a) of the Exchange Act. The recordkeeping, record preservation and financial reporting requirements of registered government securities broker-dealers are generally identical to those imposed upon registered broker-dealers. *See* Treas. Reg. § 404.2. Financial institutions registered as government securities broker-dealers by notice to an appropriate regulatory agency are, subject to certain conditions, generally exempted from the Exchange Act's recordkeeping requirements. Notwithstanding this general exemption, such government-noticed financial institutions must keep customer and securities positions ledgers and must make a record of periodic securities count differences. *See* Treas. Reg. § 404.4(a)(1).

574 *See*, *e.g.*, Rule 17a-3 of the Exchange Act (requiring the maintenance of a transaction blotter); Rule 17a-13 (requiring quarterly securities counts and verification of accuracy of records as against physical counts); *see also* SEC Litigation Release No. 34-13533 (Feb. 25, 1993) (disciplining U.S. broker-dealer subsidiary of a foreign broker-dealer for failure to keep adequate financial records, which failure permitted the U.S. broker-dealer to conceal its capital deficiency).

575 *See*, *e.g.*, SEC Release No. 34-25125 (Nov. 16, 1987) (suspending a broker-dealer for failure to comply with, among other things, Rule 17a-3 of the Exchange Act, which made it impossible for the SEC to reconstruct the broker-dealer's activities).

576 *See generally* American Institute of Certified Public Accountants, Brokers and Dealers in Securities: Audit and Accounting Guide (2015) (description of the records required by Rules 17a-3 and 17a-4 under the Exchange Act); SEC Release No. 34-11935 (Dec. 17, 1975).

577 The term "blotter" is used in the securities industry as the term "journal" is more commonly used in accounting for other industries.

578 *See* SEC Release Nos. 34-51200 (Feb. 14, 2005) and 34-46937 (Dec. 3, 2002) (imposing penalties against various broker-dealers for failure to preserve electronic mail communications including inter-office memoranda and communications). The SEC has stated that for purposes of Rule 17a-4 under the Exchange Act, "broker-dealers must retain only those e-mail and Internet communications (including inter-office communications) which relate to the broker-dealer's 'business as such.'" SEC Release No. 34-38245 (Feb. 5, 1997). The reference to "inter-office memoranda and communications" in Rule 17a-4(b)(4) is deemed also to refer to "intra-office" memoranda and communications.

In 2006, the SEC brought a settled civil action against Morgan Stanley & Co. Inc. for repeated failures to produce e-mails during the IPO and research analyst investigations conducted by the SEC from December 11, 2000 through at least July 2005. The SEC complaint alleged that (i) Morgan Stanley did not diligently search for back-up tapes containing responsive e-mails until 2005, (ii) failed to produce responsive e-mails because the company over-wrote back-up tapes, and (iii) made numerous misstatements regarding the status and completeness of its productions, the unavailability of certain documents, and its efforts to preserve requested e-mails. Morgan Stanley consented to a permanent injunction and a $15 million civil penalty, and agreed to adopt and implement policies, procedures and training on the preservation and production of e-mail communications. *See SEC v. Morgan Stanley & Co.*, SEC Litigation Release No. 19693 (May 10, 2006).

579 The SEC has adopted several amendments to Rules 17a-3 and 17a-4 designed to require retention of certain records of value to state regulators. Under the amendments, which became effective in 2003, broker-dealers are required, among other things, to make certain records available in local offices or to produce the records promptly at the request of a securities regulatory authority. *See* SEC Release No. 34-44992 (Sept. 26, 2001); *see also* SEC Release No. 34-47910 (May 22, 2003) (clarifying certain issues relating to broker-dealer books and records rules, some of which have been raised as a result of the amendments that were adopted on September 26, 2001).

580 *See generally* SEC Release No. 34-11935 (Dec. 17, 1975); SEC Release No. 34-70073 (July 31, 2013).

581 The annual audited financial statements, prepared in accordance with U.S. GAAP applicable to broker-dealers, had to be filed with the SEC within 60 days after the end of a fiscal year. Copies of such statements generally had to be provided to SROs of which the broker-dealer was a member and to state regulatory agencies in states in which the broker-dealer was registered.

582 *See generally* SEC Release No. 34-70073 (July 31, 2013).

583 Rule 17a-5(d)(2) under the Exchange Act.

584 Rule 17a-5(e) under the Exchange Act.

585 Rule 17a-5(d)(3) and (4) under the Exchange Act.

586 Rule 17a-5(d)(6) under the Exchange Act. In addition, copies must be made for any SRO of which the broker-dealer is a member, unless the SRO waives this requirement. Rule 17a-5(d)(6) under the Exchange Act.

587 Rule 17a-5(e)(4) under the Exchange Act.

588 A broker-dealer will be unable to conclude that the controls were effective if there were one or more material weaknesses (*i.e.*, deficiencies such that there is a reasonable possibility that non-compliance with (1) Rule 15c3-1 or Rule 15c3-3(e) will not be prevented or detected on a timely basis, or (2) Rule 17a-13 or any account statement rule will not be prevented or detected on a timely basis).

589 Rule 17a-5(d)(3) under the Exchange Act.

590 Rule 17a-5(d)(4) under the Exchange Act.

591 Rule 17a-5(h) under the Exchange Act.

592 Rule 17a-5(a)(4) under the Exchange Act.

593 17 C.F.R. 249.639.

594 Rule 17a-5(a) under the Exchange Act.

595 Rule 17a-5(c)(2) under the Exchange Act.

596 The SEC has adopted amendments to Rule 17a-5 that provide a conditional exemption to the requirement that a broker-dealer send its full balance sheet and certain other financial information to each of its customers twice a year. Under the amendments, a broker-dealer may send its customers only certain information regarding its net capital so long as it also provides customers with a toll-free number to call for a free copy of its full balance sheet and makes its full balance sheet available to customers over the Internet. The amendments codify relief the SEC has provided under a voluntary pilot program that began in 1999.

SEC Release No. 34-48272 (Aug. 1, 2003).

597 Rule 17a-5(c)(2)(iv) under the Exchange Act.

598 *See* § 14.07[3][b].

599 Market Reform Act of 1990, Pub. L. No. 101-432; 104 Stat. 963 (1990).

600 *See* Rules 17h-1T and 17h-2T under the Exchange Act; *see also* SEC Release No. 34-30929 (July 16, 1992); SEC Release No. 34-29635 (Aug. 30, 1991) (solicitation of public comment). The rules provide limited exemptions for broker-dealers that are permitted to maintain net capital of less than $250,000 or that do not carry customer accounts and that are permitted to have capital of less than $20 million. *See* Rules 17h-1T(d) and 17h-2T(b). Like the SEC's net capital rule amendments instituted in 1991 that prevent sudden withdrawals of capital from a broker-dealer, *see* § 14.07[2][b][ii], these disclosure requirements, which originally were considered by Congress and the SEC as a reaction to the impact of the financial difficulty of the parent holding corporation on its registered broker-dealer subsidiary Drexel and the rapid collapse of Drexel immediately following the bankruptcy of its parent, also now in part reflect a more generalized concern regarding the financial condition of a broker-dealer's affiliates and the material impact that activities of those affiliates could have on the broker-dealer. *See* SEC Release No. 34-29635 (Aug. 30, 1991). For a discussion of other regulatory developments as a result of Drexel's failure, *see* § 14.07[2][b][ii].

601 A broker-dealer that receives SEC approval to calculate market and derivatives-related credit risk deductions in accordance with Appendix E of the SEC's net capital rule, Rule 15c3-1(e) under the Exchange Act, and that is affiliated with an ultimate holding company that has a principal regulator is exempt from Rules 17h-1T and 17h-2T. Rules 17h-1T(d)(4) and 17h-2T(b)(4) under the Exchange Act. For a discussion of the requirements applicable to broker-dealers authorized to use risk-based capital deductions, *see* § 14.07[2][b][iii].

602 *See* SEC Release No. 34-30929 (July 16, 1992), 57 Fed. Reg. 32,159, 32,161 (July 21, 1992). Factors to be considered in determining whether a particular associated person is a "MAP" include: (i) the legal relationship between it and the broker-dealer, (ii) its and the broker-dealer's financing requirements and the degree, if any, to which they are financially interdependent, (iii) the degree, if any, to which the broker-dealer relies on the associated person for operational support or services, (iv) the riskiness of its activities, and (v) the extent to which the associated person has the authority or the ability to cause a withdrawal of capital from the broker-dealer. *See* Rule 17h-1T(a)(2) under the Exchange Act.

603 *See* Rules 17h-1T(c) and 17h-2T(d). The SEC staff has informally indicated that it does not wish to be deluged with reports filed with foreign regulators and that broker-dealers should file only reports in the nature of FOCUS Reports (*see* § 14.08[3][a]) that will allow the SEC to determine the financial condition of the foreign entity. Any such reports must be translated into English.

604 *See* Rules 17h-1T(b) and 17h-2T(c); *see also Institute of International Bankers* (avail. Sept. 25, 1992) (providing that certain reports filed by foreign banking groups with U.S. banking regulators need not be filed with the SEC, although the SEC will have access through the banking regulator to the report).

605 *See* GAO/GGD-92-70, SECURITIES FIRMS: ASSESSING THE NEED TO REGULATE ADDITIONAL FINANCIAL ACTIVITIES at 5-6 (Apr. 21, 1992).

606 *See* Letter, from William H. Heyman, Director of the Division of Market Regulation, SEC, to Mr. Richard L. Fogel, Assistant Comptroller General, GAO (Feb. 26, 1992).

607 *See* § 231 of the GLB Act.

608 *See* SEC Release No. 34-49831 (June 8, 2004).

609 Section 17(i)(5)(A) of the Exchange Act defined "investment bank holding company" to mean any person other than a natural person that owns or controls one or more brokers or dealers and the associated persons of the investment bank holding company. Section 17(i)(1)(A) of the Exchange Act provided that an investment bank holding company could only have elected to become supervised as a SIBHC if it were *not* an affiliate of an insured bank (with certain exceptions) or a savings association; a foreign bank, foreign company, foreign bank branch agency, or a state-chartered commercial lending company; or a foreign bank

that controls an Edge Act Corporation. Given the limitations on the types of entities with which an investment bank holding company could have been affiliated, the SIBHC regime was expected to have little practical utility.

610 *See* Former Rules 17h-1(d)(5) and 17h-2(d)(5) under the Exchange Act.

611 § 618 of the Dodd-Frank Act; *see also* SEC, Rescission of Supervised Investment Bank Holding Company Rules, 78 Fed. Reg. 42,863 (July 18, 2013).

612 *See* SEC, Release No. 34-69979 (July 12, 2013).

613 Federal Reserve System, Supervised Securities Holding Company Registration, 77 Fed. Reg. 32,881 (June 4, 2012).

614 "Securities holding company" is defined in the rule as:

> (i) [a]ny company that directly or indirectly owns or controls, is controlled by, or is under common control with, one or more brokers or dealers registered with the [SEC]; and (ii) [i]s required by a foreign regulator or provision of foreign law to be subject to comprehensive consolidated supervision.…A securities holding company does not include a company that is—(i) A nonbank financial company supervised by the Board pursuant to title I of the [Dodd-Frank Act]; (ii) An insured bank (other than an institution described in subparagraphs (D), (F), or (H) of section 2(c)(2) of the [Bank Holding Company Act]) or a savings association; (iii) [a]n affiliate of an insured bank (other than an institution described in subparagraphs (D), (F), or (H) of section 2(c)(2) of the [Bank Holding Company Act]) or an affiliate of a savings association; (iv) [a] foreign bank, foreign company, or company that is described in section 8(a) of the [International Banking Act]; (v) [a] foreign bank that controls, directly or indirectly, a corporation chartered under section 25A of the Federal Reserve Act; or (vi) [c]urrently subject to comprehensive consolidated supervision by a foreign regulator.

12 C.F.R. § 241.2(a).

615 77 Fed. Reg. 32,881, 32,882 (June 4, 2012).

616 *See* 12 C.F.R. § 241.3(b)(3).

617 SEC Release No. 34-44494 (June 29, 2001).

618 *See* SEC Release No. 34-64976 (July 27, 2011), 76 Fed. Reg. 46,960, 46,963 (Aug. 3, 2011).

619 *See* SEC Release No. 34-64976 (July 27, 2011). As defined in Rule 13h-1 under the Exchange Act, a "large trader" is any person (including any foreign person other than a foreign central bank) who directly or indirectly exercises investment discretion over and effects transactions for or on behalf of its own accounts or accounts that it controls in NMS securities by or through a registered broker-dealer in an amount of at least 2,000,000 shares or $20 million during any calendar day, or at least 20,000,000 shares or $200 million during any calendar month. (The transactions of affiliated entities in some instances would be required to be aggregated to determine whether these limits had been reached.) In addition, persons engaged in program trading to any extent would be deemed large traders.

The Treasury has adopted large position rules that establish recordkeeping and reporting requirements for foreign and domestic entities that control large positions (*i.e.*, above $2 billion) in certain Treasury securities. 61 Fed. Reg. 48,338 (Sept. 12, 1996), codified at Treas. Reg. § 420. In 2002, the Treasury adopted amendments to its large position rules to increase reporting about these positions. *See* 67 Fed. Reg. 77,411 (Dec. 18, 2002).

620 SEC Release No. 34-64976 (July 27, 2011).

621 The "reporting activity level" is defined as "(i) [e]ach transaction in NMS securities, effected in a single account during a calendar day, that is equal to or greater than 100 shares; (ii) any other transaction in NMS securities, effected in a single account during a calendar day, that a registered broker-dealer may deem appropriate; or (iii) such other amount that may be established by order of the [SEC] from time to time." Rule 13h-1(a)(8) under the Exchange Act.

622 *See* SEC Release No. 34-64976 (July 27, 2011), 76 Fed. Reg. 46,960, 46,981 (Aug. 3, 2011) ("The Rule does not require broker-dealers to definitively determine who is, in fact, a large trader.").

U.S. Regulation of the International Securities and Derivatives Markets, § 14.09, OTC DERIVATIVES DEALERS AND TRANSACTIONS IN SECURITY FUTURES PRODUCTS

U.S. Regulation of the International Securities and Derivatives Markets

[1] OTC Derivatives Dealers

Prior to the Dodd-Frank Act, the SEC had adopted a series of rules in 1998 that established a limited purpose broker-dealer registration category for entities (referred to as "OTC derivatives dealers") that engage in over-the-counter

p. 14-149

derivative instruments that are securities, but that do not engage in the broad range of securities activities typically associated with full purpose broker-dealers. [623] Due to the Dodd-Frank Act's creation of a comprehensive regulatory scheme for swaps and security-based swaps, the SEC may repeal or significantly modify this category. However, as of the date of publication, the SEC has not done so.

In adopting the series of rules that established the limited purpose broker-dealer registration category for OTC derivatives dealers, the SEC noted that the "traditional" broker-dealer regulatory structure under the Exchange Act has not permitted U.S. securities firms to operate a consolidated OTC derivatives business in the United States, involving both securities and nonsecurities instruments, on terms that are competitive with those offered by U.S. banks and foreign derivatives dealers. [624] Instead, current regulatory inefficiencies have, in many instances, caused U.S. securities firms to separate their securities derivatives activities (which they often conduct from abroad) from their nonsecurities derivatives activities (which they often place in unregistered U.S. affiliates), hindering their ability to manage risk and compete effectively in the global OTC derivatives markets.

The rules are intended to create a more practical and flexible commercial and regulatory framework under which U.S. securities firms may establish separately capitalized entities within the United States that engage in dealer activities in both securities and nonsecurities derivative instruments subject to specially tailored capital, margin and other requirements.

Registration as an OTC derivatives dealer is available to firms that are affiliated with a full purpose broker-dealer and that limit their securities derivatives activities to:

- engaging in dealer activities in "eligible OTC derivative instruments" that are securities;
- issuing and reacquiring securities that are issued by the dealer, including warrants on securities, hybrid securities and structured notes;
- engaging in "cash management securities activities";
- engaging in "ancillary portfolio management securities activities"; and
- engaging in such other securities activities as the SEC may designate by order. [625]

p. 14-149

p. 14-150

Registration as an OTC derivatives dealer is effected under § 15(b) of the Exchange Act by the filing of Form BD with the SEC.

An OTC derivatives dealer generally must effect its securities transactions through an affiliated full-purpose broker-dealer that is subject to applicable SRO sales practice requirements, except in the case of transactions with certain types of professional counterparties. [626] In addition, subject to certain enumerated exceptions, the rules require contacts with customers on behalf of the OTC derivatives dealer to be conducted by registered representatives of its affiliated full purpose broker-dealer.

OTC derivatives dealers are able to calculate their regulatory capital under Appendix F to Rule 15c3-1 under the Exchange Act rather than using the securities haircut provisions otherwise applicable to full purpose broker-dealers. [627] Extensions of credit by an OTC derivatives dealer are exempt from Regulation T (governing extensions of credit by broker-dealers), provided that the OTC derivatives dealer complies with the requirements of Regulation U (governing extensions of credit by banks and other nonbroker-dealers). In addition, OTC derivatives dealers are exempt from the provisions of SIPA, are not required to become members of an SRO and are exempted from a number of other regulatory requirements applicable to full-purpose broker-dealers. [628]

[2] Broker-Dealer Transactions in Security Futures Products

Transactions in security futures products are subject to a unique dual regulatory structure under the Exchange Act and the CEA. As part of this regime, intermediaries that engage in brokerage or dealing activities with respect to these

p. 14-150

p. 14-151

products are generally required to register both as a broker-dealer under the Exchange Act and as an FCM or introducing broker under the CEA. [629]

Footnotes

623 SEC Release No. 34-40594 (Oct. 23, 1998), *as amended by* SEC Release No. 34-40594A (Nov. 5, 1998) (containing minor corrections). The OTC derivatives dealers regulatory regime is commonly referred to as "BD Lite."

624 *See* SEC Release No. 34-40594 (Oct. 23, 1998).

625 *See* SEC Release No. 34-40594 (Oct. 23, 1998).

626 Because of this requirement, FINRA member broker-dealers that execute OTC options transactions for OTC derivatives dealers must comply with the option position limit and exercise requirements of FINRA Rule 2360 (the "position limit rules") with respect to such transactions. In its release adopting the OTC derivatives dealer regime, the SEC indicated that the NASD should consider an exemption from the position limit rules for those types of transactions. *See* SEC Release No. 34-40594 (Oct. 23, 1998). On October 12, 2004, the NASD (responding to a request from five broker-dealer affiliates of OTC derivatives dealers) submitted a proposed amendment to NASD Rule 2860 to provide a delta hedging exemption from the position limit rules for OTC derivatives dealers affiliated with NASD member broker-dealers if certain conditions are satisfied. The proposal was approved by the SEC on November 29, 2004, *see* SEC Release No. 34-50748 (Nov. 29, 2004), and subsequently adopted as part of the consolidated FINRA rulebook as FINRA Rule 2360, effective February 17, 2009. FINRA Regulatory Notice 08-78 (Dec. 2008).

627 Appendix F permits OTC derivatives dealers to calculate market risk capital charges using proprietary value-at-risk models with respect to certain asset categories and to take certain specified credit risk capital charges. Appendix F is generally consistent with the Basel Capital Accord and the capital rules of U.S. banking regulators. *Cf.* § 14.07[2][b] for a discussion of how net capital is calculated for full purpose broker-dealers.

628 To date, only a few firms have elected to register as OTC derivatives dealers. *See* SEC Release No. 34-47570 (Mar. 26, 2003), 68 Fed. Reg. 15,488, 15,489 n.7 (Mar. 31, 2003).

629 For a discussion of this dual regulatory structure, *see* U.S. REGULATION OF THE INTERNATIONAL SECURITIES AND DERIVATIVES MARKETS, TWELFTH EDITION, DERIVATIVES MARKETS, § 4.07[3].

U.S. Regulation of the International Securities and Derivatives Markets, § 14.10, ELECTRONIC TRADING SYSTEMS

U.S. Regulation of the International Securities and Derivatives Markets
1 Edward F. Greene, Alan L. Beller, Edward J. Rosen, Leslie N. Silverman, Daniel A. Braverman, Sebastian R. Sperber, Nicolas Grabar & Adam E. Fleisher, U.S. Regulation of the International Securities and Derivatives Markets § 14.10 (11th and 12th Editions 2014-2017)

Click to open document in a browser

In 1998, the SEC significantly revised the framework for the regulation of electronic trading systems. In particular, the SEC adopted new rules and rule amendments permitting certain "alternative trading systems" either to register as a national securities exchange or to register as a broker-dealer and comply with the requirements of Regulation ATS. [630] The SEC also adopted new recordkeeping requirements for "internal broker-dealer systems."

[1] Alternative Trading Systems

In the ATS Release, the SEC expanded its interpretation of an "exchange" under the Exchange Act to include a broad range of electronic trading systems, [631] while permitting certain "alternative trading systems" to continue to be regulated as broker-dealers, subject to compliance with a number of additional requirements imposed by Regulation ATS based on their activities and trading volume. [632]

Under Regulation ATS, an "alternative trading system" is defined to mean any organization, association, person, group of persons, or system that

p. 14-152

(i) constitutes, maintains, or provides a market place or facilities for bringing together purchasers and sellers of securities or for otherwise performing the functions commonly performed by a stock exchange (within the meaning of Rule 3b-16 under the Exchange Act) and (ii) does not (a) set rules governing the conduct of subscribers (other than the conduct of subscribers' trading on the system) or (b) discipline subscribers (other than by exclusion from trading). [633]

An alternative trading system subject to Regulation ATS must:

- register with the SEC as a broker-dealer;
- file with the SEC a notice of initial operation on Form ATS and quarterly transaction reports on Form ATS-R, as well as reports of any material changes to the operation of its system;
- maintain certain records, including detailed information about all orders and transactions;
- establish adequate safeguards and procedures to protect its subscribers' confidential trading information;
- cooperate with SEC and SRO examinations, inspections and investigations, including any examination, inspection or investigation of its subscribers; and
- refrain from using the words "exchange," "stock market" or similar terms in its name.

In addition to these basic requirements, Regulation ATS imposes certain additional requirements on alternative trading systems with significant trading volume. An alternative trading system that displays subscriber orders and has 5% or more of the average daily trading volume in certain equity securities during four of the six preceding calendar months must arrange with a registered securities exchange or FINRA to disseminate its best priced orders in those securities through the public quote stream and provide broker-dealers who have access to such exchange or FINRA with the ability to effect transactions with respect to those orders. [634] An alternative trading system that displays subscriber orders and has 5% or more of the average daily trading volume in certain equity securities or categories of debt securities during four of the six preceding calendar months must establish written standards for granting access to trading, not unreasonably prohibit or limit access by applying such standards in an unfair or discriminatory

p. 14-152

p. 14-153

manner, and make records and reports regarding grants and denials of access. [635] An alternative trading system with 20% or more of the average daily trading volume of certain equity securities or categories of debt securities must also satisfy certain system capacity, integrity and security requirements of Regulation ATS. [636]

Trading systems (i) whose activities are limited to routing orders to a registered securities exchange, market operated by FINRA or a broker-dealer for execution, or (ii) that automate the order routing and execution mechanisms of a single dealer or market maker, are expressly excluded from the revised interpretation of the term "exchange" and are not subject to Regulation ATS. [637]

In 2010, the SEC adopted Rule 15c3-5, under which broker-dealers that are able to trade securities on an exchange or ATS as members or subscribers, as well as broker-dealer operators of an ATS that provide access to the ATS to a nonbroker-dealer, generally are required to establish, document, and maintain a system of risk management controls and supervisory procedures reasonably designed both to systemically limit the financial exposure of the broker-dealer that could arise as a result of market access and to ensure compliance with all regulatory requirements applicable in connection with market access. [638] Specifically, the required controls and procedures

- must prevent the entry of orders unless there has been compliance with all regulatory requirements applicable prior to order entry;
- must prevent the entry of orders that (a) exceed appropriate pre-set credit or capital thresholds, (b) appear to be erroneous, or (c) the broker-dealer or customer is restricted from trading;
- must restrict market access technology and systems to authorized persons;
- must assure appropriate surveillance personnel receive immediate post-trade execution reports; and

p. 14-153

p. 14-154

- must be under the direct and exclusive control of the broker-dealer with market access (unless the requirements of certain limited exceptions applicable when the customer is a broker-dealer are satisfied).

In addition, broker-dealers with market access must establish, document, and maintain a system for regularly reviewing the effectiveness of the required controls and procedures; the system must include, among other things, an annual review of the broker-dealer's business activity in connection with market access and an annual certification by the broker-dealer's CEO that the required review has been conducted and the required controls and procedures comply with Rule 15c3-5. A limited exception to Rule 15c3-5 applies to broker-dealers that provide outbound routing services to an exchange or ATS to prevent "trade-throughs" pursuant to Regulation NMS Rule 611, discussed below.

[2] Online Brokerage and Electronic Communications

The growth of electronic trading systems has led to regulatory concern regarding the actions of broker-dealers who participate in and conduct business over such systems and on the Internet. While all rules of the SEC and the SROs apply to such online broker-dealers, regulators have expressed concerns regarding how the rules can be enforced and monitored given the lack of paper records, the speed of transactions and the transitory nature of many online businesses. In light of the use of the Internet to facilitate communications with customers, the SEC has provided guidance with respect to specific online issues including the provision of electronic confirmations of trades and the delivery of prospectuses and other materials over the Internet and through electronic mail. [639]

In 1999, the SEC issued a report [640] with respect to the subject of technology and its impact on retail brokerage. The report consists of an overview of the issues raised by online brokerage for investors and the SEC and explores how online brokerage impacts the SEC's traditional regulatory scheme. It details the findings from three roundtables conducted with participants from full-service and discount, online and offline brokerage industry representatives, securities practitioners, academics, regulators, market participants and investors. The report recommends that the SEC examine information from broker-dealers

p. 14-154

p. 14-155

regarding how they conduct research and how they then customize information for customers in reference to suitability of investments. The report further recommends that the SEC take steps to require that broker-dealers ensure more adequate systems capacity, including contingency plans, keep records of significant systems outages, testing and evaluation and provide plain English disclosure of the risks of systems delays or outages in new account documentation. Also, the report makes recommendations regarding best execution, dissemination of real-time market data, investor education, online discussion forums, privacy and compensation for entities that are not registered as broker-dealers. [641]

In addition, as part of its continuing focus on electronic trading systems, the SEC's Office of Compliance Inspections and Examinations published a summary of its findings and recommendations resulting from its examination of broker-dealers who offer online trading. [642] The report provides examples of sound practices, as well as areas where some online broker-dealers could, through self-evaluation in line with the report, enhance their practices. In the report, the SEC staff recommends that broker-dealers offering online trading consider:

- the information provided to customers online about how orders are executed, how margin works and the possibility of system delays;
- the objectivity of their advertising;
- procedures for ensuring that customers receive best execution;
- procedures for ensuring adequate operational capability to handle customer trading volume;
- security measures to protect customer privacy and funds; and
- procedures to supervise employees' use of Internet communications. [643]

In 2014, the SEC began to emphasize cybersecurity, conducting examinations of broker-dealers and investment advisers. [644] In 2015, the SEC published the results of examinations of 57 registered broker-dealers and 49 registered investment advisers, and determined that examining these firms will be a central function of the SEC's cybersecurity initiative moving forward. [645]

[3] Internal Broker-Dealer Systems

p. 14-155

p. 14-156

In 1998, the SEC adopted recordkeeping requirements for "internal broker-dealer systems" that are sponsored by a registered broker-dealer. [646] Under the rules, an "internal broker-dealer system" is defined to mean any facility (other than a national securities exchange, an exempt exchange or an alternative trading system) that provides a mechanism, automated in full or in part, for collecting, receiving, disseminating or displaying system orders and facilitating agreement to the basic terms of a purchase or sale of a security between a customer and the sponsor, or between two customers of the sponsor, through use of the internal broker-dealer system or through the broker-dealer sponsor of the system. [647] Sponsors of such systems must maintain a record of the system's customers, daily summaries of trading in the system and time-sequenced records of each transaction effected through the system. Unlike former Rule 17a-23, these rules do not require "internal broker-dealer systems" to file reports with the SEC. [648]

[4] Day Trading

Day trading is a strategy employed by retail investors who are not registered as broker-dealers or as registered representatives who trade stock at a firm (a "day trading firm") that allows the investor real time access to the major stock exchanges. Day trading is characterized by multiple intra-day trades executed to take advantage of small price movements in stocks. Stocks are generally held for seconds or hours and generally positions are closed out overnight for small profits or losses. In 2000, the SEC released a study that reported the findings of a year-long investigation by the SEC's Office of Compliance Inspections and Examinations (in cooperation with the NASD and NYSE) of 47 registered broker-dealers providing day trading facilities to the general public (the "day trading study"). [649] The purpose of the examination was to review each firm's compliance with federal securities laws and SRO rules. In addition, examiners reviewed how day trading activities fit within the existing securities regulatory structure and identified regulatory issues that might require further consideration. The examination revealed that many firms need to take steps to improve

p. 14-156

p. 14-157

compliance with net capital, short selling and supervision rules. The day trading study focused in particular on the lack of information provided to customers concerning the risks of day trading. FINRA, in part in response to the day trading study, requires that prior to opening a day trading account a broker-dealer furnish to the customer a risk disclosure statement and approve the customer for day trading only after analyzing the customer's investment objectives; trading experience and knowledge; financial situation; marital, tax and employment status; and age to ensure that a day trading strategy is appropriate for the customer. [650] FINRA also has special day trading margin requirements designed to protect broker-dealers against their intra-day exposures to day traders. [651]

[5] National Market System

Section 11A(a) of the Exchange Act, enacted in 1975, directs the SEC to facilitate the development of a national market system for securities in accordance with Congressional findings and objectives set forth therein and with due regard for the public interest, the protection of investors, and the maintenance of fair and orderly markets. [652] The Congressional findings and objectives include that it is in the public interest and appropriate for the protection of investors and the maintenance of fair and orderly markets to assure:

1. economically efficient execution of securities transactions;
2. fair competition among brokers and dealers, among exchange markets, and between exchange markets and markets other than exchange markets;

p. 14-157

p. 14-158

3. the availability to brokers, dealers, and investors of information with respect to quotations for and transactions in securities;
4. the practicability of brokers executing investors' orders in the best market; and
5. an opportunity, consistent with the provisions of clauses (i) and (iv), for investors' orders to be executed without the participation of a dealer.

The linking of all markets for qualified securities through communication and data processing facilities will foster efficiency, enhance competition, increase the information available to brokers, dealers, and investors, facilitate the offsetting of investors' orders, and contribute to best execution of such orders. [653]

Over the decades since the enactment of § 11A, the SEC has taken numerous steps to carry out Congress's instruction to facilitate the development of the national market system, including: requiring the SROs to adopt plans for the collection, consolidation and dissemination of last sale reports and quotations in certain securities and approving such plans; approving a plan linking the markets trading exchange-listed securities and SRO rules generally requiring participants in that plan to avoid execution of trades at a price worse than the best price displayed on another participant market ("trade-throughs"); requiring certain specialists and OTC market-makers to publicly display customer limit orders that better the dealer's displayed price or size; and requiring any specialist or OTC market-maker responsible for more than 1% of the volume of trading in a listed security to display their best-priced quotations and customer limit orders for that security. [654]

In 2005, the SEC published Regulation NMS, the most significant overhaul of its rules regarding the national market system since the enactment of § 11A. [655] Regulation NMS generally applies to stocks traded on a national exchange. FINRA has since adopted rules that apply Regulation NMS-style rules to the market for OTC Equity Securities as well. [656] In addition to modernizing its earlier national market system rules and consolidating them into a single regulation, Regulation NMS addresses three substantive topics:

Order Protection. Rule 611 of Regulation NMS (the "Order Protection Rule") requires "trading centers" to establish, maintain, and enforce written policies and procedures reasonably designed to prevent trade-throughs on such trading center of "protected quotations" for NMS stocks [657] displayed by other trading centers. [658] For this purpose, "trading centers" include national securities exchanges, SRO trading facilities, ATSs, exchange and over-the-counter market makers and any other broker-dealer that executes orders internally by trading as principal or crossing orders as agent. [659] The "protected quotations" covered by Rule 611 include the best bids and offers of a national securities exchange and FINRA's alternative display facility ("ADF"), provided that it is an automated quotation of an automated trading center and disseminated pursuant to an effective national market system plan. [660] To qualify quotations as "automated quotations" of an "automated trading center," the trading center displaying the quotation must (among other things) immediately and automatically execute certain orders against its displayed quotations and immediately and automatically update its displayed quotations. [661] The Order Protection Rule includes exceptions for intermarket sweep orders, quotations displayed by markets that fail to meet the response requirements for automated quotations, and "flickering" quotations with multiple prices displayed in a single second.

Intermarket Access. Rule 610 of Regulation NMS requires SRO trading centers to allow access to their quotations in NMS stocks on a nondiscriminatory basis and limits the fees that may be charged for access to quotations. Rule 610 also requires SROs to establish rules to prohibit their members from engaging in a pattern or practice of displaying quotations that lock or cross [662] the protected

quotations of other trading centers rather than executing against the protected quotation. [663] In addition, FINRA limits the fees that a member can impose for access to a published quotation in any OTC Equity Security and requires its members to implement policies and procedures that avoid the display of locking or crossing quotations in any OTC Equity Security. [664]

Sub-Penny Pricing. Rule 612 of Regulation NMS prohibits market participants from displaying, ranking, or accepting quotations in NMS stocks that are priced in an increment of less than $0.01 (or $0.0001 if the price of the quotation is less than $1.00). [665] This rule is intended to enhance the protection of customer limit orders by preventing sub-penny pricing from being used to "step-ahead" of such orders by an economically insignificant amount. FINRA applies the same rule to the displaying, ranking, or accepting of quotations in any OTC Equity Security. [666]

In 2010, the SEC began a broad review of the current structure of the national market system and published a concept release, seeking public feedback on, among others, the following issues: (i) how well the current market structure performs its functions, (ii) the strategies and tools used by firms in the current market structure, (iii) whether high volume trading poses a risk to the current market structure, (iv) the effects of undisplayed liquidity, and (v) any other notable aspects of the current market structure. The SEC intended to use the public comments received to determine whether further regulatory action is needed to improve the current equity market structure. [667]

In 2015, the SEC created an Equity Market Structure Advisory Committee to focus on the structure and operations of the U.S. equity markets. This committee is expected to discuss issues relating to the review of Regulation NMS, the role of exchanges in the current market structure and the presence and effect of conflicts in the routing and execution or equity orders. This committee has recommended a pilot program to adjust the cap that Rule 610 sets on fees that trading venues can charge to access published quotations, but as of the date of publication, the SEC has not taken any action on this recommendation. [668]

In 2016, FINRA and a group of national securities exchanges began a two-year pilot program to test the effect of widening the minimum quotation and

p. 14-160

p. 14-161

trading increment ("tick size") for stocks of some smaller companies from a penny to five cents. [669]

Footnotes

630 SEC Release No. 34-40760 (Dec. 8, 1998) (the "ATS Release"). The rules and rule amendments generally took effect on April 21, 1999, except as otherwise noted.

Prior to the adoption of Regulation ATS and related rules under the Exchange Act, electronic trading systems sponsored by registered broker-dealers operated pursuant to no-action relief granted by the SEC. *See*, *e.g.*, *Instinet Corp*. (avail. Sept. 8, 1986) (granting no-action relief from the exchange registration requirement of § 5 of the Exchange Act).

631 Pursuant to Rule 3b-16 under the Exchange Act, an organization, association or group of persons is considered to constitute, maintain or provide "a market place or facilities for bringing together purchasers and sellers of securities or for otherwise performing the functions commonly performed by a stock exchange" if it (i) brings together the orders for securities of multiple buyers and sellers, and (ii) uses established, nondiscretionary methods (whether by providing a trading facility or by setting rules) under which such orders interact with each other, and the buyers and sellers entering such orders agree to the terms of a trade. *See* Rule 3b-16(a) under the Exchange Act.

632 An alternative trading system that limits its securities activities to government securities or commercial paper and certain related instruments (*e.g.*, repurchase and reverse repurchase agreements involving government securities or commercial paper, or unlisted options on government securities) is not required to comply with the requirements of Regulation ATS, provided that it is registered as a broker-dealer under § 15 of the Exchange Act or as a government securities broker-dealer under § 15C of the Exchange Act. *See* Rule 301(a)(4) of Regulation ATS.

Alternative trading systems that permit the trading of security futures products are required under the CEA to become limited-purpose contract markets pursuant to the CEA's notice registration provisions. CEA § 5f.

633 Rule 300(a) of Regulation ATS.

634 Rule 301(b)(3) of Regulation ATS. In 2009, the SEC proposed several amendments to Regulation ATS, one of which would have lowered the average trading volume threshold from 5% to 0.25%. The amendments would also have extended display requirements to all orders displayed to more than one person, regardless of that person's membership in the ATS. *See* SEC Release No. 34-60997 (Nov. 23, 2009). The SEC's proposal was withdrawn in 2013.

635 Rule 301(b)(5) of Regulation ATS; FINRA Rule 4552, FINRA MANUAL.

636 Rule 301(b)(6) of Regulation ATS. As of November 4, 2016, 82 entities have a current Form ATS on file with the SEC. *See* SEC, Frequently Requested FOIA Document: Alternative Trading System ("ATS") List (Nov. 4, 2016), *available at* https://www.sec.gov/foia/docs/atslist.htm (last visited Nov. 11, 2016).

637 *See* Rule 3b-16(b)(1) under the Exchange Act.

638 *See* SEC Release No. 34-63241 (Nov. 3, 2010); *see also* Press Release, SEC, SEC Adopts New Rule Preventing Unfiltered Market Access (Nov. 3, 2010).

639 *See*, *e.g.*, SEC Release No. 34-42728 (Apr. 28, 2000) (providing guidance on the use of electronic media by issuers of all types, including the use of electronic media to deliver documents, issuers' liability for website content and basic legal principles that issuers and market intermediaries should consider in conducting online offerings); SEC, ON-LINE BROKERAGE: KEEPING APACE OF CYBERSPACE (Nov. 1999); SEC Release No. 34-37182 (May 29, 1996); SEC Release No. 34-36345 (Oct. 6, 1995); *Lamp Technologies* (avail. May 29, 1998); *Thomson Financial Inc.* (avail. July 10, 2002).

640 SEC, ON- LINE BROKERAGE: KEEPING APACE of CYBERSPACE (Nov. 1999).

641 *See* SEC, ON- LINE BROKERAGE: KEEPING APACE of CYBERSPACE (Nov. 1999).

642 SEC, Office of Compliance Inspections and Examinations, EXAMINATIONS of BROKER- DEALERS OFFERING ONLINE TRADING: SUMMARY of FINDINGS and RECOMMENDATIONS (Jan. 25, 2001).

643 *See* SEC, Office of Compliance Inspections and Examinations, EXAMINATIONS of BROKER- DEALERS OFFERING ONLINE TRADING: SUMMARY of FINDINGS and RECOMMENDATIONS (Jan. 25, 2001).

644 SEC, Office of Compliance Inspections and Examinations, OCIE Cybersecurity Initiative (Apr. 15, 2014).

645 SEC, Office of Compliance Inspections and Examinations, OCIE's 2015 Cybersecurity Examination Initiative (Sept. 15, 2015).

646 Rule 17a-3(a)(16) under the Exchange Act; the ATS Release.

647 *See* Rule 17a-3(a)(16) under the Exchange Act.

648 Rule 17a-23 under the Exchange Act was repealed as of the effective date of Rule 17a-3(a)(16) under the Exchange Act.

649 SEC, Office of Compliance Inspections and Examinations, REPORT OF EXAMINATIONS OF DAY-TRADING BROKER-DEALERS (Feb. 25, 2000, revised Oct. 23, 2003). In the day trading study, a "day trader" is described as "an individual who conducts intra-day trading in a focused and consistent manner, with the primary goal of earning a living through the profits derived from this trading strategy."

650 FINRA Rule 2130, FINRA MANUAL.

Certain firms have also been the subject of enforcement actions involving day trading activities that resulted in violations of Regulation T. *See*, *e.g.*, News Release, FINRA, FINRA Fines Scottrade $200,000 for Pattern Day Trading Violations (Apr. 1, 2010); Press Release, NASD, NASD Fines Scottrade, Inc. $250,000 for Improperly Extending Credit to Cash Account Customers (Jan. 21, 2005). Similar actions were brought by the NASD against Ameritrade, Datek and iClearing in March 2004. *See* Press Release, NASD, NASD Fines Ameritrade, Datek and iClearing $10 Million For Improperly Extending Credit and Allowing Trades That Avoided NASD Day Trading Margin Rules (Mar. 11, 2004).

651 *See* FINRA Rule 4210(f)(8)(B), FINRA MANUAL. Because the Regulation T initial margin requirements and standard SRO maintenance margin requirements are calculated only at the end of each day, a day trader that has no positions in its account at the end of the day would have no initial or maintenance margin requirements (except to the extent of any trading losses during the day). The day trader's broker-dealer, however, is exposed to any losses the day trader may incur during the trading day, as well as the possibility that the day trader would be unable to close out its positions before the end of the trading day. Among other things, the special day trading margin requirements require day traders to provide margin based on the largest positions held during the trading day and limit the size of the intra-day positions of "pattern day traders."

652 § 11A(a)(1) of the Exchange Act.

653 § 11A(a)(1) of the Exchange Act.

654 For some of the history of SEC regulation of the national market system, *see* SEC Release No. 34-49325 (Feb. 26, 2004), Regulation NMS, Proposed Rule, 69 Fed. Reg. 11,126, 11,130–33 (Mar. 9, 2004).

655 *See* SEC Release No. 34-51808 (June 9, 2005), Regulation NMS, Final Rule, 70 Fed. Reg. 37,496 (June 29, 2005).

656 *See* FINRA Rules 6410-90, FINRA MANUAL; *see also* FINRA Regulatory Notice 10-42 (Sept. 2010).

657 "NMS stocks" are all securities, other than options, for which transaction reports are collected, processed and made available pursuant to an effective transaction reporting plan. They include all equity securities traded on national securities exchanges. Rule 600(46) and (47) of Regulation NMS under the Exchange Act.

658 Rule 611 of Regulation NMS under the Exchange Act.

659 Rule 600(b)(78) of Regulation NMS under the Exchange Act.

660 Rule 600(b)(57) and (58) of Regulation NMS under the Exchange Act.

661 Rule 600(b)(3) and (4) of Regulation NMS under the Exchange Act.

One significant effect of Regulation NMS was initiatives by the NYSE to modernize its method of operations so that it is an "automated trading center" and some of its quotations are "automated quotations." In 2006, the SEC approved the NYSE's Hybrid Market proposal to integrate the NYSE's traditional floor-based auction market with enhanced automated trading functionality. The approved rule changes: (i) expanded the NYSE's automatic execution facility, Direct+, so that it may accept more order types and allow executions to occur against liquidity that is priced outside the NYSE's best bid or offer, (ii) automated participation by NYSE floor members so that they can electronically provide liquidity available for automatic executions, and (iii) allowed specialists to create proprietary algorithms so that they can quote and trade electronically. *See* SEC Release No. 34-53539 (Mar. 22, 2006).

662 Quotations are "locked" when the bid and offer are equal and "crossed" when the bid is higher than the offer.

Click to open document in a browser

The SEC and SROs are charged with responsibility for overseeing and enforcing, through their respective inspection and sanction powers, broker-dealer compliance with U.S. securities laws, the rules and regulations thereunder and the rules of the SROs.

[1] Inspection

The Exchange Act gives the SEC broad powers to inspect broker-dealers. Section 17(b) of the Exchange Act provides that all records kept by a registered broker-dealer are subject "at any time … [to] reasonable periodic, special, or other examinations" by the SEC. [670] Under § 21(a) of the Exchange Act, the SEC has a power of "original inquiry" to make investigations as it deems necessary to determine whether any person is violating the U.S. securities laws, the rules and regulations thereunder or the rules of the SROs. [671] The SEC may also conduct investigations on the request of a foreign securities authority, even though no violation of U.S. law has been committed or is suspected. [672]

SROs, including FINRA, maintain the right to inspect all books, records and accounts of their members, as well as to require any member to submit

p. 14-162

written reports concerning its business practices. [673] A member that does not permit an investigation or refuses a request for information is subject to sanction by the relevant SRO.

Foreign branch offices (including perhaps any offices where "dual employees" of a U.S. broker-dealer and a foreign broker-dealer work) [674] are subject to examination and to the requirement that they make their records available for inspection by U.S. regulators as would be any U.S. office. In a disciplinary action instituted against the Swiss branch of a registered broker-dealer that had failed to provide its records for inspection on a timely basis, the SEC rejected out of hand the broker-dealer's defense that Swiss secrecy laws had prevented it from making customer records promptly available to the SEC. [675]

[2] Sanctions

[a] By SROs

FINRA and the other SROs have the authority to discipline members and their associated persons with a censure, fine, suspension or expulsion from membership or "any other fitting sanction." [676] Any disciplinary action taken by an SRO is subject to review by the SEC. [677]

[b] By the SEC

The SEC has the authority to sanction broker-dealers for any violation of the U.S. securities laws or the rules and regulations thereunder. Under § 15(b)(4) of the Exchange Act, the SEC is required to "censure, place limitations on the activities, functions or operations of, suspend for [not more than]… twelve months or revoke the registration of [a broker-dealer]" if it finds that the broker-dealer has committed one of a number of enumerated offenses and the disciplinary action is in the "public interest." No disciplinary action may be taken without "notice and opportunity for hearing." [678] Suspension may be too harsh for many

p. 14-162
p. 14-163

infractions, while a censure has been described by the SEC as a "slap on the wrist." [679]

The Securities Enforcement Remedies and Penny Stock Reform Act of 1990 ("SERPSA") [680] significantly expanded the range of penalties that the SEC could impose upon broker-dealers. Pursuant to SERPSA, the SEC may now seek money penalties of up to $100,000 against a natural person or up to $500,000 against any entity for violations of the U.S. securities laws. [681] Further, SERPSA authorizes the SEC to order respondents to "cease and desist" any violation of U.S. securities laws or "to take steps to effect compliance" with such laws. [682] Notice and opportunity for hearing are generally required in connection with SEC proceedings; however, in certain emergency situations, the SEC may issue temporary orders to regulated persons, such as broker-dealers, without a hearing. [683]

[c] Private Rights of Action

The civil actions for fraud that may be brought, for example, under § 10(b) of the Exchange Act and Rule 10b-5 thereunder may be brought against broker-dealers as well as other persons. The Private Securities Litigation Reform Act of 1995, [684] among other provisions, raises the pleading standards for fraud actions under the securities laws and prohibits broker-dealers from accepting referral fees from attorneys in connection with class actions for securities law violations.

p. 14-163
p. 14-164

Broker-dealers may also be liable for fraud under other provisions of federal and state law. [685]

In addition, under § 29(b) of the Exchange Act, any contract made in violation of the Exchange Act is void. Accordingly, § 29(b) might be used, for example, as a defense by a customer of an unregistered broker-dealer that did not wish to perform an agreed-upon transaction or in an action to seek rescission. [686] Further, it is possible that this provision of the Exchange Act could also serve as the basis for a rescission action where a customer did business with a broker-dealer's employee who was not properly registered with FINRA or other SRO, even though the broker-dealer was itself properly registered and the transaction was not otherwise improper. [687]

Footnotes

670 The CFMA imposes certain limitations on the SEC's examination authority over FCMs that are notice-registered as broker-dealers, such as requiring the SEC to coordinate with the CFTC and, where possible, to use reports of examination by the CFTC. *See* §§ 17(b)(1)(B) and 17(b)(2)-(4) of the Exchange Act.

671 *See*, *e.g.*, *United States v. Morton Salt*, 338 U.S. 632 (1950). To conduct an inspection, the SEC is required to demonstrate only that any investigation is for a lawfully authorized purpose and that any documents it is seeking are reasonably relevant to its inquiry; the SEC is not required to establish "probable" or "reasonable" cause. *See*, *e.g.*, *SEC v. Howatt*, 525 F.2d 226, 229 (1st Cir. 1975); *SEC v. Brigadoon Scotch Distributing*, 480 F.2d 1047, 1054 (2d Cir. 1973), *cert. denied*, 415 U.S. 915 (1974); *SEC v. Blackfoot Bituminous*, 622 F.2d 512, 514 (10th Cir.), *cert. denied*, 449 U.S. 955 (1980); *SEC v. Kaplan*, 397 F. Supp. 564 (E.D.N.Y. 1975).

Section 15C(d) of the Exchange Act provides that the appropriate regulatory agency for a government securities broker-dealer has authority to inspect its records. Although § 21(a) of the Exchange Act gives the SEC power to inspect "any person" who has violated the act, § 15C(g)(2) of the Exchange Act provides that the SEC generally may inspect only the government securities broker-dealers for which it is the appropriate regulatory agency.

672 § 21(a)(2) of the Exchange Act; *see also* § 14.03[3][i].

673 *See*, *e.g.*, FINRA Rule 8210, FINRA MANUAL; NYSE Rule 476(a)(11), NYSE GUIDE (CCH) ¶2476 (failure to

comply with a request by the NYSE for information or testimony is cause for disciplinary action). Such information and reports may be shared with other domestic or foreign SROs with whom FINRA or the NYSE has entered into an agreement for the exchange of information or mutual assistance.

674 *See* § 14.04[2].

675 *See* SEC Release No. 34-29243 (May 29, 1991).

676 *See*, *e.g.*, FINRA Rule 8310, FINRA MANUAL; NYSE Rule 476, NYSE GUIDE (CCH) ¶2476.

677 *See* § 19(d) and (e) of the Exchange Act and Rule 19d-3 thereunder.

678 *See* § 15(b)(4) of the Exchange Act.

679 *See generally* written testimony of Richard Breeden, then-Chairman of the SEC, before the Subcommittee on Securities of the Committee on Banking, Housing and Urban Affairs, United States Senate (1990).

680 Securities Enforcement Remedies and Penny Stock Reform Act of 1990, Pub. L. No. 101-429, 104 Stat. 931 (1990).

681 *See* §§ 21(d)(3) and 21B of the Exchange Act. If the gross pecuniary gain to the defendant exceeds the maximum penalties listed in the text, the SEC can seek a penalty in court up to the amount of such gain under § 21(d)(3) of the Exchange Act. The relevant provisions provide for lower maximum penalties for first and second time offenders, unless the violation involved fraud or reckless disregard and resulted in substantial loss or created a risk of substantial loss to other persons. Note that violations of insider trading prohibitions are subject to the provisions of Exchange Act § 21A. *See* §§ 11.05[2][c] and 14.07[1][b].

682 § 21C(a) of the Exchange Act; *see also* § 21(d) of the Exchange Act (authorizing the SEC to seek injunctions in federal court). In connection with any cease and desist proceeding, the SEC may require an accounting and disgorgement. § 21C(e) of the Exchange Act. The SEC's second use of its § 21C injunctive power was in connection with a disciplinary action taken against the foreign branch of a U.S. broker-dealer that failed to make its records available for inspection on a timely basis. *See* SEC Release No. 34-29243 (May 29, 1991).

683 § 21C(c) of the Exchange Act.

684 Private Securities Litigation Reform Act of 1995, Pub. L. No. 104-67, 109 Stat. 737 (1995); *see* § 11.03[c].

685 *See generally* Chapter 11.

686 *See*, *e.g.*, *Regional Properties, Inc. v. Financial & Real Estate Consulting Co.*, 678 F.2d 552, 558 (5th Cir. 1982), *aff'd on other grounds*, 752 F.2d 178 (5th Cir. 1985) (later appeal); *Eastside Church of Christ v. National Plan, Inc.*, 391 F.2d 357 (5th Cir.), *cert. denied*, 393 U.S. 913 (1968) (allowing investors to rescind transactions with unregistered broker-dealer); *see also* Samuel H. Gruenbaum and Marc I. Steinberg, *Section 29(b) of the Securities Exchange Act of 1934: A Viable Remedy Awakened*, 48 GEO. WASH. L. REV. 1 (1979).

687 Violation of the rules of FINRA or other SROs generally does not give rise to a private right of action. *See*, *e.g.*, *Jablon v. Dean Witter & Co.*, 614 F.2d 677 (9th Cir. 1980) (holding that there is no private right of action under the NYSE's "know your customer" rule or the NASD's suitability rule); *Emmons v. Merrill Lynch, Pierce, Fenner & Smith, Inc.*, 532 F. Supp. 480 (S.D. Ohio 1982) (explaining that under the Supreme Court's test established in *Cort v. Ash*, 422 U.S. 66 (1975), there is no implied private right of action under NYSE or NASD rules); *Klitzman v. Bache Halsey Stuart Shields, Inc.*, 499 F. Supp. 255 (S.D.N.Y. 1980) (holding that there is no private right of action under NASD rules).

U.S. Regulation of the International Securities and Derivatives Markets, § 14.12, STATE REGISTRATION OF BROKER-DEALERS

U.S. Regulation of the International Securities and Derivatives Markets
1 Edward F. Greene, Alan L. Beller, Edward J. Rosen, Leslie N. Silverman, Daniel A. Braverman, Sebastian R. Sperber, Nicolas Grabar & Adam E. Fleisher, U.S. Regulation of the International Securities and Derivatives Markets § 14.12 (11th and 12th Editions 2014-2017)
11th and 12th Editions

A great complication for broker-dealers doing an international, or even a national, securities business in the United States is that they must contend both with the federal securities law registration and compliance requirements and with those contained in the securities laws of the various states ("blue sky" laws). [688] The state blue sky laws may be not only different from the federal laws but also different from each other; in addition, the various states' interpretation of the same written language may be inconsistent. It is thus essential for a broker-dealer to be aware of local securities law in each state in which it transacts business.

The North American Securities Administrators Association ("NASAA") is a coordinating agency of state securities administrators that attempts to minimize duplication and irregularity between the various jurisdictions. One result of

p. 14-165

this coordination is that a broker-dealer may register with the securities authority in every state by filing Form BD.

Most states have adopted the same version of the Uniform Securities Act, although they may differ in their respective implementations or interpretations of the act. [689] Section 201(a) of the Uniform Securities Act provides that "a person may not transact business in [a] state as a broker-dealer or sales representative unless licensed or exempt from licensing under …" the securities law of that state. A broker-dealer is defined by the Uniform Securities Act as "any person engaged in the business of effecting transactions in securities for the account of others or for his own account." [690] Excluded from this definition are, among others,

> a person who has no place of business in [the] state if (a) his only clients in [the] state are other investment advisers, broker-dealers, banks, savings institutions, trust companies, insurance companies, investment companies as defined in the Investment Company Act of 1940, pensions or profit-sharing trust[s], or other financial institutions or institutional buyers, whether acting for themselves or as trustees, or (b) during any period of twelve consecutive months he does not direct more than fifteen offers to sell or buy into [the] state in any manner to persons other than those specified in clause (a), whether or not he or any of the persons to whom the communications are directed is then present in [the] state. [691]

The Rule 15a-6 exemption from registration for foreign broker-dealers under the Exchange Act does not affect state registration requirements as such, although the above exclusions from the Uniform Securities Act definition of a broker-dealer to a certain extent overlap the Rule 15a-6 exemption from Exchange Act registration. [692] In particular, the Uniform Securities Act exclusion covers a foreign broker-dealer's transactions with registered broker-dealers,

p. 14-165

p. 14-166

banks and certain institutional investors. [693] However, the institutional investors whom an unregistered broker-dealer may contact in a particular state may not overlap precisely with the Rule 15a-6 definition of "U.S. institutional investors." Further, the Uniform Securities Act, unlike Rule 15a-6, does not provide a general exclusion for purchases and sales that are "unsolicited." [694] It is also important to note that certain states (including, *e.g.*, California) do not have an applicable exemption from registration for an out-of-state broker-dealer effecting securities transactions with only institutional investors unless the broker-dealer is registered under the Exchange Act.

The NSMIA largely preempts state securities broker-dealer qualification requirements that differ from or are duplicative of federal requirements. [695] On its face, the NSMIA would appear to eliminate state regulation of federally exempted foreign broker-dealers except for the bare requirements that such broker-dealers register and pay registration fees. Nonetheless, individual states continue to require certain documentation in addition to the Form BD, including, among other things, affidavits with respect to any previous sales activities in the state.

Accordingly, foreign broker-dealers need to consider carefully the potential applicability of state, as well as federal, registration requirements to their U.S. securities activities. This is particularly the case as state securities regulatory authorities may be quite aggressive in seeking fines or other disciplinary actions against a foreign broker-dealer. For example, the Commonwealth of Massachusetts not only imposed a substantial fine against, but also permitted Massachusetts investors to rescind individual transactions with, Midland Walwyn, a Canadian broker-dealer that was improperly doing business with former Canadians who had moved to Massachusetts. [696]

Footnotes

688 Section 28(a) of the Exchange Act preserves state law insofar as such law does not "conflict" with the provisions of the Exchange Act. *See generally* Joseph C. Long, BLUE SKY LAW (Chap. 8: Broker-Dealers, Agents & Investment Advisers) (2016).

689 Most state regulation derives from the Uniform Securities Act (1956), adopted by 37 jurisdictions, and its successor, the Revised Uniform Securities Act (published in 1985). After both of these acts were preempted in part by NSMIA, the Uniform Securities Act (2002) was drafted and approved by the National Conference of Commissioners on Uniform State Laws as a "new" Uniform Securities Act. The Uniform Securities Act (2002) has been adopted by Georgia, Hawaii, Idaho, Indiana, Idaho, Iowa, Kansas, Maine, Michigan, Minnesota, Mississippi, Missouri, New Hampshire, New Mexico, Oklahoma, South Carolina, South Dakota, Vermont, Wisconsin, Wyoming and the U.S. Virgin Islands.

690 § 401(c) of the Uniform Securities Act.

691 § 401(c)(4) of the Uniform Securities Act.

692 *See* § 14.03[3].

693 Similar to the exclusion from the definition of "broker-dealer" under the Uniform Securities Act (1956), § 401(b) of the Uniform Securities Act (2002) provides an exemption from registration for a broker-dealer without a place of business in the relevant state if its only transactions effected in the state are with "institutional investors" (a term defined in the Uniform Securities Act to include other registered broker-dealers, banks and certain types of other institutions).

694 *See* § 14.03[3][b][i].

695 In addition, § 28(a) of the Exchange Act (as amended by the CFMA) preempts the application of state laws with respect to the offer, sale or distribution of securities (other than generally applicable antifraud provisions) to transactions in security futures products.

696 *See In re Midland Walwyn Capital Corp.*, Commonwealth of Massachusetts, Docket No. E-92-148, 1993 Mass. Sec . LEXIS 2 (Dec. 3, 1993). In part in response to this case, NASAA has added § 201(a) to the Uniform Securities Act, providing for limited registration of Canadian broker-dealers. NASAA REPORTS (CCH) ¶1211. A similar limited registration regime has been adopted by Canadian securities regulatory authorities.

U.S. Regulation of the International Securities and Derivatives Markets, § 15.01, INTRODUCTION

U.S. Regulation of the International Securities and Derivatives Markets
1 Edward F. Greene, Alan L. Beller, Edward J. Rosen, Leslie N. Silverman, Daniel A. Braverman, Sebastian R. Sperber, Nicolas Grabar & Adam E. Fleisher, U.S. Regulation of the International Securities and Derivatives Markets § 15.01 (11th and 12th Editions 2014-2017)
11th and 12th Editions

Click to open document in a browser

p. 15-3

The Investment Company Act, the primary source of U.S. regulation of collective investment vehicles, [1] was adopted to curtail the securities fraud that existed in the 1930s and earlier in pooled investment funds offered in the U.S. retail market. The Investment Company Act is designed to provide a detailed regulatory scheme addressed at specific industry ills through a combination of registration and disclosure requirements and ongoing substantive regulation.

The Investment Company Act regulates companies identified as investment companies either by their purpose or by virtue of the makeup of their assets. As a result, companies, including operating companies, that are not funds (so-called "inadvertent investment companies") may fall within the Investment Company Act's definition of investment company. Companies that hold minority interests and other investment securities that account for as little as 40% of the value of their assets may be required to register as investment companies and become subject to substantive regulation. The regulatory requirements for companies registered under the Investment Company Act are extremely restrictive and, as a practical matter, are impossible for foreign companies to meet. The critical areas of inquiry for a foreign company therefore are whether it (or the affiliate, subsidiary or parent company involved in a particular transaction) falls within the definition of investment company, and, if so, whether it can avail itself of any of the provisions of the Investment Company Act or the rules thereunder, or obtain a specific order of the SEC, excluding it from the definition of investment company or exempting it from regulation.

In the early 1990s, the Investment Company Act was the subject of special scrutiny by the SEC staff and market participants. This scrutiny was largely directed at the criteria used to determine whether registration was required under the Act and the scope and limited number of exemptions from registration that were available. A 1990 SEC "concept release" (the "Concept Release") [2] soliciting public comment regarding the continued workability of the Investment Company Act generated significant commentary by professionals active on both the "buy" and "sell" sides of the industry, regulatory and self-regulatory authorities, the private bar and academics. The staff subsequently issued a major evaluation of the Investment Company Act entitled PROTECTING INVESTORS: A HALF CENTURY OF INVESTMENT COMPANY REGULATION (the "1992 Report") [3] that included

p. 15-3

p. 15-4

recommendations for various rulemaking and legislative initiatives. Although some of these proposals were implemented, action has not been taken with respect to many others, including, notably, certain of the staff's recommendations regarding the treatment of both private and public investment funds organized outside the United States. [4]

Before the SEC could act further, the National Securities Markets Improvements Act of 1996 (the "NSMIA") [5] very significantly amended the Investment Company Act. The changes made by the NSMIA included the addition of a new exemption from registration under the Investment Company Act for investment companies whose securities are offered and sold privately only to institutions and individuals with high net worth and significant investments, the addition of an exemption for dealers principally in derivative instruments, the substantial reduction of state regulation of SEC-registered public investment companies and the relaxation of restrictions on investments by one investment company in securities of another investment company. Although none of the amendments was targeted at international markets or international activities, several of the changes, including in particular the first two mentioned above, have had a significant impact on the operation of the Investment Company Act in the international context.

Even after these changes, however, the efficacy of the Investment Company Act continues to be scrutinized by Congress and other market participants with a special focus on open-end investment companies, better known as mutual funds. In late 2002, attention focused on the failure of many mutual funds and brokers to provide promised volume-based discounts (so-called "breakpoints") on sales fees charged to qualifying investors who acquired fund shares. More significantly, during the second half of 2003, a series of abuses involving mutual funds and their investment advisers came to light as a result of an investigation by the New York Attorney General, prompting the SEC to initiate numerous enforcement proceedings. [6] In general, investors are able to purchase or redeem the shares of a mutual fund that they hold at a price based on the fund's net asset value determined as of a specified time after the order is submitted. It was discovered, however, that certain mutual funds, their advisers or dealers were permitting favored investors to engage in "late trading," whereby the investors would purchase or redeem mutual fund shares based on the fund's old net asset value after the time on each day as of which the fund's new net asset value would

p. 15-4

p. 15-5

have been applicable. [7] This late trading permitted the favored investors to take advantage of market events that occurred after the fund's net asset value had been determined by, for example, purchasing shares at the old net asset value if subsequent events would cause the new net asset value to be higher or redeeming shares at the old net asset value if subsequent events would cause the new net asset value to be lower. [8] Cases also arose where investment advisers or dealers allowed investors to engage in or facilitated short-term trading in mutual fund securities in violation of stated fund policies to the detriment of other fund investors and in breach of the fiduciary duties owed by the adviser to the fund and its shareholders. [9] These so-called "market timing" practices were especially pronounced in funds that invested in non-U.S. securities, where investors would seek to take advantage of time-zone differences between the markets where the fund's portfolio securities traded and the specified time in the United States as of which the fund's net asset value was determined. There were also allegations that certain investment advisers selectively disclosed the content of fund portfolios to attract investments from large investors, potentially allowing those investors to trade against the fund. [10]

p. 15-5

p. 15-6

In addition to instituting numerous enforcement proceedings, the SEC engaged in a flurry of rulemaking, ranging from mutual fund governance reforms [11] and mandating or prohibiting certain pricing and payment arrangements [12] to enhanced disclosure of fund fee structures, trading policies and conflicts of interest. [13]

Most of the Investment Company Act's provisions address the operation of funds offered to the U.S. public. Hedge funds, however, which generally are

p. 15-6

p. 15-7

private funds, have also attracted Congressional and regulatory attention. [14] These funds, which are often organized outside the United States, rely substantially on leverage (directly and through the use of complex derivative instruments) to increase potential investment returns. The investment strategy of hedge funds, which are offered to sophisticated high net worth individuals and institutions worldwide under exemptions from regulation under the Investment Company Act, may also present a significant risk of loss. In one case involving a U.S.-based hedge fund, Long-Term Capital Management, Inc., the losses incurred were of sufficient size to have a potential systemic impact on the global financial markets and necessitated a rescue that was coordinated by the Federal Reserve Bank of New York. [15] A 2003 study by the SEC staff that examined hedge fund operations and the role that hedge funds played in the late trading and market-timing cases involving mutual funds intensified this scrutiny. [16] SEC concerns over the growth in assets managed by hedge funds, an increasing number of cases involving fraud at hedge funds and the rise in the number of retail investors exposed to hedge funds resulted in a rule that required hedge fund advisers to register under the Investment Advisers Act of 1940, [17] although this rule was later vacated by the U.S. Court of Appeals for the District of Columbia Circuit.

More recently, the SEC has adopted regulatory reforms aimed at addressing the trouble that money market mutual funds experienced during the financial crisis of 2008. For the first time, a money market mutual fund "broke the buck" (allowed its net asset value per share ("NAV") to fall below $1.00), [18] leading to a temporary loss of confidence in such funds generally and necessitating a federal rescue program to preserve liquidity and stability in the money market mutual fund market. [19] In July 2014, however, the SEC adopted new rules applicable to money market funds that require institutional money market funds that do not principally invest in U.S. government securities to transact at a floating

p. 15-7

p. 15-8

NAV, [20] give money market funds the ability to impose liquidity fees and suspend redemptions in certain circumstances, govern valuation of such funds, and provide for new disclosure, stress testing, reporting and diversification requirements. [21] In October 2016, the SEC adopted rules to address risk management and liquidity requirements [22] and "swing pricing" for open-end funds and exchange-traded funds, [23] and to require enhanced disclosure. [24] Additionally, the SEC has proposed rules that would regulate the use of derivatives by registered investment companies. [25]

The Dodd-Frank Act made few modifications to the Investment Company Act. Most notably, the Investment Company Act was amended to remove any reliance on ratings provided by national registered statistical rating organizations ("NRSROs"). [26] The SEC has revised certain Investment Company Act rules to eliminate reliance on rating agencies, as mandated by the Dodd-Frank Act, [27] but has yet to take action with respect to other rules. [28] The other notable change made by the Dodd-Frank Act was to include aiding and abetting liability for persons assisting others in violating provisions of the Investment Company Act or the rules promulgated thereunder. [29]

Footnotes

1 Operators of funds that utilize commodity futures contracts and commodity options, including security futures products, even if only for hedging or other portfolio management purposes, may also be subject to regulation as commodity pool operators under the Commodity Exchange Act ("CEA"). The Investment Company Act, Pub. L. No. 76-768, was originally passed on August 22, 1940.

2 SEC Release No. IC-17534 (June 15, 1990).

3 SEC Division of Investment Management, PROTECTING INVESTORS: A HALF CENTURY OF INVESTMENT COMPANY REGULATION (May 1992) (the "1992 Report"). The 1992 Report also addressed various aspects of U.S. investment adviser regulation, which are discussed in Chapter 16.

7 Rule 22c-1 under the Investment Company Act requires that a mutual fund sell and redeem shares at the net asset value next computed after the order is placed or the security is tendered. For example, if a mutual fund calculates its net asset value at 4:00 p.m., any orders to purchase or redeem shares in that mutual fund received after 4:00 P.M. should be satisfied using the net asset value calculated at 4:00 P.M. on the next day.

29 § 929M of the Dodd-Frank Act.

U.S. Regulation of the International Securities and Derivatives Markets, § 15.02, DEFINITION OF "INVESTMENT COMPANY"

U.S. Regulation of the International Securities and Derivatives Markets
1 Edward F. Greene, Alan L. Beller, Edward J. Rosen, Leslie N. Silverman, Daniel A. Braverman, Sebastian R. Sperber, Nicolas Grabar & Adam E. Fleisher, U.S. Regulation of the International Securities and Derivatives Markets § 15.02 (11th and 12th Editions 2014-2017)
11th and 12th Editions

The Investment Company Act's definition of "investment company" encompasses any entity that:

> (A) [i]s or holds itself out as being engaged primarily … in the business of investing, reinvesting or trading in securities;
>
> … or
>
> p. 15-9
>
> (B) [i]s engaged or proposes to engage in the business of investing, reinvesting, owning, holding, or trading in securities, and owns or proposes to acquire investment securities having a value exceeding 40 per centum of the value of such issuer's total assets (exclusive of Government securities and cash items) on an unconsolidated basis. [30]

The definition does not require that a portfolio be managed, and the requirement of being in the "business" has been interpreted very expansively; it may, for example, be satisfied even by a completely passive trust that simply holds securities [31] or by a holding company.

The wide range of companies covered by the Investment Company Act was thought by Congress to be justified in light of the abuses sought to be eliminated. An investment company is thus defined not only in terms of its purpose, but also in terms of an objective asset-based test, in part to minimize the possibility that an entity could inappropriately escape regulation under the Act. [32]

The SEC and its staff have construed the Investment Company Act's definition of "security" expansively, in order to carry out the Act's remedial purposes, even though the textual definition is virtually identical to that found in the other U.S. securities laws under which the definition has not been so broadly construed. [33] They have consistently taken the position that instruments such as

p. 15-9

p. 15-10

commercial bank loans, loans to affiliates, certain instruments issued by insurance companies, commercial and other ordinary-course credit arrangements and the like, constitute securities under the Investment Company Act, although none of these items would qualify as securities under the other securities laws. [34]

p. 15-10

p. 15-11

"Investment securities" includes all securities other than (i) "government securities"; [35] (ii) securities issued by employees' securities companies [36] and (iii) securities issued by entities that are (x) majority-owned subsidiaries of the entity being tested and (y) are not themselves investment companies or relying on the exceptions from the definition of "investment company" included in §§ 3(c)(1) or 3(c)(7) of the Investment Company Act. [37] As a result of that definition, securities issued by a sister or parent entity (*e.g.*, notes representing an intercompany financing) are treated as "investment securities" when the lender's status under the Investment Company Act is being considered, regardless of whether borrower and lender are under common control. If a security is issued by a majority-owned subsidiary of the entity being tested (*e.g.*, equity in a direct or indirect subsidiary held by a parent), that majority-owned subsidiary's status under the Investment Company Act must be tested to determine if the securities it has isssued are "investment securities," often requiring that the Investment Company Act tests be applied iteratively to each entity in a corporate chain.

The Investment Company Act prescribes the methods to be used when making determinations of value. Securities for which market quotations are available are valued at their market value as of the end of the last quarter. Securities for which market quotations are not readily available and all other assets owned at the end of the last quarter are valued at "fair value at the end of such quarter, as determined in good faith by the board of directors." [38] Assets acquired after the end of the last quarter are valued at cost.

The requirement to value many assets at fair value and the requirement that the determination of fair value be made by the board of directors often creates difficulty for companies. Although in transactions, such as some acquisition financings, where a third-party valuation of assets is obtained, the value ascribed to assets in that valuation is generally adopted by the board of the directors for purposes of this analysis, difficult questions are often raised in other contexts, particularly when the fair value of shares in subsidiaries must be determined and where there may be a significant gap between the carrying value of assets recorded under generally accepted accounting principles and fair value.

There is no doubt that conventional mutual funds are intended to be the primary subjects of Investment Company Act regulation. But the combination of the asset-based definition of investment company and the expansive interpretation of

p. 15-11

p. 15-12

the definition of security potentially subjects other entities, known to commentators and practitioners as "inadvertent investment companies," to regulation under the Investment Company Act. The appropriateness of Investment Company Act regulation for these entities is far less obvious, but the Act nonetheless fully applies to them. These companies include holding companies that own controlling, but less than majority, interests in other companies, foreign banks and insurance companies and their holding companies, and finance subsidiaries whose assets consist of loans to their parents and affiliates. [39] The Investment Company Act and the rules thereunder contain a number of provisions excluding or exempting particular types of entities either from the definition of investment company or from the operation of the Act. [40] In addition, the Act grants authority to the SEC to exempt entities from specific provisions or from its provisions generally where such exemption is "necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions" of the Act. [41]

Investment Company Act regulation can even be relevant in the context of individual account management services. Prior to the adoption of Rule 3a-4 under the Investment Company Act, the SEC staff took the position that, where an adviser manages accounts using the same or similar investment strategies, the accounts could be aggregated pursuant to the staff's "integration" policy, [42] resulting in the creation of an investment company. This issue arises in the context of so-called "wrap-fee" programs. These programs, typically sponsored by a broker-dealer or investment adviser, provide advisory clients with access to third-party money managers that are selected by the broker-dealer or adviser. [43] Rule 3a-4 provides a nonexclusive safe harbor from regulation of these programs under the Investment Company Act, subject to reporting obligations and other conditions, including that (i) each client's account will be managed according to

p. 15-12

p. 15-13

the financial situation and investment objectives and restrictions of the client, and (ii) each client retains the right, as though his or her securities and funds were not held in the program, to vote those securities and withdraw them or cash. [44]

Complex issues must also be considered in evaluating new financial products such as basket-, index- and equity-linked notes and warrants under an act that long antedated and did not ever contemplate their existence. Basket-linked notes or warrants involve the issuance of securities that are linked to a specific basket of stocks, whereas equity-linked notes or warrants pass through to investors returns on either a registered fund or, increasingly, a synthetic portfolio comprising a registered fund or fund-of-funds and specific fixed-income securities that are dynamically hedged based on an objective fixed formula.

Footnotes

30 §§ 3(a)(1)(A) and 3(a)(1)(C) of the Investment Company Act. There is also a third type of entity that falls within the definition of investment company—the "face amount certificate company" described in § 3(a)(1)(B) of the Investment Company Act—which is not relevant for the purposes of the discussion provided in this book.

31 As long as the trust has an investment purpose in acquiring the securities it holds and engages in no other business that may be considered "primary," that trust may be considered to be engaged primarily in the business of investing in the securities. *Credit Suisse First Boston Corporation* (avail. Sept. 9, 1998); *see also SEC v. Fifth Avenue Coach Lines, Inc.*, 289 F. Supp. 3, 30–31 (S.D.N.Y. 1968), *aff'd*, 435 F.2d 510 (2d Cir. 1970).

32 As stated by one observer, "[the SEC] conceived this objective [asset-based] standard, rejecting the descriptive approach theretofore advanced by text writers and others, because the existing definitions eliminated companies that exercised control or influence over their portfolio companies and because they contained indefinite terms." Edmund H. Kerr, *The Inadvertent Investment Company: Section 3(a)(3) of the Investment Company Act*, 12 STANFORD L. REV. 29, 33 (1959).

It is not clear how the objective asset-based test will be applied to investments in security futures products, which, unlike other securities, are essentially a type of notional contract that has no inherent value once marked-to-market.

33 Section 2(a)(36) of the Investment Company Act defines "security" as:

> any note, stock, treasury stock, security future, bond, debenture, evidence of indebtedness, certificate of interest or participation in any profit-sharing agreement, collateral-trust certificate, preorganization certificate or subscription, transferable share, investment contract, voting-trust certificate, certificate of deposit for a security, fractional undivided interest in oil, gas, or other mineral rights, any put, call, straddle, option, or privilege on any security (including a certificate of deposit) or on any group or index of securities (including any interest therein or based on the value thereof), or any put, call, straddle, option, or privilege entered into on a national securities exchange relating to foreign currency, or, in general, any interest or instrument commonly known as a "security", or any certificate of interest or participation in, temporary or interim certificate for, receipt for, guarantee of, or warrant or right to subscribe to or purchase, any of the foregoing.

See also § 12.01.

34 *See* § 12.01. The SEC and its staff's interpretations of the definition of "security" for purposes of the Investment Company Act are not, insofar as they are broader than those applied for purposes of the other U.S. securities laws, the subject of any published judicial or administrative decision.

The exclusions from the definitions of security under the Securities Act and the Exchange Act codified in the Commodity Futures Modernization Act of 2000 (the "CFMA"), Pub. L. No. 106-554, Appendix E, 114 Stat.

2763, 2763A–365 (2000), for qualifying swap agreements do not apply to the Investment Company Act. Title III of the CFMA contains a "savings clause" providing that nothing in the CFMA is to be construed as finding or implying that any swap agreement is or is not a security "for any purpose under the securities laws," including the Investment Company Act. § 304 of the CFMA. While interest rate and commodity swaps are unlikely to be considered securities for purposes of the Investment Company Act, the SEC staff has indicated in informal consultations that it would consider credit default swaps, which are linked or refer to defaults on specific securities or categories of securities of an issuer, to be securities for purposes of the Act. *See also MACRO Securities Depositor, LLC* (avail. Dec. 1, 2006) (granting no-action relief for trusts to enter into oil-linked OTC derivative instruments on a pre-determined formulaic basis and subject to certain other prescribed procedures, while noting that trusts using OTC derivative instruments linked to one or more securities or one or more securities indices may raise additional issues under the federal securities laws).

In 2007, the initial public offerings of several high-profile alternative asset managers, including Blackstone Group L.P. and Fortress Group LLC, attracted substantial attention, particularly with respect to their analysis of their holdings of investment securities. These entities hold principally general partnership and limited partnership interests in the private equity and hedge funds that they manage. Limited partnership interests count as securities for purposes of the Investment Company Act. General partnership interests, however, generally do not because they generate profits that result from the efforts of the general partner. Because of the high value attributed to their general partnership interests due to their entitlement to carried interest (*i.e.*, generally 20% of the profits realized by the underlying fund), investment securities comprised less than 40% of the total assets of these alternative asset managers, thereby exempting them from registration under the Investment Company Act at the time of their IPOs. *See* Andrew J. Donohue, Director, SEC Division of Investment Management, Testimony Concerning Initial Public Offerings of Investment Managers of Hedge and Private Equity Funds before the U.S. Senate Committee on Finance (July 11, 2007); *see also* Letter from Richard Trumka, AFL-CIO Secretary-Treasurer, to John White, Director, SEC Division of Corporation Finance, and Andrew Donohue, Director, SEC Division of Investment Management (May 15, 2007) (arguing that Blackstone should be viewed as an investment company because, among other things, the general partnership interests it holds are investment securities).

35 As defined in § 2(a)(16) of the Investment Company Act, "Government security" means any security issued or guaranteed as to principal or interest by the United States or its agencies or instrumentalities. Therefore, especially in the case of a foreign issuer, care should be taken to be sure that it has not categorized securities issued by a non-U.S. government as "Government securities" for this purpose.

An “employees' securities company” is an investment company all of the securities of which are owned by former and current employees of a single employer and certain other related parties.

36 § 2(a)(13) of the Investment Company Act.

37 § 3(a)(2) of the Investment Company Act.

38 § 2(a)(41) of the Investment Company Act.

39 Edmund H. Kerr, *The Inadvertent Investment Company: Section 3(a)(3) of the Investment Company Act*, 12 STANFORD L. REV. 29 (1959); Edmund H. Kerr & Alan Appelbaum, *Inadvertent Investment Companies—Ten Years After*, 25 BUS. LAW. 887 (Apr. 1970). Certain of these entities have been exempted or excluded by rule from regulation under the Act, as discussed in §§ 15.05 and 15.06. *See also Xplornet Communications Inc.* (avail. Jan. 11, 2012) (granting no-action relief under § 7(d) of the Investment Company Act to a Canadian broadband Internet service provider ("XCI"), where XCI may have been deemed an investment company if loans it made to a data transmission company were determined to be "securities.")

40 *See* §§ 15.05 and 15.06 for discussion of certain of the provisions.

41 § 6(c) of the Investment Company Act.

42 *See* § 15.06[3][c].

43 Wrap-fee arrangements also raise issues under the Advisers Act. The Advisers Act was amended to require that registered investment advisers that are sponsors of wrap-fee programs provide certain disclosure to prospective clients in these programs in addition to the brochure required under Rule 204-3 under the

Advisers Act. Mutual fund asset allocation programs are specifically excluded from the definition of wrap-fee programs for these purposes. *See* SEC Release No. IA-1411 (Apr. 19, 1994); § 16.05; *see also* §§ 15.03[2][b] and 15.06.

44 Rule 3a-4 under the Investment Company Act. The introductory note to Rule 3a-4 also clarifies that there is no registration requirement under § 5 of the Securities Act for programs organized to comply with the rule. For those programs that do not comply, prior SEC no-action letters continue to apply and impose substantially similar conditions. *See, e.g.*, *Wall Street Preferred Money Managers Inc.* (avail. Apr. 10, 1992) (stating that the staff would no longer respond to inquiries concerning when a discretionary adviser and its accounts are not subject to the Investment Company Act unless the request presented novel or unusual issues). Some have complained that Rule 3a-4 is being taken advantage of to allow Internet-based portfolio accounts and advisory accounts to operate as unregistered investment companies, and the Investment Company Institute (the "ICI") asked the SEC to consider regulating such accounts. *See* Paul F. Roye, Director, SEC Division of Investment Management, Remarks at the Third Annual IA Compliance Summit (Mar. 26, 2001).

U.S. Regulation of the International Securities and Derivatives Markets, § 15.03, REGISTRATION UNDER THE INVESTMENT COMPANY ACT

U.S. Regulation of the International Securities and Derivatives Markets
1 Edward F. Greene, Alan L. Beller, Edward J. Rosen, Leslie N. Silverman, Daniel A. Braverman, Sebastian R. Sperber, Nicolas Grabar & Adam E. Fleisher, U.S. Regulation of the International Securities and Derivatives Markets § 15.03 (11th and 12th Editions 2014-2017)
11th and 12th Editions

Click to open document in a browser

An investment company required to register with the SEC must operate as one of the three types of investment companies enumerated in the statute: a unit investment trust, a management company or a face amount certificate company. Management companies are in turn divided into open-end and closed-end companies. Unit investment trusts are defined as entities organized under trust indentures or similar instruments without boards of directors or similar bodies that issue only securities redeemable at any time at the option of the holder, each of which represents an undivided interest in a pool of specified securities. [45] Unit investment trusts are therefore generally fixed and unmanaged pools of assets. Face-amount certificate companies have been pushed out of the marketplace by other products; they are now extremely rare [46] and will not be considered further in our discussion. Management companies comprise all other investment companies. Open-end companies, the entities commonly referred to as "mutual funds" in the U.S. market, are defined as those having securities outstanding that are redeemable at any time at the option of the holder. [47] Closed-end companies, which do not issue securities redeemable by the holder at will and are traded in the secondary market, include all other management companies. [48] The requirements applicable to a registered investment company depend in part on its type. [49]

Although the system of classification contained in the Investment Company Act might have been an accurate reflection of the types of investment companies that were in existence when the Investment Company Act was adopted over 70 years ago, requiring an investment company to fit into one of these classifications now may be inconsistent with legitimate business objectives. One of the most popular investment vehicles introduced in recent years is the exchange-traded fund or "ETF." ETFs are a hybrid of open-end and closed-end funds—they are traded on the secondary market like shares of stock and their shares are redeemable, although only in very large blocks, which provides certain efficiencies in the operation of the funds. Because the innovative structure of ETFs was not contemplated by the drafters of the Investment Company Act, they do not fit neatly within the typology prescribed by the Act and, to date, have been able to operate only under individually granted exemptive orders from the SEC. [50] Historically, only "index" ETFs, which are designed to mirror the performance of certain public market indices, were available in the United States; however, in 2008, the SEC began to issue exemptive orders involving actively managed ETFs. [51] Recognizing the increasing popularity of ETFs, the SEC also proposed new rules that would codify much of the exemptive relief granted in the ETF

p. 15-14

p. 15-15

area, including in respect of actively managed ETFs, [52] although to date it has only adopted rules addressing ETF disclosure and prospectus requirements. [53]

A registered investment company is subject to very significant ongoing disclosure [54] and regulatory requirements. Although disclosure to investors and potential investors is an important part of the Investment Company Act's scheme, its primary focus is on substantive regulation, including:

- the composition of the board of directors;
- transactions between an investment company and its promoters, underwriters, advisers and other affiliated persons;

- issuance of debt or other "senior" securities and other borrowings to create leverage;
- investment in other investment companies;
- securities custody arrangements; and
- prices at which redeemable securities may be offered or redeemed.

This detailed substantive regulation derives from Congressional intent to curb specific types of abuses. For example, because fund managers of the 1930s "refused to recognize their fiduciary obligations to the shareholders" and engaged in transactions that victimized investors while benefiting themselves, [55] the Investment Company Act includes very restrictive provisions regarding related party transactions. Similarly, the provisions restricting ownership by one investment company of securities of another derive directly from "fund of funds" abuses, involving fees and self-dealing to the benefit of advisers and promoters but to the detriment of investors. [56] Although these and other detailed regulatory provisions have laudable origins, many exceed, and in some cases are inconsistent with, requirements applicable to foreign investment companies in their local jurisdictions. In the case of foreign companies that are inadvertent investment

p. 15-15

p. 15-16

companies, it is fair to say that such regulation is unheard of outside the United States.

Footnotes

45 § 4(a)(2) of the Investment Company Act.

46 According to one industry participant, as of 1990, there were only two active face-amount certificate companies in the United States. *See* Letter of IDS Financial Services Inc. (Oct. 2, 1990).

The Investment Company Act regulates foreign investment companies by restricting their offerings of securities in the United States. A foreign investment company is prohibited under the Investment Company Act from making a public offering in the United States unless it has received an order from the SEC permitting it to register as an investment company, and those orders generally impose conditions that parallel the provisions of the Investment Company Act. [57] The requirements that must be met to obtain such an order are such that, as discussed in § 15.08, with the exception of a few Canadian investment companies, U.S. public offerings by foreign investment companies are effectively prohibited. Although the Investment Company Act does not explicitly address private offerings by foreign investment companies, the SEC also has placed substantial limitations on such offerings based on the rules applicable to U.S. private investment companies, as discussed in § 15.06.

As discussed above, the definition of "investment company" has posed special problems for foreign entities that may fall within the definition—as interpreted by the SEC—but that would not ordinarily be considered investment companies within the common sense meaning of the term. A company falling within the definition of investment company may seek special exemptive relief from the SEC from all or certain provisions pursuant to § 6(c) of the Investment Company Act. The exemptive process, discussed in § 15.05[7], is uncertain and generally protracted and expensive. In recent years, the SEC staff has been reluctant to grant exemptive orders containing any novel elements, and even when granted, it has taken inordinate amounts of time to obtain such orders. Seeking such orders is therefore often unattractive for foreign companies seeking exemption from the Investment Company Act. Where the SEC has developed a consistent view in the context of successive § 6(c) applications presenting similar issues, the SEC has, through its rule-making power, excluded foreign finance subsidiaries, as well as foreign banks and insurance companies and their holding companies, and certain other companies from the definition of investment company, despite their asset composition.

[1] Finance Subsidiaries—Rule 3a-5

p. 15-17

The SEC has excluded certain finance subsidiaries from the Act's definition of investment company in Rule 3a-5 under the Investment Company Act. [58] The rule is applicable to finance subsidiaries organized within or outside the United States, and to those of both U.S. and foreign issuers. Rule 3a-5 provides that such a subsidiary will not be considered an investment company and that the securities of the subsidiary held by its parent [59] or a company controlled by the parent [60] will not be "investment securities" if the conditions of the rule are satisfied. The rule requires that the parent company own all of the securities (except

p. 15-17

p. 15-18

for debt securities and nonvoting preferred shares) of the finance company, although the staff has granted no-action relief for a structure in which the parent company effectively controlled, but did not actually own, the securities of the finance subsidiary. [61] Among its other requirements, Rule 3a-5 specifies that payment of any publicly offered or publicly held nonvoting preferred stock and debt securities [62] of the finance subsidiary must be unconditionally guaranteed by its parent. [63] For these purposes, a "keepwell" or support agreement between the parent and the subsidiary, providing, for example, that the parent will assure that the

p. 15-18

p. 15-19

issuing subsidiary has sufficient resources to satisfy its obligations, is not sufficient. [64] Where the parent company is a foreign bank, [65] however, 1991 amendments to Rule 3a-5 [66] permit the parent to issue an irrevocable letter of credit in favor of security holders in lieu of a guaranty, provided that payment on the letter of credit is conditioned only upon presentation of "customary documentation" and beneficiaries may proceed to enforce the letter of credit directly against the parent. [67] Any convertible or exchangeable securities issued by the finance subsidiary must be convertible solely into or exchangeable solely for the parent's securities or other debt or nonvoting preferred stock of the subsidiary that meets the guarantee and other requirements of Rule 3a-5 under the Investment Company Act. [68]

Rule 3a-5 also places limitations on the use of proceeds received as a result of the finance subsidiary's offering. At least 85% of such proceeds in the form of cash or cash equivalents must be invested in or loaned to its parent or a company controlled by the parent within six months of receipt. [69] In addition, the finance

p. 15-19

p. 15-20

subsidiary may not trade or own any securities other than U.S. government securities, commercial paper meeting the requirements of § 3(a)(3) of the Securities Act [70] and securities of its parent or companies controlled by its parent. [71] The restrictions on the types of securities in which the finance subsidiary may invest are apparently intended to assure that the finance subsidiary does not present risks that would make its regulation as an investment company appropriate. The restriction nevertheless can raise significant issues, particularly in the case of non-U.S. entities whose investments properly include other obligations, such as government securities issued by their "host" government. The impediment to rational financing strategies that Rule 3a-5 presents in this context often prevents issuers from taking advantage of the rule's exemption, and its various limitations should be reconsidered by the SEC.

Finally, the parent company providing the guarantee and any affiliated company to which the proceeds are loaned may not be an investment company or must be exempted under § 3(a) or (b) of the Investment Company Act or one of the SEC's rules under those sections, [72] although the SEC has provided exemptive relief to parent companies that are excluded from the definition of "investment company" under § 3(c)(3), [73] § 3(c)(5)(A), § 3(c)(5)(B) [74] or

p. 15-20

p. 15-21

§ 3(c)(6) [75] but that otherwise satisfy the requirements of Rule 3a-5. [76] Because Rule 3a-6 under the Investment Company Act excludes foreign insurance companies and banks (including government-owned institutions that qualify as "foreign banks" under the rule) [77] from the definition of "investment company," finance subsidiaries of these entities may now rely on Rule 3a-5 if they satisfy the rule's other conditions.

Because the parent guarantee requirement of Rule 3a-5 is applicable only in the case of finance subsidiaries that have outstanding debt securities and nonconvertible preferred stock that were "issued to or held by the public," the rule is available—without the need for a parent guarantee—to finance subsidiaries whose debt and preferred stock are issued in private placements, [78] including private placements contemplating the possibility of resales under Rule 144A under the Securities Act. [79]

The SEC staff has also taken the position that the phrase "issued to or held by the public," as used in Rule 3a-5, does not encompass an offering undertaken pursuant to Regulation S under the Securities Act. [80] Securities of a finance company so offered need not be guaranteed by the company's parent to comply with Rule 3a-5 under the Investment Company Act.

[2] Foreign Banks and Insurance Companies—Rule 3a-6

Rule 3a-6 under the Investment Company Act excludes banking institutions and insurance companies organized outside the United States from the definition of "investment company," exempting them entirely from the operation of the Investment Company Act, if they are regulated by home country authorities

p. 15-21

p. 15-22

as a banking institution or insurance company, as applicable, and either engaged substantially in commercial banking activity [81] or engaged primarily and predominantly in writing insurance contracts [82] or the reinsurance of such insurance contracts underwritten by insurance companies, as applicable. [83] Rule 3a-6 replaced and broadened Rule 6c-9, [84] which provided a more limited exemption available only to foreign banks and their finance subsidiaries in the case of certain offerings of debt securities and nonvoting preferred stock. [85] Issuers seeking to rely on Rule 3a-6 in connection with a U.S. public offering registered under the Securities Act must file with the SEC a brief form (Form F-N) that identifies the issuer and its agent for purposes of receiving service of process in the United States. [86]

p. 15-22
p. 15-23

Because Rule 3a-6 excludes foreign banks and insurance companies from the definition of "investment company" rather than merely exempting them from the requirements of the Investment Company Act, such entities (and their holding companies and finance subsidiaries) can take advantage of other exemptive provisions that depend on their status as noninvestment companies. [87] For example, the restriction on the holding of the securities of investment companies by registered investment companies does not apply to their holdings of securities of foreign banks and insurance companies because they are excluded from the definition of "investment company" (and not merely exempted from the operation of the Investment Company Act). [88]

Common or collective trusts, separate accounts or other pools of assets in which interests are offered (as opposed to direct interests in the issuer) will not qualify as foreign banks or insurance companies under the rule. [89] Additionally, Rule 3a-6 does not address the situation of a number of foreign bank-like entities that have sought to make offerings in the United States but, because of the nature of their assets, have sought assurances that they are not subject to regulation under the Investment Company Act. [90] Certain special credit institutions have received exemptive relief, including a non-governmental issuer of covered bonds backed by public sector debt and mortgage obligations that was not permitted to take deposits and was therefore not a "bank" for purposes of Rule 3a-6. [91] Nevertheless, relief was granted on the basis of the regulatory and supervisory home-country regime and the restricted nature of the issuer's activities.

p. 15-23
p. 15-24

Government-owned and controlled non-bank credit institutions also generally fall outside the scope of Rule 3a-6. These foreign institutions are most often involved in using their funds, which they obtain from the governments that control them and from borrowings from banks and in the capital markets, to make loans to finance economic development, export or import transactions or other activities that are part of government policy. Their assets, however, are predominantly loan receivables that may be viewed as securities under the Investment Company Act.

If these entities are not regulated as banks or "substantially engaged in commercial banking activity," they are not able to rely on Rule 3a-6 (nor would their finance subsidiaries be able to rely on Rule 3a-5 under the Investment Company Act), notwithstanding that they are generally referred to as "banks." It would appear sound, both as a matter of policy and interpretation of the Investment Company Act in light of the provisions of the Securities Act, that an issuer filing a registration statement under Schedule B of the latter as a "foreign government or political subdivision thereof" should not be viewed as an investment company. However, the SEC appears to have taken the position that, while it may be inclined to be more flexible in avoiding application of the Investment Company Act in such cases, Schedule B status is not in itself grounds for doing so. Export-import banks have generally obtained no-action relief confirming that they may rely on the exemption for companies principally engaged in purchasing and financing receivables, discussed at § 15.05[3], on the grounds that their activities generally involve lending money for, or purchasing or otherwise refinancing, purchases of goods or services in connection with import or export transactions. [92] The SEC has granted exemptions from all provisions of the Investment Company Act under § 6(c) to development banks and other government-related financing institutions where the exemptions for specific kinds of financing activity cannot be relied on. [93] The SEC has relied on the

p. 15-24
p. 15-25

strong elements of foreign government policy and foreign government control behind the activities of these entities in granting these exemptions. In other cases, where application for no-action or exemptive relief under the Investment Company Act has not been made, the SEC has apparently not raised the question of whether Investment Company Act registration is required and has declared effective under the Securities Act registration statements for governmental entities such as development banks that have filed under Schedule B.

[3] Asset-Backed Arrangements

[a] Companies "Primarily Engaged" in Purchasing Mortgages and Receivables—§ 3(c)(5)

As a result of negotiations at the time the Investment Company Act was adopted, exclusions from the operation of the Act were provided for finance and similar companies that were not banks but that purchased and financed mortgages and receivables for goods and services. [94] This exclusion, in addition to being relied on by such companies, was, at least until the adoption in 1992 of Rule 3a-7 under the Investment Company Act, the principal provision relied on to keep many asset-backed arrangements from having to register under the Investment Company Act (for purposes of this chapter, asset-backed arrangements are referred to as "ABAs"). In particular, the issuers of mortgage-backed securities and of many receivables-backed securities, whether organized within or outside the United States, have been able to fit within these exclusions. [95] These provisions have also been the basis for conclusions that certain foreign issuers, particularly government-related entities, whose business is the financing of the purchase of specified merchandise and services (such as special purpose entities designed to refinance military equipment sales) are not investment

p. 15-25

p. 15-26

companies. [96] In cases of close questions regarding these provisions, the SEC appears disposed to grant exemptive orders under § 6(c) of the Investment Company Act rather than interpret the exemptive provisions themselves to permit the proposed activities in order to maintain the ability to impose additional conditions on a particular exemption's availability.

These provisions raise a number of interpretive questions, and, on some, SEC guidance has been received. The question of what is required to be "primarily engaged" has been considered extensively in the case of mortgage-backed ABAs. In some cases, only a portion of the assets of an issuer consists of "whole loans" secured by mortgages, which are considered by the SEC to be "mortgages and other liens on and interests in real estate," [97] while the remainder consists substantially of participations or other partial interests in such loans, which, in the view of the SEC, are not "mortgages and other liens on and other interests in real estate." The SEC has granted no-action relief where pools of assets contain at least 55% by value of whole loans, finding that such pools satisfy the "primarily engaged" test. [98] The SEC has undertaken a review of market practice and its guidance under § 3(c)(5)(C), requesting comment on whether such arrangements should be prohibited from relying on § 3(c)(5) and limited—by statute or rule—to reliance on Rule 3a-7 only (discussed below). [99]

There have also been a number of interpretations regarding the types of activities that constitute the purchase of receivables and the sorts of assets that constitute permissible receivables within § 3(c)(5) of the Investment Company Act. [100] For example, relief has been granted where the purchased receivables consisted of intellectual property royalty payments where such payments were directly based on the sales price of the products using the intellectual property in

p. 15-26

p. 15-27

question. [101] In another instance, no-action relief was granted to a non-governmental issuer of covered bonds that made loans to public sector entities for construction and renovation projects, based in part on the analysis that the loans were to prospective purchasers of specified merchandise and services within the meaning of § 3(c)(5)(B). [102] In some credit card receivables securitization transactions involving ABAs and relying on § 3(c)(5), transaction participants have agreed to place restrictions on the use of such receivables resulting from cash advances, as opposed to receivables resulting from the purchase of goods and services, on the theory that only the latter receivables fall within the categories enumerated in § 3(c)(5). [103]

[b] Other Asset-Backed Arrangements—Rule 3a-7

Largely in response to comments that it received in response to the Concept Release, [104] the staff adopted Rule 3a-7 under the Investment Company Act to exclude from the definition of "investment company" issuers that do not issue redeemable securities [105] and that pool receivables, the cash flow on which is the principal source of funds for payment of the securities of those issuers. [106] Rule

p. 15-27
p. 15-28

3a-7 is available for pools of "eligible assets," which are defined as "financial assets, either fixed or revolving, that by their terms convert into cash within a finite time period plus any rights or other assets designed to assure servicing or timely distribution of proceeds to security holders." [107] The definition is intended to include credit and liquidity facilities "designed to assure the servicing or timely distribution of proceeds to security holders." [108]

To qualify for the Rule 3a-7 exemption, an issuer may only issue "fixed income securities" [109] or other securities that entitle their holders to receive payments that depend "primarily" on the cash flow from eligible assets. [110] The payment of residual interests out of proceeds from the sale or other disposition of underlying assets will therefore not prevent reliance on the exemption. Only fixed-income securities that are rated at the time of initial sale in one of the four highest rating categories applicable to long-term debt (or an equivalent short-term category depending on the maturity of the securities)—that is, are rated "investment grade"—by at least one nationally recognized statistical rating organization, may be sold publicly by the issuer or its underwriters without any

p. 15-28
p. 15-29

restriction. [111] While the SEC has proposed removing reliance on credit ratings from certain rules, [112] the SEC has requested comment on whether this and other references to credit ratings in Rule 3a-7 should be retained, or whether references to credit ratings should be replaced with conditions that are tailored to address Investment Company Act and related concerns. [113] In contrast, noninvestment grade fixed income securities may be sold only to institutional "accredited investors" within the meaning of Rule 501(a)(1), (2), (3) or (7) under the Securities Act, and to other institutions all of the equity of which is owned exclusively by such investors. All other securities, including residual interests, may be sold only to "qualified institutional buyers" within the meaning of Rule 144A under the Securities Act [114] and to persons who are involved in the organization or operation of the issuer and their affiliates. [115] Issuers and underwriters must exercise reasonable care, including through the use of legends and contractual restrictions, [116] to ensure that nonconforming securities (*i.e.*, securities that do not qualify as "fixed-income securities" or meet the rating condition) are sold or resold solely to the applicable types of institutional investors. [117] The SEC staff has orally confirmed, and transactions have proceeded on the understanding, that

p. 15-29
p. 15-30

investors in offerings by non-U.S. issuers under Rule 3a-7 that are not U.S. persons (generally following the definition set forth in Regulation S under the Securities Act) and that purchase these unrated or lower-rated securities (either in a primary offering or in the secondary market) need not meet the requirement that they be qualified institutional buyers or institutional accredited investors. But the SEC staff has provided no formal guidance as to whether U.S. persons acquiring such securities from non-U.S. persons in the secondary market must meet this requirement. [118]

Dispositions and acquisitions of eligible assets during the term of the securities are permitted as long as these actions (i) are authorized in the documents governing the financing, (ii) do not result in a downgrade of outstanding fixed-income securities of the issuer and (iii) are not undertaken for purposes of recognizing gains or preventing losses resulting from volatility in the market value of eligible assets. [119]

Finally, Rule 3a-7 requires, other than in the case of asset-backed commercial paper programs, that the issuer appoint a trustee for the pool and that the trustee be unaffiliated with the issuer or any person involved in the organization or operation of the issuer. [120] The SEC has, however, permitted as trustee a disclosed affiliate of an underwriter of the issuer's securities. [121] The rule, nevertheless, permits a trustee to act as servicer if the primary servicer becomes unable to act as such, but prohibits a trustee from providing any credit enhancement for the securities. [122] A trustee must agree that it will not resign until the financing is liquidated or a successor trustee is appointed. [123] The issuer must take reasonable steps to ensure that the trustee has "a perfected security interest or ownership interest valid against third parties" in the assets of the issuers that "principally" [124] provide the cash flow to make payments of the securities. Under the standard imposed by the rule, a trustee need not therefore have a *first* priority perfected security interest. [125]

The adoption of Rule 3a-7 has facilitated offerings in the U.S. public markets of a variety of ABAs that prior thereto were restricted or effectively prohibited. Among these instruments are nonredeemable securities representing an interest in a pool of debt securities created in a repackaging strategy or securities backed by receivables, loans or other debt instruments that do not qualify for exemption under § 3(c)(5) of the Investment Company Act. Rule 3a-7 has also facilitated U.S. public offerings of structured products consisting of interests in a combination of one or more of such instruments combined with, for example, a currency or interest-rate swap. [126] In recent years, the SEC staff has indicated a growing antipathy to the uses of Rule 3a-7 and has been construing the provisions of the rule increasingly strictly, with the result that novel ABA structures may have difficulty qualifying under the rule.

[4] Rules 3a-1 and 3a-3

Rule 3a-1 under the Investment Company Act somewhat limits the impact of § 3(a)(1)(C) of the Investment Company Act in the case of certain inadvertent investment companies having more than 40% of their assets invested in investment securities.

Under Rule 3a-1, an issuer will not be considered an investment company if (i) no more than 45% of the value of such issuer's total assets (exclusive of U.S. government securities, cash items, securities of majority owned subsidiaries and securities of companies "controlled primarily" by the issuer and through which it engages in non-investment company businesses) [127] consists of, and (ii) no more than 45% of such issuer's net income after taxes for the last four

p. 15-31

p. 15-32

fiscal quarters is derived from, investment securities. Rule 3a-1 requires that "wholly-owned subsidiaries," subsidiaries in which the issuer owns 95% or more of the voting securities, be consolidated for purposes of its asset and income tests.

Regarding the exclusion of securities issued by companies "controlled primarily" by the issuer, as described above, while the Investment Company Act provides a definition of "control," [128] which is presumed to exist when a person owns more than 25% of the voting securities of an issuer, neither the Act nor the rules thereunder define the term "controlled primarily." In proposing Rule 3a-1, the SEC stated that the "controlled primarily" standard was designed to limit the effect of subsection (a)(4)(i) of the rule to those companies that are controlled to the same extent as a majority-owned subsidiary is controlled. [129] Where an entity owns 25% to 50% of a company's shares, but there is another potential control block, the facts and circumstances of the relationship of the parties must be considered. [130]

The excluded securities must also be issued by a company "through which" the issuer engages in a business other than that of an investment company. [131] This requires that the issuer exercise active control over the company in question. [132] In the absence of facts evidencing close involvement with the company, an issuer may have difficulty demonstrating that it is acting "through" the company.

The final element of Rule 3a-1 requires that the issuer not be a "special situation investment company." [133] A special situation investment company is a company that secures control of other companies primarily for the purpose of making a profit in the sale of their securities, as opposed to a holding company that secures control of other companies primarily for the purpose of engaging in those companies' lines of business. [134]

p. 15-32

p. 15-33

Rule 3a-3 under the Investment Company Act builds on Rule 3a-1 by exempting from the registration requirements of the Act any issuer all of whose securities (other than short-term paper and certain other limited classes of securities) are owned, directly or indirectly, by a company that meets the asset and income tests of

Rule 3a-1 and that either is not an investment company as defined in § 3(a) [135] or is excluded from the definition by specified provisions. A principal benefit of Rule 3a-3 for foreign companies has been to provide an exemption for finance companies that are wholly owned by their parent, have no long-term debt to third parties and issue only short-term instruments (*e.g.*, commercial paper) without requiring such issuers to meet all of the additional conditions of Rule 3a-5 under the Investment Company Act. [136]

[5] Transient Investment Companies—Rule 3a-2

Companies that would otherwise come within the definition of investment company under § 3(a)(1) of the Investment Company Act may be able to avoid being subject to the Act for up to one year under Rule 3a-2. [137] Rule 3a-2, which codifies a line of no-action letters issued by the staff, requires such a company to have a *bona fide* intent to be engaged primarily in a business other than investing, reinvesting, owning, holding or trading of securities as soon as reasonably possible, and at most within a year. [138] A company seeking to rely on Rule 3a-2 must evidence such intent by both its business activities and an appropriate resolution of the company's board of directors. [139] This rule can be particularly useful in certain situations, such as for a start-up company with substantial assets temporarily in investment securities pending the purchase of operating assets or the consummation of planned acquisitions, [140] or alternatively, for a company that

p. 15-33

p. 15-34

holds a valuable minority interest in another enterprise acquired, for example, as part of a planned, but ultimately abandoned, acquisition.

Rule 3a-2 may not be used by a company that holds itself out as being in the business of investing or trading securities. [141] Also, a company may not rely on Rule 3a-2 more than once in any three-year period. [142]

[6] Research and Development Companies—Rule 3a-8

Certain research and development companies that would otherwise come within the definition of investment company under § 3(a) are, as a result of the adoption by the SEC of Rule 3a-8, exempt from the Act. [143] Research and development companies tend to come within the definition of investment company for two reasons: first, they seldom have substantial tangible assets and often raise large amounts of capital, invest the proceeds and use the return on those investments to fund their operations; and second, as part of a strategic alliance to conduct research and develop products, they may purchase a noncontrolling equity stake in another company. [144]

To qualify for the safe harbor provided by Rule 3a-8, a research and development company must satisfy four principal [145] criteria: first, a company's

p. 15-34

p. 15-35

research and development expenses, for its last four fiscal quarters combined, must constitute a "substantial percentage" of its total expenses over the same period; second, a company's net income derived from investments in securities, for its last four quarters combined, may not exceed twice the amount of its research and development expenses for the same period; third, a company may devote no more than five percent of its total expenses for its last four fiscal quarters combined to investment advisory, management and related activities; and fourth, with two exceptions, a company's investments in securities must constitute "capital preservation investments." [146]

[7] SEC Exemptive Power

[a] Section 6(c)

The detailed regulatory provisions of the Investment Company Act are coupled in many cases with a grant of exemptive power to the SEC. [147] In addition, § 6(c) of the Investment Company Act [148] grants the SEC, subject to satisfaction of the statutory standard, broad exemptive authority with respect to any or all of the provisions of the Investment Company Act. In order for relief to be

p. 15-35
p. 15-36

granted under § 6(c), an applicant bears the burden of showing that the relief requested is "necessary or appropriate in the public interest" *and* "consistent with the protection of investors and the purposes fairly intended by the policy and provisions" of the Investment Company Act. [149] The SEC's authority under § 6(c) is permissive rather than mandatory: the SEC "may" grant an exemption upon a finding satisfying the statutory standard. Nevertheless, if the required finding is made, the SEC's power under § 6(c) appears to be very broad. [150] The inclusion of § 6(c) was the result of the recognition by the drafters of the Investment Company Act that its provisions could prove too specific to accommodate innovation in the investment fund industry. [151] The SEC thus has the express authority to exempt persons, transactions and securities from the operation of any provision of the Investment Company Act or any rule or regulation thereunder, as well as to grant relief on an unconditional basis or subject to whatever conditions it

p. 15-36
p. 15-37

deems appropriate to ensure compliance with the terms of the relief, to protect investors or otherwise to implement the intent of the Investment Company Act in the circumstances of the relief granted.

Foreign companies have used the § 6(c) exemptive process both to gain relief with respect to specific provisions of the Investment Company Act and to obtain exemption from the entire Investment Company Act. [152] As an example of the former, in the few cases in which foreign funds have been permitted to register under § 7(d) of the Investment Company Act for purposes of making a public offering in the United States, an SEC order under § 6(c) has sometimes been necessary to address differences between the Investment Company Act and foreign regulations. As an example of the latter, a very large number of foreign banks obtained exemptions from the Investment Company Act under § 6(c) to issue debt securities in the United States prior to the adoption of the predecessor to Rule 3a-6 discussed in § 15.05[2].

Both U.S. and foreign companies have also received § 6(c) exemptive orders in situations where foreign laws or other considerations prevent the companies from acquiring majority interests or control over foreign ventures, thereby increasing the risk that these interests would qualify as "investment securities" under the Investment Company Act and that the companies would be classified as investment companies. [153] In order to obtain the exemptive relief, however, a company must take an active role in the development of the foreign ventures, and not merely be a passive investor. [154]

p. 15-37
p. 15-38

The application for exemptive relief must describe the relief sought, as well as an "adequate basis" for requesting the relief. [155] The SEC also encourages applicants to provide detail with respect to SEC precedents that may be relevant to a determination of an exemptive request. After receiving an application, [156] the SEC will publish in the *Federal Register* for public comment a notice of the application containing the names of the parties involved and a brief description of the proposed transaction or circumstances prompting the application, the basis for relief and the key representations and undertakings contained in the application. In response to the notice, interested parties may submit comments to the SEC concerning the application or may request a public hearing to present their views.

According to internal guidelines of the SEC's Division of Investment Management, the division responsible for administration of the Investment Company Act, the SEC aims to provide initial comments on an exemptive application within 45 days of receipt (although the guidelines clarify that complex or novel issues may require a longer period of review), and notices of routine requests are to be published for comment within 60 days of receipt of the application. In recent years, however, the staff has often had difficulty in adhering to these guidelines and has evidenced a general reluctance to exercise its exemptive authority, with the result that requests for exemptive orders have remained pending for extended periods. In the case of requests raising new issues, one or more rounds of staff comments requiring the preparation and filing of a revised formal application are common and add significantly to the time required to obtain relief. Publication of the notice occurs generally only after the SEC is satisfied with the application, and the notice period generally extends for 25 to 28 days. [157] The guidelines also require that SEC orders granting exemptive requests be published within two business days after the expiration of the notice period, if no hearing request is filed. In general, because all issues have been settled with the staff between the first filing of the request for exemption and publication of notice, this last very short deadline is not only difficult for the SEC to meet, but

p. 15-38
p. 15-39

also is not particularly relevant in a consideration of the overall length of the process.

The § 6(c) process has significant shortcomings. First, because the relief is exemptive, each applicant seeking an exemption, even if it is identical to one already granted, must proceed separately. As a result, although the SEC often processes applications for repeat relief expeditiously, a minimum of four to six weeks is likely to be necessary. Second, for other exemptive requests in which something more is sought than relief identical to that previously granted to another applicant, the time and expense involved can increase significantly. Conducted as described above, with publication of the application and opportunity for interested parties to object to the requested relief through a hearing process, obtaining an exemption can, under the best of circumstances, take a number of months and applications containing novel elements have sometimes remained pending for several years. The exemptive process under § 6(c) may also create a disincentive to pioneer new investment products because, although the first application for relief may require significant time and expense, subsequent applications by others requesting identical relief are processed more quickly and involve considerably less expense for the applicants. Commenters responding to the Concept Release urged that the SEC take action to reduce the time and expense associated with exemptive relief under § 6(c). At least one commenter suggested that the SEC make broader use of its ability to exempt classes of securities or transactions under § 6(c) under the Investment Company Act. [158]

The SEC acknowledged the inefficiency of the current exemptive process in the 1992 Report and proposed amendments to Rule 0-5 under the Investment Company Act to permit the staff to address on an expedited basis exemptive applications for which there is precedent and amendments to Rule 30-5 of the SEC's Rules of Practice that would increase the number of provisions of the Investment Company Act as to which the Division of Investment Management would be authorized by the SEC to take action pursuant to delegated authority. [159] The SEC adopted the changes to Rule 30-5 of its Rules of Practice in 1995, [160] but it has not taken action on the proposed changes to Rule 0-5 under the Investment Company Act. [161]

[b] Section 3(b)(2)

p. 15-39
p. 15-40

During the height of the "Internet boom" in 1999 and 2000, a number of "Internet incubator" and other "new economy" companies availed themselves of the staff's exemptive power under § 3(b)(2) of the Investment Company Act, [162] which excepts from the definition of "investment company" those companies that the SEC declares to be "primarily engaged" in a business other than investing, reinvesting, owning or holding securities. Some of these companies had significant, but not "controlling," interests [163] in other Internet-related companies, and when the market value of these holdings increased very rapidly, the companies were unable to avoid tripping the 40% test in the definition of investment company under § 3(a)(1)(C) of the Act. For example, both Yahoo! Inc. and Bill Gross's idealab! had "strategic holdings" that were considered "investment securities" under § 3(a)(1)(C) of the Investment Company Act. Both of these companies were, however, successful in obtaining exemptive relief under § 3(b)(2) of the Investment Company Act. [164] More recently, a company that was a member of a joint venture outside the technology sector was able to obtain exemptive relief where, despite owning 50% of the outstanding voting securities, it was only entitled to elect a minority of the board of directors but retained significant veto rights over board and shareholder actions by virtue of supermajority voting requirements and active participation in the management and affairs of the joint venture company. [165]

In considering applications for exemptive relief under § 3(b)(2), the SEC has stated that it considers:

- the company's historical development;
- the company's public representations of policy;
- the activities of the company's officers and directors;
- the nature of the company's present assets; and
- the source of the company's present income.

p. 15-40

p. 15-41

The determination of whether a company has qualified for exemption is based on all of the relevant facts and circumstances. [166] Like other exemptive relief under the Investment Company Act, obtaining relief under § 3(b)(2) can be expensive and time consuming. But for companies like Yahoo! or Bill Gross's idealab!, which are dependent on access to U.S. capital markets, there may be no alternative.

Certain foreign companies have used similar Internet-related business models and have faced similar issues under the Investment Company Act. But the very substantial time and cost required to obtain such exemptive relief have usually dissuaded potential foreign issuers from doing so.

Footnotes

58 Rule 3a-5(b) under the Investment Company Act defines "finance subsidiary" as any corporation:

> (i) All of whose securities other than debt securities or non-voting preferred stock meeting the applicable requirements of paragraphs (a)(1) through (a)(3) [relating to the parent company's guarantee of such securities] or directors' qualifying shares are owned by its parent company or a company controlled by its parent company; and
>
> (ii) The primary purpose of which is to finance the business operations of its parent company or companies controlled by its parent company.

Although the rule defines "finance subsidiary" as a "corporation" that satisfies the conditions in clauses (i) and (ii), the SEC staff has taken the position that finance subsidiaries organized as partnerships issuing nonvoting preferred partner interests, *Andrews & Kurth* (avail. Apr. 5, 1994), as limited liability companies issuing nonvoting preferred member interests, *Lehman Brothers Inc.* (avail. Mar. 8, 1994); *Merrill Lynch & Co.* (avail. Mar. 2, 1994), or as business trusts issuing preferred securities, *Lehman Brothers Inc.* (avail. May 26, 1995), debt securities or other securities representing nonvoting preferred beneficial interests, *Merrill Lynch & Co.* (avail. May 25, 1995), or nonvoting preferred trust certificates, *Goldman, Sachs & Co.* (avail. Apr. 27, 1995), may rely on the exemption for finance subsidiaries so long as the subsidiaries and the related transactions comply fully with the remaining requirements of the rule.

59 "[P]arent company" is defined in Rule 3a-5(b)(2) under the Investment Company Act as any corporation, partnership or joint venture:

> (i) That is not considered an investment company under section 3(a) or that is excepted or exempted by order from the definition of investment company by section 3(b) or by

> the rules or regulations under section 3(a);
>
> (ii) That is organized or formed under the laws of the United States or of a state or that is a foreign private issuer, or that is a foreign bank or foreign insurance company as those terms are used in [R]ule 3a-6 [under the Investment Company Act]; and
>
> (iii) In the case of a partnership or joint venture, each partner or participant in the joint venture meets the requirements of paragraphs (b)(2)(i) and (ii).

60 "[C]ompany controlled by the parent company" is defined in Rule 3a-5(b)(3) under the Investment Company Act as any corporation, partnership or joint venture:

> (i) That is not considered an investment company under section 3(a) or that is excepted or exempted by order from the definition of investment company by section 3(b) or by the rules or regulations under section 3(a);
>
> (ii) That is either organized or formed under the laws of the United States or of a state or that is a foreign private issuer, or that is a foreign bank or foreign insurance company as those terms are used in [R]ule 3a-6 [under the Investment Company Act]; and
>
> (iii) In the case of a corporation, more than 25 percent of whose outstanding voting securities are beneficially owned directly or indirectly by the parent company; or
>
> (iv) In the case of a partnership or joint venture, each partner or participant in the joint venture meets the requirements of paragraphs (b)(3)(i) and (ii), and the parent company has the power to exercise a controlling influence over the management or policies of the partnership or joint venture.

"[F]oreign private issuer" is in turn defined as "any issuer which is incorporated or organized under the laws of a foreign country, but not a foreign government or political subdivision of a foreign government." Rule 3a-5(b)(4) under the Investment Company Act. The definitions of "foreign bank" and "foreign insurance company" are discussed *infra* at Notes 81–82 and accompanying text.

61 *See Brown & Wood* (avail. Feb. 24, 2000).

62 In no-action correspondence relating to Rule 6c-9 under the Investment Company Act, now rescinded but which provided a similar exemption for foreign banks, the SEC staff concluded that cash-settled stock index warrants constitute debt for purposes of the rule where the warrants in question (warrants on certain broad-based indices, such as the S&P 500 Index and the Nikkei Index) represented direct obligations of the issuer to pay the cash value of warrants on their exercise date and would rank *pari passu* with all present and future unsecured senior debt of the issuer. The staff also noted that the warrants were expected to receive investment grade debt ratings from one or more nationally recognized national statistical rating organizations and that the warrants would not entitle their holders to any of the rights normally incident to equity securities, such as voting rights. *Barclays Bank PLC* (avail. Mar. 16, 1991). In that context, the SEC has also taken the position that preferred stock having limited voting rights in extraordinary circumstances, such as in connection with the liquidation of the issuer or a modification of the terms of the preferred stock, would constitute "nonvoting preferred stock." *Barclays Bank PLC* (avail. June 26, 1989).

63 Rule 3a-5 permits the parent guarantee to be subordinated in right of payment to other debt of the parent (Rules 3a-5(a)(1) and 3a-5(a)(2)), although security holders must have the right, pursuant to the terms of the

guarantee, to institute suit directly against the parent without first proceeding against the subsidiary (Rule 3a-5(a)(3)). Although there is no published no-action letter addressing the point, a parent guarantee that ranks *pari passu* with preferred stock of the parent would apparently also constitute a guarantee in compliance with the rule. A "guarantee" of preferred stock need only cover dividends after they are declared. *Cleary, Gottlieb, Steen & Hamilton* (avail. Dec. 23, 1985); *see also Chieftain International Funding Corporation* (avail. Nov. 3, 1992); *In the Matter of Echo Bay Finance Corp.*, SEC Release Nos. IC-18802 (June 22, 1992) (notice of application) and IC-18848 (July 15, 1992) (Order) (exemption from requirement to guarantee liquidation preference with respect to preferred stock).

64 SEC Release No. IC-16093 (Oct. 29, 1987). Certain precedents suggest, however, that the SEC might grant an exemption under § 6(c) of the Investment Company Act in the case of a finance subsidiary that otherwise meets the requirements of Rule 3a-5 but issues securities publicly with the benefit of a parent keepwell rather than a guarantee. 52 Fed. Reg. 42,280, 42,282 (Nov. 4, 1987). The exclusion of keepwell arrangements from Rule 3a-5 has raised particular difficulties for finance subsidiaries of Japanese companies, which for Japanese regulatory reasons much prefer "strong" keepwell arrangements, providing enforceable undertakings that the parent assure that the subsidiary has sufficient resources to meet its obligations and even that the parent's undertakings are directly enforceable by the holders of the subsidiary's securities benefiting from the keepwell, rather than guarantees. These difficulties have been significantly ameliorated by clarification that the guarantee requirement does not apply to either offerings outside the United States under Regulation S under the Securities Act, or to offerings sold in private placements as discussed below.

65 *See infra* Note 81 and accompanying text.

66 SEC Release No. IC-18381 (Oct. 29, 1991).

67 Rule 3a-5(a)(7) under the Investment Company Act. In so amending Rule 3a-5, the SEC was responding to concerns that many banks may not provide guarantees under applicable law. SEC Release No. IC-18381 (Oct. 29, 1991).

68 Rule 3a-5(a)(4) under the Investment Company Act.

69 Rule 3a-5(a)(5) under the Investment Company Act. The SEC has granted an exemptive order under § 6(c) to the effect that a company eligible to receive loans under Rule 3a-5(a)(5) could include a company otherwise meeting the definition of a "company controlled by a parent company" that engages in certain activities, including: (i) providing financing to the parent's subsidiaries through loans and through the purchase of accounts receivable, (ii) investing in temporary investments, (iii) receiving short-term funds on an ongoing basis from the parent's subsidiaries and others, and (iv) participating in a continuous program of short-term lending so long as the company only holds securities that are either permitted under Rule 3a-5(a)(6), have a remaining maturity of no greater than 12 months or consist of accounts receivable from the parent's subsidiaries. The primary purpose of the finance subsidiary must also continue to be the lending of money to the parent company or a company controlled by the parent company in accordance with their business needs. Rule 3a-5(b)(1)(ii) under the Investment Company Act; *In the Matter of IBM International Finance, N.V.*, SEC Release Nos. IC-19548 (June 29, 1993) (notice of application) and IC-19602 (July 28, 1993) (Order). In the exemptive order, the SEC took the position that a back-to-back loan from a finance subsidiary to a parent company or a company controlled by a parent company, where the subsidiary deposits funds with a bank that are in turn loaned to a specified subsidiary of the parent company, although appearing as a bank deposit on the books of the subsidiary, may be included within the 85% minimum investment required by Rule 3a-5(a)(5) and within the investments permitted by Rule 3a-5(a)(6) under the Investment Company Act. *In the Matter of IBM International Finance*, SEC Release No. IC-19602 (July 28, 1993) (Order).

70 The SEC staff has taken the position that an investment in money market mutual fund shares, repurchase agreements with respect to U.S. government securities and demand and time deposits of foreign banks, even if such deposits may not satisfy § 3(a)(3) of the Securities Act, are permitted investments under Rule 3a-5(a)(6) under the Investment Company Act. No percentage limitations apply to such an investment.

Hewlett-Packard Finance Company (avail. July 17, 1996); *see also Hewlett-Packard Finance Company* (avail. Oct. 7, 1992); *In the Matter of IBM International Finance, N.V.*, SEC Release Nos. IC-19548 (June 29, 1993) (notice of application) and IC-19602 (July 28, 1993) (Order).

71 Rule 3a-5(a)(6) under the Investment Company Act.

72 Rules 3a-5(b)(2) and 3a-5(b)(3) under the Investment Company Act.

73 Section 3(c)(3) of the Investment Company Act exempts from the definition of "investment company" U.S. banks, insurance companies and related entities. Rule 3a-6(a), in turn exempts foreign banks and insurance companies. *See* text accompanying *infra* Notes 81–85.

74 In granting an exemptive order under § 6(c), the SEC took the position that the parent company or the controlled company to which the proceeds are loaned may also be a company that qualifies for an exemption from the Investment Company Act pursuant to § 3(c)(5)(A) or § 3(c)(5)(B) solely by reason of its holding accounts receivable of its customers or of other subsidiaries of the parent company or the controlled company, or by reason of loans made by it to those customers or subsidiaries. *In the Matter of IBM International Finance, N.V.*, SEC Release Nos. IC-19548 (June 29, 1993) (notice of application) and IC-19602 (July 28, 1993) (Order).

75 Section 3(c)(6) of the Investment Company Act exempts from the definition of "investment company" companies predominantly engaged in banking activities described in § 3(c)(3), lending activities described in § 3(c)(4) or receivables financing activities described in § 3(c)(5).

76 *In the Matter of MetLife, Inc.*, SEC Release Nos. IC-29101 (Dec. 30, 2009) (notice of application) and IC-29124 (Jan. 26, 2010) (Order).

77 *See* text accompanying *infra* Notes 81–88.

78 *Sony Capital Corp.* (avail. Apr. 27, 1992) (private placement permitting resales under Rule 144A); *PSEG Capital Corp.* (avail. July 13, 1988); *see also General Electric Overseas Capital Corp.* (avail. July 7, 1983). The private placements involved in these letters provided for resales to be conducted solely under Rule 144A or otherwise to certain sophisticated investors—apparently for the life of the securities—leaving open the question whether Rule 3a-5 would continue to be available if the securities were "held by" the U.S. public as a result of resales in accordance with Rule 144 under the Securities Act. The better view, based on the staff's positions in the case of securities offered under Regulation S under the Securities Act (which may trade freely into the U.S. public market after expiration of any applicable distribution compliance period), would seem to be that the exemption would continue to be available. *See also KDSM, Inc., Sinclair Capital* (avail. Mar. 17, 1997).

79 *See* § 7.02[3].

80 *Société Générale* (avail. Feb. 14, 1992); *MEC Finance USA, Inc.* (avail. Oct. 25, 1991).

81 Being "[e]ngaged substantially in commercial banking activity" continues to be defined, as previously provided in Rule 6c-9 under the Investment Company Act, as being

> engaged regularly in, and deriving a substantial portion of its business from, extending commercial and other types of credit, and accepting demand and other types of deposits, that are customary for commercial banks in the country in which the head office of the banking institution is located.

Rule 3a-6(b)(2) under the Investment Company Act. The SEC staff has taken the position that time deposits and interbank deposits can qualify as "deposits and extensions of credit" within the meaning of Rule 3a-6, where U.S. local banking regulations would treat them as such and as customary banking activities. *Safra Republic Holdings, S.A.* (avail. Apr. 21, 1998).

What constitutes a "substantial portion of its business" is open to interpretation, although it clearly means something less than "principal" or "primary." *See Safra Republic Holdings, S.A.* (avail. Apr. 21, 1998). The SEC staff has rejected a proposed "ten percent test" based on a foreign bank's revenues and assets (with respect to credit extensions) and liabilities (with respect to deposits), but has indicated that, to constitute a "substantial portion," the banking activities of a foreign bank must be more than nominal, and that the bank should generally: (i) be authorized to accept demand and other types of deposits and extend commercial and other types of credit, (ii) hold itself out as engaging in, and engage in, each of those activities on a continuous basis, including actively soliciting depositors and borrowers, (iii) engage in both deposit taking and credit extension at a level sufficient to require separate identification of each in publicly disseminated reports and regulatory filings describing the bank's activities, and (iv) engage in either deposit taking or credit extension as one of the bank's principal activities. *See Seward & Kissel* (avail. Oct. 12, 2005).

82 As defined in § 3(a)(8) of the Securities Act, except for the substitution of supervision by foreign government insurance regulators for the regulators referred to in that section.

83 Entities operated for the purpose of avoiding the Investment Company Act cannot rely on Rule 3a-6.

84 SEC Release No. IC-18381 (Oct. 29, 1991).

85 The treatment of banks under the Investment Company Act amply illustrates the Investment Company Act's breadth. Absent the express exemption contained in § 3(c)(3) of the Investment Company Act, banks and insurance companies would be covered by the Act. That exemption is, however, limited by its terms to U.S. banks and insurance companies, with the result that exemption of foreign banks and insurance companies, other than their U.S. branches and agencies subject to U.S. federal or state supervision, *see* SEC Release No. IC-17681 (Aug. 17, 1990), required special SEC action.

86 Rule 489 under the Securities Act. Rule 489 excepts from this requirement Canadian issuers that are filing Form F-X in connection with an offering made under the U.S./Canadian multijurisdictional disclosure system (*see* Chapter 13) and issuers filing a registration statement with respect to debt securities or nonvoting preferred stock and that have a currently accurate Form N-6C9 (the predecessor to Form F-N) on file with the SEC. Rule 489 under the Securities Act. Filings are not required in connection with offerings not required to be registered under the Securities Act (*e.g.*, private placements).

87 *See* § 15.05[1] and [4].

88 *See* § 15.09[1].

89 Rules 3a-6(b)(1)(iii) and 3a-6(b)(3)(iii) under the Investment Company Act. Rule 3a-6 also expressly includes Canadian trust and loan companies and U.K. building societies as foreign banks. Rule 3a-6(b)(1)(ii) under the Investment Company Act. Although other similar institutions would not be covered by Rule 3a-6, they may seek individual exemptive relief under § 6(c) of the Investment Company Act. *See* SEC Release No. IC-18381 (Oct. 29, 1991); § 15.05[7].

90 Many of these offerings have been made under Schedule B under the Securities Act, which applies to obligations of foreign governments. *See* § 3.05[1].

91 *Compagnie de Financement Foncier*, SEC Release Nos. IC-28835 (July 22, 2009) (notice of application) and IC-28848 (Aug. 13, 2009) (Order). *See also Erste Abwicklungsanstalt* (avail. Oct. 10, 2012) (granting no-action relief to a German government backed winding-up agency established for the purpose of taking over and disposing of the assets, liabilities and exposures of a distressed state-owned bank); *Dexia Municipal Agency* (avail. Dec. 26, 2007) (granting no-action relief to a similar nongovernmental credit institution based on an analysis under § 3(c)(5) of the Investment Company Act, discussed at *infra* Note 102 and the accompanying text).

92 *See, e.g.*, *Banque Francaise du Commerce Extérieur* (avail. June 26, 1975).

93 *See, e.g.*, *Korea Finance Corp.*, SEC Release Nos. IC-29332 (June 25, 2010) (notice of application) and IC-29343 (July 20, 2010) (Order); *Banco de Comercio Exterior de Colombia S.A.*, SEC Release Nos. IC-20992 (Apr. 11, 1995) (notice of application) and IC-21044 (May 5, 1995) (Order); *Western Australian Treasury Corp.*, SEC Release Nos. IC-17617 (July 26, 1990) (notice of application) and IC-17673 (Aug. 14, 1990)

(Order); *Nacional Financiera S.A.*, SEC Release Nos. IC-11584 (Jan. 26, 1981) (notice of application) and IC-11642 (Feb. 23, 1981) (Order). The SEC has given some indication that it may be applying a more flexible policy of granting no-action letters to foreign financial institutions carrying out government development and similar policies. *See Municipality Finance Ltd.* (avail. Apr. 28, 1994) (granting no-action relief for a Finnish credit institution that was essentially a government instrumentality making loans to municipalities for the purchase of merchandise and services). The SEC earlier had appeared to be moving towards favoring more cumbersome exemptive relief under § 6(c) of the Investment Company Act. *Compare Development Finance Corporation of New Zealand* (avail. Jan. 27, 1979) *with Australian Industry Development Corp.* (avail. Aug. 11, 1980). The staff in any event will grant no-action relief where it considers it can rely on a specific exemption under the Act or rules. *See* § 15.05[3]; *see also* the discussion of § 3(c)(5) of the Investment Company Act below in § 15.05[3][a].

94 § 3(c)(5) of the Investment Company Act excludes from the definition of "investment company":

> Any person who is not engaged in the business of issuing redeemable securities, face-amount certificates of the installment type or periodic payment plan certificates, and who is primarily engaged in one or more of the following businesses: (A) purchasing or otherwise acquiring notes, drafts, acceptances, open accounts receivable, and other obligations representing part or all of the sales price of merchandise, insurance, and services; (B) making loans to manufacturers, wholesalers, and retailers of, and to prospective purchasers of, specified merchandise, insurance, and services; and (C) purchasing or otherwise acquiring mortgages and other liens on and interests in real estate.

95 *See* § 15.05[3][b] for a discussion of Rule 3a-7 under the Investment Company Act.

96 *See, e.g.*, *Hellenic Republic* (avail. Jan. 10, 1991); *Islamic Republic of Pakistan* (avail. Jan. 18, 1989); *Hashemite Kingdom of Jordan* (avail. Nov. 21, 1988); *Republic of Turkey* (avail. Nov. 3, 1988); *State of Israel* (avail. Aug. 17, 1988); *see also supra* Notes 90–93 and accompanying text for a discussion of exemptions for other foreign government financing vehicles, such as export-import banks and development banks.

97 The SEC has granted no-action relief where the assets purchased under a mortgage-backed ABA consisted of subordinated interests in whole loans, basing its relief in part on the holder's ability to control the process of foreclosing on the underlying loan, which the SEC viewed as making the investment one in the nature of mortgage interests rather than an interest in a person that invests in mortgage interests (*i.e.*, the participation seller). *Capital Trust, Inc*. (avail. Feb. 3, 2009).

98 *E.g., Bear Stearns & Co.* (avail. Oct. 3, 1986); *Salomon Brothers Inc.* (avail. June 17, 1985); *Shearson Lehman American Express Inc.* (avail. Mar. 20, 1985). Other mortgage-backed ABAs organized in the United States have received § 6(c) exemptions when it was not certain that they would be able to meet the 55% whole loan test. In addition to imposing a 55% requirement, the staff has in other no-action letters placed restrictions on the assets comprising the remaining 45% of the relevant asset pool. *See, e.g.*, *Citytrust* (avail. Dec. 19, 1990); SEC Release No. IC-29779 (Aug. 31, 2011).

99 SEC Release No. IC-29779 (Aug. 31, 2011).

100 *See Econo Lodges of America* (avail. Dec. 22, 1989); *Ambassador Capital Corp.* (avail. Oct. 6, 1986).

101 *Royalty Pharma* (avail. Aug. 13, 2010).

102 *Dexia Municipal Agency* (avail. Dec. 26, 2007) (citing *Municipality Finance Ltd.* (avail. Apr. 28, 1994), discussed in *supra* Note 91, and relying in part on the private nature of the U.S. offering and the special nature of covered bonds).

103 With the adoption of Rule 3a-7 under the Investment Company Act, discussed in § 15.05[3][b], the SEC stated that it had determined not to pursue any amendments to § 3(c)(5) of the Investment Company Act. SEC Release No. IC-19105 (Nov. 19, 1992).

104 *See* text at *supra* Note 2.

105 The SEC staff has taken the position that an ABA involving two or more securities that alone are not redeemable, but when combined give holders direct withdrawal rights, may involve the issuance of redeemable securities, depending upon the restrictions on the investor's ability to withdraw portfolio assets. Facts that the SEC staff has indicated are relevant include: (i) whether a holder's withdrawal right is conditional or absolute, (ii) whether the ABA offers the component securities for sale to holders at the same time or at different times, (iii) whether and how often the ABA sponsors activities (such as auctions and mandatory tender offers) designed to facilitate a holder's ability to acquire the component security or securities and present them for withdrawal, (iv) whether the amount of portfolio securities that a holder may withdraw from the ABA at any time is limited or unlimited, (v) how often a holder may withdraw portfolio securities from the program, (vi) whether or not there is a required "holding period" prior to withdrawal, (vii) the denomination of the securities and the minimum amount needed to withdraw portfolio securities, and (viii) how the withdrawal right is presented to investors. *Brown & Wood* (avail. Feb. 24, 1994).

106 SEC Release No. IC-19105 (Nov. 19, 1992) (the "*Adopting Release*"). Rule 3a-7(a) also allows an issuer to engage in "activities related or incidental" to the pooling of receivables. The SEC has stated that holding assets (which are not "eligible assets," see text accompanying *infra* Note 107), such as money market shares, in a pre-funded account could be viewed as a related activity or incidental activity if this activity supports and is secondary to the issuer's business of pooling receivables. The relevant factors to be considered in reaching a determination on this point include the length of the pre-funding period, the maturity date of the asset-backed securities issued by the issuer and the cash amount deposited in the pre-funded account compared with the total offering proceeds. *See Federated Investors, Inc.* (avail. July 8, 1997).

107 Rule 3a-7(b)(1) under the Investment Company Act. Presumably, assets in default at the time of pledge would also qualify since their probable cash flows can be statistically analyzed, fixed-income securities can be rated based on those cash flows and, by their terms, the assets would convert into cash as required by the rule. The SEC staff has, however, taken the position that cumulative preferred stock that has no predetermined liquidation date is not an eligible asset within the meaning of the rule; the characteristics of a security, and not its label, will be determinative. *Brown & Wood* (avail. Feb. 24, 1994). Unsecuritized commitment fees would also not constitute "eligible assets." *Citicorp Securities, Inc.* (avail. Aug. 4, 1995).

108 *Brown & Wood* (avail. Feb. 24, 1994).

109 "Fixed income securities" are defined in Rule 3a-7(b)(2) under the Investment Company Act as any securities that entitle the holder to receive:

> (i) A stated principal amount; or
>
> (ii) Interest on a principal amount (which may be a notional principal amount) calculated by reference to a fixed rate or to a standard or formula which does not reference any change in the market value or fair value of eligible assets; or
>
> (iii) Interest on a principal amount (which may be a notional principal amount) calculated by reference to auctions among holders and prospective holders, or through remarketing of the security; or
>
> (iv) An amount equal to specified fixed or variable portions of the interest received on the assets held by the issuer; or
>
> (v) Any combination of amounts described [above];

provided, that substantially all of the payments to which the holders of such securities are entitled consist of the foregoing amounts.

110 Rule 3a-7(a)(1) under the Investment Company Act.

111 Allotment securities, when first sold by the underwriter to the public, would also have to meet the rating condition. Issuers that are concerned about the availability of the exemption upon a downgrade in these circumstances could require the underwriters to sell any securities that do not meet the rating condition only in private placements to sophisticated investors. Adopting Release, 57 Fed. Reg. 56,248, 56,252 n.48 (Nov. 27, 1992).

112 SEC Release No. IC-29592 (Mar. 3, 2011), 76 Fed. Reg. 12,896, 12,897 n.11 (Mar. 9, 2011).

113 SEC Release No. IC-29779 (Aug. 31, 2011). The release notes that the purpose of these requirements was not principally to assess creditworthiness but rather the issuer's investor protection measures under the assumption that rating agencies, when providing a rating assessing the credit risk of an asset-backed issuer, evaluated whether the issuer was structured in a manner that also addressed investor protection under the Investment Company Act.

114 *See* § 7.02[3][a]. Rule 3a-7 permits an issuer to issue only noninvestment grade securities, provided that the securities are issued solely to institutional accredited investors and to qualified institutional buyers. *See Citicorp Securities, Inc.* (avail. Aug. 4, 1995).

115 In late 2006, a registration statement was filed for a public offering of securities by an issuer a significant portion of the assets of which consisted (directly or through a subsidiary holding company) of equity interests in so-called "CDOs" that were themselves relying on Rule 3a-7. *See* Highland Financial Trust, Registration Statement No. 333-138334 (Oct. 31, 2006). The question was raised in the course of the SEC staff review of this registration statement whether the sale of the issuer's equity interests to persons who are not "qualified institutional buyers" would violate § 48(a) of the Investment Company Act, which provides that it is unlawful for any person, directly or indirectly, to cause anything to be done through another person that would be unlawful for the first person to do under the Investment Company Act or any rules thereunder, such as Rule 3a-7. The registration statement was subsequently withdrawn by the issuer, which indicated in the withdrawal letter that it might undertake a subsequent private offering in reliance on Rule 155(c) under the Securities Act.

116 Adopting Release, 57 Fed. Reg. 56,248, 56,253 n.54 (Nov. 27, 1992).

117 Rule 3a-7(a)(2) under the Investment Company Act.

118 *Compare* the position under § 3(c)(1) of the Investment Company Act as set forth in *Investment Funds Institute of Canada* (avail. Mar. 4, 1996) *with* the position under § 3(c)(7) under the Investment Company Act as set forth in *Goodwin, Proctor & Hoar* (avail. Feb. 28, 1997), as discussed in § 15.06.

119 Rule 3a-7(a)(3) under the Investment Company Act.

120 Rule 3a-7(a)(4) under the Investment Company Act. The SEC staff has taken the position that the term "trustee" does not include a custodian bank. *Brown & Wood* (avail. Feb. 24, 1994). *But see Global Exempt Certificates of Ownership in NHA MBS Securities Inc.* (avail. Dec. 30, 1994) (confirming that a trustee whose responsibilities are limited to holding legal title to the securities, receiving payments thereon and protecting and enforcing its legal title and the rights of certificate holders against adverse claims or actions meets the requirements of Rule 3a-7).

121 *In the Matter of Citibank N.A.*, SEC Release Nos. IC-28717 (Apr. 29, 2009) (notice of application) and IC-28746 (May 26, 2009) (Order) (granting relief under § 6(c) of the Investment Company Act where, among other things, the underwriter affiliate will not be involved in the operation of the issuer (though it may participate in the selection of assets to be pooled) or provide credit support).

122 Adopting Release, 57 Fed. Reg. 56,248, 56,254 (Nov. 27, 1992).

123 Rule 3a-7(a)(4) under the Investment Company Act.

124 Adopting Release, 57 Fed. Reg. 56,248, 56,255 (Nov. 27, 1992).

125 Adopting Release, 57 Fed. Reg. 56,248, 56,255 (Nov. 27, 1992).

126 In adopting new and amended rules to address the registration, disclosure and reporting requirements for asset-backed securities under the Securities Act and the Exchange Act, the SEC has requested further comment on the treatment of synthetic securitizations under Rule 3a-7. SEC Release No. 33-8518 (Dec. 22, 2004). Synthetic securitizations are designed to create exposure to an asset that is not transferred to or otherwise part of the asset pool from which payments on the asset-backed securities are meant to be made. This exposure is often created through the use of derivatives such as credit default or total return swaps. One question that can arise under these securitizations is whether the right to receive payments on the securities depends "primarily" on the cash flow from eligible assets included in the pool. *See* text accompanying *supra* Note 109.

127 The term "cash items," which are excluded from the valuation of an issuer's total assets under subsection (a) of the rule, is not defined by the Investment Company Act but is generally narrowly construed. However, the SEC has stated that shares of registered money market funds subject to Rule 2a-7 are the equivalent of cash items for purposes of Rule 3a-1. *Willkie Farr & Gallagher* (avail. Oct. 23, 2000).

128 "Control" as defined in § 2(a)(9) of the Investment Company Act means "the power to exercise a controlling influence over the management or policies of a company, unless such power is solely the result of an official position with such company." Section 2(a)(9) further states that "[a]ny person who owns beneficially, either directly or through one or more controlled companies, more than 25 per centum of the voting securities of a company shall be presumed to control such company." Although this presumption may be rebutted, it remains effective "until a determination to the contrary [is] made by the [SEC]."

129 *See* SEC Release No. IC-10937 (Nov. 13, 1979).

130 Where, for example, management of the company must be jointly exercised by both owners of control blocks, the company would not be "controlled primarily" by either such owner. *See* SEC Release No. IC-10937 (Nov. 13, 1979).

131 Rule 3a-1(a)(4)(ii) under the Investment Company Act.

132 *See* SEC Release No. IC-10937 (Nov. 13, 1979).

133 Rule 3a-1(b) under the Investment Company Act.

134 SEC Release No. IC-10937 (Nov. 13, 1979).

135 *See* § 15.02.

136 *See* § 15.05[1].

137 Rule 3a-2 under the Investment Company Act.

138 Rule 3a-2 under the Investment Company Act. Note, however, that the SEC has granted an exemptive order under § 6(c) to a company that was unable to reduce its holdings of investment securities within a year of becoming a "transient investment company" to effectively extend the one-year period for two additional years. *In the Matter of Cohesion Technologies, Inc.*, SEC Release Nos. IC-24425 (Apr. 27, 2000) (notice of application) and IC-24462 (May 23, 2000) (Order); *see also Price Communications Corp.*, SEC Release Nos. IC-25533 (Apr. 23, 2002) (note of application) and IC-25579 (May 22, 2002) (Order under § 6(c) exempting a cellular telephone company that, as part of the contemplated liquidation of its business, had contributed its business to a limited partnership in return for a 45% interest in the partnership along with certain significant management and other rights with respect to the partnership, from all provisions of the Investment Company Act for up to four years).

139 Rules 3a-2(a)(1) and 3a-2(a)(2) under the Investment Company Act.

140 In recent years, there has been a proliferation of securities offerings by "blank check companies" or "SPACs" that have no operations and no specific business plan other than to engage in a merger with or acquisition of a company or companies yet to be identified. Rule 419 under the Securities Act requires that

the proceeds from such offerings, if they involve the issuance of "penny stock" (as defined in Rule 3a51-1 under the Exchange Act), be deposited in an escrow account, invested in bank deposits, money market funds or U.S. government securities, and returned to the investors if they have not been released from escrow and used for an acquisition within 18 months after the offering. The adopting release noted that, although the escrow account established pursuant to Rule 419 may be an investment company under the Investment Company Act, in light of the purposes served by the regulatory requirement to establish such an account, the limited duration of the account and the limited nature of the investments, such an account will neither be required to register as an investment company nor regulated as an investment company as long as it meets the requirements of Rule 419. SEC Release No. IC-18651 (Apr. 13, 1992), 57 Fed. Reg. 18,037, 18,040 (Apr. 28, 1992).

Rule 419 does not apply to many of the so-called "SPAC" offerings that have been done because they do not involve the issuance of penny stock. The trust account arrangements that are customarily employed in these SPAC offerings, however, have a similarly limited purpose and duration (though they frequently last up to 30, rather than 18, months) and provide for the similarly limited investments permitted by Rule 419, and are therefore not considered to create investment companies.

141 SEC Release No. IC-10943 (Nov. 16, 1979). In a subsequent release, the SEC clarified that an issuer's intent to satisfy the requirements of Rule 3a-1(a) would not necessarily satisfy Rule 3a-2's required intent to be involved primarily in a business other than being an investment company. SEC Release No. IC-11552 (Jan. 14, 1981).

142 Rule 3a-2(c) under the Investment Company Act.

143 Rule 3a-8 under the Investment Company Act.

144 *See* SEC Release No. IC-26077 (June 16, 2003) (adopting Rule 3a-8 under the Investment Company Act).

145 In addition to the four principal criteria, a company may not hold itself out as being engaged, or be primarily engaged, in the business of investing, reinvesting or trading in securities.

146 "Capital preservation investment" is defined by Rule 3a-8 to mean "an investment that is made to conserve capital and liquidity until the funds are used in the issuer's primary business or businesses." Rule 3a-8(b)(4) under the Investment Company Act. The rule requires that a company's board of directors adopt a written investment policy with respect to its capital preservation investments. Rule 3a-8(a)(7) under the Investment Company Act. In a recent no-action letter, the SEC staff clarified that what constitutes a capital preservation investment, including the appropriate tenor of the investment, will depend on the particular facts and circumstances of the relevant research and development company's business and the terms of the investment. *Ark Therapeutics Group plc* (avail. Apr. 15, 2005). In appropriate circumstances, capital preservation investments can include securities that are not denominated in U.S. dollars or that are non-U.S. securities. *Ark Therapeutics Group plc* (avail. Apr. 15, 2005).

Rule 3a-8 permits a company relying on the rule to acquire investments that are not capital preservation investments if (i) no more than ten percent of the company's total assets consists of such investments or (ii) no more than 25% of the company's total assets consists of such investments so long as at least 75% of those investments were made pursuant to collaborative research and development arrangements. *See* Rule 3a-8(a)(4) under the Investment Company Act.

147 *See* §§ 2(a)(9), 3(b)(2), 6(b), 6(d), 8(f), 10(e), 10(f), 16(a), 17(b), 17(f), 18(i), 22(e)(3), 23(b) and 23(c)(3) of the Investment Company Act.

148 Section 6(c) of the Investment Company Act provides that

> [t]he [SEC], by rules and regulations upon its own motion, or by order upon application, may conditionally or unconditionally exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions, from any provision or provisions of [the Investment Company Act] or of any rule or regulation thereunder, if and to the extent that

> such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of [the Investment Company Act].

149 Some variation exists among the statutory standards for granting exemptive relief under the many provisions of the Investment Company Act that authorize such relief. Exemptive relief under § 6(b) of the Investment Company Act is, for example, conditioned solely on a finding by the SEC that relief is consistent with the protection of investors.

Exemptive orders under § 6(c) suggest some degree of uniformity in the SEC's treatment of asserted bases for satisfying the statutory standard. For example, the SEC has considered the sophistication of investors in a proposed fund, the existence and adequacy of alternative regulation and the terms of the securities themselves (*e.g.*, whether the securities provide for restrictions on transfer) to be relevant to a determination as to whether the exemption is appropriate in light of the § 6(c) standard. *See, e.g.*, *Condren Housing Partners*, SEC Release Nos. IC-6807 (Nov. 3, 1971) (notice of application) and IC-6851 (Nov. 29, 1971) (Order); *National Corp. for Housing Partnership*, SEC Release Nos. IC-5945 (Dec. 29, 1969) (notice of application) and IC-5955 (Jan. 13, 1970) (Order); *BP No. Am. Fin. Corp.*, SEC Release Nos. IC-4332 (Aug. 20, 1965) (notice of application) and IC-4350 (Sept. 9, 1965) (Order). To demonstrate consistency with the policies "fairly intended" by the Investment Company Act, an applicant must show that the abuses addressed by the Act would not arise if the exemption were granted and that the purposes of the provision from which relief is sought will be preserved. That a particular scheme existed at the time of the adoption of the Investment Company Act will often be fatal to an application under § 6(c), although the proposed creation of a novel pooled investment vehicle or unforeseen circumstances is generally in and of itself not a sufficient basis on which to grant relief. *See* Tamar Frankel, Arthur B. Laby & Ann T. Schwing, THE REGULATION OF MONEY MANAGERS MUTUAL FUNDS AND ADVISERS (3d ed. 2015).

150 There was some concern expressed at the time of the Concept Release that the SEC may have concluded, contrary to both the language of the statute and its legislative history, that there may be limits on its exemptive authority under § 6(c) of the Investment Company Act. In particular, there was concern that the SEC had reached this conclusion with respect to provisions of the Investment Company Act that contain specific numerical or other limitations or that are introduced by a clear prohibition, such as "it shall be unlawful.…" *See* Letter from Merrill Lynch & Co., Inc. to Jonathan G. Katz, Secretary, SEC (Oct. 18, 1990).

151 In hearings before the U.S. House of Representatives, the then-Chief Counsel for the Commission Trust Study stated that § 6(c) was included to alleviate "the difficulty of making provision for regulating any industry which has so many variants and so many different types of activities." Hearings on S. 3580 Before a Subcommittee of the Committee on Banking and Currency, 76th Cong., 3d Sess. 197 (1940).

152 *See, e.g., Worldwide Fund Ltd.*, SEC Release Nos. IC-3318 (Aug. 25, 1961) (notice of application) and IC-3327 (Sept. 18, 1961) (Order).

153 These companies are often in danger of qualifying as investment companies under § 3(a)(1)(C) of the Investment Company Act because 40% or more of their total assets might be deemed to be "investment securities" due to the minority interests that they hold in foreign operating companies, either because of local laws that restrict foreign ownership in the local enterprises or because of stakes held by other strategic partners in the operating companies. *See* text accompanying *supra* Notes 33–37. Legislative history related to the passage of the NSMIA indicates that Congress intended the SEC to exempt U.S. companies from regulation as investment companies where those companies engaged in foreign infrastructure projects in jurisdictions that limited their ability to acquire a majority interest in the projects. *See* H.R. Rep. No. 104-622, at 19 (1996) (stating expectation that the SEC would "take administrative action expeditiously … to exempt from regulations as investment companies U.S. companies that own substantial interests in foreign infrastructure companies and that are … actively involved in foreign infrastructure projects").

154 Many of these orders have been requested by companies seeking to make investments in foreign telecommunications ventures. *See, e.g.*, *Propel, Inc.*, SEC Release Nos. IC-24633 (Sept. 6, 2000) (notice of application) and IC-24673 (Oct. 3, 2000) (Order). In the *Propel* order, for example, the company sought, and obtained, an exemption under § 6(c) that permitted it, among other things, to make investments in foreign telecommunications companies, provided that the company (directly or indirectly) acquired at least a 10% economic or voting interest in each foreign telecommunications company and provided active developmental assistance to each such company. *Propel, Inc.*, SEC Release No. IC-24633 (Sept. 6, 2000) (notice of application); *see also Telesystem International Wireless Inc.*, SEC Release Nos. IC-23618 (Dec. 22, 1998) (notice of application) and IC-23658 (Jan. 20, 1999) (Order); *Formus Communications, Inc.*, SEC Release Nos. IC-23486 (Oct. 14, 1998) (notice of application) and IC-23530 (Nov. 10, 1998) (Order); *Tele-Communications International*, SEC Release Nos. IC-22797 (Aug. 22, 1997) (notice of application) and IC-22825 (Sept. 17, 1997) (Order); *Enron Corp.*, SEC Release Nos. IC-22515 (Feb. 14, 1997) (notice of application) and IC-22560 (Mar. 13, 1997) (Order).

155 SEC Release No. IC-14492 (Apr. 30, 1985).

156 Since 2008, the SEC has required that applications for orders under the Investment Company Act, including exemptive orders, be submitted *via* EDGAR. *See* SEC Release No. 33-8981 (Oct. 29, 2008).

157 1992 Report at 509 n.28.

158 *See, e.g.*, Letter from Davis, Polk & Wardwell (Oct. 10, 1990).

159 SEC Release No. IC-19362 (Mar. 26, 1993).

160 SEC Release No. 34-35483 (Mar. 14, 1995); *see also* SEC Release No. 34-35483A (Mar. 21, 1995) (correcting final rule).

161 The SEC removed consideration of the reforms to Rule 0-5 from its regulatory agenda in 1996, but stated that it may consider the reforms at some future point. SEC Release No. IC-21795 (Mar. 4, 1996).

162 *See, e.g.*, *Yahoo! Inc.*, SEC Release Nos. IC-24459 (May 18, 2000) (notice of application) and IC-24494 (June 13, 2000) (Order); *Bill Gross' idealab!*, SEC Release Nos. IC-24642 (Sept. 15, 2000) (notice of application) and IC-24682 (Oct. 10, 2000) (Order).

163 *See* § 2(a)(9) of the Investment Company Act.

164 *Yahoo! Inc.*, SEC Release No. IC-24494 (June 13, 2000); *Bill Gross' idealab!*, SEC Release No. IC-24682 (Oct. 10, 2000). Note, however, that an application by Yahoo! several years earlier had not been successful. In addition, the SEC staff has indicated informally that it would no longer be receptive to applications for exemptions by such companies.

165 *See SeaCo Ltd.*, SEC Release Nos. IC-29176 (Mar. 17, 2010) (notice of application) and IC-29206 (Apr. 9, 2010) (Order).

166 *See Tonopah Mining Company of Nevada*, 256 SEC 426, 427 (1947). In a potentially significant ruling, the court in *SEC v. National Presto Industries*, 486 F.3d 305 (7th Cir. 2007), applied the *Tonopah* facts to conclude that, even though it had not sought an exemptive order under § 3(b)(2) as suggested by the SEC, an issuer that was actively engaged in an operating business could rely on the exemption under § 3(b)(1) of the Investment Company Act for companies that are "primarily engaged, directly or through a wholly-owned subsidiary or subsidiaries, in a business or businesses other than that of investing, reinvesting, owning, holding or trading in securities," notwithstanding the fact that more than 40% of its assets comprised investment securities so that it would otherwise be considered an inadvertent investment company under § 3(a)(1)(C) of the Investment Company Act. *See* § 15.02. Law firms have generally been hesitant about providing opinions relying on § 3(b)(1) because of its heavily factual and arguably subjective nature, and because of the SEC's strong emphasis on the asset test as being essentially dispositive absent another specifically applicable exemption. However, in at least one instance, the SEC was willing, based on an analysis using the *Tonopah* criteria under § 3(b)(1), to grant no-action relief rather than requiring an exemptive order under § 3(b)(2). *See Accor Services* (avail. June 7, 2010). More recently, the SEC applied the *Tonopah* criteria and *National Presto* analysis to find that a public medical device manufacturer that had

failed to commercialize and generate a net operating profit based on its medical device was an investment company because 90% of its assets and 90% of its income were derived from investment securities and, among other things, the company did not seek to protect its financial assets and instead invested in equities and paid dividends to shareholders. *In the Matter of Daxor Corporation*, SEC Admin. Proc. File No. 3-14055 (Aug. 31, 2011). Notably, rather than giving the five *Tonopah* criteria equal weight, the SEC emphasized these quantitative criteria as being of primary importance.

U.S. Regulation of the International Securities and Derivatives Markets, § 15.06, PRIVATE OFFERINGS BY FOREIGN FUNDS: *TOUCHE REMNANT* AND §§ 3(c)(1) AND 3(c)(7)

[1] Private Offerings to Qualified Purchasers Under § 3(c)(7)

Section 3(c)(7), added to the Investment Company Act in 1996 by the NSMIA, facilitates U.S. private offerings by U.S. and non-U.S. investment companies. Section 3(c)(7) excepts from the definition of "investment company" any issuer (i) whose outstanding securities [167] are, with the exception of securities

p. 15-42

held by "knowledgeable employees" of the issuer, [168] owned only by persons who, at the time of acquisition [169] (whether in a primary offering or in the secondary market), the fund or a person acting on its behalf reasonably believes are "qualified purchasers," [170] and (ii) that is not making and does not at such time propose to make a public offering of its securities in the United States. [171] This exception is intended to provide increased flexibility for funds owned exclusively by highly sophisticated investors— "qualified purchasers"—who are thought to possess sufficient investment acumen so as not to require the substantive protections of the Investment Company Act. [172] Unlike § 3(c)(1) of the Investment Company Act, with its 100-owner limit and resulting issues, as discussed below, there is no limit under § 3(c)(7) to the number of qualified purchasers such an issuer may have as investors.

p. 15-42

p. 15-43

Section 2(a)(51) of the Investment Company Act, also added by the NSMIA, defines the term "qualified purchaser" as: (i) any natural person who owns not less than $5 million in qualifying investments (including investments held jointly with such person's spouse), [173] (ii) certain family-owned companies, including trusts, owning not less than $5 million in investments that are "owned directly or indirectly by … direct lineal descendents," [174] (iii) certain other trusts [175] or (iv) any person, acting for its own account or the accounts of other qualified purchasers (*i.e.*, institutional investors), who in the aggregate owns and invests on a discretionary basis not less than $25 million in investments. [176] Rule 2a51-1(g) under the Investment Company Act also provides that, with certain

p. 15-43

p. 15-44

very limited exceptions, "qualified institutional buyers" (as defined in Rule 144A under the Securities Act) shall be deemed to be qualified purchasers. [177]

Analogizing to its positions under § 3(c)(1) of the Investment Company Act discussed below, the SEC staff has stated that a foreign issuer would be able to avail itself of the exemption provided by § 3(c)(7) of the Investment Company Act if it engaged in no public offerings in the United States and all U.S. residents (pursuant to the definition of "U.S. person" in Regulation S under the Securities Act) that purchased its securities in a primary offering (or a secondary offering involving the foreign issuer or its agents, affiliates or intermediaries) or as part of an unbroken chain of U.S. persons that began with the primary offering (or such a secondary offering) were qualified purchasers. [178] A foreign issuer may qualify for § 3(c)(7) even if U.S. residents who have purchased in the secondary market securities that were initially placed or subsequently resold outside the United States to non-U.S. persons are not qualified purchasers. [179] A foreign fund making a private offering of its securities in the United States must therefore comply with § 3(c)(7) with respect to its securities sold directly to U.S. residents or subsequently transferred by such U.S. residents to other U.S. residents. Securities that flow into the United States in secondary market trading (including securities that are initially placed with U.S. resident investors but that are subsequently sold to non-U.S. persons and flow back to U.S. resident investors in secondary market transactions) need not be counted. [180]

p. 15-44
p. 15-45

Where U.S. secondary market transactions must be monitored to ensure that any U.S. resident purchaser is a qualified purchaser, concerns regarding security, convenience, speed of settlement and liquidity have nevertheless led investors and other market participants to favor issuance of securities in global "book-entry" form rather than in physical, registered form. [181] Issuance in global "book-entry" form, however, raises a number of questions. In the ABA Interpretive Letter, the SEC explicitly rejected the suggestion that the requirement that a § 3(c)(7) fund (or a person acting on its behalf) reasonably believe that a purchaser of its securities is a qualified purchaser may be satisfied if the seller of the securities (rather than the fund) forms the reasonable belief. The fund's belief that such purchasers are both qualified institutional buyers and qualified purchasers may also not be formed exclusively on the basis of so-called "deemed" representations now commonly included in the disclosure for Rule 144A transactions—representations as to a purchaser's status that are deemed to be made by prospective investors that receive the offering document. [182] The SEC left open the possibility that a fund could develop procedures in the Rule 144A market that, if followed, would be sufficient to form the requisite reasonable belief. The SEC stated, however, that it will not respond to requests as to whether any particular set of procedures is adequate for this purpose. [183]

Members of a number of major law firms, including ours, have developed, in consultation with The Depository Trust Company ("DTC"), Euroclear and Clearstream Banking, and published a set of procedures that can be implemented to permit § 3(c)(7) monitoring for book-entry securities issued by certain non-U.S. issuers. [184] The procedures appropriate for any particular transaction are

p. 15-45
p. 15-46

dependent upon, among other things, the nature of the issuer, whether the securities being offered are debt or equity and the expected level of U.S. interest and trading in the security. Among the more significant procedures applicable to most offerings relying on the 3(c)(7) procedures are:

- disclosure and "deemed" representations concerning transfer restrictions and the status of the purchaser as a qualified purchaser;
- legends on global securities and minimum denominations or purchase amounts;
- a representation by the issuer, based on factors that the issuer and its counsel consider necessary or appropriate, as to the issuer's reasonable belief about the qualified purchaser status of initial and subsequent purchasers;
- representations and covenants by the distributor of the securities, which must be a sophisticated investment bank with the ability to screen purchasers, concerning its own qualified purchaser status and that of investors to which it may make resales;
- the issuer's right under its charter, by-laws or other document, which must also be disclosed to investors, to force a noncomplying holder to resell its securities to an appropriate holder or to redeem the securities;
- periodic reminders from the issuer to securityholders and DTC (and, in the case of a non-U.S. issuer, Euroclear and Clearstream Banking) participants of the § 3(c)(7) restrictions and the issuer's rights as described above;
- notations on any Bloomberg, Telekurs and/or Reuters screen that includes quotations about the

securities as to their § 3(c)(7) status;

- instruction by the issuer to DTC (and, in the case of a non-U.S. issuer, Euroclear and Clearstream Banking) to take certain pre-determined steps to identify the securities as restricted under § 3(c)(7), including the distribution of notices to DTC (and, in the case of a non-U.S. issuer, Euroclear and Clearstream Banking) participants and the provision of information about DTC

p. 15-46
p. 15-47

(and, in the case of a non-U.S. issuer, Euroclear and Clearstream Banking) participants to the issuer; and

- the inclusion on trade confirmations of a CUSIP number bearing a "3c7" indicator.

Additional procedures that are appropriate in some circumstances, including offerings of equity securities, include limits on the amount of the offering sold into and the number of purchasers in the United States, requiring representation letters as to "qualified purchaser" status from U.S. investors and using a "gatekeeper" to monitor compliance with restrictions on resales applicable to securities initially sold to U.S. persons.

U.S. issuers must observe these procedures for all holders, whether U.S. or non-U.S. persons. Non-U.S. issuers need not implement these procedures for their non-U.S. holders, who may trade their securities through Euroclear and Clearstream freely. [185]

[2] Private Offerings Under § 3(c)(1) and *Touche Remnant*

For non-U.S. issuers that are or might be investment companies and that wish to sell their securities in a private offering to U.S. investors that are not all qualified purchasers, the SEC's no-action positions under §§ 3(c)(1) and 7(d) of the Investment Company Act effectively preclude them from selling to more than 100-beneficial owners that are U.S. residents. While, as discussed below, practitioners widely believe that the SEC's position is not supported by the statutory provisions of the Investment Company Act, there is little appetite to design offerings that operate directly in conflict with the SEC's position. In addition, the exemption provided by § 3(c)(7) of the Investment Company Act, discussed above, for offerings to an unlimited number of qualified purchasers, has reduced the practical significance of the limitations mandated by the SEC's position.

The ability of foreign investment companies to access the U.S. market in a public offering is governed by § 7(d) of the Investment Company Act, which prohibits a foreign domiciled investment company from making a public offering of its securities in the United States, [186] unless the SEC, upon application by

p. 15-47
p. 15-48

the investment company, permits its registration on the basis that it is both "legally and practically" feasible to enforce the provisions of the Investment Company Act against the applicant and that the granting of relief is consistent with the public interest and the protection of investors. [187] The prohibition of § 7(d) of the Investment Company Act is against the use of U.S. jurisdictional means in connection with a public offering. [188] A "public" offering in this context was historically thought to have the same meaning as it did for purposes of determining the need for registration of an offering under the Securities Act. [189] The prohibition was thus for many years thought not to extend to other activities that might result in U.S. beneficial ownership of a fund, such as U.S. private investment or acquisitions in the secondary market by U.S. investors. Foreign

p. 15-48
p. 15-49

funds could thus take advantage of the exemptions from Securities Act registration provided in § 4(a)(2) of the Securities Act and Regulation D thereunder. Under Rule 506 of Regulation D, for example, a foreign private investment company could make an offering to an unlimited number of U.S. "accredited investors" and up to 35 other investors and still qualify for safe harbor treatment under the rule.

The staff rejected this interpretation of § 7(d) of the Investment Company Act in *Touche Remnant & Co.*, where it concluded that, even if a foreign fund complied with the requirements of Rule 506 of Regulation D under the Securities Act, [190] the fund would still be subject to registration under the Investment Company Act if "upon completion of the offering there would be more than 100 persons resident in the United States who were beneficial owners of its securities." [191] The staff was careful to emphasize that its conclusion was not based on the fact that the foreign fund was offering its securities publicly outside the United States, but on the legitimate U.S. interest in activities actually conducted in the United States or the effects of the fund's offshore activities on the United States. In that regard, the staff's analysis was two-pronged. First, the staff found that § 3(c)(1) of the Investment Company Act—the so-called "private" investment company exemption [192] that limits beneficial ownership of funds within its purview to 100 persons—evidenced a U.S. regulatory interest in funds having more than 100 investors. Second, the staff asserted that § 7(d) "demonstrates Congress' intent to require foreign investment companies whose conduct has a significant effect on U.S. investors to be subject to the same type of regulation that applies to American investment companies." [193] Absent the 100-U.S. resident limitation, foreign and U.S. funds would be treated unequally, a result that would be, in the staff's view, contrary to the policy expressed in § 7(d). The *Touche Remnant* position has been interpreted to apply not only to closed-end, but also to open-end, funds. [194]

Industry groups, as well as the private securities bar, strongly criticized *Touche Remnant* and, in response to the Concept Release, urged the withdrawal of the staff's position as a matter of both law and policy. [195] The first criticism leveled at the staff's position is that it is inconsistent with the language of § 7(d) and the very structure of the Investment Company Act. Section 7(d) regulates foreign investment companies; the baseline inquiry must thus be whether an entity is an "investment company" within the meaning of the Investment Company Act. If not—because it is, for example, an operating company or falls within a statutory exclusion from the definition, such as § 3(c)(1)—there is no further inquiry under the Investment Company Act. On the other hand, if the entity is an investment company, it is subject to the general prohibitions of § 7 of the Investment Company Act. A comparison of the restrictions set forth in subsections (a) and (b) of § 7 with subsection (d) evidences a clear legislative intent to differentiate between the regulation of domestic and foreign investment companies. In the case of U.S.-domiciled investment companies, §§ 7(a) and 7(b) require registration under the Investment Company Act. In the case of foreign-domiciled investment companies, the language of § 7(d) is clear: the use of the jurisdictional means is forbidden only where used in connection with a public offering in the United States of the securities of the foreign fund. Section 3(c)(1) is thus definitional only.

Moreover, there is no other authoritative legal basis for attributing a different meaning to "public offering" for purposes of the Investment Company Act than that which has developed under the Securities Act. [196] Regulation D and Rule 144A under the Securities Act do not restrict the number of large U.S. offerees or purchasers, whether primary or secondary, in order to avoid a public offering subject to registration under the Securities Act. More important, § 3(c)(1) itself provides convincing evidence that the 100-owner standard cannot be read into § 7(d) of the Investment Company Act. Section 3(c)(1) contains a two-pronged standard requiring that there be no public offering and that there be no more than 100-beneficial owners of the issuer's securities (excluding short-term paper). If exceeding the 100-owner standard by itself resulted in a "public offering" within the meaning of the Investment Company Act, the second prong of § 3(c)(1) imposing the 100-owner limit would be superfluous since it would be

subsumed in the concept of a "public offering." Moreover, there is no indication in the legislative history of the Investment Company Act of any intent to read § 3(c)(1) into the regulation of foreign investment companies and require registration when, as a result of or following a U.S. private placement, a foreign investment company has more than 100 U.S. beneficial owners. [197]

Although there was some disagreement among the private bar, the *Touche Remnant* position has been interpreted by many practitioners to require only that there be no more than 100-beneficial owners of a foreign fund's securities who are U.S. residents immediately following the private placement in the United States (relying, for these purposes, on the definition of "U.S. person" provided by Regulation S under the Securities Act in counting U.S. owners). Under this interpretation, *Touche Remnant* is considered not to apply to secondary market trading in securities placed with non-U.S. persons in a primary offering, so long as the issuer, its agents and affiliates are not involved in that trading. This "snapshot" approach still necessitates an inquiry as to the residence of any owners of the investment company's securities at the time of the placement. Although a difficult task in view of the substantial overseas use of bearer securities and the increasingly widespread practice of holding securities in "street name," this approach does not entail any procedures, such as transfer restrictions, to police secondary flowback into the United States of securities placed initially with non-U.S. persons.

This interpretation has been confirmed by the SEC in *Investment Funds Institute of Canada*, in which the staff noted that *Touche Remnant* and § 7(d) do not "as a general matter" require an issuer to monitor resales of its securities independently made by such holders in secondary market transactions. [198] Therefore, securities of a foreign fund that are initially placed outside the United States

p. 15-51
p. 15-52

under Regulation S to non-U.S. persons need not be counted toward the 100-beneficial-owner limit even if they are subsequently transferred to U.S. investors in the secondary market, so long as neither the foreign fund nor any of its agents, affiliates or intermediaries is involved in promoting such transfers. For the purposes of applying the 100-owner test to securities initially sold by the issuer to U.S. persons, it is the view of the authors that one should count (i) securities sold in the United States in previous private offerings that remain in the United States and (ii) securities originally sold to U.S. persons that are either held by the original purchaser or have been resold to other U.S. resident investors and remain owned by U.S. resident investors. Securities that flow into the United States in secondary market trading after the placement, however (including securities that are initially privately offered to U.S. resident investors but that subsequently are sold to non-U.S. persons and then flow back again to U.S. resident investors in secondary market transactions), need not be counted. [199]

Prior to the adoption of § 3(c)(7) of the Investment Company Act, the result of *Touche Remnant* was often that foreign funds and inadvertent investment companies had no practical recourse but to forgo U.S. private offerings that they and their underwriters would otherwise consider. This result in turn forced U.S. institutional investors interested in purchasing these securities into foreign markets to do so. The detailed sales restrictions that would have to be adopted in connection with a U.S. private offering, described below, are not attractive, especially for secondary market transactions of companies listed and publicly traded outside the United States. The alternative of a § 6(c) exemption, which is sometimes pursued in the context of a U.S. public offering by such an issuer, is too time-consuming, expensive and uncertain to be considered as a practical alternative in the context of a private offering—the foreign offering to which the U.S. private offering is probably an adjunct will not wait for the exemptive process to be completed, the U.S. private offering is probably not a crucial element of the overall offering for the issuer (although it might be beneficial to U.S. investors and dealers), and in many cases success in pursuing the exemptive process cannot be guaranteed. The absence of applications for § 6(c) exemptive relief in connection with U.S. private offerings by foreign inadvertent investment companies is empirical evidence that it is not a practical solution to the problems caused by *Touche Remnant*. [200]

p. 15-52
p. 15-53

Like domestic funds, a foreign fund may not simultaneously rely on both §§ 3(c)(1) and 3(c)(7) of the Investment Company Act by offering securities in a private placement in the United States both to qualified purchasers and to less than 100 U.S. resident nonqualified purchasers. [201] A foreign fund may, however, make an offshore public offering of its securities in accordance with Regulation S under the Securities Act while at the same time making a private placement under § 3(c)(1) or § 3(c)(7) without causing the offerings to be integrated. In this case, any U.S. persons to whom securities were initially sold by the foreign fund in the offshore public offering would be required, for the purposes of the U.S. private placement as discussed above, to count towards the § 3(c)(1) 100-owner limit or to be qualified purchasers under § 3(c)(7), as applicable. [202]

[3] *Touche Remnant* and Beneficial Ownership Issues Under § 3(c)(1)

[a] General

For foreign funds that choose to rely on § 3(c)(1) rather than § 3(c)(7) of the Investment Company Act, the SEC's *Touche Remnant* doctrine not only requires that a foreign "private" investment company have 100 or fewer beneficial owners who are U.S. residents in order to avoid violation of § 7(d) of the Investment Company Act, [203] but also notwithstanding that § 7(d) is silent on the point, requires consideration of the rules regarding ownership and attribution of ownership under § 3(c)(1) of the Investment Company Act. [204] The latter requirement—even though it has no relation to the number of actual offerees—demonstrates how far the SEC's position has strayed from the § 7(d) "public offering" requirement. In general, any person or entity that has any ownership interest in an investment company's securities, whether debt or equity, is an owner for purposes of determining the 100-U.S.-beneficial owner limitation. Subject to the Investment Company Act's attribution rules discussed below, entities such as corporations and partnerships will generally be treated as a single beneficial owner, [205] although where the owners of such an entity may be deemed to be making a separate investment decision to invest in a private investment fund, the SEC may look through the entity and find each of such owners to be a beneficial owner. [206]

Procedures must be adopted in all cases to determine beneficial ownership, although the types of steps taken by issuers have varied. Where the securities are in registered form, determination of beneficial ownership is a relatively easy inquiry, at least insofar as registration places the issuer on notice of facts that may result in attribution of beneficial ownership. Where a question is raised as to the identity of an issuer's beneficial owners, certifications containing appropriate representations and warranties may be obtained from purchasers. In many cases, additional procedures have been implemented that provide ongoing ability to police U.S. beneficial ownership. Some issuers have, for example, imposed payment and transfer restrictions that prohibit the transfer of, or the payment of

p. 15-54

p. 15-55

any distribution on, their securities in the absence of certification that the securities are not beneficially owned by U.S. persons.

As noted above, investors and other market participants now broadly favor "book-entry" securities. However, even under the principles of the *Investment Funds Institute of Canada* letter, secondary market sales by a U.S. beneficial owner purchasing in the original offering to another investor (and subsequent transfers in this chain of U.S. resident purchasers) must be monitored to ensure compliance with the 100-U.S.-beneficial owner limitation. This requirement has made practitioners reluctant to permit securities of non-U.S. private investment companies offered in the United States under the strictures of § 3(c)(1) of the Investment Company Act and *Touche Remnant* to be held in global form, for example at DTC, where secondary market transactions cannot generally be monitored. [207] Nonetheless, issuance of such securities in global form has been countenanced in particular transactions where the existence of special circumstances, generally confirmed by the sole manager (or lead manager), permits the conclusion that U.S. secondary trading can be effectively monitored.

In the case of bearer securities, on the other hand, even upon original issuance an issuer cannot know with certainty how many U.S. residents are beneficial owners of its securities. Issuers have derived comfort in these circumstances from a variety of factors, including the absence of any offering of the issuer's securities in the United States or of any active trading market in the United States for the issuer's securities—particularly if the issuer is managed and controlled wholly outside the United States. The selling restrictions for certain offerings with a private placement component have also included specific restrictions on the underwriters not to make a sale in the United States if the underwriter would have reason to believe that, immediately following the sale, there would be more than 100 U.S. residents who beneficially own the issuer's securities.

In addition, issuers sometimes reserve the right to deny transfer in any instance in which the issuer believes that the transfer will result in breach of the 100-U.S.-resident limitation. Issuers also typically include other protections in their articles of incorporation or other constituent documents. Those provisions often require an automatic redemption or repurchase of the issuer's securities (or alternatively permit the issuer to cause such a redemption or repurchase) in any case in which the beneficial ownership restrictions of the Investment Company Act or the related terms of the securities may have been violated. It would appear, however, that even the most rigid of restrictions may not pass SEC muster if there is any possibility that the *Touche Remnant* standard could be violated. [208]

[b] Attribution Rules

p. 15-55
p. 15-56

Following the adoption of the NSMIA, the attribution rules of the Investment Company Act are only called into play when an investment company (or an entity that would be an investment company but for the exceptions provided by § 3(c)(1) or § 3(c)(7) of the Investment Company Act) owns "10 per centum or more of the outstanding voting securities of the issuer." In that event, § 3(c)(1)(A) of the Investment Company Act provides that beneficial ownership will be "attributed" to the owners of such investment company's outstanding securities (other than short-term paper), all of which will then be counted against the 100-U.S.-beneficial owner limit. Although the Investment Company Act defines "voting security" as any security entitling the holder "to vote for the election of directors of a company," [209] the SEC has found other types of securities to qualify, such as limited partnership interests that entitle their holders to remove or select a general partner in any but the most restricted of circumstances [210] and securities that represent a sufficiently large economic interest in the investment company to permit the holder to exercise power and control over the investment company. [211]

[c] Integration

Even where procedures are adopted to ensure that a foreign investment company has no more than 100 U.S. residents who are beneficial owners of its securities, the *Touche Remnant* limitations on U.S. beneficial ownership may still be breached if the sponsor of the investment company has sponsored one or more other similar investment companies. [212] In certain circumstances, the SEC has taken the position that two or more funds may be "integrated" for purposes of determining compliance with the private investment company exception contained in § 3(c)(1) of the Investment Company Act. The NSMIA added new § 3(c)(7)(E) of the Investment Company Act providing that a § 3(c)(7) fund will generally not be integrated with a § 3(c)(1) fund. However, a single issuer may not rely on both §§ 3(c)(1) and 3(c)(7) of the Investment Company Act. [213]

p. 15-56
p. 15-57

The purpose of the integration doctrine is to prevent circumvention of the Investment Company Act's registration and other requirements through the use of artificially distinct investment vehicles. Where the doctrine is applicable, if the aggregate number of beneficial owners of the integrated funds exceeds the 100-U.S.-beneficial owner limitation, none of the funds will be entitled to be exempted from registration under the Investment Company Act.

Although the application of the integration doctrine requires a highly fact-intensive analysis, the SEC has in no-action letters emphasized several factors relevant to determining whether two or more funds ought to be considered together for purposes of § 3(c)(1) of the Investment Company Act. As stated by the staff of the SEC, a key inquiry is whether an interest in one fund, as compared to a second fund, "would be considered materially different by a reasonable investor qualified to purchase both." [214] In *PBT Covered Option Fund*, the staff refused to take a no-action position where two funds had the same investment objectives, the same types of portfolio securities and similar portfolio risk/return characteristics. The staff concluded that it could not determine that a reasonable investor would find one fund to be materially different from the other. [215] Moreover, artificial differences between funds, such as a condition to investment based on residency in one state as opposed to another, do not provide a sufficient basis on which to conclude that two funds should not be integrated. [216]

p. 15-57
p. 15-58

The SEC staff's concern for these "cookie cutter" funds has resulted in its issuance of letters refusing no-action positions that contain overly broad language that can inhibit development of legitimate institutional products. Consequently, where the characteristics of two or more funds raise the potential for integration such that the funds together may have more than 100 beneficial owners that are U.S. residents, it may be desirable that the documentation for each fund reflect limitations on the ability of U.S. persons to purchase the funds' securities in the aggregate.

Footnotes

167 Unlike § 3(c)(1) of the Investment Company Act, even holders of short-term paper must meet the qualified purchaser standard. *See American Bar Association Section of Business Law* (avail. Apr. 22, 1999) (the "ABA Interpretive Letter").

168 Rule 3c-5 under the Investment Company Act. The rule encompasses only those employees who actively participate in the management of a fund's investments and does not include those persons who merely obtain information regarding the fund's activities. The SEC has indicated that, as a general matter, marketing and investor relations professionals who act for a fund, attorneys who provide advice to a fund, brokers and traders of a broker-dealer related to a fund and financial, compliance, operational and accounting officers of a fund, would *not* qualify. *See* the ABA Interpretive Letter. However, in a recent no-action letter, the SEC staff emphasized that knowledgeable employee status depends on the relevant facts and circumstances of a particular investment manager's business operations, and indicated that, under certain circumstances, the following individuals could qualify as knowledgeable employees: (i) individuals in charge of information technology or investor relations departments; (ii) members of a policy making group or committee of an investment manager; (iii) research analysts; (iv) members of an analytical risk team; (v) traders; (vi) tax professionals; (vii) attorneys; (viii) employees involved in the investment activities of certain separate accounts; and (ix) the employees of related advisers. *See Managed Fund Accounts* (avail. Feb. 6, 2014). Similarly, securities owned by knowledgeable employees are excluded for the purposes of determining, pursuant to Rule 2a51-3(b) under the Investment Company Act, whether each beneficial owner of a company's securities is a qualified purchaser. *Paragon Advisers, Inc.* (avail. Oct. 1, 1998). Securities held by knowledgeable employees are not excluded, however, for purposes of Rule 2a51-3(a), when a company is formed for the purpose of acquiring securities offered by a § 3(c)(7) fund, in order to avoid permitting nonqualified purchasers to do indirectly what they could not do directly. *Paragon Advisers, Inc.* (avail. Oct. 1, 1998). Persons who participate in the investment activities of "foreign or offshore investment companies" are also eligible for knowledgeable employee status. In addition, the spouse (but not a dependent) of a knowledgeable employee who invests jointly with the employee does not have to be a qualified purchaser or a knowledgeable employee, and the spouse is not counted towards the 100-owner limit under § 3(c)(1) of the Investment Company Act (although a dependent is). A family company trust or similar estate planning vehicle for which the knowledgeable employee is both responsible for investment decisions and the source of funds invested is eligible for knowledgeable employee status. *See* the ABA Interpretive Letter.

169 The status of a qualified purchaser need not be reaffirmed in connection with the crediting of a fund's earnings to an investor's account, although a reinvestment of dividends may, in certain circumstances, be considered an offering of securities. *See* the ABA Interpretive Letter.

170 Rule 2a51-1(h) under the Investment Company Act.

171 § 3(c)(7) of the Investment Company Act.

172 *Goodwin, Procter & Hoar* (avail. Feb. 28, 1997).

173 § 2(a)(51)(A)(i) of the Investment Company Act. Rule 2a51-1 under the Investment Company Act clarifies how the amount of investments owned by a prospective qualified purchaser should be determined. Privately offered funds and employees' securities companies may count their unfunded capital

commitments as "investments" for these purposes. *The BSC Employee Fund, L.P.* (avail. Oct. 14, 1997). Equity interests held by individuals in securities-related businesses structured as partnerships or limited liability companies (rather than corporations) are also "investments," even if not technically "securities." *Sullivan & Cromwell* (avail. Dec. 29, 1997).

174 § 2(a)(51)(A)(ii) of the Investment Company Act. A trust is "owned directly or indirectly by … direct lineal descendants" if the beneficiaries of the trust were lineal descendants of a settlor and related as aunts or uncles and nieces and nephews. A trustee is not an owner for purposes of this provision, which is aimed at identifying the holder of the economic interest (whether present or future, vested or contingent) in the trust. *Meadowbrook Real Estate Fund* (avail. Aug. 26, 1998); the ABA Interpretive Letter. *But see Cabot Wellington, LLC* (avail. June 17, 2008) (recommending no enforcement action be taken with respect to the treatment as a "qualified purchaser" of a § 3(c)(1) fund in which the non-familial executive director and principal investment director (a "qualified purchaser" in his own right) also invests).

175 § 2(a)(51)(A)(iii) of the Investment Company Act. The requirement that "each settlor or other person who has contributed assets to the trust" be a qualified purchaser applies even if the settlor has died. The settlor must have been a qualified purchaser at least once when assets were contributed to the trust. The ABA Interpretive Letter; *see also SCP Private Equity Partners II, L.P.* (avail. June 6, 2006).

176 § 2(a)(51)(A)(iv) of the Investment Company Act. The $25 million threshold may be satisfied by aggregating investments that a person owns with investments that the person invests on a discretionary basis. *Service Corporation International* (avail. Oct. 6, 1998). This approach is consistent with the SEC's interpretation of the definition of a "qualified institutional buyer" in Rule 144A(a)(1)(i) under the Securities Act, which permits aggregation of proprietary and managed holdings. In addition, a company may aggregate its investments with investments of its majority-owned subsidiaries, its parent company (so long as it is a majority-owned subsidiary) and any other majority-owned subsidiaries of its parent. *Service Corporation International* (avail. Oct. 6, 1998). A company is not a qualified purchaser if it was formed for the specific purpose of acquiring a § 3(c)(7) fund's securities, unless each beneficial owner of the company's securities is a qualified purchaser. Rule 2a51-3 under the Investment Company Act. Whether or not a company is formed for that purpose depends on an analysis of all of the surrounding facts and circumstances. Although relevant, the percentage of a company's assets invested in the fund is not determinative of this inquiry. The ABA Interpretive Letter.

177 In the context of employee benefit funds, a fund that is a qualified institutional buyer may not qualify as a qualified purchaser in circumstances where individual participants in the fund have the discretion to decide whether and how much to invest in specific investments, including § 3(c)(7) funds. In those situations, a § 3(c)(7) fund must look through the employee benefit fund to determine whether each beneficial owner of the employee benefit fund is a qualified purchaser. The SEC has provided no-action relief with respect to this look-through requirement in certain circumstances. *See, e.g.*, *Invesco Advisers, Inc.* (avail. Apr. 8, 2014).

Similarly, for purposes of calculating the 100-person limitation applicable to investment companies exempt from registration as such under § 3(c)(1) of the Investment Company Act (*see infra* Note 192), a § 3(c)(1) fund must look through such discretionary employee benefit funds and count each beneficial owner as a separate person.

178 *Goodwin, Procter & Hoar* (avail. Feb. 28, 1997). A foreign investor temporarily present (but not resident) in the United States may purchase an interest in a foreign issuer without having to be a qualified purchaser under § 3(c)(7) of the Investment Company Act. *Wilmer, Cutler & Pickering, Davis Polk & Wardwell* (avail. Oct. 5, 1998).

179 *Goodwin, Procter & Hoar* (avail. Feb. 28, 1997); *see also Investment Funds Institute of Canada* (avail. Mar. 4, 1996).

180 Relying on this interpretation, in 2006, a number of private equity firms established permanent capital vehicles that qualified as "foreign private issuers" for purposes of the Securities Act and that invested the proceeds of their offerings in several U.S. private equity funds managed by such firms. Such funds conducted private placements of their shares outside the United States and listed their shares on non-U.S.

exchanges, such as Euronext Amsterdam, while concurrently offering to U.S. qualified purchasers "restricted depositary units" that allowed them to restrict transfer to U.S. qualified purchasers or to secondary trading on the non-U.S. exchanges.

181 The difficulties of monitoring ownership in the case of bearer securities will presumably raise issues and require special circumstances or imposition of special measures if such securities are used. *See* § 15.06[3][a].

182 *See* Chapter 7. Among other issues, not all qualified institutional buyers are qualified purchasers. Rule 2a51-1(g)(1) under the Investment Company Act excludes (i) dealers that own and invest less than $25 million in securities and (ii) participant-directed employee plans. Moreover, while transfer restrictions in most Rule 144A transactions fall away after six months in the case of Exchange Act-reporting issuers (and one year in the case of all other issuers) due to the availability of public resales under Rule 144 under the Securities Act, restrictions under § 3(c)(7) of the Investment Company Act must be monitored for the life of the fund.

183 *See* the ABA Interpretive Letter.

184 *See New Developments in Procedures for Book-Entry Deposit of Rule 144A Securities by Certain Issuers Relying on Section 3(c)(7) of the Investment Company Act*, INVESTMENT LAWYER (Part I, Mar. 2003; Part II., Apr. 2003). *See Book-Entry Deposit Procedures for Certain Offerings by Non-U.S. Issuers under Section 3(c)(7) of the Investment Company Act*, INVESTMENT LAWYER (June 2008); *see also Investment Company Act Status of Non-U.S. Issuers—Updated Commentary on Book-Entry Deposit Procedures under Section 3(c)(7) of the Investment Company Act*, INVESTMENT LAWYER (Mar. 2012).

Neither the original nor the supplemental procedures are appropriate for U.S. fund issuers seeking to issue securities in book-entry form due to the requirement that they confirm qualified purchaser status for all of their investors—both U.S. and non-U.S.—and the resulting greater potential to end up being held by investors that are not qualified purchasers. U.S. fund issuers, however, could satisfy the reasonable belief standard by, for example, using a private book-entry depositary that functions as a closed system and allows only participants that meet the necessary qualifications. In 2007, a number of new transfer systems (including, for example, systems operated by American Stock Transfer & Trust Company and The Bank of New York), which are able to restrict transfers in securities to investors that are both qualified institutional buyers and qualified purchasers, were established in part to facilitate trading by investors in hedge funds, private equity funds and other alternative asset vehicles for which the book-entry procedures described above would not be appropriate.

185 Generally, secondary sales of securities by non-U.S. persons need not be monitored so long as the issuer (and its affiliates and agents) have not participated in any "secondary market trading" within the meaning of the SEC no-action relief granted in *Goodwin, Procter & Hoar* (avail. Feb. 28, 1997) and *Investment Funds Institute of Canada* (avail. Mar. 4, 1996).

186 The prohibition of § 7(d) is not by its terms limited to U.S. public offerings, although the correctness of this conclusion is clearly supported by the legislative history of the Investment Company Act and decades of market practice and SEC acquiescence. *See* S. Rep. No. 1775, 76th Cong., 3d Sess. 13 (1940); H.R. Rep. No. 2639, 76th Cong., 3d Sess. 13 (1940). The conclusion was confirmed by the SEC in adopting Rule 144A under the Securities Act. SEC Release No. 33-6862 (Apr. 23, 1990).

187 Section 7(d) of the Investment Company Act provides:

> No investment company, unless organized or otherwise created under the laws of the United States or of a State, and no depositor or trustee of or underwriter for such a company not so organized or created, shall make use of the mails or any means or instrumentality of interstate commerce, directly or indirectly, to offer for sale, sell, or deliver after sale, in connection with a public offering, any security of which such company is the issuer. Notwithstanding the

> provisions of this subsection and of Section 8(a) [of the Investment Company Act], the [SEC] is authorized, upon application by an investment company organized or otherwise created under the laws of a foreign country, to issue a conditional or unconditional order permitting such company to register under this title and to make a public offering of its securities by use of the mails and means or instrumentalities of interstate commerce, if the [SEC] finds that, by reason of special circumstances or arrangements, it is both legally and practically feasible effectively to enforce the provisions of [the Investment Company Act] against such company and that the issuance of such order is otherwise consistent with the public interest and the protection of investors.

As originally proposed, § 7(d) would not have authorized the SEC to grant relief from the § 7(d) prohibition against U.S. public offerings by foreign investment companies. H.R. Rep. No. 2639, 76th Cong., 3d Sess. 13 (1940). For a discussion of § 7(d), *see* § 15.08.

188 The SEC staff has clarified that § 7(d) prohibits the use of U.S. jurisdictional means by a foreign investment company only in connection with a public offering in the United States or to U.S. persons, rather than the use of U.S. jurisdictional means generally. To the extent that this clarification is inconsistent with the position previously taken by the SEC staff in *KBS International Ltd.* (avail. Mar. 18, 1985), that position has been expressly superseded. *Goodwin, Procter & Hoar* (avail. Oct. 5, 1998).

189 *Stars & Stripes GNMA Funding* (avail. Apr. 17, 1986); *see also* § 6.01. Subsequent to the elimination of the requirement, in connection with the securities trading safe harbor under the Internal Revenue Code (the "IRC"), that a foreign entity's principal office be located outside the United States, the SEC confirmed that the performance in the United States of those specific activities (typically referred to as the "ten commandments") in connection with a private U.S. offering or an offshore public offering would not implicate § 7(d) as long as those activities that amount to an offer or sale of securities are consistent with the regulatory restrictions on nonpublic offerings or offshore offerings to non-U.S. persons. *Wilmer, Cutler & Pickering, Davis Polk & Wardwell* (avail. Oct. 5, 1998); *Goodwin, Procter & Hoar* (avail. Oct. 5, 1998).

190 In this regard, the *Touche Remnant* letter reversed earlier staff advice that offerings made pursuant to Rule 506 (the only Regulation D safe harbor available to investment companies) were nonpublic offerings for purposes of the § 3(c)(1) "private" investment company exemption from registration as an investment company. *See, e.g., San Jose Capital Corporation* (avail. Feb. 14, 1983); *Ideal Mortgage and Realty Service Corp.* (avail. Jan. 4, 1978) (relating to Rule 146, the predecessor of Regulation D). For a description of Rule 506, including recent changes to the general solicitation and "bad actors" restrictions, see § 7.02[2].

191 *Touche Remnant & Co.* (avail. Aug. 27, 1984).

192 Section 3(c)(1) of the Investment Company Act provides an exception from the definition of "investment company," and, therefore, from registration and compliance with most of the requirements of the Investment Company Act, for "[a]ny issuer whose outstanding securities (other than short-term paper) are beneficially owned by not more than one hundred persons and which is not making and does not presently propose to make a public offering of its securities."

193 *Touche Remnant & Co.* (avail. Aug. 27, 1984).

194 *Touche Remnant & Co.* (avail. Aug. 27, 1984).

195 *See, e.g.*, Letter from Cleary, Gottlieb, Steen & Hamilton (Oct. 12, 1990); Letter from Ropes & Gray (Oct. 9, 1990).

196 For many years following the adoption of the Securities Act and in part based upon SEC staff advice, practitioners addressing the presence of a public offering attached significant weight to the number of offerees and purchasers. *See* § 7.02[1].

Nevertheless, the SEC subsequently rejected the importance of that factor in adopting Regulation D, and the SEC division responsible for administering the Investment Company Act has never explicitly distinguished the public offering concept for purposes of that Act from the context in which the concept has evolved under the Securities Act.

197 *See* S. Rep. No. 1775, 76th Cong., 3d Sess. 13 (1940) ("Foreign investment companies may not … *publicly* offer securities of which they are the issuer in the United States unless the [SEC] finds that these foreign investment companies can be effectively subjected to the same type of regulation as domestic investment companies." (emphasis added).

198 *Investment Funds Institute of Canada* (avail. Mar. 4, 1996). The same principle was applied in *Indosuez Asset Management Asia Ltd* (avail. Feb. 14, 1997), where the SEC stated that a fund would not have to aggregate holders of fund shares that were purchased in offshore secondary market transactions not involving the fund or its affiliates that are deposited in a depositary receipt facility with holders of shares or depositary receipts acquired either in a U.S. private placement or from the fund or its affiliates pursuant to Regulation S under the Securities Act, so long as the fund does not promote the public use of the depositary receipts or take any other action that is intended or could be expected to condition the market in the United States for fund shares or facilitate the creation of a public secondary market for fund shares or depositary receipts. *See also Cantor Fitzgerald & Co.* (avail. June 16, 2004); *Merrill Lynch, Pierce, Fenner & Smith Inc.* (avail. Sept. 3, 1999).

The SEC staff has also confirmed that the definition of "U.S. person" under Regulation S should be used to determine whether to count an entity as a U.S. resident owner for purposes of complying with the § 3(c)(1) exemption *. Goodwin, Procter & Hoar* (avail. Oct. 5, 1998).

199 *See Investment Funds Institute of Canada*, at n.13 (avail. Mar. 4, 1996).

200 The SEC staff also proposed in the 1992 Report that § 7(d) of the Investment Company Act be amended to clarify the application of the Act's registration requirement to foreign-domiciled funds that have not made a public offering of their securities in the United States. The staff's recommended amendments would in effect codify its position taken in *Touche Remnant* that the Investment Company Act applies to foreign investment companies that do not make a public offering in the United States. Under the proposal, a foreign fund that is not otherwise excepted from the definition of "investment company" would be prohibited from using U.S. jurisdictional means: (i) to offer, sell or deliver any of its securities or (ii) to facilitate U.S. secondary market trading in its securities, including through listing on an exchange and quotation by a registered "securities information processor," if the fund has, or as a result of either of these activities "can reasonably expect" to have, more than 100 shareholders of record (as opposed to beneficial owners under *Touche Remnant*) that are U.S. residents. 1992 Report at 218–19. Because the staff's recommendation regarding § 7(d) would have effectively legislated compliance with *Touche Remnant*, it was not supported by market participants or the private bar. The staff's recommendation, which was part of a broader proposal to clarify the operation of § 7(d) that raises a number of controversial issues, see § 15.08, has not in fact received significant attention from U.S. legislators, and Congressional initiatives to revise § 7(d) are not expected in the near term.

201 *Goodwin, Procter & Hoar*, at n.10 (avail. Oct. 5, 1998); *see also The Townsend Group*, *Inc.* (avail. July 9, 2008).

202 *Goodwin, Procter & Hoar* (avail. Oct. 5, 1998).

203 Note that an investor who becomes a knowledgeable employee of a fund after purchasing securities of that fund may be treated as having been a knowledgeable employee at the time of the prior purchase and thus cease to be counted for the 100-owner limit test. *See* the ABA Interpretive Letter, *supra* Note 167.

204 *See* SEC Release No. 33-6862 (Apr. 23, 1990).

205 § 3(c)(1)(A) of the Investment Company Act.

206 *See, e.g.*, *Tyler Capital Fund, L.P./South Market Capital* (avail. Sept. 28, 1987). On the other hand, the SEC has taken the position that shares of a § 3(c)(1) fund that are jointly owned by both spouses should be considered to be owned by one beneficial owner, even where each spouse may have discretionary authority over the shares. *See* SEC Release No. IC-22597 (Apr. 3, 1997), 62 Fed. Reg. 17,512, 17,518

n.69 (Apr. 9, 1997); *see also* the ABA Interpretive Letter.

In a 2005 no-action letter, the SEC staff also concluded that the look-through requirement would not apply to a deferred compensation plan in which the amount that plan participants deferred would be paid by the employer to participants at a later time after being adjusted for the performance of a "benchmark" selected by the individual participant from among a group of possible benchmarks designated by the plan's committee. Benchmarks could be based on the performance of individual investment indices, registered investment companies and/or individual § 3(c)(1) or § 3(c)(7) funds. In reaching its conclusion, the SEC staff relied, among other factors, on the employer's representations that (i) the plan was not formed for the purpose of investing in a particular § 3(c)(1) or § 3(c)(7) fund, (ii) the plan committee would act in accordance with the "prudent man" standard set forth in § 404(a)(1)(B) of the Employee Retirement Income Security Act of 1974, as amended ("ERISA") (*see* § 15.07[1][a]) in connection with the selection and retention of any § 3(c)(1) or § 3(c)(7) fund as a performance benchmark under the plan, and (iii) the plan committee would not condition the selection of any § 3(c)(1) or § 3(c)(7) fund on the agreement of such fund to use the employer (The Goldman Sachs Group, Inc.) or any of its affiliates as a prime broker. Also of relevance were the fact that the employer was not obligated to invest in any of the benchmark funds to hedge its obligations to plan participants (although it retained the option to do so) and that plan participants were only general creditors of the employer, and did not have the right to any amount held in a segregated account. *The Goldman Sachs Group, Inc*. (avail. Mar. 8, 2005). It is not clear, however, whether this no-action position will be applied by the SEC staff to other reference instruments that are based on the performance of § 3(c)(1) or § 3(c)(7) funds.

207 *But see* the discussion of monitoring resales under § 3(c)(7) of the Investment Company Act at § 15.06[1].

208 *See Alpha Finance Corp.* (avail. July 27, 1990) (response stated that the staff could not assure that it would not recommend enforcement action if, notwithstanding extensive transfer restrictions, more than 100 persons in the United States beneficially own the securities at any time).

209 § 2(a)(42) of the Investment Company Act.

210 SEC Release No. IC-8456 (Aug. 9, 1974); *see also Weiss, Peck & Greer Venture Associates II, L.P.* (avail. Apr. 10, 1990). *But see Horsley Keogh Venture Fund* (avail. Apr. 27, 1988) (taking the position that an interest that gives the right to name a new general partner constitutes a voting security).

211 *See, e.g.*, *Devonshire Capital Corp.* (avail. Feb. 15, 1976); *Pierce, Lewis & Dolan* (avail. Mar. 17, 1972).

212 The staff has taken a similar position where funds have common advisers and promoters. *Monument Capital Management, Inc.* (avail. July 12, 1990).

213 § 3(c)(7)(B) of the Investment Company Act; *see also Goodwin, Procter & Hoar* (avail. Feb. 28, 1997). *But see Washington Capital Joint Master Trust* (avail. Sept. 25, 2006) in which the staff, while noting the distinction in facts from *Coutts Global Fund* (avail. Apr. 11, 1994) in which sub-funds of an offshore "umbrella" trust were deemed to be separate issuers for purposes of § 3(c)(1), nonetheless granted no-action relief in the case of sub-funds of a domestic trust subject to ERISA that relied on various exceptions from the definition of "investment company," such as those set forth in §§ 3(c)(1), 3(c)(5) and 3(c)(7) of the Investment Company Act. In both cases, the assets and liabilities of each sub-fund in the trust were separate from those of any other sub-funds, and the ownership interests in the trust were composed of units representing interests in the property of a discrete sub-fund the assets of which could only be applied to discharge claims against that sub-fund and could not be applied to discharge claims against any other sub-fund.

214 *PBT Covered Option Fund* (avail. Feb. 17, 1979).

215 *PBT Covered Option Fund* (avail. Feb. 17, 1979); *see also Monument Capital Management, Inc.* (avail. July 12, 1990); *Rogers, Casey & Associates, Inc.* (avail. June 16, 1989). *But see Resolution Trust Corp.* (avail. July 18, 1991) (granting no-action relief where there would be materially different cash flows allocated to securities of various funds, notwithstanding that all funds had a single adviser); *Oppenheimer Arbitrage Partners, L.P.* (avail. Dec. 26, 1985) (granting no-action relief where funds had dissimilar portfolio risk/return characteristics, different investment objectives and different portfolio composition and were

designed for different classes of investors such that no reasonable investor would be qualified to invest in both funds); *Pasadena Investment Trust* (avail. Jan. 22, 1993) (granting no-action relief where a non-U.S. fund and a U.S. registered fund, as a result of the non-U.S. fund's offering and selling its securities outside the United States and investing substantially all of its assets in the U.S. registered fund, shared the same investment objectives and risk/return characteristics but created materially different investment opportunities for foreign and U.S. investors because of differing tax laws and other regulatory disparities).

216 *See, e.g.*, *Madison Park Investment Management* (avail. Mar. 4, 1986) (denying no-action relief where two funds that would use different broker-dealers had the same investment objectives and risk/return characteristics and portfolio composition, notwithstanding differences in investment strategy that could result from the transaction costs associated with each broker and the timing of the formation of each fund).

U.S. Regulation of the International Securities and Derivatives Markets, § 15.07, OTHER REGULATORY ISSUES FOR FOREIGN FUNDS

U.S. Regulation of the International Securities and Derivatives Markets
1 Edward F. Greene, Alan L. Beller, Edward J. Rosen, Leslie N. Silverman, Daniel A. Braverman, Sebastian R. Sperber, Nicolas Grabar & Adam E. Fleisher, U.S. Regulation of the International Securities and Derivatives Markets § 15.07 (11th and 12th Editions 2014-2017)
11th and 12th Editions

Click to open document in a browser

Foreign funds seeking to make offers in the United States, and even to U.S. investors seeking to acquire interests in such funds in the secondary markets abroad, must also address other regulatory issues in addition to those arising under U.S. federal securities laws. For example, funds that trade futures and commodity options may be "commodity pools" within the meaning of the CEA, thus necessitating registration of the fund's managers as "commodity pool operators." [217]

Aside from issues pertaining directly to the fund's operation, a foreign fund must also take into account issues relevant to its targeted investors. Pension funds regulated under ERISA are subject to a variety of restrictions, certain of which, if not adequately addressed, may result in the foreign fund manager's being deemed to be a "fiduciary" and in the foreign fund assets becoming "plan assets" within the meaning of ERISA, thereby subjecting the foreign fund manager to the fiduciary standards imposed by ERISA and subjecting the assets of the foreign fund to the custody and prohibited transaction requirements of ERISA and the U.S. tax laws. The effects of U.S. federal income taxation on portfolio investment—principally the "passive foreign investment company," or "PFIC," rules—must also be considered in planning an offering targeted to U.S. investors.

[1] U.S. Pension Investment in Foreign Funds

ERISA does not prohibit investment by U.S. pension funds in the securities of foreign investment companies, including those denominated in currencies

other than U.S. dollars. [218] Rather, each investment must be judged in light of ERISA's "prudent man" rule. [219]

The most significant ERISA provision that may affect foreign funds is that if investments by pension funds subject to ERISA and certain other types of investors in the aggregate equal or exceed 25% by value of any class of equity securities of the foreign fund, the assets of the foreign fund itself are likely to be treated as plan assets. In such a case, as discussed in more detail below, the application of ERISA to the assets of the foreign fund would have very significant consequences. [220]

ERISA has no specific requirements relating to investment in foreign securities except concerning their custody. Only foreign securities or, in certain limited circumstances, foreign currency may be held outside the United States, and then only if certain conditions are satisfied.

[a] The “Prudent Man” Rule

The legislative history of ERISA recognized that "investment in securities of foreign companies and governments have [sic] been and may well continue to be in the best interests of plan participants in appropriate circumstances and with proper safeguards." [221] The standard for judging a fiduciary's decision to invest in foreign securities is the same as that applied to any investment decision made by a fiduciary: a fiduciary must make the decision to invest in foreign securities "with the care, skill, prudence, and diligence under the circumstances then prevailing that a prudent man acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of a like character and with like aims." [222]

Although U.S. Department of Labor regulations interpreting the prudent man rule provide little objective guidance, they do provide that the prudent man rule will be satisfied with respect to an investment made by a fiduciary if the fiduciary has given "appropriate consideration" to all the facts and circumstances, given the scope of the fiduciary's investment duties, that the fiduciary knows or should know are relevant to the particular investment. [223] Among the considerations that might be appropriate in the context of a decision whether to

p. 15-59

p. 15-60

invest in foreign securities are opportunities for increased return and diversification by investing in foreign securities, volatility of certain foreign equity markets, currency risks and hedging costs, tax implications, political risk, relative lack of disclosure regarding investments and lower levels of liquidity in certain foreign markets.

There is no limitation in ERISA regarding the maximum percentage of pension fund assets that may be invested in foreign securities. There is, however, a general rule that requires a pension fund manager to invest the fund's assets in a diversified manner so as to prevent the risk of large losses—the so-called diversification rule. [224] As with the prudent man rule, the diversification rule provides little objective guidance in determining the appropriate mix of foreign securities in a pension fund's portfolio.

[b] Plan Asset Regulations

Under regulations issued by the U.S. Department of Labor, as modified by § 3(42) of ERISA (the "Plan Asset Regulations"), the assets of a foreign fund or other entity in which an employee benefit plan subject to ERISA invests can, under certain circumstances, be deemed assets of the pension plan itself ("plan assets"). [225] The Plan Asset Regulations generally provide that when a “plan acquires an equity interest [226] in a foreign fund or other entity, the plan's assets include both the equity interest and an undivided interest in the underlying assets of the entity, unless it is established that: (i)(a) the equity interest acquired is a "publicly offered security" [227] or (b) although unlikely for reasons discussed in § 15.08 below, the equity interest acquired is a security issued by an investment company registered under the Investment Company Act, (ii) the entity is an "operating company," or (iii) equity participation in the entity by "benefit plan investors" does not equal or exceed 25% of the value of any class of equity securities of the entity (the "25% test"). [228] As a result, generally, unless a foreign fund

p. 15-60

p. 15-61

is registered under the Investment Company Act, or qualifies as a "venture capital operating company" or a "real estate operating company," participation in the fund by benefit plan investors should be limited in order to avoid having assets of the fund considered "plan assets." [229] If the assets of the fund constitute plan assets, the whole panoply of ERISA's substantive fiduciary provisions would apply to the foreign fund. It is often difficult, if not impracticable, to comply with such provisions.

For purposes of the 25% test exception, a "benefit plan investor" is any of the following:

- any employee welfare benefit plan or employee pension benefit plan subject to the provisions of Title I of ERISA;
- any plan described in I.R.C. § 4975(e)(l) to which I.R.C. § 4975 applies, such as individual retirement plans ("IRAs") or Keogh plans; [230] and
- any entity whose underlying assets include plan assets by reason of a plan's investment in the entity (a "plan asset entity"). [231]

Benefit plan investors therefore include not only U.S. plans subject to ERISA, IRAs and Keogh plans, but also entities such as collective trusts, insurance company separate accounts and, in certain cases, general accounts and limited partnerships holding assets deemed to be plan assets.

Because of the Plan Asset Regulations, some foreign funds completely prohibit sales to benefit plan investors. Other funds strictly limit sales to benefit plan investors and include restrictions on subsequent transfers in order to ensure that the 25% test is not violated as a result of secondary market sales.

p. 15-61

p. 15-62

Some foreign funds seek to qualify as venture capital operating companies ("VCOCs"). An entity is a VCOC if at least 50% of its assets (valued at cost) are invested in "venture capital investments" and the entity, in the ordinary course of its business, actually exercises "management rights" with respect to one or more of the operating companies in which it invests. [232] A "venture capital investment" is an investment in an operating company (other than another VCOC) as to which the investor obtains "management rights." An "operating company" generally is defined as an entity that is primarily engaged, directly or indirectly through majority-owned subsidiaries, in the production or sale of a good or service other than the investment of capital. [233] "Management rights" are contractual rights directly between the investor and an operating company to substantially participate in, or substantially influence the conduct of, the management of the operating company. In order to qualify as a VCOC, an entity must meet these requirements on the date it makes its first long-term investment and annually during an "annual valuation period." An entity cannot qualify as a VCOC before it makes its first investment in an operating company. Therefore, a manager of an investment fund seeking to qualify as a VCOC generally will not accept funds from plans until the closing of the fund's first investment in an operating company. [234]

The consequences of deeming the assets of a foreign investment company to be plan assets could potentially be severe. In addition to imposing general fiduciary standards, ERISA generally prohibits a broad range of transactions involving the assets of a plan subject to ERISA and persons having a specified relationship to the plan, such as advisers, brokers and others with whom a foreign fund would normally do business. [235] Many transactions undertaken in the ordinary course by a foreign fund would probably be prohibited. Under U.S. law, excise tax liability for "parties in interest" or "disqualified persons" to plans and civil liability for such plans' fund advisers and other "fiduciaries" could result from prohibited transactions. [236] The fact that private litigants can bring suit for fiduciary breaches, that indemnities for, and disclaimers of, breaches of fiduciary

p. 15-62

p. 15-63

duty may be unenforceable and that such excise taxes could be imposed cause many foreign funds to take steps to avoid the applicability of ERISA. [237]

[c] Holding Plan Assets Outside the United States

ERISA prohibits a pension fund subject to ERISA from holding the indicia of ownership [238] of any securities outside the jurisdiction of the U.S. district courts unless held in a manner permitted by U.S. Department of Labor regulations. [239]

Under the regulations, only "foreign securities" (and, in limited cases, foreign currency) may be held outside the jurisdiction of the U.S. district courts. [240] There are three principal alternatives under which foreign securities or currency may be held outside the jurisdiction of the U.S. district courts: the asset manager alternative, the direct custody alternative or the indirect custody alternative.

Under the asset manager alternative, the pension fund's assets must be managed and controlled by a U.S. entity with a principal place of business within the United States that is a bank, insurance company or SEC-registered investment adviser that meets certain capital and regulatory requirements. [241] Under this alternative, the pension fund manager may prudently select any capable person, domestic or foreign, to act as a custodian of pension fund assets, regardless of whether that person is a qualifying bank, insurance company, broker or dealer.

Under the direct custody alternative, foreign securities may be held outside the jurisdiction of the U.S. district courts in the physical possession of a U.S.

p. 15-63

p. 15-64

entity that is a bank or SEC-registered broker or dealer with a principal place of business in the United States and that meets certain capital requirements. [242]

Under the indirect custody alternative, foreign securities may be held outside the jurisdiction of the U.S. district courts by an SEC-registered broker or dealer in the custody of an entity designated by the SEC as a satisfactory control location [243] holding as agent for the broker or dealer, or by a U.S. bank in the custody of an entity that is a foreign securities depositary, a foreign clearing agency that acts as a securities depository, or a foreign bank, provided in each case that certain additional requirements are met. [244]

[2] U.S. Federal Income Tax Considerations

A foreign investment company that invests in U.S. securities will need to take steps to ensure that it will not become subject to U.S. federal income tax on a net income basis as a result of its activities in the United States. The foreign investment company will also need to consider whether U.S. withholding tax will be imposed on income it receives in respect of the U.S. securities and whether it will be required to withhold U.S. tax on distributions that it makes.

Additional U.S. tax considerations will arise if shares in the foreign investment company are marketed to U.S. investors. In that case, the U.S. shareholders of the foreign investment company may be subject to potentially adverse U.S. tax treatment under special rules that apply to U.S. shareholders of "passive foreign investment companies."

[a] Investing in U.S. Securities

[i] *U.S. Federal Income Tax*

To preserve investor returns, foreign investment companies are usually structured so that they will not be subject to significant foreign or U.S. net income taxes. Foreign taxes may be minimized by organizing the foreign investment company in a "tax haven" jurisdiction, such as the Cayman Islands, the Netherlands Antilles or Bermuda. Tax havens do not impose significant taxes on the net income of domestic corporations and usually do not impose withholding taxes on distributions of earnings to nonresident shareholders.

Income of a foreign investment company will not be subject to U.S. federal income tax on a net income basis if the company is not "engaged in trade or business within the United States." If the foreign investment company is so

p. 15-64

p. 15-65

engaged, the net taxable income of the company that is "effectively connected" with the trade or business will be subject to U.S. federal income tax at the normal rates applicable to U.S. corporations and, upon distribution of the effectively connected earnings, the foreign investment company may be subject to a 30% U.S. tax under U.S. "branch profits tax." [245]

To encourage foreign investors to trade in the U.S. capital markets, the U.S. tax rules provide a "safe harbor" that generally exempts such investors from U.S. federal income tax. [246] Under the safe harbor rule, a foreign investment company will not be engaged in a U.S. trade or business as a result of its securities trading activities in the United States, and thus will not be subject to U.S. federal income tax as a result of such activities, if the company is not a "dealer" in securities. [247]

Additional U.S. tax considerations will be relevant if the foreign investment company invests in a partnership that is engaged in a U.S. trade or business. The U.S. tax rules attribute the U.S. trade or business of a partnership to its foreign partners, [248] and a foreign partner may be allocated a distributive share of the effectively connected income of the partnership. As a result, if a foreign investment company acquires an interest in such a partnership, the company's

p. 15-65

p. 15-66

share of the income of the partnership (after taking into account allowable deductions connected to such income) generally will be subject to U.S. federal income tax. [249] In addition, partnership income allocable to the foreign investment company may be subject to a 30% U.S. tax under the U.S. "branch profits tax." [250] Even if the foreign investment company is not allocated any effectively connected income from the partnership, it will be obligated to file a U.S. federal (and possibly state and local) income tax return due to the fact that it is treated as engaged in a U.S. trade or business. The foregoing rules relating to investments in a U.S. partnership will not apply if the partnership is treated as a corporation for U.S. tax purposes because interests in the partnership are publicly traded. [251] An investment in such a partnership by a foreign investment company will be treated the same as an investment in stock of a U.S. corporation. Furthermore, the foregoing discussion generally assumes that the foreign investment company is itself treated as a corporation for U.S. tax purposes. If a foreign investment company instead is treated as a partnership for U.S. tax purposes, the applicable rules are somewhat different, although they generally raise the same issues.

Special U.S. tax considerations also apply if the foreign investment company invests in a "United States real property interest" ("USRPI"), such as stock of U.S. corporations whose assets consist primarily of U.S. real property. [252] A foreign investment company's gain from the disposition of a USRPI is treated as effectively connected income. Accordingly, such gains would be subject to U.S. federal income tax, and the company would be required to file a U.S. federal income tax return. However, stock that is regularly traded on an established securities market will not be treated as a USRPI if the foreign investment company did not hold more than 5% of such stock at any time during the five-year period ending on the date the stock is sold. [253] Stock in a "real estate investment trust" also will not be treated as a USRPI if either (i) the trust is majority owned by U.S. persons or (ii) the foreign investment company did not hold more than 10% of such stock at any time during the five-year period ending on the date the stock is sold. [254]

[ii] *U.S. Withholding Tax*

p. 15-66

p. 15-67

Foreign investment companies that invest in stock or securities of U.S. issuers must also consider whether income from those investments will be subject to U.S. withholding taxes. Most U.S. source interest income from standard capital markets debt securities will qualify as "portfolio interest" that is exempt from U.S. withholding tax. [255] However, subject to certain other exemptions, the gross amount of dividends and other payments of "fixed or determinable annual or periodical" income, including interest that is not "portfolio interest," received by a foreign investment company from sources within the United States will be subject to U.S. withholding tax at the rate of 30%. [256] The tax is deducted and withheld from the payment by the U.S. payor and is not refundable. [257] The 30% rate for U.S. withholding tax may be reduced under an applicable U.S. income tax treaty (although the United States has not entered into such treaties with the tax haven jurisdictions where many foreign investment companies are organized). [258]

Because U.S. withholding taxes can significantly reduce a foreign investment company's returns from investments in the United States, potential U.S. withholding taxes must be considered in connection with each such investment. Many foreign investment companies have established investment guidelines that help them to determine efficiently whether income from proposed investments will be subject to U.S. withholding taxes.

A detailed discussion of the U.S. tax rules applicable to foreign investors in securities of U.S. issuers is beyond the scope of this book. However, the most important exemptions from U.S. withholding tax other than the "portfolio interest" exemption that may apply include interest paid on a bank deposit in the United States, [259] discount on an obligation with a maturity of 183 days or less

p. 15-67

p. 15-68

from the date of original issue [260] and capital gains realized by a foreign corporation. [261]

In 2010, an additional level of U.S. withholding tax was enacted under the so-called Foreign Account Tax Compliance Act ("FATCA") rules to deter U.S. taxpayers from hiding foreign assets and income from the Internal Revenue Service ("IRS"). [262] In general, FATCA imposes a 30% withholding tax on all dividends, interest and other fixed or determinable annual or periodical payments from a U.S. source, and on the gross proceeds from the sale or disposition of any assets that can produce U.S. source dividends or interest, made to, or received by, a "foreign financial institution" ("FFI"), unless the FFI agrees to report information about its U.S. direct and indirect investors to the IRS and to withhold U.S. tax on distributions to investors who do not comply with the FATCA rules. [263] The definition of an FFI includes a foreign bank and a foreign entity that, as a substantial portion of its business, holds financial assets for the account of others, or that is engaged primarily in the business of investing or trading in securities or other financial assets. [264] Based on this broad definition, most foreign investment companies will be treated as FFIs.

In general, in order to avoid the 30% FATCA withholding tax, a foreign investment company that is an FFI will be required to enter into an agreement with the IRS pursuant to which it generally will be required to identify and report to the IRS information with respect to direct and indirect U.S. investors, withhold 30% tax on U.S. source payments to investors and other FFIs that refuse to comply with FATCA's requirements, and, in some cases, close accounts with respect to which reporting is not permitted. [265] Less onerous rules will apply if the foreign investment company satisfies the IRS that it has no U.S. investors or if it does not qualify as an FFI. [266] Regulations also impose detailed diligence requirements on FFIs; however, these are satisfied in many cases by collecting

p. 15-68

p. 15-69

U.S. tax forms (*e.g.*, Form W-8BEN, Form W-8BEN-E, Form W-9) from investors. [267] As a result, investment companies should generally expect to collect U.S. tax forms from their investors, and provide such forms to their counterparties. The United States has entered into intergovernmental agreements ("IGAs") with many jurisdictions to implement FATCA. Most IGAs require FFIs in a particular jurisdiction to report account holder information to local tax authorities, who in turn provide such information to the IRS.

Withholding on payments to non-compliant investors commenced on July 1, 2014 in respect of dividends, interest and other fixed or determinable annual or periodical payments, and will commence in 2019 with respect to gross proceeds on the sale or disposition of U.S. financial assets. [268]

[b] Tax Consequences for U.S. Shareholders

U.S. shareholders of a corporation generally are not subject to U.S. tax on corporate earnings until those earnings are distributed to them as dividends. However, under complex rules that apply to U.S. holders of equity securities of a "passive foreign investment company" ("PFIC"), U.S. holders of equity securities of most foreign investment companies are denied the benefits of tax deferral on undistributed earnings. [269] A foreign investment company will be a PFIC if it is a foreign corporation and either a substantial portion of its assets consists of stock or securities or its income is mainly derived from stock or securities. [270] Under these rules, most foreign investment companies will be PFICs. Some foreign entities that are inadvertent investment companies for purposes of the Investment Company Act may not be PFICs, but a case-by-case evaluation is required.

The PFIC rules provide several alternative mechanisms for eliminating tax deferral on the undistributed earnings of a PFIC. If neither of the elections described below is made, "excess distributions" in respect of the PFIC shares and

p. 15-69

p. 15-70

gain realized on the sale of the PFIC shares will be allocated over the shareholder's holding period and the U.S. shareholder's tax liability (*i.e.*, the applicable rate of tax and interest charges for deemed underpayments of tax) will be determined accordingly. [271]

Alternatively, if a "qualified electing fund" election is made, the U.S. shareholder will be required to include in gross income for each taxable year of the PFIC its share of the undistributed earnings of the PFIC. [272] The U.S. shareholder may, subject to an interest charge, elect to defer the payment of taxes on undistributed PFIC earnings included in income. [273] To enable its U.S. shareholders to make a qualified electing fund election, a foreign investment company whose potential investors include U.S. investors generally must separately calculate its income in accordance with U.S. tax principles and make this information available to its U.S. shareholders or provide its U.S. shareholders with sufficient access to its books and records to permit them to perform the required calculations. [274]

A third option is available generally for a U.S. shareholder of PFIC stock that is "marketable." [275] This option permits such a shareholder to elect to use a mark-to-market approach whereby it includes any increase or, to the extent of net prior mark-to-market inclusions, any decrease in the fair market value of its PFIC stock as of the close of the taxable year as ordinary income or loss. [276] Stock in a PFIC is marketable if it is regularly traded on a U.S. securities exchange or regulated foreign exchange satisfying certain specified requirements, or if the PFIC offers for sale or has outstanding stock that is redeemable at its net asset value in a manner similar to U.S.-registered investment companies. [277]

Because adverse tax rules apply to U.S. shareholders of a PFIC, equity securities of a foreign investment company may not be an attractive investment for taxable U.S. investors. However, U.S. pension funds and other tax-exempt investors should not be affected by the PFIC rules. Offering materials for equity securities of a foreign investment company that will be offered in the United States generally should indicate that the foreign investment company will be a PFIC and that U.S. investors will be subject to adverse U.S. tax rules applicable to U.S. shareholders of a PFIC.

[3] Anti-Money Laundering Compliance Obligations

p. 15-70
p. 15-71

[a] Registered Investment Companies

Registered investment companies that operate as open-end investment companies, or "mutual funds," are required under the Bank Secrecy Act ("BSA") and the Financial Crimes Enforcement Network's ("FinCEN") implementing regulations thereunder to develop and implement an anti-money laundering program pursuant to § 352 of the PATRIOT Act. [278] In order to implement an anti-money laundering program under FinCEN's rules, a mutual fund is required to adopt written policies and procedures reasonably designed to ensure that it not be used to launder money. The mutual fund is also required to provide for periodic independent testing of the program, designate an anti-money laundering compliance officer and provide ongoing training to employees.

The BSA imposes additional requirements on mutual funds, many of which are similar to the applicable requirements for broker-dealers, discussed in § 14.07[4]. For example, mutual funds are required under § 326 of the PATRIOT Act to maintain a CIP (customer identification program) as part of their broader anti-money laundering program. [279] The CIP requirements for mutual funds are similar to the requirements summarized in § 14.07[4][d] for broker-dealers. Additionally, like broker-dealers, mutual funds are among the financial institutions required to identify and verify the identity of the beneficial owners of their legal entity customers under FinCEN's final customer due diligence rule issued in May 2016, the requirements of which are summarized in § 14.07[4][e]. [280] Mutual funds also are subject to FinCEN's information sharing rule, [281] which is summarized in § 14.07[4][f] as it relates to broker-dealers, and its private banking and correspondent account due diligence and enhanced due diligence rules, which are similarly summarized in § 14.07[4][g]. [282]

Mutual funds are also subject to reporting and record-keeping requirements, including a requirement to file suspicious activity reports with FinCEN

p. 15-71
p. 15-72

based on criteria that are similar to the criteria that must be applied by broker-dealers, as described in § 14.08[3][a]. [283]

[b] Unregistered Investment Companies

In November 2008, FinCEN withdrew proposed rules that would have required certain types of unregistered investment companies, including certain hedge funds, real estate investment trusts, commodity pools and other investment funds and vehicles, to develop and implement an anti-money laundering program pursuant to § 352 of the PATRIOT Act. [284] In August 2015, FinCEN released proposed rules, which are summarized in § 16.15, that would impose AML compliance obligations on registered investment advisers pursuant to the BSA. [285] Due to the Dodd-Frank Act's expansion of the scope of investment advisers required to register with the SEC, the proposed rules would apply to many investment advisers to unregistered investment companies, such as hedge funds, private equity funds and other private funds, and would achieve similar coverage of the asset management industry as the proposed rules for unregistered investment companies withdrawn in 2008. [286]

Footnotes

217 Security futures products are defined both as securities and as futures contracts. *See* U.S. REGULATION OF THE INTERNATIONAL SECURITIES AND DERIVATIVES MARKETS TWELFTH EDITION, DERIVATIVES MARKETS, § 2.16[5].

219 § 404(a)(1)(B) of ERISA.

220 § 3(42) of ERISA; Labor Reg. § 2510.3-101(a)(2)(ii) and (f) under ERISA; *see* § 15.07[1][b]. Additionally, in April 2016, the Department of Labor issued a final rule defining who is a “fiduciary” of an employee benefit plan under ERISA. *See* § 14.07[1][a].

221 H.R. Rep. No. 93-1280, 93d Cong., 2d Sess. 306, *reprinted in* 1974 U.S.C.C.A.N. 5038, 5086.

222 § 404(a)(1)(B) of ERISA.

223 Labor Reg. § 2550.404a-1(b)(2)(i) under ERISA.

224 § 404(a)(1)(C) of ERISA.

225 § 3(42) of ERISA; Labor Reg. § 2510.3-101(a)(2) under ERISA.

226 "Equity interest" means any interest in an entity other than an instrument that is treated as indebtedness under applicable local law and that has no substantial equity features. Labor Reg. § 2510.3-101(b)(1) under ERISA.

227 "Publicly offered security" means a security which is: (i) part of a class of securities owned by more than 100 investors independent of the issuer and each other, (ii) freely transferable, which is determined by a facts and circumstances test, and (iii) either part of a class of securities (1) registered under § 12(b) or § 12(g) of the Exchange Act or (2) acquired by the plan in a U.S. public offering and subsequently and timely registered under § 12 of the Exchange Act. Labor Reg. § 2510.3-101(b)(2) under ERISA.

228 § 3(42) of ERISA; Labor Reg. § 2510.3-101(a)(2) and (f) under ERISA. In determining the ownership percentage of benefit plan investors, any interests held by a person who has discretionary authority or control with respect to the assets of the foreign fund or other entity or any person who provides investment advice for a fee (direct or indirect) with respect to any such assets or any affiliate of such a person is excluded. The 25% test must be met each time an acquisition of any equity interest in the foreign fund or other entity is made.

229 The exception for publicly offered securities is available only for securities publicly offered in the United States and/or registered under the Exchange Act. Other foreign entities that are inadvertent investment companies for purposes of the Investment Company Act may nonetheless be operating companies under the Plan Asset Regulations, but an evaluation must be made on a case-by-case basis.

230 An IRA is a written trust or custodial account to which eligible individuals may make cash contributions up to certain limits, with the benefit of tax-deferred buildup of income available for retirement. A Keogh plan is a qualified retirement plan established for the benefit of a self-employed individual.

231 § 3(42) of ERISA. With respect to a plan asset entity, its investment will be counted as an investment by a benefit plan investor only to the extent its own equity interests are held by benefit plan interests (*i.e.*, its

investment will be pro rated between benefit plan investor money and non-benefit plan investor money by reference to the proportion of its own equity interests held by benefit plan investors and non-benefit plan investors).

232 Labor Reg. § 2510.3-101(d) under ERISA.

233 Labor Reg. § 2510.3-101(c) under ERISA.

234 A "real estate operating company" ("REOC") is similar to a VCOC except that it is designed to invest in real property. A REOC must invest at least 50% of its assets in real estate that is managed or developed and with respect to which the entity has the right to substantially participate directly in the management or development activities. The entity must be engaged directly in real estate management or development activities in the ordinary course of its business. Labor Reg. § 2510.3-101(e) under ERISA.

235 §§ 406 and 3(14) of ERISA; *see also* I.R.C. § 4975(a), (b), (c) and (e)(2).

236 I.R.C. § 4975; §§ 409 and 502(1) of ERISA; *see also Harris Trust and Savings Bank v. Salomon Smith Barney Inc.*, 530 U.S. 238 (2000).

237 In addition, if the assets of the foreign fund are deemed to be plan assets, the rules regarding holding plan assets outside the United States discussed in § 15.07[1][c] would apply to all of the assets of the foreign fund, which, in the case of a fund having assets other than securities or currency, would prove unworkable.

238 The term "indicia of ownership" means the documents that represent the pension fund's ownership interest, *e.g.*, a stock certificate, a bond or, according to a Department of Labor interpretation, an ADR. The latter means that if an ADR is maintained within the jurisdiction of the U.S. district courts, the underlying foreign security need not be maintained within the jurisdiction of the U.S. district courts. Preamble to Labor Reg. § 2550.404b-1 under ERISA, 42 Fed. Reg. 54,122, 54,122 (Oct. 4, 1977); Department of Labor Advisory Opinions 75-80 (Feb. 13, 1975) and 87-03A (May 5, 1987).

239 § 404(b) of ERISA.

240 Labor Reg. § 2550.404b-1(a)(1) under ERISA. "Foreign securities" include (i) securities issued by a person (other than an individual) that is not organized under the laws of the United States or any state and that does not have its principal place of business within the United States, (ii) securities issued by a foreign government or its instrumentalities and (iii) securities issued by a person (other than an individual), the principal trading market for which is outside the jurisdiction of the U.S. district courts. Foreign currency may only be held outside the jurisdiction of the U.S. district courts solely as an incident to the purchase, sale or maintenance of foreign securities.

241 Labor Reg. § 2550.404b-1(a)(2)(i) under ERISA.

242 Labor Reg. § 2550.404b-1(a)(2)(ii)(A) under ERISA.

243 *See* § 14.07[1][b], Note 309.

244 Labor Reg. § 2550.404b-1(a)(2)(ii)(B) and (C) under ERISA.

245 I.R.C. §§ 882(a)(1) and 884.

246 The safe harbor is nonexclusive and, in certain cases, a foreign investment company that does not meet all of the requirements for "safe harbor" treatment may nevertheless not be engaged in a U.S. trade or business under the relevant case law. *See, e.g.*, *Higgins v. Commissioner*, 312 U.S. 212 (1941). For example, a foreign investment company generally will not be engaged in a U.S. trade or business where it has a foreign-based investment adviser and no investment discretion is given to any agent in the United States at any time, no investment decisions are made in the United States and the investment company has no office or fixed place of business in the United States through which, or at the direction of which, transactions are effected.

247 I.R.C. § 864(b)(2)(A)(ii). The safe harbor applies to securities transactions effected by employees of the foreign investment company or through a U.S. broker, commission agent, custodian or other agent, whether or not the employee or agent has discretionary authority. The number of transactions effected in the United States is irrelevant. *See* Treas. Reg. § 1.864-2(c)(2)(i). A foreign investment company will be a dealer if it is regularly engaged in purchasing stocks or securities and selling them to customers. Treas. Reg. § 1.864-

2(c)(2)(iv). Under this rule, very few foreign investment companies will be considered to be dealers. Foreign investment funds may rely on a similar safe harbor for commodities trading activities, subject to certain additional requirements. I.R.C. § 864(b)(2)(B)(ii).

Certain investment-like activities of a foreign investment company may not qualify for the safe harbor. For example, originating loans to U.S. borrowers rather than purchasing loans as an investor may result in a foreign investment company being engaged in a U.S. trade or business. *See* I.R.S. A.M. 2009-010 (Sept. 22, 2009). Furthermore, a foreign investment company that invests in U.S. mortgages or mortgage-backed securities may be treated as engaged in a U.S. trade or business if it purchases distressed mortgages with a view to negotiating a workout with mortgagors or if it forecloses on a mortgage and as a result holds a direct interest in U.S. real estate.

248 I.R.C. § 875(1).

249 Under I.R.C. § 1446, a partnership that is engaged in a U.S. trade or business is required to withhold taxes in respect of a foreign partner's share of the partnership's effectively connected income. Special rules apply to publicly traded partnerships that are not treated as corporations for U.S. tax purposes. *See* Treas. Reg. § 1.1446-4.

250 *See* I.R.C. § 884.

251 *See* I.R.C. § 7704.

252 *See* I.R.C. § 897.

253 I.R.C. § 897(c)(3). Interests in publicly traded partnerships and trusts are subject to rules similar to those that apply to publicly traded corporations. *See* Treas. Reg. § 1.897-1(c)(2)(iv).

254 *See* I.R.C. § 897(h)(2), (k)(1). In addition, stock in a "real estate investment trust" will not be treated as a USRPI if held by certain publicly traded foreign investment corporations. *See* I.R.C. § 897(k)(2).

255 The "portfolio interest" exemption applies to interest paid on debt obligations issued after July 18, 1984. Interest will not qualify as "portfolio interest" if the foreign investment company owns, directly or indirectly, 10% or more of the voting stock of the issuer of the debt obligation. I.R.C. § 881(c)(3)(B). The portfolio interest exemption also is subject to certain other limitations.

256 I.R.C. § 881(a)(1). Whether investment income is considered to be from sources within the United States for U.S. withholding tax purposes is determined under special rules that vary depending upon the particular type of income received. In 2017, similar withholding rules will apply to payments on equity derivatives and other equity-linked instruments that are determined by reference to dividends from sources within the United States. *See* I.R.C. § 871(m).

257 I.R.C. § 1442(a).

258 A foreign investment company may be able to claim benefits on behalf of investors under a tax treaty with their home jurisdiction if such jurisdiction treats the foreign investment company as a pass-through entity such that individual investors are required to include their allocable share of income on their income tax returns and the investors would otherwise qualify for the benefits of such tax treaty if they had earned this income directly. Treas. Reg. § 1.894-1(d).

259 I.R.C. §§ 881(d) and 871(i)(2)(A). In order for the exemption to apply, interest received on the bank deposit must not be effectively connected with the conduct of a trade or business within the United States.

260 I.R.C. § 871(g)(1)(B)(i).

261 Under I.R.C. §§ 865(a)(2) and 865(g)(1)(B), capital gains of a foreign corporation generally will not be U.S. source income and thus will not be subject to U.S. withholding tax under I.R.C. § 881(a)(1). *See also* Treas. Reg. § 1.1441-2(a)(3), which states that gain from the sale of property is not fixed or determinable annual or periodical income.

As discussed above, special rules apply to gains realized on the sale of a ("USRPI"). *See* I.R.C. §§ 897 and 1445.

262 FATCA, originally titled the Foreign Account Tax Compliance Act, was enacted as part of the Hiring

Incentives to Restore Employment Act of 2010, Pub. L. No. 111-147 124 Stat. 71 (2001) (the "HIRE Act"). The FATCA rules are located in I.R.C., Chapter 4 (§§ 1471-1474) and the Treasury Regulations promulgated thereunder.

263 I.R.C. §§ 1471 and 1473(1)(A).

264 I.R.C. §§ 1471(d)(4) and 1471(d)(5).

265 *See* Treas. Reg. §§ 1.1471-2, 1.1472-1.

266 I.R.C. § 1471(b)(2) (FFI with no U.S. investors); I.R.C. § 1472(b) (foreign investment company that is not an FFI).

267 Treas. Reg. § 1.1471-3(c).

268 IRS Notice 2015-66, 2105-41 I.R.B. 541 (Sept. 18, 2015). However, payments on debt obligations issued prior to January 1, 2014 are generally not subject to FATCA withholding. Treas. Reg. § 1.1471-2(b). Debt obligations issued prior to the date six months after final regulations implementing gross proceeds withholding are similarly exempted from FATCA withholding on gross proceeds from their sale or disposition. Treas. Reg. § 1.1471-2(b)(i)(3).

269 *See* I.R.C. §§ 1291–98. Undistributed earnings of a foreign investment company may also be taxed to its U.S. shareholders under the rules of the I.R.C. relating to controlled foreign corporations (I.R.C. §§ 951–65). In most cases, however, a foreign investment company will not be a controlled foreign corporation. A foreign investment company will not be a controlled foreign corporation unless, on any day during its taxable year, more than 50% of the voting power or value of its stock is owned by U.S. persons that own (directly or indirectly) 10% or more of the voting power of the corporation.

U.S. Regulation of the International Securities and Derivatives Markets, § 15.08, PROSPECTS FOR U.S. PUBLIC OFFERINGS BY FOREIGN FUNDS

U.S. Regulation of the International Securities and Derivatives Markets
1 Edward F. Greene, Alan L. Beller, Edward J. Rosen, Leslie N. Silverman, Daniel A. Braverman, Sebastian R. Sperber, Nicolas Grabar & Adam E. Fleisher, U.S. Regulation of the International Securities and Derivatives Markets § 15.08 (11th and 12th Editions 2014-2017)

Click to open document in a browser

Section 7(d) of the Investment Company Act prohibits a public offering in the United States by a foreign investment company without an SEC order permitting its registration. [287] Such an order must be based on a finding that it is legally and practically feasible to enforce the Investment Company Act against the foreign investment company and that allowing the foreign investment company to register is consistent with the public interest and protection of investors. [288]

As a practical matter, the standard mandated by § 7(d) has proven exceptionally difficult to meet, [289] and few entities have succeeded in obtaining

p. 15-73

relief. [290] Indeed, SEC practice under § 7(d) has proven to be little more than a series of unsuccessful attempts to reconcile the statutory standard of § 7(d) to the demands of an international market.

Although, with the exception of Rule 7d-1 under the Investment Company Act, the SEC has proceeded on a case-by-case basis under § 7(d), it has provided some guidance as to factors relevant to its disposition of applications for relief. For many years, these guidelines were in fact based on Rule 7d-1. [291] Rule 7d-1 provides class relief under § 7(d) for Canadian management investment companies, on order of the SEC upon application, if the conditions of the rule are satisfied. While the SEC stated that the adoption of the rule was a recognition of the "high degree of comity that has prevailed between …[the United States] and Canada, the existing treaties, the proximity of the two countries, their joint heritage of the common law, and the essential similarity of statutes and law relating generally to corporations and the rights of stockholders," [292] the conditions of the rule in fact do little to recognize or accommodate differences between Canadian and U.S. securities laws. [293] Those conditions include, for example, requirements that a majority of the board of directors of the company be U.S. citizens of whom a majority are resident in the United States, that the company's charter or other constituent documents contain all of the substantive provisions of the Investment Company Act, which must be enforceable by the company's shareholders, and that all of the assets of the company be maintained in the United States. The rule requires, in effect, that the company be a U.S. investment company in all respects other than the location of its domicile. [294]

p. 15-73

p. 15-74

Even subsequent to the adoption of Rule 7d-1 and the promulgation of the SEC's guidelines, few Canadian companies—and even fewer non-Canadian companies—sought or were granted the right to register under the Investment Company Act. [295] Not only have the requirements of the rule and the guidelines themselves been burdensome, but they also often conflict irremediably with local law applicable to a foreign investment company. In one well-known example—the attempt by the German company, Union-Investment-Gesellschaft mbH ("UI"), to register one of its funds, Unifonds, under § 7(d)—the Investment Company Act's terminology alone presented insurmountable obstacles. Whereas the Investment Company Act's definitions of "bank," "broker" and "underwriter" are derived from U.S. regulatory schemes that clearly separate these functions, under German law Unifonds was able to engage in banking, brokerage and underwriting activities. The consequences of the distinctions under the Investment Company Act are understood to have made compliance by UI and Unifonds with, for example, the requirements for independent members of the board of directors of UI and the restrictions imposed by the Investment Company Act on affiliated transactions uncertain at best. Nevertheless, after two years of negotiations, Unifonds reached agreement with the SEC as to the manner of its compliance with the provisions of the Investment Company Act, and the SEC finally published the Unifonds application for public comment. The publication drew objections from the Investment Company Institute—the most important of the investment company industry groups—which sought a public hearing as to the standards of § 7(d) and Unifonds's proposed compliance with the Investment Company Act. The prospects of such a hearing, which would likely have been lengthy and highly adversarial, prompted Unifonds to withdraw its application from consideration altogether.

The significance of these conflicts and the impediment posed by § 7(d) of the Investment Company Act to the internationalization of the securities markets have been repeatedly acknowledged by the SEC. Long before the issuance of the Concept Release, the SEC specifically requested public comment concerning appropriate standards for permitting increased access by foreign investment companies to the U.S. public market without sacrificing important concerns for investor protection. [296] In the wake of commentary that not only did not suggest

p. 15-74

p. 15-75

any uniform solution to the difficult standard posed by § 7(d), but further highlighted the variety and number of obstacles encountered by foreign investment companies attempting to meet that standard, [297] the SEC determined to continue its historical practice of addressing registration of foreign investment companies on a case-by-case basis. The SEC nevertheless outlined certain conditions it would consider prerequisites to permitting registration of a foreign investment company, including that the company have a minimum three-year operating history, with at least $50 million in net assets at registration and $25 million at the time of any offering in the United States, and that the company undertake to limit U.S. investment to 50% of its total outstanding shares at the time of sale. [298] The SEC also imposed limitations on the portfolio investments of foreign companies seeking registration: a company must maintain at least 60% of the value of its portfolio in securities of issuers organized in its home country or 75% in securities of non-U.S. issuers. [299]

These additional guidelines stimulated so little activity under § 7(d) that in 1983 the SEC abandoned its efforts to formulate workable standards under § 7(d) and formally recommended that foreign investment companies consider forming a separate U.S.-domiciled company for purposes of raising capital in the U.S. public market. [300] The "mirror fund" approach—that is, the establishment of a separate U.S. registered investment company to be offered in the United States to invest in foreign securities that "mirrors" a non-U.S. fund offered outside the United States—effectively enables a foreign adviser to offer in the United States

p. 15-75

p. 15-76

approximately the same product it offers outside the United States. However, the operations of the U.S. fund must be conducted within the framework of the Investment Company Act. In a 1996 no-action letter, the staff permitted the "bunching" of trades by a non-U.S. fund and its U.S.-registered mirror fund. [301] This bunching of trades and the subsequent allocation of proceeds was designed to lessen the trading inefficiencies of operating two separate funds.

The SEC staff's comprehensive review of the Investment Company Act in 1990 generated renewed interest in clarifying and ameliorating the operation of § 7(d). Among the staff's recommendations included in the 1992 Report was a call for legislative action to replace the standard imposed by § 7(d) with guidelines that would permit the SEC greater discretion in approving exemptive applications by foreign funds. The staff's proposed amendments would have authorized the SEC upon application to permit "operating foreign investment companies" [302] to make a U.S. public offering of their securities or otherwise to use U.S. jurisdictional means to offer or sell their securities, *if* (i) the SEC determines that "by reason of special circumstances or arrangements, it is both legally and practically feasible effectively to enforce" the Investment Company Act against the applicant and (ii) the SEC and the analogous authority in the domicile of the investment company have executed a "memorandum of understanding" providing for "regulatory cooperation and mutual recognition of investment company regulation by that country and the United States." [303]

p. 15-76

p. 15-77

The staff's recommendations are unlikely to yield significant benefits for foreign funds. First, the staff proposed to retain the statutory standard required to be satisfied to receive an exemption that is currently provided in § 7(d). This standard has to date been the principal impediment to U.S. registration of foreign funds since it requires either that the foreign fund include all of the provisions of the Investment Company Act as part of its charter or that the fund make a detailed showing as to the comparability of local regulation to the Investment Company Act's requirements in the context of the fund's proposed activities. Moreover, this showing must be made separately by each applicant under § 7(d). The deficiencies of this approach have been amply demonstrated by the inability of all but a handful of foreign funds to make a U.S. public offering of their securities.

In addition, the staff added a requirement that had not previously been suggested for a memorandum of understanding with the jurisdictions in which acceptable funds are organized. This could provide a further obstacle to the introduction of foreign funds into the United States. On the other hand, if the staff were to make an otherwise workable proposal for the introduction of foreign funds into the United States, it is possible that the requirement for a memorandum of understanding could be satisfied in many jurisdictions.

Any foreign fund seeking authorization to register under the Investment Company Act would generally also require relief from certain of the Investment Company Act's provisions that may be inconsistent with the fund's home-country regulation. The staff's proposed amendments to § 7(d) would also authorize the SEC by rule or order to exempt any operating foreign investment company from any provision of the Investment Company Act, upon findings that (i) the exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the Investment Company Act, (ii) the "laws under which such company operates provide protections for investors that serve the same purposes as the protections provided by the provisions of [the Investment Company Act] from which exemption is requested or that specific conditions agreed to by the company provide such investor protections," and (iii) the company is not operated for purposes of evading Investment Company Act regulation. This approach would apparently replace, in the case of foreign funds, the existing exemptive procedure under § 6(c) of the Investment Company Act that requires that the SEC make only the findings described in clause (i) above. [304] The additional showing called for by the SEC's proposed amendments would likely entail—as in the case of registration orders—a detailed analysis of the comparability of local and U.S. investment company regulation. Although in the 1992 Report the SEC acknowledged that "the foreign regulatory system need not be identical to the provisions from which exemption is requested," [305] the staff stated that the SEC would need to find that

> the foreign law adequately addresses the same regulatory concerns and serves essentially the same purposes.…In making that finding, the [SEC] could consider the different regulatory requirements, customs, investment company business practices, and overall investment company regulatory framework in the jurisdiction in which the fund is organized. [306]

It is difficult to imagine how the revised standard, which appears only to increase the demonstrative burden of applicants while limiting the existing authority of the SEC under § 6(c) of the Investment Company Act, would expand the number of foreign funds able to access the U.S. public market. Indeed, given the SEC's authority under § 6(c), it is difficult to imagine why a second standard is at all necessary or desirable in the case of foreign funds, much less what role § 6(c) might play for those funds if the staff's recommendations were implemented. In this respect, the staff's proposal was in sharp contrast to an earlier SEC proposal to amend § 7(d) of the Investment Company Act. Among the conditions to the SEC's exemptive authority under that proposal was a finding that "compliance with the provision [for which exemption was requested] would be unduly burdensome because the company was organized or otherwise created under foreign law and invested primarily in foreign securities." [307] The ability of the SEC to consider the "burdens" of compliance with the Investment Company Act was criticized by many as providing an unfair advantage to foreign funds [308] and was expressly rejected by the staff in the 1992 Report. [309] If the universe of foreign funds operating in the United States is to expand, it is nevertheless this authority to weigh the relative benefits and burdens of compliance with the Investment Company Act that must be accorded to the SEC—a one-sided approach focusing exclusively on the benefits of U.S. regulation will, virtually by definition, fail to accommodate the often irreconcilable differences between U.S. and foreign regulators. Recent comments by the staff on opening the U.S. market to non-U.S. funds have focused on the ability of non-U.S. advisers to manage funds incorporated in the United States and not on increasing

p. 15-78
p. 15-79

opportunities for non-U.S. funds. [310] Until the SEC takes any definitive action in this field, the guidelines provided in Rule 7d-1 under the Investment Company Act appear to be the best guidance available for the few companies that may seek relief under § 7(d). [311]

291 SEC Release No. IC-8959 (Sept. 26, 1975).

292 SEC Release No. IC-1945 (Jan. 28, 1954).

293 The difficult standard of § 7(d) has also resulted in the exclusion of foreign investment companies from other advantageous securities law developments. For example, the multijurisdictional disclosure system between the United States and Canada, discussed in Chapter 13, is not available for any entity subject to registration under the Investment Company Act.

294 Rule 7d-1 under the Investment Company Act also requires that each officer, director, investment adviser and principal underwriter for the company agree in writing to comply with the company's charter or other constituent documents and that failure to comply with that agreement will constitute a violation of the order issued by the SEC pursuant to Rule 7d-1. The company and each of its nonresident officers, directors and investment advisers must also agree to appoint the company's U.S. custodian as agent for service of process. Finally, the principal underwriter for the company must be a corporation organized under the laws of one of the states of the United States (or a person that is resident in and a citizen of the United States) with its principal place of business in, the United States, any accountant to the company must be qualified to act as an "independent public accountant" to the company within the meaning of the Securities Act and must have a permanent place of business in the United States and the company must maintain at least a copy of its books and records in the United States.

295 The SEC staff indicated that, as of March 19, 1999, only one Canadian fund was registered with the SEC. SEC Release No. IC-23745 (Mar. 19, 1999), 64 Fed. Reg. 14,648, 14,649 n.10 (Mar. 26, 1999).

296 SEC Release No. IC-8596 (Dec. 2, 1974).

297 Commenters representing foreign interests objected to a range of SEC regulation, including the *per se* rules prohibiting transactions with affiliates or interested persons, Letter from Crystal & Driscoll, P.C. (Jan. 30, 1975) ("Clearly, no other country has such stiff rules."); *see also* Letter from The Investment Trusts Association (Japan) (Mar. 11, 1975), structural differences between U.S. and foreign funds, Letter from Save & Prosper Group Ltd. (Jan. 27, 1975) ("[T]he majority of European funds are of a contractual, rather than corporate structure."), voting requirements, Letter from Leva, Hawes, Symington, Martin & Oppenheimer (Aug. 8, 1974) ("The German Investment Company Act does not permit, and most certainly does not contemplate, giving voting rights to investors.…"), and corporate governance matters, Letter from the Ministry of Finance of Japan (Mar. 1, 1975) (the requirement for a majority of independent members of a fund's Board of Directors is inconsistent with the Japanese-approved contractual form of investment trust).

298 SEC Release No. IC-8959 (Sept. 26, 1975).

299 SEC Release No. IC-8959 (Sept. 26, 1975). Under the SEC's guidelines, an applicant would also have to provide certain information, such as a comparison of applicable foreign law and a section-by-section description of each provision of the Investment Company Act with which the applicant was unable or unwilling to comply, together with an explanation for the proposed noncompliance.

300 SEC Release No. IC-13691 (Dec. 23, 1983). Legislative attempts to relax the standard imposed by § 7(d) have also been unsuccessful. *See, e.g.*, H.R. 8256, 93d Cong., 1st Sess. (1973) (bill to amend § 7(d) to permit the SEC, in considering applications under § 7(d), to "take into account the differing laws, regulations, customs, and business conditions of particular countries in which such companies are organized and the adequacy of existing regulation in such countries"). In 1984, the SEC again attempted to encourage Congress to increase the SEC's flexibility in granting orders under § 7(d) by proposing amendments to the statutory standard. In particular, the amendments would have permitted the SEC, under its rulemaking and exemptive authority, to grant exemption from any provision of the Investment Company Act to a foreign operating investment company upon findings that:

> (1) compliance with such provision would be unduly burdensome because the company is organized or otherwise created under foreign law and invests primarily in foreign securities, (2) the laws under which such company operates provide protections for investors which serve the same purposes as the protections provided by the provisions of [the Investment Company Act] from which exemption is requested or that specific conditions agreed to by the company provide such investor protections, (3) the exemption is consistent with the protection of investors and the purposes fairly intended by the policy of [the Investment Company Act], and (4) such company is not operated for the purpose of evading the provisions [of the Investment Company Act].…

Click to open document in a browser

As a natural consequence of the SEC's "mirror fund" approach to enabling foreign portfolio investment by U.S. investors and the desire of many U.S. investors to have increased investments in non-U.S. securities, many fund sponsors have established U.S.-domiciled investment companies that invest in part or primarily in foreign securities. [312] These funds are generally closed-end management investment companies (though some are open-end) established in the United States and registered under the Investment Company Act. Investment objectives have included investing principally in the securities of a number of countries other than the United States (so-called "international funds"), in the securities of a number of countries including the United States (so-called "global funds") or in the securities of a single country (so-called "country funds"). [313]

p. 15-80

In addition to local law requirements and the requirements of the Investment Company Act, a fund designed to invest in foreign securities can raise issues beyond those faced by investment companies generally, certain of which are summarized below.

[1] Fund Structure and Investments

A fund investing in foreign securities must of course comply with the laws of the foreign country or countries in which it invests, and an early examination of applicable foreign investment, exchange control, securities and tax laws must therefore be made to ensure that the fund's investment objectives can be accomplished. Particular attention should be directed to restrictions on investments in specific sectors or industries, exchange controls that could affect conversion of local currency into dollars, the availability of repatriation guarantees and related governmental approvals and taxation (including applicability of withholding taxes) of payments to nonresidents, such as the fund, of dividend and interest income and of capital gains. Where a local investment vehicle is used to avoid some of these issues, the vehicle must be structured so that it is not a separate investment company subject to the Investment Company Act. Section 12(d) of the Investment Company Act imposes strict limitations on the ability of a registered investment company to invest in securities of other investment companies. [314]

p. 15-80

p. 15-81

Where the local vehicle may have too much substance to be disregarded as a separate entity, the fund may attempt to take advantage of § 12(d)(1)(E) of the Investment Company Act, which provides an exemption from the limitation on holdings of another fund imposed by § 12(d) where the U.S.-registered fund holds only securities of the second-tier fund and U.S. government securities and meets certain other requirements. [315] Recent amendments to § 12(d)(1) by the NSMIA have made these issues easier to address in certain circumstances. [316]

p. 15-81

p. 15-82

Management investment companies must be classified under the Investment Company Act as either "diversified" or "nondiversified." To be classified as "diversified," at least 75% of the value of the fund's total assets must be represented by cash, U.S. government securities and other securities limited in respect of any one issuer to an amount not greater in value than 5% of the total assets of the fund and not more than 10% of the outstanding voting securities of such issuer. [317] A fund that elects to be classified as "nondiversified" is not required to meet these tests, but will still be subject to the diversification requirements of U.S. federal tax laws described below.

For purposes of both the Investment Company Act and U.S. tax laws, securities issued by foreign governments are treated in the same manner as securities issued by private companies; they do not benefit from the same treatment accorded to U.S. government securities. To date, neither the SEC nor the IRS has taken formal action permitting a country fund to substitute securities of its "host" government for those of the United States in satisfying the diversification tests. This may affect the short-term management of a country fund during the initial start-up period and during any period in which the portfolio manager believes a defensive posture is appropriate. Difficulties can be particularly acute where local exchange control rules restrict or prohibit free exchange from local currency into U.S. dollars or transfer of currency out of the local jurisdiction after liquidation of local investments, since in such cases the ability to invest in U.S. government securities for defensive or cash management purposes may be limited.

[2] Custody

Use of foreign custodians for foreign portfolio securities must comply with applicable SEC rules. Under a previous version of Rule 17f-5 under the Investment Company Act, the principal alternatives were:

- a local branch or office (where one exists) of a U.S. bank that qualifies as a custodian under the Investment Company Act, in which case no specific additional rules must be complied with;
- a banking institution organized under the laws of a foreign country, in which case the foreign institution must meet certain requirements under Rule 17f-5 under the Investment Company Act;
- a non-U.S. securities depositary or clearing agency that operates "the system for the central handling of securities or equivalent book-entries" in the

p. 15-82
p. 15-83

  foreign country of its organization and that is regulated by a "foreign financial regulatory authority"; or
- a non-U.S. securities depositary or clearing agency that operates a "transnational system for the central handling of securities or equivalent book-entries." [318]

This issue was a significant problem for registered investment companies seeking to invest in a jurisdiction where securities can only be held through a depositary in book-entry form and where there is not clearly a single depositary that is "the central system" in the jurisdiction. [319] In certain cases, the SEC staff has granted no-action relief, although the bases for relief have varied substantially as a result of the differences in the practices among the countries in question. [320]

Recognizing the substantial difficulties associated with foreign custody issues, the SEC amended Rule 17f-5 under the Investment Company Act in 1997 to expand the types of institutions that may serve as custodians. [321] The SEC delayed implementation of the new amendments twice, [322] in response to industry concerns and finally implemented the changes in 2000. [323] Revised Rule 17f-5 applies only to funds maintaining assets with a foreign bank custodian and not to

p. 15-83
p. 15-84

custody arrangements with foreign securities depositaries. [324] The revised rule permits a fund to utilize "eligible foreign custodians," which are regulated non-U.S. banks or majority-owned direct or indirect subsidiaries of U.S. banks or bank holding companies. [325] In selecting such a foreign custodian, a fund's board must ensure that certain standards are observed in (i) selecting the custodian, (ii) establishing contractual relations with the custodian and (iii) monitoring the appropriateness of maintaining the arrangement. [326]

Partly in response to the industry's concerns regarding Rule 17f-5, the SEC adopted Rule 17f-7 under the Investment Company Act to govern custody arrangements with foreign securities depositaries. [327] Under Rule

17f-7, funds may maintain their foreign assets only with an "eligible securities depositary," which must: (i) operate a central system for handling securities and be regulated by a foreign financial regulatory authority, (ii) hold the fund's assets under conditions no less favorable than those that apply to other participants, (iii) maintain records identifying the assets of each participant and keep the depositary's own assets separate, (iv) provide periodic reports to participants, and (v) be subject to periodic review by regulatory authorities or independent accountants. [328] To comply with Rule 17f-7, the fund or its adviser must receive from its primary custodian (or its agent) an initial risk analysis of the depository arrangements with the depository, and the fund's contract with its primary custodian must state that the custodian will monitor risks and promptly notify the fund or its adviser of

p. 15-84
p. 15-85

material changes in risks. The primary custodian and other custodians also must agree to exercise reasonable care in this regard. [329]

[3] Investment Advisers

A fund may be set up to have a single investment adviser or a number of investment advisers, each with responsibility for a different portion of the fund's portfolio or with one or more sub-advisers. Any investment adviser to a registered investment company, including a foreign adviser or sub-adviser, is required to register under the Advisers Act. The SEC staff has taken the position that the recordkeeping and reporting requirements and certain other rules of the Advisers Act apply to a registered investment adviser in respect of both U.S. and foreign customers, and that the Advisers Act in certain circumstances can apply to or result in the imposition of requirements on affiliates of registered advisers. [330]

[4] Disclosure

In addition to registering under the Investment Company Act, funds making public offerings in the United States must register the offerings under the Securities Act. Special disclosure forms have been designated by the SEC for the Securities Act registration of investment companies. These forms include disclosure requirements particular to investment companies, including regarding investment objectives, trading policies, advisory arrangements, fund expenses, accounting policies for derivatives [331] and many others. Prospectuses of funds investing in foreign securities generally contain disclosure relating to the securities markets and economic and political background of the countries in which they plan to invest, as well as the effect of local laws on the ability of the fund to invest, reinvest and hold securities and to comply with U.S. requirements. The level of disclosure depends on a number of factors, including the percentage of

p. 15-85
p. 15-86

the fund's assets expected to be invested in a particular country. The disclosure can also be expected to depend on the degree to which the country's economy, political system and securities markets present special risks.

[5] U.S. Taxation

Like other U.S.-registered investment companies, a fund investing in foreign securities can effectively avoid most U.S. federal income tax at the corporate level if it meets certain requirements. [332] While a complete discussion of tax issues for registered investment companies is beyond the scope of this book, the following summarizes the principal requirements for the operation of such a company to effectively avoid taxation at the corporate level.

First, the fund must be registered under the Investment Company Act. [333] Second, the fund must meet certain diversification requirements. It generally may not invest more than 25% of its assets in the securities of any one issuer, including any foreign government. [334] At least 50% of its assets must be invested in cash, U.S. government securities and securities of issuers each of which does not represent more than 5% of the fund's assets. [335] Third, at least 90% of the fund's gross income must derive from interest, dividends, gains from the sale or other disposition of securities or foreign currency and certain other categories of income related to securities investment. [336] Fourth, the fund must distribute to shareholders at least 90% of its net investment income from interest, dividends, options and the like and short-term capital gains (net of long-term capital losses). [337] Income subject to the distribution requirements includes realized gains attributable to currency fluctuations. It is therefore important that local exchange control regulations be flexible enough to permit the fund to repatriate a sufficient portion of its earnings to cover required distributions.

Under current law, the fund will be subject to U.S. federal income tax on net long-term capital gains (reduced by any net short-term capital losses) and other investment income not distributed to shareholders and a 4% excise tax to the extent the fund does not distribute 98.2% of its capital gains and 98% of its other net income. [338] Income tax paid by the fund on undistributed long-term capital gains (but not the excise tax) may be claimed as a credit by shareholders. [339]

p. 15-86

p. 15-87

These distribution requirements make accumulation of realized gains by U.S.-registered investment companies burdensome and potentially costly. As a result, many U.S. funds have dividend reinvestment plans. Reinvested dividends generally are treated as distributed dividend income for U.S. tax purposes. [340]

Payments on foreign securities held by a U.S. investment company may be subject to withholding taxes imposed by the country from which the payments are sourced. If more than 50% of the total value of the fund's assets is invested in stocks or securities of foreign corporations as of the end of the taxable year, the fund may elect to pass-through the foreign tax credit to its shareholders who, if they are U.S. taxpayers, can thus obtain the benefit of the credit. [341] As a consequence of the election, the shareholders (including shareholders that are not U.S. taxpayers) are treated as receiving, and the fund is treated as distributing, a dividend equal to the amount of foreign taxes paid and each shareholder that is a U.S. taxpayer is entitled to a foreign tax credit or deduction for his or her proportionate share of such amount. [342]

Non-U.S. shareholders generally will be subject to withholding tax at a rate of 30% in respect of dividends paid by a U.S. investment company, subject to reduction by an applicable tax treaty. [343] It therefore may not be tax-efficient for non-U.S. persons to invest in foreign securities through U.S. investment companies.

Footnotes

312 For a description of certain issues that can arise when non-U.S. investment companies seek to invest in U.S. securities, *see* § 3.05[1], Note 521 (discussing certain restrictions applicable to participation in U.S. initial public offerings).

313 The SEC staff has provided guidance as to when a registrant may use the terms "international" and "global" in the name of a fund and requires that the name of a particular region or country be used where the fund will have a concentration of investments in that region or country. *See, e.g.*, Letter from SEC, Division of Investment Management, to Registrants (Feb. 22, 1993) (citing Letter from SEC, Division of Investment Management, to Registrants (Jan. 3, 1991)). For these purposes, a fund may count securities of issuers (i) that are organized under the laws of the particular country, (ii) for which the principal securities trading market is in that country or (iii) that derive a significant proportion (at least 50%) of their revenues or profits from goods produced or sold, investments made or services performed in the country or that have at least 50% of their assets situated in that country. Letter from Registrants, SEC, Division of Investment Management, to Registrants (Feb. 22, 1993) (citing Letter from SEC, Division of Investment Management, to Registrants (Jan. 3, 1991)). Note, however, that under Rule 35d-1 under the Investment Company Act adopted January 17, 2001, in order for a registered investment company to have a name suggesting that it focuses on a particular type of investment, the company must invest at least 80% of its assets in the type of investment suggested by its name. Rule 35d-1 under the Investment Company Act; *see also* SEC, Division of Investment Management, Frequently Asked Questions about Rule 35d-1 (Investment Company Names) (Dec. 4, 2001).

314 The limitations on a so-called "fund of funds" prohibits, subject to certain exceptions, a registered investment company (and companies under its control) from investing in the securities of another investment company if, after the acquisition, the acquiring group of companies owns in the aggregate: (i) more than 3% of the voting stock of the acquired company, (ii) securities of the acquired company representing more than 5% of the value of the total assets of the acquiring group of companies or (iii) securities of the acquired company and all other investment companies representing more than 10% of the value of the total assets of the acquiring group of companies. § 12(d)(1)(A) of the Investment Company Act. The restriction on purchasing more than 3% of the voting stock of another investment company applies in the case of investments made by a registered investment company in a fund relying on § 3(c)(1) or § 3(c)(7) of the Investment Company Act and investments by such a fund in securities of any registered investment company. Sales by a registered open-end investment company of its securities to any other investment company are similarly constrained. §§ 12(d)(1)(A) and 12(d)(1)(B) of the Investment Company Act. The SEC has adopted rules that to a certain extent expand the circumstances in which an investment company may invest in shares of another investment company. SEC Release No. IC-27399 (June 20, 2006).

The SEC staff has under certain circumstances taken the position that § 12(d) will not apply to a fund's investment through the vehicle of another fund where the fund is U.S. domiciled and is the sole owner, and will control the management and investment policies, of the vehicle and the arrangement will not result in any additional sales load to the fund or significant duplicative custodian fees or other costs to fund shareholders. *See, e.g.*, *The Spain Fund, Inc.* (avail. Mar. 28, 1988). The SEC staff has also taken the position in such cases that the offering is not an indirect offering of a foreign investment company in violation of § 7(d) of the Investment Company Act. The SEC staff has extended this reasoning to a three-tier fund structure where a registered closed-end investment company invested only in the securities of an offshore fund that, in turn, invested only in the securities of another registered closed-end fund. *Man-Glenwood Lexington TEI, LLC* (avail. Apr. 30, 2004).

The SEC staff has permitted a registered closed-end investment company to acquire securities of foreign investment companies in excess of the limitations on such ownership imposed by § 12(d)(1)(A) of the Investment Company Act. *The France Growth Fund, Inc.* (avail. July 15, 2003). In granting the requested no-action relief, the SEC staff relied, among other things, on the fact that the relevant foreign investment companies would not acquire securities of other investment companies. However, in the context of a fund of funds arrangement previously permitted under an exemptive order, the staff recently permitted the acquired companies in the fund of funds structure to acquire the securities of unaffiliated investment companies for short-term cash management purposes, even in excess of § 12(d)(1)(A) limits. *John Hancock Trust, et al.* (avail. Apr. 12, 2012).

The SEC staff also stated that it would not recommend enforcement action under § 7(d) of the Investment Company Act because the registered investment company would only acquire securities issued by foreign investment companies that conducted offerings of their securities in the United States or to U.S. persons in accordance with § 3(c)(7) of the Investment Company Act and would comply with the diversification requirements of § 5(b)(1) of the Investment Company Act. *See* text accompanying *infra* Note 317. Because the registered investment company was not currently engaged in a public offering of its shares, the SEC staff expressly did not consider whether the registered investment company's proposed actions would constitute an indirect public offering or sale of the foreign investment company's securities in the United States.

315 *See The Thai Fund, Inc.* (avail. Nov. 30, 1987) (confirming the availability of the exception provided by § 12(d)(1)(E) of the Investment Company Act and also granting no-action relief with respect to § 7(d)); *see also The Thai Fund*, SEC Release Nos. IC-16066 (Oct. 21, 1987) (notice of application) and IC-16130 (Nov. 17, 1987) (Order) (providing an exemption with respect to the requirement of § 12(d)(1)(E) of the Investment Company Act that all principal underwriters of the fund be U.S.-registered broker-dealers).

316 Such amendments added a new § 12(d)(1)(G) to the Investment Company Act that provides an additional exemption for investments by registered open-end investment companies in securities of other open-end

investment companies or unit investment trusts if (i) they are both part of the same group of investment companies (defined as two or more registered investment companies that hold themselves out to investors as related companies for purposes of investment and investor services) and (ii) securities of the acquired company, securities of other registered open-end investment companies and unit investment trusts that are part of the same group of investment companies, government securities and short-term paper are the only investments held by the acquiring company.

317 § 5(b)(1) of the Investment Company Act.

318 17 C.F.R. § 270.17f-5 (1997).

319 If a jurisdiction has no system that may qualify under Rule 17f-5 and applicable law prohibits the holding of local securities outside that jurisdiction or there is no practical alternative manner of satisfying the requirements of § 17(f), it appears that some investment companies have used derivatives to achieve synthetic positions in the local securities. Some have also argued that where equity securities are represented by American deposit receipts ("ADRs"), there is no need for a Rule 17f-5 custodian other than with respect to the ADRs. This argument assumes that the depositary for the shares bears the custodial risk with respect to the underlying equity securities.

320 *See, e.g.*, *ING Bank N.V.* (avail. May 24, 1999); *Templeton Russia Fund Inc.* (avail. Apr. 18, 1995); *Jardine Fleming China Region Fund, Inc.* (avail. Apr. 26, 1993); *Custody of B Shares Trading on the Shenzhen and Shanghai Securities Exchanges* (avail. Apr. 26, 1993).

In the case of China, the SEC concluded in *Custody of B Shares* that each of several nonoverlapping depositaries operating book-entry systems in a single jurisdiction with respect to the same class of shares could act as custodian for a registered investment company, based in part on the fact that each of the depositaries for shares trading on the Shenzhen Securities Exchange was (i) either a foreign branch of a U.S. bank having capital, surplus and undivided profits at least equal to $500,000 or a foreign branch of a foreign bank having shareholders' equity of at least $200 million and (ii) the sole depositary for a particular issue of a class of shares. In the case of shares traded on the Shanghai Securities Exchange, the SEC granted no-action relief, subject to satisfaction of certain conditions, based on the fact that the depositary in question was the "central" book-entry depositary and sole clearing agent, transfer agent and registrar of all shares of the class traded on that Exchange.

321 SEC Release No. IC-22658 (May 12, 1997).

322 SEC Release No. IC-23201 (May 21, 1998); SEC Release No. IC-23815 (Apr. 29, 1999).

323 SEC Release No. IC-24424 (Apr. 27, 2000); *see also* SEC Release No. IC-23815 (Apr. 29, 1999).

324 Rule 17f-5 under the Investment Company Act. Arrangements with foreign depositaries are addressed by Rule 17f-7 under the Investment Company Act, discussed below.

325 Rule 17f-5 under the Investment Company Act. *See also The Brink's Company* (avail. Feb. 11, 2014) (granting relief from the requirements of § 17(f)(1) of the Investment Company Act to registered investment companies that place their gold bullion and other precious metals in the custody of a vault services company in the United Kingdom, where such company was not an entity permitted to serve as a custodian to a registered investment company pursuant to the rules and regulations adopted under § 17(f)).

326 SEC Release No. IC-24424 (Apr. 27, 2000).

327 SEC Release No. IC-24424 (Apr. 27, 2000). The SEC has declined to apply the requirements of Rules 17f-5 and 17f-7 under the Investment Company Act to funds that hold securities with a U.S. depositary that are ultimately custodied with a foreign custodian or depositary. SEC Release No. IC-25934 (Feb. 13, 2003), 68 Fed. Reg. 8438, 8441 (Feb. 20, 2003).

328 Rule 17f-7 under the Investment Company Act. Rule 17f-7 states that "a system for the central handling of securities" has the meaning set forth in Rule 17f-4 under the Investment Company Act. This definition was removed from Rule 17f-4, however, after recent changes to that provision. The SEC staff has stated that until it corrects this discrepancy, it would interpret "a system for central handling of securities" consistently with the definition previously included in Rule 17f-4, as "a system where all securities of any particular class

or series of any issuer deposited within the system are treated as fungible and may be transferred or pledged by bookkeeping entry without physical delivery of the securities." *Austraclear Ltd.* (avail. Apr. 28, 2004).

329 Rule 17f-7(a)(1) under the Investment Company Act; SEC Release No. IC-24424 (Apr. 27, 2000).

330 *See* § 16.02.

331 *See also* Memorandum from SEC, Division of Investment Management, Regarding Mutual Funds and Derivative Instruments 11 (Sept. 26, 1994); Letter to the Investment Company Institute Regarding Derivative-Related Disclosures by Investment Companies (July 30, 2010). The SEC's Division of Investment Management has indicated that if more than 5% of a fund's net assets are at risk from its involvement in derivative instruments and transactions, its prospectus should: (i) identify the types of derivative transactions in which it will engage, (ii) briefly describe the characteristics of such transactions or instruments, (iii) state the purpose for which the fund will use derivatives, and (iv) identify the risks of derivative instruments and transactions. Letter from SEC, Division of Investment Management, to Registrants (Feb. 25, 1994). Certain uses of exchange-traded futures contracts and options on futures by registered investment companies can implicate the provisions of the CEA applicable to commodity pool operators.

Click to open document in a browser

The SEC possesses broad powers of enforcement under the Investment Company Act that extend not only to registered investment companies but also to other persons, including funds that are exempt from the Act's registration and reporting requirements. For instance, §§ 42(a) and 42(b) empower the SEC to conduct investigations to determine whether any violation of the Investment Company Act has occurred. In addition, the Securities Enforcement Remedies and Penny Stock Reform Act of 1990 ("SERPSA") [344] significantly expanded the ability of the SEC to seek civil penalties. Pursuant to SERPSA, the SEC may seek up to $150,000 against a natural person and up to $725,000 against an entity

for violations of the Investment Company Act. [345] Further, SERPSA enables the SEC to order respondents to "cease and desist" from any act or practice that violates the Investment Company Act and to "take steps to effect compliance" with the Act. [346] Although notice and opportunity for hearing are generally required in connection with SEC hearings, in certain emergency situations, the SEC may issue temporary orders to persons that are subject to regulation, such as brokers, dealers, investment advisers, investment companies, etc., without a hearing. [347]

The SEC is also able to seek temporary and permanent injunctions in court to curtail any violations of the Investment Company Act and to enforce compliance with the Act. [348] Any evidence of violations may also be referred by the SEC to the Department of Justice for the institution, at the Department of Justice's discretion, of criminal proceedings.

In addition, under § 47 of the Investment Company Act, any contract that violates the Investment Company Act is void and unenforceable and, to the extent such a contract has been performed, may be rescinded, unless in either case a court finds that enforcement of the contract would produce a more equitable result. [349]

One court has held that an implied private right of action exists under § 7(d) of the Investment Company Act for claims brought against non-U.S. investment companies for publicly offering their securities through U.S. jurisdictional means without registering with the SEC. [350] These nonregistration claims are subject to a one-year limitation period. [351] Subsequent cases, however, have adopted more restrictive approaches to finding implied rights of action under other provisions of the Investment Company Act, calling into question whether other courts would find an implied private right of action under § 7(d). [352]

p. 15-89

In light of the effective prohibition of § 7(d) of the Investment Company Act on public offerings in the United States by foreign-domiciled investment companies, most such companies may only offer their securities in the United States on a private placement basis in order to be exempt from registration under both the Investment Company Act and the Securities Act. Exemptions from state securities law registration requirements are also generally available for such offerings since they are typically marketed to U.S. institutional investors (as distinguished from the general or "retail" public). In 1996, the NSMIA amended § 18 of the Securities Act to provide for federal preemption of any state laws and regulations requiring registration of securities or securities transactions that apply to a "covered security." Among other categories of "covered securities"described in the NSMIA that might apply to private offerings of foreign-domiciled investment companies as described above, securities that are offered or sold to "qualified purchasers," as such term is to be defined by the SEC by rule, are preempted. This development should facilitate marketing such offerings in all 50 states in a uniform manner. [353] Currently, however, although state laws provide exemptions for sales of securities to specified types of institutions, including banks, broker-dealers and insurance companies, the types of institutions to which exempt sales may be made can vary from state to state, as can other state securities law requirements incidental to the availability of an exemption thereunder. [354] The NSMIA provides for preemption of state securities registration and filing requirements with respect to "covered securities" in certain transactions that are exempt from federal registration requirements pursuant to regulations promulgated by the SEC under § 4(a)(2) of the Securities Act. Such offerings would include those exempted by Rule 506 of Regulation D under the Securities Act; however, technically, securities offered pursuant to § 4(a)(2) itself

p. 15-89

p. 15-90

would not be considered "covered securities," as they are not exempt "pursuant to … regulations issued under" § 4(a)(2) of the Securities Act.

Where, on the other hand, a sponsor elects to follow the SEC's "mirror fund" approach and establish a U.S. registered investment company to invest in foreign securities for purposes of conducting a U.S. offering and market the fund's shares to the general public, the offering typically will also be subject to the registration requirements of state securities laws. In the past, registration under these statutes could lead to a significant additional administrative burden and expense. However, pursuant to the preemptive provisions of the NSMIA, one of the categories of preempted "covered securities" consists of any security issued by an investment company registered under the Investment Company Act or that has filed a registration statement thereunder. Accordingly, issuers of these types of securities will now register exclusively with the SEC and will no longer be required to register under states' laws. The NSMIA permits the states to take action, however, to require the filing with the relevant state securities regulator of (i) any document filed with the SEC, together with periodic reports of the value of securities sold to persons in the state solely for notice purposes, and (ii) a consent to service of process in the state. In addition, the states may require the payment of fees in connection with such filings. Without taking any further action, the states may continue to collect fees payable in connection with such offerings as required under state law in effect on October 10, 1996. Significantly, investment companies no longer need to receive approval from a state with respect to its filing prior to commencement of the offering. As soon as the state notice filing and fee payment requirements are met, the investment company's securities may be offered and sold in the state.

Footnotes

353 In the "covered security" context, the SEC is likely to define the term "qualified purchaser" differently than it is defined for purposes of § 3(c)(7) of the Investment Company Act. In its recent proposal to revise Regulation D, the SEC has included a request for comment on whether to define the proposed term "large accredited investor" as a "qualified purchaser" for purposes of § 18 of the Securities Act. The release also notes that the SEC's prior proposal to equate that term with the definition of the term "accredited investor" in Regulation D is no longer under consideration by the SEC.

354 *See* § 7.09 for a discussion of the application of state securities laws in the context of private placement transactions.

U.S. Regulation of the International Securities and Derivatives Markets, § 16.01, INTRODUCTION

U.S. Regulation of the International Securities and Derivatives Markets
1 Edward F. Greene, Alan L. Beller, Edward J. Rosen, Leslie N. Silverman, Daniel A. Braverman, Sebastian R. Sperber, Nicolas Grabar & Adam E. Fleisher, U.S. Regulation of the International Securities and Derivatives Markets § 16.01 (11th and 12th Editions 2014-2017)
11th and 12th Editions

Click to open document in a browser

p. 16-3

The internationalization of the securities markets is strongly evidenced in the investment advisory business. Many money management organizations have operations in the major international financial centers, and their advisory clients are in the United States and elsewhere around the world. How such organizations are run both within and outside the United States can be significantly affected by regulation under the Advisers Act.

The SEC staff had long taken the position that if an organization—wherever domiciled—was (or should have been) registered under the Advisers Act, the regulatory scheme of the Advisers Act applied to the adviser's worldwide advisory activities, including those undertaken with its non-U.S. clients outside the United States. [1] The SEC staff has moderated this view, however, in the case of advisory services provided to the non-U.S. clients of registered advisers located outside the United States. [2]

In the first of a series of no-action letters advancing this view, *Uniao de Bancos de Brasileiros S.A.* ("*Unibanco*"), [3] the staff agreed that a foreign adviser need not comply with all of the provisions of the Advisers Act in providing services to its non-U.S. clients. The relief was subject to certain procedural requirements, including the maintenance of books and records, to ensure the SEC had adequate access to the foreign adviser for enforcement purposes.

Unibanco and its progeny reflect in large measure preliminary conclusions set forth in the SEC staff report, PROTECTING INVESTORS: A HALF CENTURY OF INVESTMENT COMPANY REGULATION (the "1992 Report"). [4] The 1992 Report included a wide-ranging analysis of the then-existing regulatory consequences for foreign and multinational advisers and recommended certain alternatives. On the basis of *Unibanco* and subsequent no-action letters, the SEC staff has backed away from seeking to regulate the worldwide activities of advisers located outside the United States. Rather, the staff is moving towards regulating the U.S. activities of these advisers and assuring that the activities outside the United States of non-U.S. advisers and non-U.S. affiliates of U.S. advisers do not adversely affect U.S.

p. 16-3

p. 16-4

clients, U.S. investors in clients that are investment funds, or the U.S. market. [5] The staff's position regarding the degree of regulation under the Advisers Act of activities outside the United States remains a threshold issue in structuring investment advisory operations.

Money managers that provide advice for compensation in the United States concerning securities are generally subject to regulation under the Advisers Act. [6] The Advisers Act provides for:

- registration of the adviser and disclosure concerning its business practices and personnel;
- substantive regulation of many aspects of the adviser's ongoing relationships with its clientele, particularly under general antifraud prohibitions and with respect to the ability of an adviser to charge performance-based or nonrefundable fees with certain clients and to engage in transactions with advisory clients as principal; and
- SEC oversight, inspection and disciplinary authority with respect to the adviser's activities.

Certain U.S. advisers are also subject to regulatory requirements imposed by state securities authorities that in some cases are more comprehensive than those applicable under federal law and, as discussed below, to state oversight rather than federal oversight by the SEC.

Several securities derivative products are used by investment advisers. Certain of these derivative products, such as futures, options and swaps on financial instruments and currencies, are in some instances regulated in the United States under the CEA. If an adviser's activities involve such futures, options or swaps, the adviser may also be subject to regulation as a "commodity trading advisor" (a "CTA") under the CEA. Like the Advisers Act, the CEA and the regulations promulgated by the Commodity Futures Trading Commission ("CFTC") thereunder provide for a comprehensive regulatory scheme applicable to CTAs, including registration and ongoing recordkeeping requirements, substantive restrictions on relationships with clients (including a prohibition against holding

p. 16-4

p. 16-5

customer funds related to futures contracts and commodity options in its own name) and extensive disclosure obligations, as well as CFTC oversight. [7]

Following the explosive growth experienced by the money management business and numerous investor fraud scandals, U.S. Congressional and SEC attention is increasingly focused on existing regulation and the level of resources currently devoted to oversight. [8] The Investment Advisers Supervision Coordination Act of 1996 [9] effected a significant delegation of authority over investment advisers from the SEC to state securities commissions. Numerous other

p. 16-5

p. 16-6

proposals have been considered by Congress and industry groups but have not been adopted, and include the creation of one or more self-regulatory organizations or the extension of the jurisdiction of the Financial Industry Regulatory Authority ("FINRA"), an existing broker-dealer self-regulatory organization ("SRO"), to include investment advisers [10] and the creation of a private right of action to permit advisory clients to sue their advisers for failure to adhere to regulatory requirements, particularly those relating to fraudulent and deceptive practices. [11] Other legislative proposals have included provisions imposing higher and ongoing registration fees on advisers, additional disclosure obligations and a requirement to obtain greater information regarding their clients' financial circumstances to ensure the suitability for those clients of the adviser's trading strategies. [12] In 1994, the SEC proposed rules that would expressly prohibit investment advisers from making unsuitable recommendations to clients. [13] Title IV of the Dodd-Frank Act, or the Private Fund Investment Advisers Registration Act of 2010 (the "Private Fund Advisers Act"), required many advisers to hedge funds and private equity funds that were formerly exempt from registration under the so-called "*de minimis*" exemption under the Advisers Act to register as investment advisers, imposed significant new reporting requirements on advisers to private funds and venture capital funds, including information about fund clients, and shifted regulation of many smaller and mid-size advisers from SEC oversight to oversight by the states. [14]

The management of accounts where the beneficiary is a regulated entity, such as an investment company [15] or a pension plan, raises additional regulatory considerations. [16] In such cases, registration as an investment adviser may be

p. 16-6

p. 16-7

desirable or required as a condition to the adviser's ability to manage the assets of such entities, notwithstanding that under the Advisers Act itself an exemption from registration may be available.

Footnotes

1 *See* § 16.02.

2 The SEC staff continues to take the position that the regulatory scheme of the Advisers Act applies to activities of advisers located in the United States with all U.S. and non-U.S. clients.

3 *Uniao de Bancos de Brasileiros S.A.* (avail. July 28, 1992); *see also infra* Note 58 for related no-action letters.

4 SEC, Division of Investment Management, *Protecting Investors: A Half Century of Investment Company Regulation* (May 1992). Many of the conclusions embodied in the 1992 Report resulted from comments received in response to a "concept release" that was part of a comprehensive SEC study of the Investment Company Act and the Advisers Act. SEC Release No. 33-6868 (June 15, 1990) (the "1990 Concept Release").

5 The SEC subsequently confirmed that—in keeping with *Unibanco*—it does not apply most of the substantive provisions of the Advisers Act to the non-U.S. clients of a non-U.S. adviser. SEC Release No. IA-2333 (Dec. 2, 2004) (the "Hedge Fund Release"). Title IV of the Dodd-Frank Act significantly expanded the regulatory scope and obligations of advisers, but it reconfirmed the view expressed in the Hedge Fund Release relating to the application of the Advisers Act to the non-U.S. clients of non-U.S. advisers. SEC Release No. IA-3222 (June 22, 2011), 76 Fed. Reg. 39,646, 39,681 (July 6, 2011).

6 Money managers that provide such advice concerning security futures products may also be subject to regulation as commodity trading advisors under the Commodity Exchange Act (the "CEA"). *See* § 16.16.

7 Such advisers may also be subject to regulation as "commodity pool operators" under the CEA if they manage (*i.e.*, "operate") a collective investment vehicle that trades in futures contracts, commodity options or swaps. Regulations applicable to commodity pool operators ("CPOs") are discussed U.S. REGULATION OF THE INTERNATIONAL SECURITIES AND DERIVATIVES MARKETS, TWELFTH EDITION, DERIVATIVES MARKETS, Chapter 7. As noted above, advisory activities with respect to transactions in security futures products may be subject to regulation under both the CEA and the Advisers Act, absent an exemption. *See* §§ 16.16 and 12.16[5]. The Dodd-Frank Act expanded the definition of CPO and CTA in the CEA to require that entities engaging in swaps activity, in addition to using or advising on futures and options, be subject to this regulatory framework. The CFTC has adopted rules in the context of rulemaking under the Dodd-Frank Act that rescind important exemptions from CPO registration and impose significant additional requirements on CTAs and CPOs. 77 Fed. Reg. 11,252 (Feb. 14, 2012).

8 The SEC conducted a Study on Investment Advisers and Broker-Dealers, required by the Dodd-Frank Act, in January 2011 with the goal of harmonizing regulation of investment advisers and broker-dealers. SEC, Study on Investment Advisers and Broker-Dealers (Jan. 2011) (the "Advisers and Broker-Dealer Study"). As of October 2015, there were 11,956 registered investment advisers. SEC Office of Inspector General, Rept. No. 533, Office of Compliance Inspections and Examinations' Management of Investment Adviser Examination Coverage Goals (Mar. 10, 2016). Although SEC staff resources dedicated to adviser examination has decreased while the number of registered advisers has increased in recent years, the Advisers and Broker-Dealer Study indicates that the SEC continues to make adviser oversight a priority. The SEC uses risk-based methods to focus resources and compliance examinations on firms that present the greatest risks to investors. In 2015, the SEC conducted "nearly 2,000 formal examinations of registrants, an increase over each of the prior five fiscal years." SEC, 2015 Annual Report at 24. On February 3, 2017, President Trump directed the Secretary of Labor to reexamine the Fiduciary Duty Rule. *See* Presidential Memorandum on Fiduciary Duty Rule (Feb. 3, 2017).

Following the Advisers and Broker-Dealer Study, the SEC's Investor Advisory Committee recommended a framework for a new fiduciary duty standard applicable to broker-dealers under the Advisers Act. *See* Recommendation of the Investor Advisory Committee Broker-Dealer Fiduciary Duty (Nov. 2013). The SEC has not yet proposed rules to implement the recommendations of the Investor Advisory Committee; however, Chair White testified before Congress in 2016 on the SEC's 2017 budget request indicating that while the issue is "complicated" and not "quick" she supports advancing "a uniform fiduciary rule for broker-dealers and investment advisers" under § 913 of the Dodd-Frank Act. *See* Hearing to Review the FY17 Budget Request for the SEC & CFTC Before the S. Comm. on Appropriations, Subcomm. on Financial Services and General Government, 114th Cong. (2016) (testimony of SEC Chair White), http://www.appropriations.senate.gov/hearings/hearing-to-review-the-fy17-budget-request-for-the-sec-and-cftc.

For a discussion of the 2016 Department of Labor rule defining a "fiduciary" of employee benefit plans under ERISA and certain retirement plans, *see* § 14.07[1][a].

9 *See infra* Note 19 and accompanying text.

10 *See* §§ 14.06[2] and 14.07[3] for a description of SRO activity and certain aspects of FINRA.

11 *See, e.g.*, Roberta S. Karmel, *The Challenge of Fiduciary Regulation: The Investment Advisors Act After Seventy-Five Years*, 10 BROOK. J. CORP. FIN. & COM. L. 405, 429–30 (2016); Richard Y. Roberts, Commissioner, Remarks at Midwest/Midsouth Securities Law Conference, Investment Adviser Reform (Feb. 14, 1992).

12 The Investment Advisers Modernization Act of 2016, if enacted, would make a number of changes to the Advisers Act and certain of its rules with respect to advisory services provided to clients other than registered investment companies. It proposes among other things to exempt certain communications from the books and records rule and amend the custody rule to only require publicly-traded securities and cash to be maintained with a qualified custodian. *See* Investment Advisers Modernization Act of 2016, H.R. 5424, 114th Cong. (2016).

13 SEC Release No. IA-1406 (Mar. 16, 1994). No further action has been taken with respect to this proposed rulemaking.

14 §§ 403, 407, 408 and 410 of the Dodd-Frank Act.

15 For a discussion of the Investment Company Act and the types of investment companies regulated thereunder, *see* Chapter 15.

16 Additionally, there are circumstances where even a registered adviser is prohibited from providing investment management services to certain types of clients. Advisers that have been convicted of felonies or have been subject to other forms of disciplinary action (so-called "bad actors") are prohibited from acting as the investment manager of hedge funds, private equity funds, registered investment companies or any other form of collective investment pool that offers its securities through private placement under Rule 506 of Regulation D. *See* SEC Release No. 33-9414 (July 10, 2013); *see also* § 7.02[2] for a description of the recently adopted "bad actor" rules for Regulation D offerings.

[1] Jurisdiction

The jurisdiction of the SEC to compel registration under the Advisers Act depends in the first instance on the existence of contacts with the United States. The requisite jurisdictional nexus may be established through the provision of services from or within the United States. Thus, an adviser domiciled in the United States who provides advice to non-U.S. persons, [17] as well as a foreign adviser providing advisory services to U.S. persons, will be subject to regulation under the Advisers Act. The staff of the SEC has taken the position, however, that a foreign adviser to foreign clients may use U.S. jurisdictional means to acquire information about the securities of U.S. issuers and may effect transactions in those securities through U.S. broker-dealers without registration under the Advisers Act. [18]

[a] Allocation of Regulatory Authority Between the SEC and the States

The Investment Advisers Supervision Coordination Act of 1996 (the "Coordination Act") effected a significant reallocation of the responsibilities for regulating investment advisers between the SEC and the state securities regulatory authorities, [19] and the Private Fund Advisers Act further reallocated responsibilities. Generally, the Coordination Act required advisers with $25 million or more of assets under management to register with the SEC; advisers with less than $25 million of assets under management that were registered with a state were prohibited from registering with the SEC. This reallocation of regulatory

p. 16-8

responsibilities from the SEC to the states primarily grew out of Congress's concerns that the SEC's resources are inadequate to supervise the activities of the growing number of investment advisers registered with the SEC and that many large advisers operating nationally have faced significant regulatory burdens in being subject to the differing laws of many states. The Coordination Act added § 203A to the Advisers Act, which provides that an investment adviser that is regulated or required to be regulated as an investment adviser in the state in which it maintains its principal office and place of business is prohibited from registering with the SEC unless such adviser (i) has assets under management [20] of not less than $25 million (or such higher amount as the SEC may by rule deem appropriate) or (ii) is an adviser to a registered investment company. [21]

The Private Fund Advisers Act maintains the $25 million threshold, but modifies § 203A of the Advisers Act to create a new group of "mid-sized" advisers and shifts primary regulatory oversight from the SEC to the state securities authorities for these advisers. [22] An investment adviser that (i) has assets under management between $25 million and $100 million (or such higher amount as the SEC may by rule deem appropriate) and (ii) is required to be registered in the state in which it maintains its principal office and place of business and subject to examination as an investment adviser by such state, is considered a "mid-sized" adviser and is prohibited from registering with the SEC. [23]

The SEC is authorized to deny registration to any applicant that does not meet the criteria for SEC registration, [24] and is directed to cancel the registration of any adviser that no longer meets the criteria for registration. [25] The SEC has the power to exempt investment advisers from the prohibition on SEC registration if the application of the prohibition would be "unfair, a burden on interstate commerce, or otherwise inconsistent with the purposes" of § 203A. [26] Rule 203A-2 under the Advisers Act exempts six types of advisers from the prohibition on SEC registration, and the SEC has adopted rule amendments to these exemptions:

p. 16-8
p. 16-9

- nationally recognized statistical rating organizations ("NRSROs");
- pension consultants that provide investment advice to certain employee benefit plans with respect to assets having an aggregate value of at least $200 million; [27]
- any adviser that directly or indirectly controls, is controlled by or is under common control with an investment adviser that is eligible to register (and is, in fact, registered) with the SEC;
- newly formed investment advisers that have a reasonable expectation that, within 120 days, they will become eligible to register with the SEC;
- any adviser that is required to register as an investment adviser in 15 or more states; [28] and
- certain investment advisers that provide advisory services primarily through the Internet. [29]

Under § 203A(a)(1) of the Advisers Act, advisers that are not regulated or required to be regulated as investment advisers in the state in which they have their principal office and place of business must register with the SEC regardless of the amount of assets they have under management. This provision makes clear that the SEC will retain regulatory responsibility for an adviser in a state that has not enacted an investment adviser statute and for foreign advisers doing business in the United States.

A mid-sized adviser that relies on a state law registration exemption, or is otherwise "not required to be registered in a state," must register with the SEC unless another exemption applies. [30] Most states require registration unless the adviser has both no place of business in the state and relatively few clients in the state (following the national *de minimis* standard set forth in Section 222 of the Advisers Act). A small handful, including New York and New Jersey have a

p. 16-9
p. 16-10

de minimis exemption regardless of whether an adviser has an office in the state. [31] However, if the state securities authority does not conduct compliance examinations, then the mid-sized adviser must register with the SEC. [32] The SEC has surveyed each state and made available a list of those non-examining states on its website. Notably, New York does not conduct examinations and as such, mid-sized advisers in New York are required to register with the SEC. [33]

In order to facilitate transition of mid-sized advisers to state regulation, the SEC amended Rule 203A-1. [34] If any SEC-registered adviser files an annual updating amendment to its Form ADV reporting it is not eligible for SEC registration, Rule 203A-1 requires such adviser to withdraw from SEC registration within 180 days of its fiscal year end. [35] During the transition period while the adviser is registered with both the SEC and the state securities authority, the Advisers Act and applicable state law would apply to the adviser's advisory activities. [36] Revised Rule 203A-1 also requires any state-registered adviser to apply for registration with the SEC within 90 days of filing an annual updating amendment to its Form ADV reporting eligibility for SEC registration and no reliance on an exemption. [37]

The Coordination Act gives the SEC primary responsibility for the regulation of advisers that remain registered with the SEC by preempting certain state laws with respect to those advisers, and the Dodd-Frank Act leaves this unchanged. The Coordination Act provides that no state laws regulating investment advisers or supervised persons of investment advisers shall apply to any person (i) that is registered under § 203 of the Advisers Act as an investment

p. 16-10
p. 16-11

adviser or a supervised person of an investment adviser, except that a state may license, register or otherwise qualify any investment adviser representative who has a place of business located within that state, [38] or (ii) that is not registered under § 203 because that person is excepted from the definition of investment adviser under § 202(a)(11) of the Advisers Act. [39]

The Coordination Act also added § 222 to the Advisers Act. Section 222(b) provides that no state may enforce any law or regulation that would require an investment adviser to maintain any books or records in addition to those required under the laws of the state in which it maintains its principal office and place of business [40] if the investment adviser (i) is registered or licensed as such in the state in which it maintains its principal office and place of business and (ii) is in compliance with the applicable books and records requirements of the state in which it maintains its principal office and place of business. [41] Section 222(c) sets forth a similar rule regarding minimum net capital and bond posting requirements for investment advisers. Section 222(d) provides that no state may require an investment adviser to register with the securities commissioner of the state or to comply with such state's investment adviser law (except antifraud provisions) if the investment adviser (i) does not have a place of business located within the state, and (ii) during the preceding 12-month period, has had fewer than six clients who are residents of that state. [42]

p. 16-11
p. 16-12

The Coordination Act preserves state authority over SEC-registered advisers in three areas. First, states may investigate and bring enforcement actions against SEC-registered advisers with respect to fraud and deceit. [43] Second, states may require SEC-registered advisers to file, for notice purposes only, documents filed by such advisers with the SEC. [44] Third, states may require SEC-registered advisers to continue paying state filing, registration and licensing fees. [45]

[b] Consequences of Registration

A foreign adviser who registers under the Advisers Act may well expect that the Advisers Act's requirements will apply to its activities in the United States, but may not appreciate that in the SEC's view the Advisers Act may be applicable to all of its activities, including those relating exclusively to offshore clientele. The impact on offshore business operations can include:

- requirements to deliver disclosure documents;
- limitations on principal transactions between an advisory client and an adviser or its affiliates;
- requirements to adopt, maintain and enforce a compliance program and a code of ethics;
- general antifraud prohibitions;
- reporting requirements with respect to advisers to "private funds" and "venture capital funds"; [46] and
- application of the SEC's recordkeeping and oversight requirements, which can entail disclosure of customer identities, if the SEC so determines in the case of enforcement proceedings. [47]

[c] Section 203(d)

p. 16-12
p. 16-13

The SEC's position had historically been that if an adviser located outside the United States chose to register, the Advisers Act applied to all of its activities wherever conducted. This position was based on a 1970 amendment to the Advisers Act adding § 203(d). The amendment stated that registered advisers were prohibited from certain acts, practices or courses of conduct irrespective of whether they used the "mails or any means or instrumentality of interstate commerce." [48] Although the legislative history indicates that the addition of § 203(d) was intended to serve an evidentiary purpose—to eliminate the often burdensome requirement of showing that the adviser had used jurisdictional means in connection with its U.S. activities [49]—the SEC had taken the position that the addition of this provision permitted the SEC to apply the provisions of the Advisers Act to the wholly foreign activities of a registered non-U.S. investment adviser. [50]

The apparent conflict between the SEC's position and the legislative history of § 203(d) [51] engendered a good deal of criticism by the private bar and market participants alike as contradicting the SEC's initiatives to promote internationalization of securities markets, such as Regulation S, [52] that are premised on a territorial approach and a desire to avoid extraterritorial extension of the regulatory (as opposed to antifraud) provisions of the U.S. securities laws in situations free of significant U.S. consequences. [53]

p. 16-13

p. 16-14

In connection with its comprehensive study of the Investment Company Act and the Advisers Act, including a request for comment on the practicality of its extraterritorial application of Advisers Act, [54] the staff concluded that existing interpretations of the Act's reach required revision. In particular, in the 1992 Report, the staff endorsed a narrower, territorial approach to regulation of advisers based on a more traditional "conduct" and "effects" test. According to this approach, "the Advisers Act would apply to activities where a sizable amount of advisory services takes place *in the United States* or where the advisory services have effects *in the United States*." [55] This approach is consistent with the Dodd-Frank Act and related SEC rulemaking, both of which focus on advisers with a principal office and place of business in the United States and advisers with clients in the United States. However, the new exemptions from registration under the Private Fund Advisers Act as applied to foreign advisers focus also on the location of investors in private funds managed by the adviser and may require filings by a foreign adviser even if the foreign adviser has no place of business in the United States and no U.S. clients, if the foreign adviser has U.S. investors in the non-U.S. private funds it manages. *See* § 16.03[3] *infra*.

More difficult questions are raised by a multinational registered adviser and its non-U.S. clients, particularly where personnel from both U.S. and foreign offices provide services to a single client. The staff indicated that where the foreign client deals exclusively with personnel outside the United States and where the adviser has a policy that portfolio decisions for that client be in fact formulated by the non-U.S. office, the Advisers Act should not apply. [56] Advisers Act protections would, in contrast, seem appropriate in the case of foreign clients seeking advice regarding the U.S. market and employing principally the U.S.-based personnel of the adviser. [57]

p. 16-14

p. 16-15

The staff first implemented certain elements of its revised interpretation of the jurisdictional reach of the Advisers Act in *Unibanco*, [58] in which it concluded that the registered foreign advisory subsidiary of a foreign bank need not comply with the Advisers Act with respect to its non-U.S. clients. [59] Relief was granted based in part on undertakings made by both the bank and its subsidiary to maintain books and records in compliance with SEC requirements that would "clearly reflect the investment advice given to [the subsidiary's] clients." [60] These undertakings reflect the staff's interest, first articulated in the 1992 Report, in ensuring that activities involving non-U.S. clients do not adversely affect U.S. clients or the integrity of the U.S. markets. [61]

[2] Subsidiaries and Affiliates

Many foreign entities wishing to conduct an advisory business with U.S. clients have organized separate entities to isolate the provision of those services that would require registration under the Advisers Act. Although the staff suggested in the 1992 Report that the "conduct" and "effects" test would result in diminished need by foreign advisers to create special subsidiaries to isolate their U.S. advisory activities, it recognized that for tax, internal policy or other reasons some advisers may nevertheless continue to operate their U.S. advisory business through a separate subsidiary. In such situations, the issue arises whether the new subsidiary entity is, in fact, the "investment adviser," or whether the offshore parent is merely doing indirectly what it could not do directly without registration, thereby violating § 208(d) of the Advisers Act. [62] The SEC staff has taken the position that the parent remains subject to the registration obligation if the subsidiary, rather than being the true adviser, is only an undercapitalized "shell" or alter ego established (i) to shield the parent from regulatory scrutiny and liability or (ii) to permit the parent to profit by trading

p. 16-15

based on recommendations made by the controlled entity to its clients (a practice sometimes known as "scalping"). [63]

Prior to the 1992 Report and *Unibanco*, the staff's position regarding integration of advisory entities was best articulated in its no-action letter *Richard Ellis, Inc.* ("Richard Ellis"). [64] In *Richard Ellis*, the staff indicated that a subsidiary may be considered independent of its parent for purposes of the Advisers Act if the subsidiary:

- is adequately capitalized;
- has a buffer (such as a board of directors with a majority of members independent of the parent) between the subsidiary's personnel and the parent;
- does not have personnel who participate directly in rendering advice to both the subsidiary's clients and the parent's clients;
- decides by itself what investment advice to communicate to, or use on behalf of, its clients, and has and uses sources of investment information that are not limited to its parent; and
- keeps its investment advice confidential until communicated to its clients.

A registered advisory subsidiary of an unregistered entity could nonetheless have a significant degree of shared personnel with its parent or other affiliate without subjecting the unregistered entity to the Advisers Act registration requirement. The registered adviser could also receive investment research services, including general economic or market analyses and advice, from its unregistered parent or other affiliate as long as (i) the parent or other affiliate is not the only source of the service, (ii) the service does not purport to meet the investment needs of a particular client or clients of the registered adviser or to recommend the purchase or sale of specific securities and (iii) the research or advice is not passed directly on to the clients of the registered adviser. The staff had also indicated that other support services and personnel, such as computer facilities and marketing personnel not otherwise involved in negotiating advisory contracts, could be shared between an investment adviser subsidiary and its parent

p. 16-16
p. 16-17

and other affiliates without subjecting the parent and affiliates to registration under the Advisers Act. [65]

In the 1992 Report, the staff concluded that the SEC should "recognize separateness if the affiliated companies are separately organized (*i.e.*, two separate entities), and if the registered entity is staffed with personnel (whether physically located in the United States or abroad) who are capable of providing investment advice." [66] The staff nevertheless emphasized that advisory and supervisory personnel of the unregistered entity involved in advisory services provided to U.S. persons should be within the SEC's jurisdiction and that the unregistered entity should be subject to SEC access for monitoring purposes to ensure compliance with the Advisers Act.

The staff's view on the subject is exemplified in *Thomson Advisory Group, L.P.* [67] There the staff made clear that the concerns of §§ 203(a) and 208(d) of the Advisers Act are adequately addressed when (i) the unregistered affiliates of a registered adviser do not themselves provide investment advice (the affiliates' activities were limited to activity as general partners of investment partnerships), (ii) the unregistered affiliates and each of their employees are deemed "associated persons" [68] of the registrant when they have access to the investment recommendations of the registered adviser or information concerning the recommendations prior to the effective dissemination of the recommendations and (iii) the SEC has access to the unregistered affiliates' books and records to the extent necessary to examine the business of the registered adviser. [69]

As mentioned above in § 16.02[1][c], the staff originally implemented this approach in *Unibanco* where it agreed that the foreign parent of a foreign-domiciled registered investment adviser would not be subject to Advisers Act registration. [70] No-action relief in *Unibanco* was conditioned on several undertakings made by the parent to ensure SEC jurisdiction over the parent's operations to the extent relevant to the SEC's supervision of the registered advisory subsidiary. These conditions included, first, the appointment by the unregistered parent of an agent to accept service of process in SEC enforcement proceedings,

p. 16-17
p. 16-18

as well as other proceedings arising out of or relating to the activities of its subsidiary or "any related securities transactions"—a term the staff stated would be construed broadly. [71] Second, the parent agreed to maintain books and records with respect to "related securities transactions" in English and in accordance with certain SEC rules and to cause its subsidiary to comply with Advisers Act recordkeeping requirements. Third, the parent agreed that its personnel involved in U.S. advisory activities would become "associated persons" of the subsidiary. [72] Finally, the parent agreed that it would produce its employees in connection with any SEC proceeding and authorize them to testify regarding their knowledge of the activities of the advisory subsidiary and "related securities transactions." Employees would be authorized to provide information relating to customers of the parent only with the consent of the parent, although the parent's agreement not to contest SEC proceedings otherwise than under U.S. law did not extend to any contest relating to customer identities. [73]

In subsequent no-action letters, the SEC staff has confirmed the position taken with respect to a parent and its SEC-registered subsidiary in *Unibanco* and has extended its approach to registered and unregistered affiliated companies. In *The National Mutual Group*, [74] the staff concluded that, subject to satisfaction of conditions substantially similar to those set out in *Unibanco*, each of several affiliated companies domiciled outside the United States could register under the Advisers Act without the need to comply with specified provisions of the Advisers Act in the case of its non-U.S. clients, including the "brochure" rule, prohibitions against performance fees and agency cross and principal transactions with affiliates, compliance with Advisers Act limitations on payments for client solicitations and certain recordkeeping requirements. The SEC staff also confirmed that it would not recommend enforcement action against any company within *The National Mutual Group* if it failed to enforce any policy or procedure required by or established pursuant to § 204A of the Advisers Act [75] or for other actions that may be deemed to violate the antifraud provisions of the Advisers

p. 16-18
p. 16-19

Act to the extent that the action or omission in question would involve no conduct, or would have no effects, in the United States, or would have no effects on the U.S. clients of the company. [76] In addition, guidance that the so-called "substantive" requirements of the Advisers Act do not apply to a registered offshore adviser and its relationship with its non-U.S. clients was subsequently affirmed more recently in rule releases. [77] The "substantive" provisions the SEC staff has stated do not apply to the non-U.S. clients of an SEC-registered foreign adviser include the "compliance rule, custody rule, and proxy voting rule," "certain provisions that would otherwise be required by section 205 … section 206(3)'s restrictions … rules governing adviser advertising, or cash solicitations.…" [78] Further, the SEC staff confirmed such an adviser is "not require[d] to deliver a written disclosure brochure to its offshore clients (or to any investors in an offshore private fund it advises) under rule 204-3, although the adviser does have a fiduciary duty to provide those clients with full and fair disclosure of conflicts of interest." [79] In addition, a registered offshore adviser, with respect to its non-U.S. clients, "will not be required to adopt a code of ethics but must retain its access persons' personal securities reports that would otherwise be required under such a code." [80]

Furthermore, in *Mercury Asset Management*, [81] the staff concluded that a foreign-domiciled SEC-registered adviser need not comply with the Advisers Act in the case of its non-U.S. clients and that the adviser's affiliates need not register under the Advisers Act solely by reason of providing research or other advisory services to the U.S. clients of the registered adviser through the registered adviser (*e.g.*, dual-hatted employees). While not withdrawing the position regarding subsidiaries in *Richard Ellis*, the staff stated its view that affiliated companies are separate if:

p. 16-19
p. 16-20

> they are separately organized (*i.e.*, two distinct entities); the registered entity is staffed with personnel (whether physically located in the United States or abroad) who are capable of providing investment advice; all persons involved in United States advisory activities are deemed "associated persons" of the registrant; and the [SEC] has access to trading and other records of each affiliate involved in United States advisory activities, and to its personnel, to the extent necessary to monitor and police conduct that may harm United States clients or markets. [82]

Among the specific conditions to the relief granted in *Mercury Asset Management* was a requirement that the registered adviser list on its Form ADV (in addition to its directors) each of its investment managers expected to formulate investment advice for U.S. clients, as well as the names of each other individual and affiliate of the adviser involved in the formulation of such advice. The SEC also required that the registered adviser not hold itself out as such to its non-U.S. clients so as not to foster any expectation that the adviser's activities were governed by U.S. law. Each of the adviser's unregistered advisory affiliates was required to provide advisory services to U.S. persons solely through the registered adviser and to submit to the jurisdiction of the SEC to the extent previously required in *Unibanco*.

In *Kleinwort Benson Investment Management Ltd.*, [83] the staff concluded that certain foreign advisory affiliates of a U.S.-domiciled registered adviser need not register under the Advisers Act if they share certain portfolio managers with the registered adviser, subject to specific conditions substantially similar to those required in *Mercury Asset Management*. In a departure from prior practice, however, the staff did not require certain affiliates of the registered adviser whose activities were confined to publication of research reports to make the undertakings required of the other foreign affiliates. The staff noted that the materials received from the research affiliates would not be prepared specifically for the registered adviser's clients, and information barriers had been implemented to prevent the affiliates from obtaining information about the registered adviser's trade recommendations. [84]

p. 16-20
p. 16-21

In *ABN AMRO Bank N.V.*, [85] the staff concluded that even though the adviser and its affiliates were restricted by Dutch law from making certain undertakings made in *Unibanco* and its progeny, they could still share personnel and provide certain services if certain substitute undertakings were made. Under Dutch law, ABN AMRO Bank was unable to make undertakings with respect to (i) providing the SEC staff with access to staff trading records and (ii) the availability of personnel for questioning by the staff. ABN AMRO Bank undertook, however, (a) to make a good faith effort to obtain written authorizations to provide staff trading records, (b) to make available for SEC inspection redacted staff trading records for those staff for which an authorization was not in effect and (c) to assist the SEC in enlisting the assistance of the Dutch regulatory authorities if the SEC determined it required information not in the trading records. [86]

Although the above no-action letters for the most part involved the relationship of U.S. based SEC-registered advisers with their foreign affiliates, the SEC generally has not addressed the applicability of the Advisers Act to the non-U.S. clients of a foreign unregistered adviser that is controlled by a U.S. person, where the U.S. person either is itself, or also controls, a U.S.-registered adviser. The staff stated in the 1992 Report that whether registration of the foreign adviser should be required in these circumstances is a difficult question, the resolution of which could turn on whether the non-U.S. client has substantial and direct contact with U.S.-based advisory personnel. [87] This approach was reaffirmed by the Private Fund Advisers Act exemptions to registration under the Advisers Act, which limit exemptions for foreign advisers based on having offices in or assets managed from the United States. Although such contacts can

p. 16-21
p. 16-22

raise the specter of the "Barbary Coast" [88] (that is, the United States providing a haven for investment advisers seeking to avoid regulation in any jurisdiction), the better view is that registration of the foreign adviser should not be required either as a matter of law or policy. First, a separate non-U.S. adviser's non-U.S. activities should be relevant to U.S. regulators only insofar as they affect U.S. investors or U.S. markets. Second, the imposition of a registration requirement in these circumstances would place U.S. firms that seek to isolate their non-U.S. activities at a significant disadvantage relative to their foreign competitors. In this regard, the SEC staff has already acknowledged that the location of an adviser's personnel is not a relevant consideration in determining the independence of an advisory entity from its affiliates, [89] a conclusion largely motivated by the staff's concerns about competition and efficiency. [90] Finally, principles of comity and the problems inherent in reconciling U.S. law to often inconsistent provisions of foreign law make registration in such circumstances undesirable and impracticable. Nevertheless, in light of the staff's cautions in the 1992 Report, [91] pending further guidance in this area, it is not altogether clear whether the staff would extend its territorial approach to the Advisers Act in circumstances involving the provision of advisory services to the non-U.S. clients of a foreign adviser that is controlled by a U.S. person.

Notwithstanding the revised approach reflected in the 1992 Report and the *Unibanco* letters, which all post-date *Richard Ellis*, the SEC staff has not withdrawn *Richard Ellis*. It would seem reasonable to conclude that the staff's positions in *Unibanco* and its progeny are not exclusive, such that advisers that are unable or unwilling to accede to *Unibanco*-style procedural conditions [92] may continue to structure their operations to achieve a satisfactory degree of independence in reliance on *Richard Ellis*. Indeed, the SEC staff's position in the 1992 Report suggests that adequate independence can be achieved, without the necessity for the procedural requirements delineated in *Unibanco*, with some relaxation of the *Richard Ellis* requirements (*e.g.*, in the use of common employees providing investment advice, as suggested in *Kleinwort Benson Investment Management Ltd.*). [93] The SEC's adopting release for the final rules implementing the Private Fund Advisers Act generally affirms the *Unibanco* line of no-action letter guidance as applicable to foreign advisers, sanctioning, under certain conditions, interactions between a non-U.S. unregistered adviser and its U.S. registered affiliate. [94] In addition, the adopting release notes the *Richard Ellis* no-action letter providing certain requirements for recognizing the separateness of affiliated entities. [95]

Footnotes

17 *See infra* Note 162.

18 *See, e.g., Vocor International Holding S.A.* (avail. Apr. 9, 1990) (citing *Gim-Seong Seow* (avail. Nov. 30, 1987)); *Double D Management, Ltd.* (avail. Jan. 31, 1983). The staff has taken this position notwithstanding that "means or instrumentality of interstate commerce" is defined to include the facilities of a national securities exchange. § 202(a)(14) of the Advisers Act.

19 National Securities Markets Improvement Act of 1996, Pub. L. No. 104-290, Tit. III, 110 Stat. 3416, 3436 (1996) ("NSMIA").

20 The SEC's rules provide that the calculation of assets under management for registration purposes refers to an adviser's "regulatory assets under management," which is described in further detail in § 16.03[3][a][i].

21 § 203A(a)(1) of the Advisers Act and Rule 203A-1(a) thereunder.

22 An adviser with its principal office and place of business outside the United States is permitted to register with the SEC regardless of its assets under management.

23 § 410 of the Dodd-Frank Act.

24 § 203(c) of the Advisers Act.

25 § 203(h) of the Advisers Act.

26 § 203A(c) of the Advisers Act.

27 The value threshold under the former Rule 203A-2 was $50 million. 17 C.F.R. § 275.203A-2.

28 The state registration threshold under the former Rule 203A-2 was 30 or more states. 17 C.F.R. § 275.203A-2.

29 Rule 203A-2 under the Adviser's Act; *see also* SEC Release No. IA-3221 (June 22, 2011); SEC Release No. IA-2091 (Dec. 12, 2002). An adviser is eligible for registration under Rule 203A-2(e) if the adviser provides investment advice to all of its clients exclusively through the adviser's interactive website, except that the adviser may advise fewer than 15 clients through other means during the preceding 12 months.

30 § 410 of the Dodd-Frank Act.

31 *See* N.Y. GEN. BUS. LAW § 359-eee(1)(a)(5) (excluding from the definition of "investment adviser" any "person who sold, during the preceding twelve month period, investment advisory services to fewer than six persons residing in this state, exclusive of financial institutions and institutional buyers …"); N.J. STAT. A NN. § 49:3-56(g)(1), (2) (exempting from registration a person with or without a place of business in the state if the person has had no more than five clients who are New Jersey residents other than certain financial institutions).

32 § 410 of the Dodd-Frank Act. The SEC also adopted Rule 203A-5, which required SEC-registered advisers that no longer qualified for SEC registration under the new assets under management threshold to transition from SEC to state registration by June 28, 2012.

33 SEC, Division of Investment Management, Frequently Asked Questions Regarding Mid-Sized Advisers (June 28, 2011). A mid-sized adviser with a principal office and place of business in Wyoming (which does not require adviser registration) or New York (which does not subject advisers to examination) must register with the SEC regardless of regulatory assets under management unless another exemption applies. "Regulatory assets under management" is described in further detail in § 16.03[3][a][i]. All other states subject state-registered advisers to examination.

34 *See* SEC Release No. IA-3221 (June 22, 2011).

35 Rule 203A-1(b)(2) under the Advisers Act.

36 Rule 203A-1(a)(1) provides a buffer for mid-sized advisers with regulatory assets under management between $90 million and $110 million. Such advisers may, but are not required to, register with the SEC (if below $110 million) or withdraw from SEC registration (if above $90 million).

37 Rule 203A-1(b)(1) under the Advisers Act.

38 Rule 203A-3 under the Advisers Act defines "*investment adviser representative*" as a supervised person of an SEC-registered investment adviser who has more than five clients who are natural persons and more than 10% of whose clients are natural persons.

39 § 203A(b)(1) of the Advisers Act.

40 § 985(c)(4) of the Dodd-Frank Act changed references in § 222 of the Advisers Act from "principal place of business" to "principal office and place of business."

41 § 222(b) of the Advisers Act.

42 § 222(d) of the Advisers Act. The SEC rules implementing the Private Fund Advisers Act amended Rule 222-2 under the Advisers Act, which explains how clients are counted for purposes of the national *de minimis* threshold of § 222(d) of the Advisers Act. The amended Rule 222-2 states that for purposes of the national *de minimis* threshold described in the text above, an adviser may rely on the definition of "client" provided by Rule 202(a)(30)-1 rather than Rule 203(b)(3)-1, which has been rescinded. Rule 202(a)(30)-1, like Rule 203(b)(3)-1, treats as a single client, among others, any natural person and (i) any relative or spouse of the natural person sharing the same principal residence and (ii) all accounts of which such persons are the sole primary beneficiaries. The rule also treats as a single client a corporation, partnership, trust or other legal organization that receives investment advice based on the objectives of the entity (and not its shareholders, partners, beneficiaries or members). *See* SEC Release No. IA-3222 (June 22, 2011). Unlike Rule 203(b)(3)-1, Rule 202(a)(30)-1 does not include a "special rule" providing advisers with the option of not counting as a client any person for whom the adviser provides investment advisory services without compensation. 17 C.F.R. § 275.203(b)(3)-1. *See* § 16.03[3][b][i] for a discussion of determining the number of clients for purposes of the foreign private adviser exemption.

43 § 203A(b)(2) of the Advisers Act.

44 § 307(a) of the Coordination Act.

45 § 307(b) of the Coordination Act.

46 §§ 407 and 408 of the Dodd-Frank Act.

47 See Rule 204-2(c) under the Advisers Act (permitting designation of client identities on an adviser's books by numerical, alphabetical or other code) and § 209(b) of the Advisers Act (granting authority to the SEC to obtain such information under certain circumstances in an enforcement proceeding). However, certain provisions (*e.g.*, limitations on performance fees) do not apply to an adviser's dealings with offshore clients. *See* § 16.06.

48 § 203(d) of the Advisers Act. Section 203(d) provides that:

> Any provision of this title … which prohibits any act, practice, or course of business if the mails or any means or instrumentality of interstate commerce are used in connection therewith shall also prohibit any such act, practice, or course of business by any investment adviser registered pursuant to this section or any person acting on behalf of such an investment adviser, irrespective of any use of the mails or any means or instrumentality of interstate commerce in connection therewith.

49 H.R. Rep. No. 1382, 91st Cong., 2d Sess. 40 (1970); S. Rep. No. 184, 91st Cong., 2d Sess. 47 (1969).

50 SEC Release No. IC-17534 (June 15, 1990); *Gim-Seong Seow* (avail. Nov. 30, 1987).

51 Among other things, the SEC's continued use, subsequent to the enactment of § 203(d), of a form (applicable solely to advisory conduct arising in any place subject to the jurisdiction of the United States) that registered, nonresident advisers are required to file consenting to service of process in legal actions had suggested that the SEC did not believe that registration alone provides a sufficient jurisdictional nexus to reach the wholly foreign activities of a foreign adviser. *See* Rule 0-2 under the Advisers Act. A senior staff member of the Division of Investment Management of the SEC—the division responsible for administering the Advisers Act—had endorsed this view and the conclusion that the Advisers Act should not apply to the wholly foreign activities of a nonresident adviser. Stanley B. Judd, *International Investment Advisers*, 19 REV. SEC. & COMM. REG. 1 (1986).

52 *See* Chapter 8.

53 *See* Edward F. Greene, Mitchell S. Dupler & Alan B. Cohen, *Jurisdictional Reach of the Investment Advisers Act of 1940*, 4 INSIGHTS 21 (1990); *see also* Stanley B. Judd, *International Investment Advisers*, 19 REV. SEC. & COMM. REG. 6–7 (1986) (suggesting that the SEC's exemptive power under § 206A of the Advisers Act should be exercised to exempt a foreign adviser from prohibitions relating to activities that are permitted under the law of the adviser's domicile). A number of the comment letters received by the SEC in response to the 1990 Concept Release also supported this position. *See, e.g.*, Letter from the American Bar Association (Oct. 18, 1990); Letter from Cleary, Gottlieb, Steen & Hamilton (Oct. 12, 1990); Letter from Davis, Polk & Wardwell (Oct. 10, 1990); Letter from Ropes & Gray (Oct. 9, 1990).

54 1990 Concept Release.

55 1992 Report at 222. The staff noted that the "conduct" and "effects" approach was supported not only by traditional principles relating to the appropriate jurisdictional reach of U.S. law, but also by numerous policy considerations, including comity. For example, the staff noted that the United Kingdom does not apply certain of its advisory regulations to the foreign activities of foreign advisers registered as such under U.K. law. Non-U.S. clients of a non-U.S. adviser would also be less likely to expect that U.S. law would govern the advisory relationship. 1992 Report at 229 n.26.

56 1992 Report at 233.

57 1992 Report at 233.

58 *Unibanco* (avail. July 28, 1992); *see also American Bar Association Subcommittee on Private Investment Entities* (avail. Aug. 10, 2006) (the "ABA Private Investment Subcommittee"); *Royal Bank of Canada* (avail. June 3, 1998); *ABN AMRO Bank N.V.* (avail. July 1, 1997); *Murray Johnstone Holdings Ltd.* (avail. Oct. 7, 1994); *Kleinwort Benson Investment Management Ltd.* (avail. Dec. 15, 1993); *Mercury Asset Management* (avail. Apr. 16, 1993); *The National Mutual Group* (avail. Mar. 8, 1993).

59 SEC rulemaking in response to the Dodd-Frank Act generally affirmed the *Unibanco* line of no-action letters. *See infra* Note 94 and accompanying text.

60 *Unibanco* (avail. July 28, 1992).

61 *Unibanco* (avail. July 28, 1992).

62 Section 208(d) of the Advisers Act provides that "[i]t shall be unlawful for any person indirectly, or through or by any other person, to do any act or thing which it would be unlawful for such person to do directly under the provisions of [the Advisers Act] or any rule or regulation thereunder."

63 *See*, *e.g.*, *Price Waterhouse* (avail. Oct. 1, 1987); *Kenneth Leventhal & Co.* (avail. Feb. 7, 1983); *United Asset Management Corp.* (avail. Nov. 2, 1981); *Richard Ellis, Inc.* (avail. Sept. 17, 1981); SEC Release No. IA-353 (Dec. 18, 1972).

64 *Richard Ellis, Inc.* (avail. Sept. 17, 1981) (involving an indirect subsidiary of a U.K. real estate investment adviser).

66 1992 Report at 233–34.

67 *Thomson Advisory Group, L.P.* (avail. Sept. 26, 1995).

68 *See infra* Notes 72 and 426. Generally, an adviser's associated persons will be subject to the adviser's policies and procedures as if they were employees of the adviser.

69 *Thomson Advisory Group, L.P.* (avail. Sept. 26, 1995); *see also John W. Henry & Co., Inc.* (avail. Sept. 20, 1996); *Lazard Freres Asset Management* (avail. Feb. 12, 1996).

70 *Unibanco* (avail. July 28, 1992).

71 *Unibanco* (avail. July 28, 1992). The SEC staff has approved a specific form of appointment of an agent for these purposes. *See Murray Johnstone Holdings Ltd.* (avail. Oct. 7, 1994); *Kleinwort Benson Investment Management Ltd.* (avail. Dec. 15, 1993); *Mercury Asset Management* (avail. Apr. 16, 1993).

72 § 202(a)(17) of the Advisers Act. A registered adviser has certain supervisory and other obligations with respect to its associated persons under §§ 203(e)(6) and 204A, which require, for example, implementation of policies and procedures preventing the misuse of material nonpublic information. Violations of these obligations can lead to regulatory proceedings against the adviser, including monetary penalties.

73 *Unibanco* (avail. July 28, 1992).

74 *The National Mutual Group* (avail. Mar. 8, 1993).

75 § 204A of the Advisers Act requires investment advisers, including state-registered advisers and unregistered advisers (other than those relying on exemptions in § 203(b) of the Advisers Act) to establish, maintain, and enforce policies and procedures to prevent the misuse of material nonpublic information. *See* § 16.13 for further discussion of the obligations of registered investment advisers regarding such policies and procedures.

76 *The National Mutual Group* (avail. Mar. 8, 1993).

77 Hedge Fund Release, 69 Fed. Reg. 72,054, 72,072–72,073 (Dec. 10, 2004). In its adopting release for the final rule implementing the new Dodd-Frank exemptions from the registration requirements of the Advisers Act, the SEC said that it does not “apply most of the substantive provisions of the Advisers Act to the non-U.S. clients of a non-U.S. adviser registered with the [SEC] and that nothing in that final rule "is intended to

withdraw any prior statement of the [SEC] or the views of the staff as expressed in the *Unibanco* letters." SEC Release. No. IA-3222, 76 Fed. Reg. 39,646, 39,681 (July 6, 2011). Non-U.S. advisers with no U.S. clients may still be required to register with the SEC if, for instance, they provide advisory services from a place of business in the United States, even if their principal place of business is offshore.

78 Hedge Fund Release, 69 Fed. Reg. 72,054, 72,073 n. 221 (Dec. 10, 2004).

79 Hedge Fund Release, 69 Fed. Reg. 72,054, 72,073 (Dec. 10, 2004).

80 Hedge Fund Release, 69 Fed. Reg. 72,054, 72,073 (Dec. 10, 2004).

81 *Mercury Asset Management* (avail. Apr. 16, 1993).

82 *Mercury Asset Management* (avail. Apr. 16, 1993).

83 *Kleinwort Benson Investment Management Ltd.* (avail. Dec. 15, 1993).

84 *Kleinwort Benson Investment Management Ltd.* (avail. Dec. 15, 1993). The *Unibanco* letters generally permit a registered adviser and its participating affiliate to share personnel and other resources under certain conditions. For example, in the *Murray Johnstone* no-action letter, the permitted shared personnel included directors, officers, and employees, so long as any of these personnel participating in the advisory business of the U.S. registered adviser or having access to information concerning securities recommended to its U.S. clients were deemed "associated persons" of the U.S. registered adviser. *Murray Johnstone Holdings Ltd.* (avail. Oct. 7, 1994).

85 *ABN AMRO Bank N.V.* (avail. July 1, 1997).

86 *ABN AMRO Bank N.V.* (avail. July 1, 1997). In *Royal Bank of Canada*, the staff reaffirmed the *Unibanco* position with regard to a group of affiliated entities under the Royal Bank of Canada umbrella and added that it would not recommend enforcement action if certain foreign trust company affiliates delegated investment discretion over the assets held by certain offshore trusts to a registered investment adviser affiliate or an unaffiliated registered investment adviser. *Royal Bank of Canada* (avail. June 3, 1998).

87 1992 Report at 233. The SEC staff previously took the position that if a foreign affiliate of a U.S.-domiciled registered adviser had no U.S. business, registration under the Advisers Act was not required, even where both entities were controlled by a U.S. person and without regard to the degree of independence between the registered entity and the foreign affiliate. *Double D Management, Ltd.* (avail. Jan. 31, 1983); *see also BOH Investment Management Co.* (avail. Jan. 2, 1987); *TAC America Ltd.* (avail. July 25, 1984). In a subsequent no-action letter, however, the staff appeared to cast doubt on the continued viability of these letters, at least in extreme circumstances. *H.P. Hambrick Co., Inc.* (avail. Oct. 14, 1988) (in refusing to grant relief, SEC staff noted that an issue was raised under § 208(d) where a U.S. resident was providing advisory services to foreign clients through a wholly owned offshore, unregistered entity, "particularly if the individual also provides advice to U.S. clients through another wholly-owned corporation registered as an adviser with the Commission").

88 *SEC v. Kasser*, 548 F.2d 109, 116 (3d Cir. 1977), *cert. denied, Churchill Forest Industries Ltd. v. SEC*, 431 U.S. 938 (1977); *see also Morrison v. National Australia Bank, Ltd.* 561 U.S. 247, 270 (2010); *IIT v. Vencap, Ltd.*, 519 F.2d 1001, 1017 (2d Cir. 1975).

89 1992 Report at 233–34.

90 1992 Report at 226.

91 *See supra* text accompanying Note 57.

92 Many offshore advisers may, for example, be reluctant to submit their unregistered advisory activities to the level of SEC scrutiny implied by the *Unibanco* conditions, particularly to the extent such scrutiny risks disclosure of customer identities. Although Rule 204-2(d) under the Advisers Act permits client identities to be indicated on an adviser's books by numerical, alphabetical or other similar code, ultimately that information could be obtained by the SEC in an enforcement proceeding. *See* § 210(c) of the Advisers Act.

93 *Kleinwort Benson Investment Management Ltd.* (avail. Dec. 15, 1993).

94 SEC Release No. IA-3222 (June 22, 2011). The adopting release notes, however, that the *Unibanco* letters

were developed by the SEC staff in the context of the *de minimis* exemption, which was repealed by the Dodd-Frank Act. The release states that, while nothing in the newly adopted rules is intended to withdraw any prior statement of the SEC or the views of the staff as expressed in the *Unibanco* letters, the SEC expects that the staff will provide guidance, as appropriate, based on facts that may be presented to the staff regarding the application of the *Unibanco* letters in the context of the new foreign private adviser exemption and the private fund adviser exemption. *See*, *e.g.*, *Zenkyoren Asset Management of America, Inc.* (avail. June 30, 2011) (granting no-action to a wholly owned subsidiary of a Japanese insurance "federation" advising only the parent via funds in which the parent is the only investor).

95 SEC Release No. IA-3222 (June 22, 2011). The SEC also mentions several times in the adopting release § 208(d) of the Advisers Act (the prohibition against doing anything indirectly that the adviser would not be permitted to do directly) and the possibility of conflating entities that, while separately organized, are "operationally integrated" or otherwise appear to be in contravention of § 208(d) of the Advisers Act. *See In the Matter of TL Ventures Inc.*, SEC Release No. IA-3859 (June 20, 2014) (SEC charged that two affiliated exempted (one venture capital, one private fund) fund advisers were not operationally independent and should have been regarded as a single advisory organization in determining whether to rely on registration exemptions).

U.S. Regulation of the International Securities and Derivatives Markets, § 16.03, REGISTRATION REQUIREMENT

U.S. Regulation of the International Securities and Derivatives Markets

Click to open document in a browser

Any person, regardless of whether resident in or organized under the laws of the United States, who for compensation provides, in or from the United States, investment advisory services concerning securities, must register with the SEC as an investment adviser and comply with other provisions of the Advisers Act unless an exclusion or exemption is available. [96]

[1] Investment Adviser Defined

p. 16-24

The Advisers Act provides that an "*investment adviser*" is:

> any person who, for compensation, engages in the business of advising others, either directly or through publications or writings, as to the value of securities or as to the advisability of investing in, purchasing, or selling securities, or who, for compensation and as part of a regular business, issues or promulgates analyses or reports concerning securities.… [97]

Whether a person providing securities advisory services will satisfy this definition depends on all of the facts and circumstances.

[a] Providing Advice

It is clear that a person who offers advice on the value of specific securities, or issues reports including recommendations on specific securities, satisfies the first element of the definition of investment adviser. [98] Questions have

p. 16-24

p. 16-25

been raised whether a database service that provides information regarding market conditions, industry sectors and the like would constitute an "analysis or report concerning securities" so as to require registration under the Advisers Act. In no-action correspondence, the SEC staff has taken the position that information relating to securities does not constitute an analysis or report within the meaning of § 202(a)(11) of the Advisers Act if (i) the information is readily available to the public in its raw state, (ii) the categories of information are not highly selective and (iii) the information is not organized or presented in a manner that suggests the purchase, holding or sale of any securities. [99] The staff has, on the other hand, refused to grant no-action relief where the information to be provided in the database relates to "closely held businesses which may expect to raise capital in future transactions exempt from the registration requirements of applicable securities laws." [100]

The SEC staff has also stated that persons who, as part of a regular business, provide advice or issue reports concerning securities in general or the relative value of investing in securities as compared to other types of investments would satisfy the definition of investment adviser, although financial planners who provide integrated financial services may make general recommendations regarding asset allocation among a variety of investments, including securities, without becoming subject to registration as an adviser. [101] Services for matching entrepreneurs with potential investors are, by contrast, generally not subject to registration if participants pay only an initial administrative fee and a periodic renewal fee to defray the costs of maintaining the database and the service does not participate in negotiations between the entrepreneurs and investors. [102]

p. 16-25
p. 16-26

For many years, the staff also took the position that persons receiving compensation for referring clients to registered investment advisers were themselves subject to registration as investment advisers, unless they were in the employ or otherwise under the supervision and control of a registered investment adviser. [103] This position reflected the staff's view that conflicts of interest arising in the context of paid solicitation activities are inherently fraudulent and not susceptible to cure by disclosure. [104] The staff clarified its position with the adoption of Rule 206(4)-3 under the Advisers Act, which prohibits payment of cash fees for client solicitation otherwise than in accordance with the terms of the rule. [105]

[b] Engaging in a Business

Although the "business" component of the definition of investment adviser is stated somewhat differently in the Advisers Act depending on whether the person is providing advice or issuing reports, the SEC staff has stated its intention to interpret the requirement in the same fashion for both activities. [106] Satisfaction of the "business" component does not require that the person engage exclusively in securities advisory activities or that the activities be the person's principal line of business, but only that they constitute "a business activity occurring with some regularity." [107] In the case of financial planners who provide integrated investment and retirement planning services, the SEC staff has stated that it would consider a person to be "in the business" of providing advice if the person:

p. 16-26
p. 16-27

(i) holds himself out as an investment adviser or as one who provides investment advice;

(ii) receives any separate or additional compensation that represents a clearly definable charge for providing advice about securities, regardless of whether the compensation is separate from or included within any overall compensation, or receives transaction-based compensation if the client implements the investment advice; or

(iii) on anything other than rare, isolated and nonperiodic instances, provides specific investment advice. [108]

The staff has also stated its intention to consider other financial services activities offered to clients in determining the presence of a business, such that a financial planner who limits his planning activities to general recommendations as to allocation of portfolio assets, but who also gives investment advice as to specific securities in his capacity as a registered representative of a broker-dealer, would be considered to be "in the business" of providing advice. [109]

The staff has also made clear that an employer that provides investment-related information to its employees who participate in the employer's defined contribution plan would not be an "investment adviser" as defined in the Advisers Act. [110] Although this exclusion applies regardless of the type of investment-related information provided by the employer, the exclusion only applies to employers and not to others who may provide investment-related information to plans or plan participants. [111]

In the case of publications, the staff has taken the position that the publication of an isolated book, pamphlet or article would not constitute the conduct of a "business," and thus generally would not subject the author or publisher to registration, if no specific recommendations of securities or issuers were made in the publication and if the publication were not part of a series or intended to be supplemented. [112]

p. 16-27
p. 16-28

The staff's interpretive advice did not extend, however, to the licensing or use, particularly as part of computer programs or models, of mathematical or investment formulas to assist clients in making investment decisions. [113] In this connection, the staff has distinguished between mathematical formulas and computer models that are mere arithmetic tools, which would fail the "advice" component of the investment adviser definition, and those that may be used to make investment decisions. Thus, if a computer model generates information related to actual historical prices of securities or a client's particular financial and investment circumstances and suggests the purchase or sale of a category of securities or a particular security, the model would probably not be characterized as an arithmetic tool. [114]

[c] Receiving Compensation

The compensation component of the "adviser" definition is interpreted broadly by the SEC staff. [115] The receipt of any direct or indirect economic benefit, including commissions for directed brokerage, [116] is

p. 16-28
p. 16-29

sufficient. [117] The compensation need not be paid directly by the client if the compensation or other benefit received relates to the advisory services rendered. [118] The fact that a person does not charge a separate fee for advisory services will not be dispositive of the compensation question, if the fee relates to a variety of services, including securities advice. [119] Additionally, although an adviser does not meet the definition of "investment adviser" unless it receives compensation for providing advice to others, once an adviser meets the definition by receiving compensation from one client, the Advisers Act applies to the relationship between the adviser and all of its advisory clients, including clients from which the adviser does not receive compensation. [120]

[2] Exclusions

The Advisers Act excludes certain entities from the definition of "investment adviser" and exempts certain investment advisers from its registration requirements. In most cases, entities are excluded or exempted because their activities are separately regulated under U.S. laws or because those activities are not considered to raise risks for investors requiring the protections afforded by the Advisers Act. The principal difference between exclusion and exemption is that persons exempt (but not those that are excluded) from registration remain subject to the restrictions on principal and agency cross-trading and other antifraud provisions of § 206 of the Advisers Act. Both excluded and exempted persons are subject to potential regulation by state and other local securities authorities [121] and remain liable to clients under state common law principles applicable to fiduciaries.

[a] Banks

p. 16-29
p. 16-30

Among those persons excluded from the definition of investment adviser are U.S. banks [122] (and bank holding companies as defined by the Bank Holding Company Act of 1956) that are not "investment companies" within the meaning of the Investment Company Act. [123] Foreign banks do not meet the definition of "bank" since they are neither organized under U.S. law nor subject to U.S. regulation, and thus do not qualify for the Advisers Act exclusion. [124] Foreign banks with U.S. banking operations are treated as "bank holding companies" for purposes of U.S. banking law [125] and, although the SEC has yet to address the issue, may also qualify as such for purposes of § 202(a)(11)(A). If so, foreign banks

p. 16-30
p. 16-31

may be excluded from regulation under the Advisers Act since, following the SEC's adoption of Rule 3a-6 under the Investment Company Act, such entities are no longer "investment companies." In any event, U.S. bank affiliates and branches (and, in some cases, perhaps agencies) of foreign banks are now typically considered "banks" under the Investment Company Act and are expressly included in the definition of "bank" under the GLB Act. [126] Accordingly, these entities will not be subject to any of the provisions of the Advisers Act, including its antifraud prohibitions.

[b] Broker-Dealers

A broker-dealer, including a foreign broker-dealer engaged in advisory activities permitted by Rule 15a-6 under the Exchange Act, [127] that provides investment advisory services solely incidental to the conduct of its business as a broker-dealer and that receives no special compensation for the services is excluded from the Advisers Act definition of "investment adviser." [128]

The SEC sought, by adopting Rule 202(a)(11)-1 under the Advisers Act, to address the applicability of the Advisers Act to broker-dealers offering certain types of fee-based (as opposed to commission-based) brokerage programs and to further clarify the meaning of the terms "solely incidental" and "special compensation." [129] In particular, the rule aimed to reconcile the increasing use of fixed or asset-based fees charged by broker-dealers for a package of services (including brokerage and incidental advice) with the statutory exclusion. Prior to Rule 202(a)(11)-1, such fees could be considered "special compensation" because they were not commission-based compensation, even if the package of services covered by the fee was commensurate with the services provided in a traditional brokerage arrangement.

p. 16-31

p. 16-32

In 2007, the U.S. Court of Appeals for the District of Columbia Circuit vacated Rule 202(a)(11)-1, concluding that the SEC did not have the authority to broaden the exception from the definition of "investment adviser" for broker-dealers provided under § 202(a)(11)(C) of the Advisers Act. [130] The court held that, with § 202(a)(11)(C) of the Advisers Act, Congress unambiguously created a precise exemption from the adviser definition applicable to broker-dealers. Accordingly, "because broker-dealers are already expressly addressed in subsection (C), they are not ‘other persons' under subsection (F)," and the SEC cannot use such authority "to establish new, broader exemptions for broker-dealers." [131] In addition, the court noted that the SEC's general rulemaking authority under § 211(a) of the Advisers Act could not ignore this distinction. [132]

After determining not to appeal the *Financial Planning Association* decision, [133] the SEC proposed a new rule that would reinstate certain interpretative provisions of the vacated rule clarifying what services are considered "solely incidental" to a broker-dealer's business. [134] Under the proposal, a broker-dealer's exercise of investment discretion with respect to a customer account would *not* be considered a service solely incidental to brokerage services unless such discretion were granted by the customer on a "temporary or limited basis." In addition, investment advice provided for a separate fee or under a separate contract would *not* be solely incidental to brokerage services.

p. 16-32

p. 16-33

The proposed rule would also reinstate an interpretation of "special compensation" that a broker-dealer would *not* be deemed to have received such compensation solely because it charged one customer a commission, mark-up, mark-down or similar fee for brokerage services that was greater or less than the fee it charged another customer. Under earlier SEC staff interpretations, full-service broker-dealers are potentially subject to the Advisers Act with respect to accounts for which they provide advice incidental to their brokerage services simply because they also offer discount brokerage services for a lower fee to other accounts. [135] The proposed rule also would clarify that broker-dealers are advisers only with respect to those accounts for which they provide services or receive compensation that subjects them to the Advisers Act.

The *Financial Planning Association* decision accelerated the release of a report the SEC had commissioned from the RAND Corporation addressing how the twin regulatory systems for broker-dealers and advisers affect investors. [136] Released in January 2008, the report concluded that, despite high levels of satisfaction, investors "typically fail to distinguish broker-dealers and investment advisers along the lines federal regulations define." [137] The report also surveyed industry practices and found them "very heterogeneous, with firms taking many different forms and offering a multitude of services and products." In a statement accompanying the release, the SEC stated it is studying the results of the report and is considering the potential regulatory implications of its findings. [138]

The Dodd-Frank Act requires the SEC to further consider the regulatory requirements applicable to broker-dealers and advisers through various studies, many of which have been completed and delivered to Congress for further consideration, and additional rulemaking authority. [139] The regulatory regime governing broker-dealers and advisers may be shaped by the findings,

p. 16-33
p. 16-34

recommendations and conclusions of the mandated studies. However, as of publication, no new rules have been proposed in light of the studies.

[c] Publishers and Authors

Section 202(a)(11)(D) of the Advisers Act excludes from the definition of investment adviser "the publisher of any *bona fide* newspaper, news magazine or business or financial publication of general and regular circulation." [140] In one of the few instances in which it has addressed the Advisers Act, the U.S. Supreme Court interpreted this exclusion in a case involving an investment adviser who was statutorily barred from registering under the Advisers Act due to his previous disciplinary history. [141] The adviser had published a newsletter containing recommendations for "buying, selling, or holding stocks." On the facts, the Court held that the adviser was not required to be registered because his activities were within the publisher exclusion. [142] The Court based its holding on a finding that

p. 16-34
p. 16-35

the newsletter was *bona fide*. As opposed to a "tip" sheet used to tout a security, the newsletter contained only "disinterested commentary and analysis," no "promotional material," and was of general and regular circulation. It was offered to the public at large and was not "timed to specific market activity or to events affecting or having the ability to affect the securities industry." [143] The Court indicated that inclusion of general recommendations concerning specific securities will not vitiate the *bona fides* of a publication so long as the recommendations are not based on the investment objectives of a particular customer. In addition, the Court suggested that a publication would not fail to be of regular circulation merely because the publication schedule was not "consistent." [144]

Although the Court's focus on "impersonal" advisory services creates an exemption that could be of substantial breadth, it should not be read as a means to avoid the antifraud provisions of the Advisers Act. One former SEC staff member has urged that if a publication of general and regular circulation were used as a "tout" or "tip" sheet, it would fail the *bona fides* test and subject the creator of the "tout" or "tip" sheet to the Advisers Act's antifraud provisions and possible SEC enforcement action. [145]

[d] Other Exclusions

p. 16-35
p. 16-36

The Advisers Act also excludes from the definition of "investment adviser" certain professionals whose advice is solely incidental to their primary occupation [146] and persons whose advice relates exclusively to securities issued or guaranteed by the U.S. government or its corporate instrumentalities. [147] The Private Fund Advisers Act added a new exclusion for any family office, as defined by the SEC. [148] In addition, the Advisers Act delegates to the SEC the authority to designate other persons as not being within the scope of the definition. [149]

[3] Exemptions

Even if an entity satisfies the definition of "investment adviser," it still may escape most of the Advisers Act provisions if it is eligible for one of the exemptions from registration provided in § 203(b) of the Act. [150] As stated above, an

p. 16-36
p. 16-37

exempt adviser nevertheless continues to be subject to the antifraud provisions contained in § 206 of the Advisers Act. [151]

The Private Fund Advisers Act eliminated the most significant exemption from registration provided for in the Advisers Act that was relied upon by many advisers to hedge funds, private equity funds and other pooled investment vehicles, the so-called "*de minimis*" exemption. [152] The *de minimis* exemption was available to an adviser who (i) during the prior 12 months had fewer than 15 clients [153] (none of which is an investment company, or business development company, registered under the Investment Company Act) and (ii) did not "hold himself out generally to the public as an investment adviser." [154] To limit the expanded scope of the Advisers Act following the elimination of the *de minimis* exemption, the Private Fund Advisers Act established several new exemptions, including exemptions for "foreign private advisers," "private fund" advisers with assets under management in the United States of less than $150 million, and "venture capital fund" advisers.

On June 22, 2011, the SEC adopted new rules and rule amendments under the Advisers Act (the "Private Fund Advisers Rules") to implement the Private Fund Advisers Act, including the new exemptions replacing the *de minimis* exemption. [155] The Private Fund Advisers Rules clarify and define terms in the exemptions for foreign private advisers, private fund advisers and venture capital fund advisers.

[a] Private Fund Adviser Exemption

p. 16-37
p. 16-38

The Private Fund Advisers Act creates an exemption from registration under the Advisers Act for an adviser that acts solely as an adviser to "private funds" (which is defined as an issuer that would be required to register as an investment company but for § 3(c)(1) or § 3(c)(7) of the Investment Company Act) and has assets under management in the United States of less than $150 million. [156]

[i] *Assets Under Management*

The Private Fund Advisers Rules change the way assets under management are calculated for purposes of adviser registration. The Private Fund Advisers Rules define a term "regulatory assets under management" ("R-AUM") to provide a uniform calculation of an adviser's assets under management when determining an adviser's eligibility for an exemption from registration with the SEC. [157] The calculation includes any proprietary assets, assets managed without receiving compensation [158] and assets of non-U.S. clients, all of which an adviser was permitted to exclude from its calculation of its assets under management under the former rules. [159] In addition, an adviser may not subtract outstanding indebtedness and other accrued but unpaid liabilities, which remain in a client's account and are managed by the adviser. [160] Furthermore, in the case of private funds, the calculation must include uncalled capital commitments and be based on the current market value (or fair value) of fund assets.

[ii] *In the United States*

p. 16-38
p. 16-39

The SEC's interpretation of the phrase "in the United States" turns on whether the adviser is a U.S. or non-U.S. adviser. In calculating its R-AUM for purposes of this exemption, a U.S. adviser is required to include all private fund assets in its calculation, whereas a non-U.S. adviser is only required to include the amount of private fund assets it manages *at* a place of business in the United States. [161] Whether an adviser is a U.S. or non-U.S. adviser depends on where that adviser's "principal office and place of business" is located, which is understood to be the executive office of the investment adviser from which the officers, partners or managers of the investment adviser direct, control and coordinate the activities of the investment adviser. [162] The Private Fund Advisers Rules make clear that an adviser has only one "principal office and place of business." [163]

[iii] *Advisers Solely to Private Funds*

Under the Private Fund Advisers Rules, for non-U.S. advisers the condition that such advisers advise solely private funds is deemed fulfilled as long as all of the non-U.S. adviser's clients that are U.S. persons [164] are private funds. The requirement that an adviser advise solely private funds requires that an

p. 16-39

p. 16-40

adviser relying on this exemption not advise any managed accounts that do not fit under the definition of private fund. [165]

While advisers who rely on the private fund adviser exemption are exempt from registering under the Advisers Act, they are still required to make certain disclosures to the SEC (as described in § 16.03[3][d] *infra*).

[b] Foreign Private Adviser Exemption

The Private Fund Advisers Act exempts from registration any investment adviser that is a "foreign private adviser," which it defines as an adviser that (i) has no place of business in the United States, (ii) has (a) in total, fewer than 15 U.S. person clients and investors in private funds advised by the adviser [166], and (b) aggregate assets under management attributable to such U.S. clients and investors of less than $25 million, and (iii) neither "holds itself out generally to the public in the United States as an investment adviser" [167] nor acts as an investment adviser to any investment company registered under the Investment Company Act or to an entity that is or has been elected to be treated as a business development company as defined in the Investment Company Act. [168] This

p. 16-40

p. 16-41

exemption is similar in concept to the former *de minimis* exemption, except that the foreign private adviser exemption is available only to non-U.S. advisers, both investors and clients are counted for purposes of the exemption and there is an AUM threshold component. Unlike advisers to "private funds" and "venture capital funds," which are subject to reporting requirements despite exemption from registration, exempt foreign private advisers are not subject to reporting requirements.

The Private Fund Advisers Rules broadly define "place of business" as any office where the investment adviser regularly provides advisory services, solicits, meets with, or otherwise communicates with clients, and any location held out to the public as a place where the adviser conducts any such activities. [169] This definition captures advisers with any place of business in the United States and is particularly broad when compared with the current application of the Advisers Act, which distinguishes between advisers whose principal places of business are inside or outside the United States. Furthermore, a pure marketing or client service office that involves contacting clients, even if it does not provide any investment advice, will likely be captured by this definition, whereas an office that does not conduct advisory activities or communicate with clients likely would not be captured. [170] This may cause many foreign advisers to be ineligible for this exemption, but they may qualify for the private fund adviser exemption.

[i] *Determining the Number of Clients and Investors*

Each separate person or entity in the United States that receives investment advice from the adviser must be counted as a separate client in determining the availability of the foreign private adviser exemption. As under the prior rules regarding the *de minimis* exemption, "single advisee" treatment is accorded under the Private Fund Advisers Rules to trusts where the only beneficiaries are natural persons, their minor children, relatives and spouses. [171] Similarly, a

p. 16-41

p. 16-42

corporation, general partnership, limited partnership, limited liability company, trust (other than of the type referred to in the preceding sentence) or other legal organization that receives investment advice based on its investment objectives rather than the individual objectives of its shareholders, partners, limited partners, members or beneficiaries, is deemed a single client. [172] "Single advisee" treatment will not be accorded, however, where any shareholder, partner, limited partner, member or beneficiary is otherwise an advisory client of the person (or any party related to such person) seeking to rely on it. [173] The Private Fund Advisers Rules also eliminate a "special rule" under the Advisers Act permitting an adviser not to count as a client any person for whom the adviser provides advisory services without receiving compensation. [174]

Unlike the former *de minimis* exemption, the foreign private adviser exemption counts not only U.S. clients but also each U.S. investor in private funds advised by the adviser. The Private Fund Advisers Rules define an "investor" as any person who would be included in determining the number or identity of beneficial owners or qualified purchasers under §§ 3(c)(1) and 3(c)(7) of the Investment Company Act. [175] To avoid double-counting, an adviser (i) does not need to count a private fund as a client if the adviser counted the investors in

p. 16-42

p. 16-43

that private fund as investors with respect to that private fund for purposes of determining the availability of the exemption and (ii) is able to treat as a single investor any person who is an investor in two or more private funds advised by the investment adviser. [176] The Private Fund Advisers Rules do not include "knowledgeable employees" (as defined in Rule 3c-5 under the Investment Company Act) in the definition of "investor"; thus, a non-U.S. adviser need not count U.S. knowledgeable employees toward the 14 U.S. client and investor in private fund limit. [177]

[ii] *Holding Out to the Public*

A key component of the former *de minimis* exemption from registration as an investment adviser was the prohibition against the adviser's holding itself out to the public as an investment adviser. [178] Under the Private Fund Advisers Act, the same prohibition against "holding out" applies to foreign advisers relying on the foreign private adviser exemption but extends only to the adviser's activities in the United States—thus a foreign private adviser cannot hold itself out to the public in the United States as an investment adviser. [179] The SEC staff has taken a broad view of the types of activities that constitute "holding out to the public." The staff has repeatedly stated that if an adviser, by word of mouth or otherwise, lets it be known to the public that he is willing to take on new clients, or uses the term "investment adviser" or "investment counselor" on business cards, on stationery, or in a telephone or building directory, the staff will deem the adviser to have held himself out to the public as an investment adviser. [180] The SEC staff has also stated that participation in a "mini-account" or similar investment advisory program [181] and using a publicly available electronic medium, such as an Internet site, to provide information about the adviser's U.S. activities would be

p. 16-43

p. 16-44

deemed "holding out" to the public. [182] In addition, the retention of a client referral service would in most, if not all, cases constitute *per se* "holding out" to the public. [183] As a practical matter, the difficulties of establishing an advisory business (other than as a private fund adviser, which regularly relied on the now rescinded *de minimis* exemption from Advisers Act registration, which included the same "holding out" criterion as noted below) without some kind of "holding out" to the public had substantially reduced the utility of the exemption.

Where entities act as advisers to private limited partnerships or other investment vehicles, the SEC departed from the harsh guidelines otherwise governing the "holding out" element. In response to concerns that the disclosure of an adviser's name in any offering document used to market limited partnership interests might constitute "holding out to the public," the SEC had included in Rule 203(b)(3)-1 under the Advisers Act a statement that a nonpublic offering of limited partnership interests in an entity for which a person acts as adviser is not "holding out to the public" by that person. [184] The same principle would appear to apply in the case of other passive investment vehicles.

[c] Venture Capital Fund Adviser Exemption

Advisers solely to venture capital funds are exempt from registration with the SEC under the Private Fund Advisers Act. The Private Fund Advisers Rules define a venture capital fund as a private fund that (i) holds no more than 20% of the fund's capital commitments in "non-qualifying investments" (other than short-term holdings), [185] (ii) does not borrow, provide guarantees or otherwise

p. 16-44

p. 16-45

incur leverage in excess of 15% of the fund's capital contributions and committed capital (other than limited short-term borrowing), and any such borrowing or leverage (excluding certain guarantees by the fund of qualifying portfolio obligations) is for a non-renewable term of no longer than 120 calendar days, (iii) does not offer its investors redemption or other similar liquidity rights except in extraordinary circumstances, (iv) represents itself as pursuing a venture capital strategy to investors, and (v) is not registered under the Investment Company Act and has not elected to be treated as a business development company. [186] A non-U.S. adviser may rely on the venture capital fund exemption if all of its clients, whether U.S. based or otherwise, are venture capital funds. [187]

The Private Fund Advisers Rules define "qualifying investment" generally as any equity security acquired directly from a "qualifying portfolio company" and certain equity securities exchanged for the directly acquired securities, and "qualifying portfolio company" as one that (i) is not a reporting or foreign traded company and does not have a control relationship with such a company, (ii) does not incur leverage in connection with the investment by the private fund and distribute the proceeds of any such borrowing to the private fund in exchange for the private fund investment, and (iii) is not itself a fund (*i.e.*, is an operating company). [188]

The definition of "venture capital fund" includes a grandfathering provision for any private fund that (i) represented to investors and potential investors at the time the fund offered its securities that it is a venture capital fund, (ii) has sold securities to one or more investors prior to December 31, 2010, and (iii) does not sell any securities to, including accepting any additional capital commitments from, any person after July 21, 2011. [189] Venture capital fund advisers that meet these requirements are not required to register with the SEC under the Private Fund Advisers Rules. These advisers, however, are still required to make certain disclosures to the SEC (as described in § 16.03[3][d] below).

No exemption from registration may be used for purposes of evading the application of the Advisers Act. [190] Accordingly, the activities of an unregistered adviser and a related registered adviser, or two or more related unregistered

p. 16-45

p. 16-46

advisers, may be collapsed if the advisers do not have sufficiently distinct operations to permit the unregistered advisers to qualify separately for the exemptions relied upon. [191]

[d] Exempt Adviser Reporting Requirements

The Private Fund Advisers Act requires the SEC to determine reporting requirements as necessary and appropriate for advisers exempt from registration under the exemptions for advisers to venture capital funds and private funds ("Exempt Reporting Advisers"). [192] The reporting requirements, however, do not apply to exempt foreign private advisers. [193]

Under the Private Fund Advisers Rules, Exempt Reporting Advisers are required to complete a limited subset of the SEC's revised Form ADV. As a result, the Form ADV serves as both a registration and a reporting form, with the reporting section to be made publicly available on the SEC's website. [194] Exempt Reporting Advisers are required to file their initial Form ADV within 60 days of relying on an exemption that requires reporting. [195]

p. 16-46

p. 16-47

Rule 204(b)-1 under the Advisers Act requires that SEC-registered investment advisers report systemic risk information to the SEC on Form PF if they advise at least $150 million in assets of one or more private funds. [196] Form PF elicits non-public information about private funds and their trading strategies the public disclosure of which, in many cases, could adversely affect the funds and their investors. The SEC does not intend to make public Form PF information identifiable to any particular adviser or private fund, although the SEC may use Form PF information in an enforcement action. The SEC requires Form PF to be filed each year, or in the case of certain "large private fund advisers" managing over an aggregate of $1 billion in private fund assets, each quarter.

[e] Other Exemptions

Section 203(b) of the Advisers Act currently provides for six other exemptions: (i) the "intrastate" exemption for advisers (other than advisers to private funds) operating exclusively within a single state whose advice is limited to nonexchange traded—or listed—securities, (ii) an exemption for advisers whose only clients are insurance companies, (iii) an exemption for certain advisers who are charitable organizations and provide advice only to charitable organizations, (iv) an exemption for certain advisers whose only clients are church-sponsored employee pension plans, (v) an exemption for certain registered CTAs performing limited securities advisory activities; and (vi) an exemption for certain advisers to small business investment companies that are regulated by the Small Business Administration. [197]

With respect to the intrastate exemption, the staff has taken the position that an adviser providing advice on the unlisted securities issued by a mutual fund that invests in exchange-listed securities would not satisfy the second element of the exemption. [198] For purposes of determining whether a client is a resident of a state, the staff has generally found that a corporation that is incorporated and domiciled [199] or has its principal place of business within a state [200] will qualify as a "resident" for purposes of the exemption.

p. 16-47

p. 16-48

The exemption for registered CTAs, part of which was enacted as part of the Commodity Futures Modernization Act ("CFMA"), [201] applies to a registered CTA whose business does not consist "primarily of acting as an investment adviser" and who does not act as an investment adviser to a registered investment company. [202] There is currently no guidance as to the level of securities advisory activity that would cause a CTA to be acting "primarily" as an investment adviser. The Private Fund Advisers Act added an exemption for registered CTAs that advise private funds, but requires any such adviser whose business after the date of enactment of the Private Fund Advisers Act becomes predominately the provision of securities-related advice to register with the SEC, unless such adviser could meet another exemption. [203]

Footnotes

96 In addition to its authority to require registration under the Advisers Act, the SEC also has authority to cause the deregistration of any adviser that "is not engaged in business as an investment adviser." § 203(h) of the Advisers Act. As noted above, persons providing investment advice with respect to security futures products, which are defined as both securities and futures contracts, may be required to register as CTAs. U.S. Regulation of the International Securities and Derivatives Markets, Twelfth Edition, Derivatives Markets, § 8.07. In September 2013, the SEC also adopted rules that provide a means for entities that qualify as "municipal advisors" under § 975 of the Dodd-Frank Act to fulfill the Dodd-Frank Act's requirement that such entities register with the SEC to be able to provide advice to or solicit municipal entities (unless an exception applies). Municipal advisors are deemed under the Exchange Act to have a

statutory fiduciary duty to any municipal entity they advise. *See* SEC Release No. 34-70462 (Sept. 20, 2013); *see also* Rules 15Ba1-1 through 15Ba1-8 and 15Bc4-1 under the Exchange Act. The Dodd-Frank Act's definition of "municipal adviser" excludes any adviser registered under the Advisers Act and any CTA registered under the CEA or persons associated with a CTA who provide advice with respect to swaps. *See* § 15B(e)(4)(C) of the Exchange Act; *see also* SEC Release No. 34-63576 (Dec. 20, 2010)

97 § 202(a)(11) of the Advisers Act. A person's status as an investment adviser may also in certain circumstances depend on other laws. For example, § 2(c)(20) of the Investment Company Act defines an "investment adviser" to an investment company, in some respects more broadly than the Advisers Act, as:

> (A) any person … who pursuant to contract with such company regularly furnishes advice to such company with respect to the desirability of investing in, purchasing or selling securities or other property, or is empowered to determine what securities or other property shall be purchased or sold by such company, and
>
> (B) any other person who pursuant to contract with a person described in clause (A) regularly performs substantially all of the duties undertaken by such person.

§ 2(A)(20) of the Investment Company Act.

98 § 761 of the Dodd-Frank Act amended the definition of "security" under the Securities Act and the Exchange Act to include security-based swaps. Although the Advisers Act was not similarly amended, given the SEC Division of Investment Management's expansive views on what constitutes a "security" for Advisers Act purposes, a person who offers advice with respect to security-based swaps is likely to be considered to satisfy this first element. The fact that a person only offers securities advice to registered investment advisers or any other subgroup of the general public will not allow such person to avoid registration as an investment adviser. *David Parkinson, Ph.D.* (avail. Oct. 19, 1995).

99 *Charles Street Securities* (avail. Feb. 27, 1987); *see also Angel Capital Electronic Network* (avail. Oct. 25, 1996) (compilation of small corporate stock offerings arbitrarily ordered and derived from information publicly available or readily available from the issuers would not subject provider to registration); *Missouri Innovation Center, Inc.* (avail. Oct. 17, 1995) (newsletter describing securities offerings in the state of Missouri derived from publicly available information and organized alphabetically with no buy or sell recommendations would not subject provider to registration); *Investex Investment Exchange Inc.* (avail. Apr. 9, 1990) (compilation of limited partnerships and related monthly newsletter describing limited partnerships would not subject provider to registration); *NoLoad Mutual Fund Association, Inc.* (avail. Dec. 31, 1984) (compilation of statistical performance data of mutual funds derived from publicly available information and organized alphabetically with no buy or sell recommendations would not subject provider to registration); *Richard Daniels* (avail. Dec. 12, 1984) (monthly newsletter compiling information derived from official records relating to Arizona limited partnerships would not subject provider to registration).

June 5, 1992) (matching service identifying prospective investors in venture capital enterprises was not subject to registration where, *inter alia*, only an annual subscription fee was charged such that service did not constitute an analysis or report issued "as part of a regular business"); *Capital Resources Network* (avail. Apr. 23, 1993).

108 SEC Release No. IA-1092 (Oct. 8, 1987).

109 SEC Release No. IA-1092 (Oct. 8, 1987).

110 *See Employer Sponsors of Defined Contribution Plans* (avail. Dec. 5, 1995).

111 *See Employer Sponsors of Defined Contribution Plans* (avail. Feb. 22, 1996).

112 SEC Release No. IA-563 (Jan. 10, 1977). This release nevertheless clarifies that, to avail itself of the staff's interpretation, a publisher must not be engaged in any other advisory activities that would otherwise bring the publisher within the definition of investment adviser. An additional requirement previously imposed by the staff in no-action responses—that the publication not contain any investment formulas—was abandoned by the staff because of the difficulty of differentiating "essentially mechanical formulae or guidelines [from] those more general investment philosophies, techniques or analytical approaches for which registration under the [Advisers] Act has not normally been required in the absence of other factors." *See* 42 Fed. Reg. 2953, 2953 (Jan. 14, 1977).

113 *See*, *e.g.*, *Marakon Systems, Inc.* (avail. Sept. 6, 1982); *Syrus Associates, Ltd.* (avail. Oct. 23, 1981). In *Syrus Associates, Ltd.*, the staff clarified in taking this position that the seller or other provider of the formula or model must not provide any information or assistance in preparing data or assumptions for use with the formula or model. *See also Wilson Associates* (avail. May 25, 1988); *cf. Datastream International, Inc.* (avail. Mar. 15, 1993).

114 *See*, *e.g.*, *Computer Language Research, Inc.* (avail. Dec. 26, 1985); *Monchik-Weber Associates, Inc.* (avail. Oct. 23, 1981); *TMI Investment Systems Corp.* (avail. Apr. 15, 1978). *But see*, *e.g.*, *Innosearch Corp.* (avail. Sept. 12, 1985) (computer tool used to evaluate "hypothetical" options contracts); *Warren P. Humphreys* (avail. July 23, 1984) (program indicated whether "stocks" would fall or rise in price).

115 The principal source of elaboration regarding the compensation issue is the exclusion from the definition of investment adviser for any broker or dealer that provides advice solely incidental to its business and not for special compensation, which was the subject of scrutiny both by the SEC and by the broker-dealer community in the wake of U.S. deregulation of commission rates in 1975. The broker-dealer exclusion is discussed in § 16.03[2][b].

An adviser's receipt of compensation may also raise the converse question, that is, whether the adviser must register as a broker-dealer. The SEC staff has taken the position that where, *inter alia*, fees charged by an adviser are not based on transactions effected for the accounts of advisory clients and the adviser does not have actual custody of client funds (even though it may have full discretionary authority with respect to such funds), the adviser need not register as a broker-dealer. *See*, *e.g.*, *Robert R. Jones* (avail. Nov. 14, 1984); *Kirr, Marbach & Co.* (avail. Feb. 6, 1977); *First Atlantic Investment Advisory Corp.* (avail. Mar. 22, 1974); *Fundamental Advisors, Inc.* (avail. Dec. 4, 1971); *Mecs, Ph.D., B.M.* (avail. Dec. 6, 1970);

see also Chapter 14 for a discussion of U.S. regulation of broker-dealers.

116 "Directed brokerage" refers to the practice of advisory clients to direct their brokerage transactions to a particular broker either as payment for the advisory fees of an affiliated adviser (or as payment for some other service that the broker renders to the adviser, whether or not affiliated) or other expenses of the client or to achieve a favorable commission rate. *See* § 16.09 for a discussion of fiduciary obligations in the context of directed brokerage and "soft dollar" transactions.

117 The staff has refused to grant no-action relief to an individual who proposed not to charge any fees, but instead would ask only for a voluntary commission. *Russell H. Smith* (avail. May 2, 1996).

118 SEC Release No. IA-1092 (Oct. 8, 1987) (citing *Warren H. Livingston* (avail. Mar. 8, 1980)).

119 SEC Release No. IA-1092 (Oct. 8, 1987) (citing *Warren H. Livingston* (avail. Mar. 8, 1980)); *see also United States v. Elliott*, 62 F.3d 1304 (11th Cir. 1995) (holding that defendants were compensated for providing investment advice, despite the fact that plaintiffs did not pay a discrete fee specifically earmarked as payment for investment advice); *Independent Drug Wholesalers Group, Inc.* (avail. Apr. 16, 1992) (no-action relief denied to president of a trade association who proposed to provide to members of the association, free of charge, recommendations regarding stock of pharmaceutical companies based on information in the association's possession regarding sales of specific drugs in part because he would receive indirect compensation in the form of his salary paid out of association members' dues).

120 *See* SEC Release No. IA-3222 (June 22, 2011).

121 *See* § 16.14 for a discussion of state regulation of investment advisers.

122 The Advisers Act defines "*bank*" as:

> (A) a banking institution organized under the laws of the United States or a Federal savings association, as defined in section 2(5) of the Home Owners' Loan Act, (B) a member bank of the Federal Reserve System, (C) any other banking institution, savings association, as defined in section 2(4) of the Home Owners' Loan Act, or trust company, whether incorporated or not, doing business under the laws of any State or of the United States, a substantial portion of the business of which consists of receiving deposits or exercising fiduciary powers similar to those permitted to national banks under the authority of the Comptroller of the Currency, and which is supervised and examined by State or Federal authority having supervision over banks or savings associations, and which is not operated for the purpose of evading the provisions of [the Advisers Act], and (D) a receiver, conservator, or other liquidating agent of any institution or firm included in clauses (A), (B), or (C) of this paragraph.

§ 202(a)(2) of the Advisers Act.

123 The definition of "investment adviser" was, however, amended by the Gramm-Leach-Bliley Act (the "GLB Act") to include any bank or bank holding company "to the extent that such bank or bank holding company serves or acts as an investment adviser to a registered investment company." Nevertheless, "if, in the case of a bank, such services or actions are performed through a separately identifiable department or division, the department or division, and not the bank itself, shall be deemed to be the investment adviser." GLB Act, Pub. L. No. 106-102, 113 Stat. 1338, 1399 (1999).

124 While the definition of "bank" in § 2(a)(5) of the Investment Company Act used to be substantially identical to that provided in the Advisers Act, the GLB Act amended the definition in the Investment Company Act to strike clause (A), which read, as in the Advisers Act definition, "a banking institution organized under the laws of the United States," and inserted a new clause (A), which now reads "a depository institution (as

defined in § 3 of the Federal Deposit Insurance Act) or a branch or agency of a foreign bank (as such terms are defined in § 1(b) of the International Banking Act of 1978)." § 2(a)(5)(A) of the Investment Company Act. For a discussion of foreign banks and the "bank" exception under the Investment Company Act, see § 15.05[2].

125 Although these entities do not technically meet the definition of a "bank holding company" under the Bank Holding Company Act, they are nevertheless deemed bank holding companies under the Bank Holding Company Act. 12 U.S.C. § 3106 (2010).

See also § 202(a)(2)(C) of the Advisers Act.

126 *See also* § 202(a)(2)(C) of the Advisers Act.

127 *See*, *e.g.*, *Charterhouse Tilney* (avail. July 15, 1993) (no-action relief granted to foreign broker-dealer that proposed to (i) provide research reports to major U.S. institutional investors and to effect transactions in the securities discussed in the research reports with or for these investors and (ii) distribute those reports to U.S. persons other than major institutional investors through its U.S. registered broker-dealer affiliate); *Brown Shipley Stockbroking Limited* (avail. Dec. 6, 1989) (explaining that a foreign broker-dealer not registered with the SEC generally would be required to register as an investment adviser (absent an available exemption or exception from registration) where the foreign broker-dealer sought to manage the investment portfolios of U.S. residents).

128 § 202(a)(11)(C) of the Advisers Act. This exclusion for broker-dealers would also cover a futures commission merchant that has notice-registered as a broker-dealer for the limited purpose of effecting transactions in securities futures products. *See* U.S. REGULATION OF THE INTERNATIONAL SECURITIES AND DERIVATIVES MARKETS, TWELFTH EDITION, DERIVATIVES MARKETS, § 4.07.

129 *See* SEC Release No. IA-2376 (Apr. 12, 2005); *see also Securities Industry Association* (avail. Dec. 16, 2005).

130 *Financial Planning Association v. SEC*, 482 F.3d 481 (D.C. Cir. 2007).

131 *Financial Planning Association v. SEC*, 482 F.3d 481, 488 (D.C. Cir. 2007). As the opinion notes, following an amendment to § 202(a)(11) of the Advisers Act by the Credit Rating Agency Reform Act of 2006, subsection (F) was redesignated as subsection (G). The opinion refers to the former designation. *Financial Planning Association v. SEC*, 482 F.3d 481, 483 n.1 (D.C. Cir. 2007).

132 *Financial Planning Association v. SEC*, 482 F.3d 481, 493 (D.C. Cir. 2007).

133 Press Release, SEC, SEC Seeks Time for Investors and Brokers to Respond to Court Decision on Fee-Based Accounts (May 14, 2007). To facilitate the transition of non-advisory fee-based accounts, the SEC sought a 120-day stay of the decision, and provided a temporary alternative method for advisers to comply with certain requirements of the Advisers Act related to principal transactions with advisory clients for whom the adviser does not have discretion, SEC Release No. IA-2653 (Sept. 24, 2007). The sunset period for this temporary alternative method has been extended to December 31, 2016. SEC Release No. IA-3984 (Dec. 23, 2014); *see infra* Note 270.

134 SEC Release No. IA-2652 (Sept. 24, 2007). The SEC removed the proposed rule from the unified regulatory agenda in 2012, but stated that it may consider the reforms at some future point. *See* SEC, The 2012 Regulatory Plan and the Unified Agenda of Federal Regulatory and Deregulatory Actions, RIN 3235-AJ97 http://www.reginfo.gov/public/do/eAgendaViewRule?pubId=201210&RIN=3235-AJ97. If reconsidered and adopted, the new interpretations would be codified as Rule 202(a)(11)-1, replacing the vacated rule.

135 *See* SEC Release No. IA-626 (Apr. 27, 1978); SEC Release No. IA-2 (Oct. 28, 1940).

137 Angela A. Hung, *et al.*, *Investor and Industry Perspectives on Investment Advisers and Broker-Dealers* (RAND Corp. 2008).

138 Press Release, SEC, SEC Publishes Text of RAND Report on Investment Adviser, Broker-Dealer

Industries (Jan. 3, 2008); *see* Andrew J. Donohue, Director, SEC Division of Investment Management, Remarks at the Tenth Annual Investment Adviser Compliance Best Practices Summit (Mar. 21, 2008); *see also* the Advisers and Broker-Dealer Study (citing the RAND report among other SEC-commissioned studies to support the need for uniform treatment of retail investors by broker-dealers and investment advisers).

139 *See*, *e.g.*, § 913 of the Dodd-Frank Act (requiring the SEC to conduct a study concerning the obligations of broker-dealers and investment advisers and authorizing the SEC to promulgate rules concerning, among other things, the legal or regulatory standards of care for broker-dealers, investment advisers and persons associated with these intermediaries for providing personalized investment advice about securities to retail customers) and related Advisers and Broker-Dealer Study (*see supra* Note 8) (while the SEC's Investor Advisory Committee has recommended an enhanced standard of care for broker-dealers, the SEC has not yet proposed any new rules in the area, though Chair White testified before Congress in 2016 on the SEC's 2017 budget request that she "expect[s] to continue to develop support from [her] fellow Commissioners for a uniform fiduciary duty for investment advisers and broker-dealers"); § 914 of the Dodd-Frank Act (requiring the SEC to review and analyze the need for enhanced examination and enforcement resources for investment advisers) and related SEC Study on Enhancing Investment Adviser Examination (Jan. 2011); § 919 of the Dodd-Frank Act (authorizing the SEC to issue rules designating documents or information that shall be provided by a broker or dealer to a retail investor before the purchase of an investment product or service by the retail investor) and related SEC Study and Recommendations on Improved Investor Access to Registration Information About Investment Advisers and Broker-Dealers (Jan. 2011). Separate FINRA proposals to address the study's recommendations by requiring broker-dealer websites to include links to BrokerCheck in different ways were made and withdrawn through the period from 2012 to 2014. *See* FINRA Regulatory Notice 12-10 (Feb. 2012); SEC Release No. 34-68700 (Jan. 18, 2013); FINRA Regulatory Notice 14-19 (Apr. 2014). FINRA proposed a requirement to include a link to BrokerCheck to be "readily apparent" on member websites intended to be viewed by retail investors or that include a professional profile of one or more registered persons who conduct business with retail investors. SEC Release No. 34-75377 (July 7, 2015). The SEC approved the requirement, amending FINRA Rule 2210, in 2015, and the requirement's effective date was in June 2016. *See* SEC Release No. 34-76105 (Oct. 8, 2015); FINRA Rule 2210(d)(8). On February 3, 2017, President Trump directed the Secretary of Labor to reexamine the Fiduciary Duty Rule. *See* Presidential Memorandum on Fiduciary Duty Rule (Feb. 3, 2017).

140 The SEC staff has also found that the exclusion may extend in certain circumstances to video information services, *Reuters Information Services, Inc.—TV 2000* (avail. Jan. 17, 1991), and to telephonic market timing services, *Charles L. Simpson* (avail. July 7, 1992).

141 *Lowe v. SEC*, 472 U.S. 181 (1985).

142 Although the Court decided the case on statutory grounds, First Amendment concerns played a role in its reasoning. The Court noted that:

> [T]he legislative history [of the Advisers Act] demonstrates that Congress was primarily interested in regulating the business of rendering personalized investment advice, including publishing activities that are a normal incident thereto. On the other hand, Congress, plainly sensitive to First Amendment concerns, wanted to make clear that it did not seek to regulate the press through the licensing of nonpersonalized publishing activities.

Lowe v. SEC, 472 U.S. 181, 204 (1985).

In a concurring opinion, in which Chief Justice Burger and Justice Rehnquist joined, Justice White rejected the majority's statutory construction, concluding that the definition of investment adviser could encompass publishers of impersonal investment advice, but that First Amendment principles would not permit the blanket injunctive relief at issue in *Lowe*. *Lowe v. SEC*, 472 U.S. 181, 211 (1985).

143 *Lowe v. SEC*, 472 U.S. 181, 206–09 (1985). The staff of the SEC has suggested, for example, that a "900 number" service providing telephonic recorded stock tips may qualify for the publishers' exclusion under *Lowe*. *Mary Lee Botsaris—900 Stock Tip Number* (avail. Mar. 25, 1993).

144 *Lowe v. SEC*, 472 U.S. 181, 209 (1985).

145 David Ferber, *The Narrow Holding of the Lowe Case*, 19 REV. SEC. & COMM. REG. 29 (1986); *see also SEC v. Wall Street Publishing Institute, Inc*., 851 F.2d 365 (D.C. Cir. 1988), *cert. denied*, 489 U.S. 1066 (1989); SEC Litigation Release No. 10813 (July 8, 1985).

In ruling on a motion to dismiss, one court has held that an individual who maintained a website which touted certain stocks and e-mailed his stock picks to subscribers could be considered an investment adviser. *SEC v. Park*, 99 F. Supp. 2d 889 (N.D. Ill. 2000). The court rejected the argument that the service was not personalized and found that the SEC had alleged facts sufficient to show that the defendant may not fall within the publisher's exemption for registration under the Advisers Act.

146 § 202(a)(11)(B) of the Advisers Act excludes "any lawyer, accountant, engineer or teacher whose performance of such services is solely incidental to the practice of his profession."

147 § 202(a)(11)(E) of the Advisers Act. The SEC staff has questioned the availability of the exclusion for advice regarding U.S. government securities where an adviser proposed to advise as to repurchase agreements. *J.Y. Barry Arbitrage Management Inc*. (avail. Oct. 18, 1989) (citing SEC Release No. IC-10666 (Apr. 18, 1979) and *The Prospect Group* (avail. Nov. 29, 1988)). The staff based its conclusion on its position that a repurchase agreement should be viewed as a loan rather than a sale and repurchase of securities, so that the repurchase agreement would constitute an evidence of indebtedness. Under SEC rules, advisers to municipalities are regulated under the Exchange Act. *See supra* Note 96.

148 § 409 of the Dodd-Frank Act. The SEC adopted a new Rule 202(a)(11)(G)-1 under the Advisers Act to define family offices that are excluded from the definition of "investment adviser" under the Advisers Act. Rule 202(a)(11)(G)-1 largely codifies the exemptive orders that the SEC has issued to family offices. Each of these exemptive orders reflected the specific factual situation presented by the family office applicant. *See* SEC Release No. IA-3220 (June 22, 2011); SEC, Division of Investment Management Responses to Questions About the Family Office Rule (Apr. 27, 2012).

149 § 202(a)(11)(H) of the Advisers Act; *see, e.g.*, SEC Release No. IA-2013 (Feb. 7, 2002); SEC Release No. IA-1970 (Aug. 27, 2001).

150 § 203(b) of the Advisers Act exempts, among other persons:

> (1) any investment adviser, other than an investment adviser who acts as an investment adviser to any private fund, all of whose clients are residents of the State within which such investment adviser maintains his or its principal office and place of business, and who does not furnish advice or issue analyses or reports with respect to securities listed or admitted to unlisted trading privileges on any national securities exchange; (2) any investment adviser whose only clients are insurance companies; [or] (3) any investment adviser that is a foreign private adviser.

A person seeking to provide advice on an exempt basis with respect to the trading of security futures products requires an exemption from both the Advisers Act and the CEA. Although currently there is considerable overlap between exemptions under both statutes, the exemptions are not entirely coextensive. In 2012, the SEC adopted rules that eliminated certain exemptions from the CEA and created a number of new requirements for persons registered under the CEA. *See supra* Note 7.

151 *See* discussion at §§ 16.07 and 16.08.

152 The Private Fund Advisers Act was Congress's solution to the question of hedge fund regulation. The SEC sought to expand its regulation of hedge funds by adopting a new rule and several rule amendments that took effect in 2005. Hedge Fund Release. The Hedge Fund Release effectively required many hedge fund advisers to register as investment advisers under the Advisers Act by changing the manner in which they counted their clients for purposes of determining the availability of the *de minimis* exemption. In June 2006, the U.S. Court of Appeals for the District of Columbia Circuit vacated the rule and the related rule amendments, concluding that the SEC had acted arbitrarily in determining that the investors in a hedge fund would be deemed clients of an adviser for purposes of the *de minimis* exemption when only the fund itself would be considered the adviser's client for other purposes under the Advisers Act. *Goldstein v. SEC*, 451 F.3d 873 (D.C. Cir. 2006). The SEC then embarked on an aggressive agenda through rulemaking and staff guidance to address the consequences of this decision. *See* Rule 206(4)-8 under the Advisers Act.

153 For purposes of determining clients under the *de minimis* exemption, no shareholder, partner or beneficial owner of a client entity was considered a client unless such person was a client of the adviser separate and apart from its status as shareholder, partner or beneficial owner. The Private Fund Advisers Act maintained the interpretive provisions for determining who are clients.

154 15 U.S.C. § 80b-3(b)(3) (2006).

155 SEC Release No. IA-3221 (June 22, 2011); SEC Release No. IA-3222 (June 22, 2011).

156 § 402(a) of the Private Fund Advisers Act.

157 R-AUM is reported on Part 1 of Form ADV.

158 In response to commenters citing the statutory definition of investment adviser (which includes a "for compensation" qualifier), the SEC noted in its adopting release that "[a]lthough a person is not an ‘investment adviser’ for purposes of the Advisers Act unless it receives compensation for providing advice to others, once a person meets that definition (by receiving compensation from *any* client to which it provides advice), the person is an adviser, and the [Advisers] Act applies to the relationship between the adviser and any of its clients (whether or not the adviser receives compensation from them)." SEC Release No. IA-3221 (June 22, 2011), 76 Fed. Reg. 42,950, 42,955 (July 19, 2011). Presumably the SEC is only referring to an adviser's *advisory* clients in this context (as opposed to all of the adviser's clients, including non-advisory clients), *i.e.*, if the adviser receives compensation from any one client to which it provides advice then it is an adviser to each client *to which it provides advice* whether or not compensation is received.

159 *See* Rule 202(a)(30)-1(c)(1) under the Advisers Act; Form ADV, Instruction 5.b(1) to Part 1A.

160 *See* Form ADV, Instruction 5.b(1) to Part 1A.

161 For clarification purposes, in its adopting release the SEC changed this wording from the proposal that said "*from* a place of business in the United States" to more clearly reflect a focus on the location at which management is conducted. The SEC also made clear in its adopting release that, for non-U.S. advisers, the analysis likely will not turn on whether the non-U.S. adviser has a place of business in the United States but on whether the adviser manages assets, or has "assets under management," at such a U.S. place of business. "Assets under management" are securities portfolios for which the adviser provides "continuous and regular supervisory or management services." The SEC confirmed that, while this is an inherently factual determination, it would not view providing research or due diligence at a U.S. place of business to be managing assets in the United States if a person outside the United States makes an independent investment decision and implements those decisions. SEC Release No. IA-3222 (June 22, 2011), 76 Fed. Reg. 42,950, 42,955 (July 19, 2011). Presumably, marketing or other client services offices that do not engage in "management" of assets would also be excluded from the calculation of assets under management in the United States for such non-U.S. advisers.

162 Given the focus on assets under management in the United States for a non-U.S. adviser, many non-U.S. advisers may be able to rely on the private fund adviser exemption instead of the foreign private adviser exemption.

163 *See* § 16.03[3][b] for discussion of the meaning of "place of business."

164 The Private Fund Advisers Rules refer to the definition of a U.S. person in Regulation S. *See* § 8.02 for a discussion of Regulation S and related definitions.

165 SEC Release No. IA-3222 (June 22, 2011). The adopting release states that whether a single-investor fund could be a "private fund" for purposes of the exemption depends on the facts and circumstances. The release notes the SEC's concern that an adviser simply could convert client accounts to single-investor funds—which would be tantamount to separately managed accounts—in order to avoid registering under the Advisers Act. The SEC references § 208(d) of the Advisers Act as anticipating "these and other artifices" and thus prohibiting a person from doing indirectly anything that it would be unlawful to do directly. Although the release acknowledges that there are circumstances in which it may be appropriate for an adviser to treat a single investor fund as a private fund for purposes of the rule, these are likely to be limited—such as where a fund that seeks to raise capital from multiple investors has only a single, initial investor for a period of time or where all but one of the investors in a multi-investor fund have redeemed their interests. 76 Fed. Reg. 39,646, 39,667–39,668 (July 6, 2011).

166 "In the United States" refers to the definition of a U.S. person as provided for in Regulation S. *See supra* Note 164.

167 In the context of the *de minimis* exemption, at least one commentator had suggested that an adviser that offers services to more than 14 persons is not exempt regardless of the actual number of clients, because it would be making a public offering of its advisory services. *See* Tamar Frankel & Ann Taylor Schwing, 2 THE REGULATION OF MONEY MANAGERS: MUTUAL FUNDS AND ADVISERS § 10.02[B] (2d ed. 2001).

168 § 402(a) of the Private Fund Advisers Act. The exemption would thus potentially be available to an adviser providing advice to entities excluded from the definition of investment company specified in § 3(c) of the Investment Company Act. *See*, *e.g.*, *Bache & Co. (Pan America), Inc.* (avail. Sept. 19, 1976). For a description of the types of entities required to register under the Investment Company Act, *see* § 15.03.

169 Rule 202(a)(30)-1(c)(4) under the Advisers Act.

170 The SEC clarified in the adopting release that while a "place of business" as defined would include any office where the adviser regularly communicates with U.S. or non-U.S. clients or regularly conducts research, it would likely not include a place of business used solely for administrative or back office activities if such activities are not "intrinsic to providing investment advisory services" and do not involve communicating with clients. *See* SEC Release No. IA-3222 (June 22, 2011), 76 Fed. Reg. 39,646, 39,679 (July 6, 2011); *see also supra* Notes 161–163 and accompanying text. Even with this clarification, determining whether an operation or office in the United States will count as a "place of business" for purposes of this exemption will be a fact-intensive and difficult analysis, especially given the breadth of activities one can conduct in an office and the ambiguity inherent in the standard the SEC has cited (*i.e.*, "intrinsic to providing advice").

171 Rule 202(a)(30)-1(a)(1) under the Advisers Act; *see also supra* Note 42.

172 Rule 202(a)(30)-1(a)(2) under the Advisers Act. The staff has also indicated that an investment adviser that advised funds through a two-tiered investment structure, where a top-tier fund would invest in several underlying investment funds, need not count the underlying funds as clients for purposes of § 203(b)(3). *See Willkie Farr & Gallagher* (avail. Oct. 30, 1998).

173 Even if "single advisee" treatment is unavailable with respect to a limited partner that is otherwise an advisory client, such treatment may still be available with respect to other limited partners complying with the rule. Rule 202(a)(30)-1(b)(1) under the Advisers Act. Under the prior rules regarding the *de minimis* exception, the SEC has declined to expand this treatment to include general partnerships on the theory that it was intended to establish parity of treatment between limited partnerships and corporate vehicles for passive investment—a function not, in the SEC's view, typically served by the general partnership form.

SEC Release No. IA-983 (July 12, 1985).

174 SEC Release No. IA-3222 (June 22, 2011). The SEC also determined to include in the calculation of assets under management assets managed without compensation, noting that if an adviser receives compensation from any one client to which it provides advice, then it is an adviser to each advisory client whether or not compensation is received. *See supra* Note 158.

175 Rule 202(a)(30)-1(c)(2) under the Advisers Act. The adopting release clarifies that an adviser must look through nominee and similar arrangements, total return swaps or similar instruments, as well as through master-feeder structures, to the beneficial owners. The SEC introduced a reasonableness standard for this determination, *i.e.*, the adviser may treat as an investor a person the adviser reasonably believes is the actual investor. The same standard may be used in determining if a particular investor is "in the United States." The SEC noted that because private fund advisers already need to "look through" and count investors for purposes of their Investment Company Act exemption, this provides no additional burden to advisers who argue that they may not know the identity or location of each investor. SEC Release No. IA-3222 (June 22, 2011), 76 Fed. Reg. 39,646, 39,678 (July 6, 2011).

176 Rules 202(a)(30)-1(b)(4) and 202(a)(30)-1(c)(2) under the Advisers Act.

177 *See* Rule 202(a)(30)-1(c)(2) under the Advisers Act. Proposed Rule 202(a)(30)-1(c)(1)(i), by reference to Rule 3c-5 under the Investment Company Act, would have counted "knowledgeable employees" as investors for purposes of the foreign private fund adviser exemption. *See* SEC Release No. IA-3111 (Nov. 19, 2010).

178 *See*, *e.g.*, *Alexander, Holburn, Beaudin & Lang* (avail. Aug. 13, 1984).

179 Section 202(a)(30)(D); *see also infra* Note 184.

180 *See, e.g., Mr. R. Bate* (avail. June 28, 1988); *The Gordian Cos., Inc.* (avail. Aug. 20, 1987); *Executive Group* (avail. July 9, 1984); *System Dynamics* (avail. June 21, 1983); *Benedict A. Stanonis* (avail. May 20, 1982); *Bruce O. McCracken* (avail. May 29, 1981); *David Streetman* (avail. Aug. 17, 1979); *Ronald F. Bentley* (avail. Jan. 24, 1978); *ONB Securities, Inc.* (avail. Dec. 17, 1978).

181 SEC Release No. IC-21260 (July 27, 1995), 60 Fed. Reg. 39,574, 39,575 n.8 (Aug. 2, 1995); *Resource Bank & Trust* (avail. Mar. 29, 1991).

182 SEC Release No. 33-7288 (May 9, 1996). An unregistered adviser's Internet site should also be properly legended to indicate that the adviser's services are not available, and are not being offered, to U.S. investors. SEC Release No. IA-1710 (Mar. 23, 1998). The SEC staff has also indicated that an investment adviser that posted information on an Internet site about private funds, whether structured as domestic or foreign partnerships, limited liability companies, trusts or other entities, would not be "holding out" to the public if the operator of the Internet site used procedures designed to limit access to the Internet site information to a select group of accredited investors. *Lamp Technologies, Inc.* (avail. May 29, 1998). In addition, the SEC staff has indicated that it would not recommend enforcement action against advisers relying on the § 203(b)(3) exemption if they provided information to a data service provider that only distributed the information exclusively to the institutional sales and trading desks of broker-dealers. *Thomson Financial Inc.* (avail. July 10, 2002).

183 SEC Release No. IA-688 (July 12, 1979).

184 Rule 203(b)(3)-1(c) under the Advisers Act. The Private Fund Advisers Act rescinded Rule 203(b)(3)-1; however, Rule 202(a)(30)-1 was adopted at the same time and covers substantially the same ground but in the context of the foreign private adviser exemption, which is currently the only exemption that refers to not "holding out" as a criterion. SEC Release No. IA-3221 (June 22, 2011).

185 The fund's compliance with the 20% limit is to be calculated at the time any non-qualifying investment is made, based on the non-qualifying investments then held in the fund's portfolio. SEC Release No. IA-3222 (June 22, 2011).

186 Rule 203(l)-1 under the Advisers Act; SEC Release No. IA-3222 (June 22, 2011).

187 SEC Release No. IA-3222 (June 22, 2011).

188 Rule 203(l)-1(c)(3) and (4) under the Advisers Act.

189 Rule 203(l)-1(b) under the Advisers Act.

190 § 208(d) of the Advisers Act prohibits "any person indirectly, or through or by any other person, to do any act or thing which it would be unlawful for such person to do directly under the provisions of the [Advisers Act] or any rule or regulation thereunder." *See also supra* Note 66 and accompanying text.

191 A discussion of SEC positions regarding the integration of advisory activities of different entities for purposes of the Advisers Act registration requirement is included at § 16.02[2]. *See also Murray Johnstone Holdings Ltd*. (avail. Oct. 7, 1994) (granting no-action relief from integration of several unregistered and registered affiliates for purposes of determining the number of U.S. clients serviced by the group and the applicability of Rule 203(b)(3)-1 where the affiliates were operated separately and independently, notwithstanding certain director interlocks).

192 The SEC noted in the adopting release the possibility of recordkeeping requirements for Exempt Reporting Advisers to be addressed in a future release. *See* SEC Release No. IA-3221 (June 20, 2011).

193 §§ 407 and 408 of the Dodd-Frank Act.

194 The rules require that Exempt Reporting Advisers complete the following seven items in Part 1A of Form ADV: Items 1 (Identifying Information), 2.B (Checkbox regarding Exemption Qualifications), 3 (Form of Organization), 6 (Other Business Activities), 7 (Financial Industry Affiliations and Private Fund Reporting), 10 (Control Persons), 11 (Disclosure Information), and the corresponding sections of Schedules A, B, C and D. The Private Fund Advisers Rules do not require Exempt Reporting Advisers to complete and file other items in Part 1A or prepare a client brochure. Items 1, 3 and 10 require basic identification details about an Exempt Reporting Adviser such as name, address, contact information, form of organization and who owns the adviser. Items 6 and 7.A provide details regarding other business activities that the adviser and its affiliates are engaged in. Item 11 requires advisers to disclose the disciplinary history for the adviser and its employees and other advisory affiliates. Exempt Reporting Advisers are also required to complete the newly revised item 7.B, which requires advisers to provide the SEC with basic organizational, operational and investment characteristics of each fund client, the amount of assets held by each fund client, the nature of the fund client's investors and/or owners, the advisory services provided to the fund client, and each fund client's service providers (*i.e.*, auditors, prime brokers, custodians, administrators and marketers). SEC Release No. IA-3221 (June 22, 2011).

195 SEC Release No. IA-3221 (June 22, 2011).

196 *See* SEC Release No. IA-3308 (Oct. 31, 2011).

197 *See supra* Note 150.

198 *Roy Heybrock* (avail. Apr. 5, 1982). *But see Associates in Financial Planning* (avail. Mar. 21, 1977) (granting no-action relief to a company that advised with regard to unlisted mutual fund securities).

199 *See Guardian Investment Services, Inc.* (avail. Sept. 18, 1986).

200 *See, e.g., Crosby Investment Consultants, Inc.* (avail. Oct. 28, 1977) (federally chartered institutions having their principal offices in applicable states were qualifying clients for purposes of the intrastate exemption); *First Federal Savings & Loan Association of Dallas, Texas and F.F. Corp.* (avail. Oct. 2, 1976). *But see Alpha Capital Corp.* (avail. Mar. 3, 1971) (granting no-action relief even where request failed to identify whether corporate advisory clients would be domiciled and have principal place of business within the state).

202 § 203(b)(6) of the Advisers Act

203 § 403 of the Private Fund Advisers Act.

U.S. Regulation of the International Securities and Derivatives Markets, § 16.04, REGISTRATION PROCESS

U.S. Regulation of the International Securities and Derivatives Markets
1 Edward F. Greene, Alan L. Beller, Edward J. Rosen, Leslie N. Silverman, Daniel A. Braverman, Sebastian R. Sperber, Nicolas Grabar & Adam E. Fleisher, U.S. Regulation of the International Securities and Derivatives Markets § 16.04 (11th and 12th Editions 2014-2017)
11th and 12th Editions

Click to open document in a browser

Registration under the Advisers Act for those advisers required to register with the SEC is a relatively simple process, requiring the completion of a prescribed application form—Form ADV. [204] Within 45 days after filing, the SEC must either approve the prospective adviser for registration or commence proceedings to determine whether registration ought to be denied. [205] The Advisers Act requires no showing of competence by personnel, such as the passing of an examination, nor does it impose any minimum capital requirements for a registered adviser. [206] It does, however, contain certain "statutory disqualifications"

p. 16-49

from registration, which include: (i) the making of false and misleading statements to the SEC under the Advisers Act, [207] (ii) criminal convictions and violations relating to any of the federal or state securities or commodities laws, [208] (iii) criminal convictions relating to any felony, [209] and (iv) convictions for substantially equivalent crimes and violations of substantially equivalent foreign laws. [210]

In addition to complying with the basic registration requirements, foreign advisers must also file with the SEC an irrevocable consent to service of process and a power of attorney appointing the SEC as agent to receive process, pleadings and other papers in connection with any civil suit or action arising out of the adviser's business, in any place subject to the jurisdiction of the United States, and based upon the Advisers Act, the Securities Act, the Exchange Act, the Trust Indenture Act, the Investment Company Act or any rule or regulation under any of those statutes. [211]

The application for registration as an investment adviser on Form ADV consists of two parts. Part 1 requires a description of the adviser and other information primarily relating to the basics of the adviser's business and the adviser's disciplinary history and ownership, including persons or entities having a controlling influence over its policies. In the case of an adviser in corporate form, the identity of owners of 5% or more of the common stock (voting) of the applicant and the owners of 25% or more of such owners up the ownership chain, unless an indirect owner is subject to the reporting requirements of the Exchange Act, is required to be disclosed. [212] In the case of advisers or their owners that are organized as limited liability companies or limited partnerships, disclosure of

p. 16-49
p. 16-50

those persons that have contributed or have the right to receive upon dissolution 5% (in the case of a direct owner) or 25% (in the case of an indirect owner) of such entity's capital is required, resulting in persons with only an economic interest (no voting rights) being subject to disclosure. This requirement may raise issues for foreign advisers with complex and confidential holding company ownership structures, particularly since foreign parents of such advisers are often not Exchange Act reporting companies. Although the SEC staff has not published any no-action or other guidance with respect to this requirement, it has demonstrated a willingness in isolated cases to explore compromise disclosure with an applicant.

The Private Fund Advisers Rules require additional information to be provided on Part 1 of Form ADV. The rules amended Form ADV to require advisers to provide supplemental information about three areas of operation: (i) private funds advised, (ii) advisory activity, including business practices, and (iii) non-advisory activity, including financial industry affiliations. [213]

Part 2 of Form ADV describes in detail the services provided by the adviser and its primary policies affecting its relationship with its clientele, with emphasis on disclosure of conflicts of interest. Part 2 requires, among other things, details regarding: material changes to the brochure since the last annual update, a description of the adviser's business; the adviser's fee schedule; the amount of assets under management and how such amount is calculated; side-by-side management of performance-based and nonperformance-based fee accounts; the types of clients it advises; the types of securities about which it provides advice; the investment strategies it uses in formulating advice and the risks related thereto; its disciplinary history; its brokerage placement practices; affiliations the adviser may have with other market participants (including broker-dealers, commodity trading advisers, banks and insurance companies); custody of client funds and securities; and the adviser's code of ethics (including a statement that the adviser will furnish a copy of its code of ethics to any client or prospective client upon request). In addition, an adviser that requires its clients to prepay more than $1,200 in fees (per client) six or more months in advance must file with its Form ADV an audited balance sheet for its most recent fiscal year (prepared in accordance with, or reconciled to, U.S. generally accepted accounting principles ("GAAP")). [214] All disclosures in Part 2 of Form ADV must be written in "plain English." [215]

p. 16-50

p. 16-51

Form ADV must be promptly amended in the event of material changes in certain information or upon any changes, regardless of materiality, in other information included in the form. [216] In addition, each registered investment adviser is required to file an annual update to its registration statement within 90 days of the close of the adviser's fiscal year. [217]

Footnotes

204 Applications for registration as an adviser must be submitted electronically through the Investment Adviser Registration Depository ("IARD"). SEC Release No. IA-1897 (Sept. 12, 2000). Investment advisers may satisfy filing obligations under both state and federal law with a single electronic filing made through the IARD.

FINRA (the operator of the IARD) typically charges an initial set-up fee and annual fees that vary depending on the amount of assets under management. Rule 204-1(d) under the Advisers Act. Under the current fee structure, the amount of filing fees paid by an adviser depends on its R-AUM. SEC Release No. IA-3126 (Dec. 22, 2010). All states (and the District of Columbia), with the exception of Wyoming, which does not regulate investment advisers, permit registration under local securities laws using Form ADV. Most states now mandate electronic filing. For a discussion of local securities regulation applicable to investment advisers, *see* § 16.14.

205 § 203(c)(2) of the Advisers Act.

206 The SEC staff has taken the position on at least one occasion, presumably on the basis of general antifraud principles, that a person holding himself out as an investment adviser "represents that he has adequate qualifications by virtue of his educational background or experience to engage in that activity." *Edgardo H. Segura* (avail. Apr. 14, 1978). In addition, many state securities authorities require that employees of investment advisers registered in the state that provide clients with investment advice or who supervise such employees pass a standardized examination. *See*, *e.g.*, GA. CODE ANN. § 10-5-41; R.I. GEN. LAWS § 7-11-203. Certain states also require the posting of a bond or the maintenance of professional liability insurance or minimum capital requirements as a condition to registration as an investment adviser in the state. *See*, *e.g.*, GA. CODE ANN. § 10-5-40; ARK. CODE ANN § 23-42-303; 64 PA. CODE § 303.042.

207 § 203(e)(1) of the Advisers Act.

208 § 203(e)(2) of the Advisers Act.

209 § 203(e)(3) of the Advisers Act.

210 §§ 203(e)(2) and 203(e)(3) of the Advisers Act.

211 Rule 0-2 under the Advisers Act. The Advisers Act prescribes the precise form of the required consent to

service of process. The breadth of inquiry to which the consent exposes a foreign adviser may pose special issues in the case of foreign banks and bank holding companies conducting securities-related activities in the United States in reliance on Rule 15a-6 under the Exchange Act, which provides such entities (and other foreign brokers and dealers) an exemption from broker-dealer registration in limited circumstances. *See* § 14.03[3]. A foreign broker or dealer also registered under the Advisers Act is subject to examination with respect to all of its activities, including securities activities conducted in reliance on Rule 15a-6.

212 There is no published authority to the effect that an entity exempt from reporting requirements pursuant to Rule 12g3-2(b) under the Exchange Act would not be required to disclose its beneficial owners, and it would appear that this disclosure would be required to be made by such an entity. For a further discussion of Rule 12g3-2(b), *see* § 4.02[3].

213 SEC Release No. IA-3221 (June 22, 2011).

214 Form ADV, Part 2, Item 18.

215 The SEC adopted significant amendments to Part 2 of Form ADV that, among other things, (i) expanded the scope of information required on the form, (ii) changed the manner in which the Part 2 information is presented from the prior "check-the-box" form to a narrative discussion, and (iii) required that Part 2 of Form ADV, and any amendments thereto, be filed with the SEC through the IARD. SEC Release No. IA-3060 (July 28, 2010).

216 See Rule 204-1(a) under the Advisers Act.

217 Rule 204-1(a) under the Advisers Act. An annual fee typically must be paid to FINRA, as the operator of the IARD, upon filing of the annual report. *See supra* Note 204.

U.S. Regulation of the International Securities and Derivatives Markets, § 16.05, "BROCHURE RULE" AND RELATED DISCLOSURE

U.S. Regulation of the International Securities and Derivatives Markets
1 Edward F. Greene, Alan L. Beller, Edward J. Rosen, Leslie N. Silverman, Daniel A. Braverman, Sebastian R. Sperber, Nicolas Grabar & Adam E. Fleisher, U.S. Regulation of the International Securities and Derivatives Markets § 16.05 (11th and 12th Editions 2014-2017)
11th and 12th Editions

Click to open document in a browser

Pursuant to the so-called "Brochure Rule," Part 2 of Form ADV, or a comparable document providing at least the information called for by the form, must be provided to advisory and prospective advisory clients before or at the time they enter into an investment advisory contract, unless the client has the right to terminate the contract without penalty for a period of five business days after concluding the contract, in which case the required information must be delivered at the time the contract is entered into. [218]

An adviser to a fund that is also the general partner (or an entity serving in a similar capacity) to the fund typically delivers a copy of its "brochure" to each investor in or beneficial owner of the fund, in addition to delivering a copy of the "brochure" to the fund itself. [219] In addition, it is market practice for advisers who are not also the general partners of the funds to deliver their "brochures" and make certain other disclosures to the investors in or beneficial owners of the funds but these disclosures can be made in the offering materials or in other disclosure documents that investors receive.

The SEC staff has also taken the position that foreign advisers need not deliver a "brochure" to their non-U.S. clients, subject to satisfaction of certain

p. 16-52

conditions. [220] The staff has conditioned the ability of a foreign adviser not to comply with the Advisers Act in the case of non-U.S. advisory clients on the adviser's agreement that it will not hold itself out to such clients as being registered with the SEC. [221]

A brochure need not be delivered in connection with a contract with an investment company registered under the Investment Company Act that has been approved by a majority of its directors who are not interested parties with respect to the contract. [222] The Brochure Rule, as well as the other regulatory provisions of the Advisers Act, only apply to activities concerning advisory clients. A broker-dealer that is also an investment adviser has to comply with the Advisers Act provisions only with respect to its advisory clients. The adviser must offer to deliver its brochure annually to its clients. [223]

Registered investment advisers that are "sponsors" of "wrap fee programs" [224] must provide prospective clients in these programs with a separate narrative brochure, which must also be filed with the SEC as part of Form ADV. [225]

p. 16-52

p. 16-53

The brochure must disclose information regarding the programs and related fees and services and include a statement that persons who solicit participation in the programs will be compensated and may have a financial incentive to recommend the wrap fee program over other programs or services. Where a sponsor offers several programs, the sponsor has the option to prepare either a single brochure describing all of its wrap fee programs or separate brochures for each program. The wrap fee brochure is required to be updated promptly after any information in the brochure becomes materially inaccurate. The requirement to deliver a wrap fee brochure does not apply to "managed account programs," defined as programs in which clients are provided with advice about portfolio managers, continuous monitoring of portfolio managers and brokerage services, but are charged advisory fees and transaction-based commissions, or to "mutual fund asset allocation programs," defined as programs that provide recommendations of mutual funds, rather than portfolio managers, and do not involve the provision of advisory and brokerage services for a single wrap fee. [226]

Under Regulation S-P, investment advisers (as well as broker-dealers and investment companies) must provide notice to "customers"—that is, clients who are natural persons about the advisers' privacy policies and practices. [227] The notice must be provided to a client when the relationship is established and on an annual basis during the term of the relationship. Regulation S-P also requires an investment adviser not to disclose nonpublic personal information about a client to unaffiliated third parties unless the adviser provides certain information to the client and the client has not elected to opt out of the disclosure. [228] While a fund client is not a "customer" under Regulation S-P, the Consumer Financial Protection Bureau's ("CFPB's") Regulation P applies to private funds, whose "customers" are natural persons who are investors in those funds. [229] In addition, The Federal Trade Commission had similar authority related to privacy notices over financial institutions including private funds before Dodd-Frank, [230] which transferred privacy notice rulemaking authority from a number of agencies over a number of types of institutions to the CFPB. In each case, regardless of the agency imposing the rule, the requirements are generally as described above with regard to Regulation S-P. [231]

Footnotes

218 Rule 204-3 under the Advisers Act; *see also Money-Matters! Limited Partnership* (avail. Oct. 1, 1991) (no-action relief denied to "900 number" telephone call-in advisory service seeking to respond to telephone inquiries without previously providing brochure). Advisers may satisfy their delivery obligations under the Advisers Act by using electronic media as an alternative to paper-based media. In particular, advisers may use electronic media to fulfill their obligations under §§ 205(a)(2), 205(a)(3) and 206(3) of the Advisers Act, and Rules 204-3, 205-3(d), 206(3)-2, 206(4)-2 and 206(4)-3 under the Advisers Act. *See* SEC Release No. IA-1562 (May 9, 1996). Clients also may consent to having their primary adviser receive brochures on their behalf from any subadvisers hired to advise their accounts. *Goldman, Sachs & Co.* (avail. June 20, 2013).

219 However, the SEC has made clear that an adviser is not *required* to deliver its brochure to investors in funds managed by the adviser. *See* SEC, Division of Investment Management, Frequently Asked Questions: Staff Responses to Questions About Part 2 of Form ADV, Question III.2 (Mar. 18, 2011) (responding that brochures need only be delivered to "clients" under Rule 204-3, not to investors in a private fund that is itself the client).

220 Hedge Fund Release. *See also Murray Johnstone Holdings Ltd.* (avail. Oct. 7, 1994); *The National Mutual Group* (avail. Mar. 8, 1993) (substantive provisions of Advisers Act do not apply to foreign registered advisers with respect to non-U.S. clients).

221 *Murray Johnstone Holdings Ltd.* (avail. Oct. 7, 1994); *Mercury Asset Management* (avail. Apr. 16, 1993). *But see* Hedge Fund Release, 69 Fed. Reg. 72,054, 72,072 n. 215 (Dec. 10, 2004) ("We are not, at this time, prohibiting offshore advisers from representing themselves as SEC-registered advisers, but we remind them that they remain subject to the Act's antifraud provisions and that substantial clarification and disclosure may be necessary to make the representation not misleading.").

222 Rule 204-3(c)(1) under the Advisers Act. A "brochure" is also not required in connection with a "contract for impersonal services" for a fee of less than $500, whereby the adviser provides advice solely through written statistical or other information that is not designed to meet the specific investment objectives of the client and does not make any recommendation as to the investment merits of a particular security. Rule 204-3(h)(1) under the Advisers Act.

223 Rule 204-3(b)(2) under the Advisers Act. The SEC has indicated that an adviser has a fiduciary obligation to inform its clients every time a material change occurs, and that this duty could be fulfilled through a revised brochure. SEC Release No. IA-3060 (Oct. 12, 2010); SEC Release No. IA-664 (Jan. 30, 1979).

224 *See* § 16.06 for a discussion of wrap fee arrangements.

225 SEC Release No. IA-1411 (Apr. 19, 1994). A "wrap fee program" is defined in Rule 204-3(h)(5) under the Advisers Act as "an advisory program under which a specified fee or fees not based directly upon transactions in a client's account is charged for investment advisory services (which may include portfolio

management or advice concerning the selection of other investment advisers) and the execution of client transactions." The Glossary of Form ADV defines a "sponsor" as an adviser "that sponsors, organizes, or administers the program, or selects, or provides advice to clients regarding the selection of, other investment advisers in the program." Accordingly, the definition would include only persons who "promote or solicit" clients for programs that have "some degree of uniformity among clients and that are entered into more than occasionally." SEC Release No. IA-1411 (Apr. 19, 1994), 59 Fed. Reg. 21,657, 21,658 n.8 (Apr. 26, 1994). In promulgating these requirements, the SEC stated its expectation that prospective wrap fee clients will generally not be interested in or eligible for other investment programs, so that sponsors will not need to deliver both their general brochure and their wrap fee brochure to a significant number of prospective clients.

226 SEC Release No. IA-1411 (Apr. 19, 1994).

227 SEC Release No. IA-1883 (June 22, 2000).

228 SEC Release No. IA-1883 (June 22, 2000). *See* §§ 248.13, 248.14 and 248.15 of Regulation, 79 Fed. Reg. 64,057.

230 The FTC's Privacy of Consumer Financial Information, 16 C.F.R. Part 313, governed private funds until the CFPB inherited the authority under which it promulgated Regulation P.

231 § 1093 of the Dodd-Frank Act. *See* Regulation P Adopting Release, 79 Fed. Reg. 64,057, 64,058 (Oct. 28, 2014).

U.S. Regulation of the International Securities and Derivatives Markets, § 16.06, PERFORMANCE FEES AND COMPENSATION ARRANGEMENTS

U.S. Regulation of the International Securities and Derivatives Markets
1 Edward F. Greene, Alan L. Beller, Edward J. Rosen, Leslie N. Silverman, Daniel A. Braverman, Sebastian R. Sperber, Nicolas Grabar & Adam E. Fleisher, U.S. Regulation of the International Securities and Derivatives Markets § 16.06 (11th and 12th Editions 2014-2017)
11th and 12th Editions

Click to open document in a browser

p. 16-54

Among the more significant provisions of the Advisers Act is its prohibition on receipt by an adviser subject to regulation thereunder of certain performance fees that are based on a share of the capital gains or appreciation in a client's account. [232] The prohibition applies to new contracts, as well as to renewals and extensions of existing contracts, thus excluding the possibility for "grandfathering" an adviser's existing client relationships for contracts, which would require renewal or extension. [233]

There are a number of exemptions to the prohibition against performance fees that have significantly reduced the impact of the restriction. First, as a result of the National Securities Markets Improvement Act of 1996 ("NSMIA"), [234] the prohibition does not apply to an investment advisory contract with a person who is not a resident of the United States.

Second, the prohibition does not apply to compensation that is based on a fixed percentage of the value of assets under management as of a particular date or dates or averaged over a definite period of time. [235] The SEC's general antifraud rules would, however, operate to prohibit any advisory fee that is "greater than that normally charged in the industry for investment advisory services" unless appropriate disclosure is made to clients, generally in the adviser's "brochure." [236] The SEC staff has taken the position that an adviser would be required to disclose that an annual advisory fee in excess of 2% of assets under management is greater than that normally charged in the industry.” [237]

Third, the prohibition does not apply to a contract with any registered investment company or certain other persons, if the contract relates to at least $1 million of assets, provides for compensation based on the value of assets under management averaged over a specified period and increases and decreases

p. 16-54

p. 16-55

proportionately with the investment performance [238] of the assets in relation to the investment record [239] of an index of securities prices or any other measure approved by the SEC. [240] Increases and decreases in the adviser's compensation are measured from the fee, known as the "fulcrum fee," that the adviser would earn if the performance of the company or fund were equivalent to the applicable index. [241]

Fourth, an exemption exists in the case of contracts that investment advisers have with "qualified clients." For these purposes, a qualified client means: (i) a natural person or a company that has at least $1,000,000 [242] under management, (ii) a natural person or company that is reasonably believed by the adviser to have a net worth of more than $2,100,000 [243] or is a "qualified purchaser" as defined in the Investment Company Act or (iii) a natural person who is an executive officer, director, trustee, general partner or person performing a similar function with the adviser or an employee of the adviser who has been performing investment activities for at least 12 months. [244]

p. 16-55

p. 16-56

Fifth, compensation including up to 20% of the realized capital gains, calculated as provided in the Advisers Act, may be paid in connection with advice to a limited class of U.S.-domiciled investment companies—known as "business development companies" [245]—that are subject to the reporting requirements of the Exchange Act, have assets invested in specified types of securities and have their principal operations in the United States. [246]

Finally, also pursuant to amendments introduced by NSMIA, the prohibition does not apply to an investment advisory contract with a company excepted from the definition of an investment company under § 3(c)(7) of the Investment Company Act. [247]

Under the Private Fund Advisers Act, the SEC is required to adjust any dollar amounts used in connection with the compensation-related tests discussed above not later than July 21, 2011, and every five years thereafter, for the effects of inflation on such test. [248]

The SEC also has the power to:

> by rule or regulation, upon its own motion or by order upon application, … conditionally or unconditionally exempt any person or transaction, or any class or classes of persons or transactions, from [the prohibition], if and to the extent that the exemption relates to an investment advisory contract with any person that the [SEC] determines does not need the protections of [the prohibition], on the basis of such factors as financial sophistication, net worth, knowledge of and experience in financial matters, amount of assets under management, relationship with a registered investment adviser, and such other factors as the [SEC] determines are consistent with [the prohibition]. [249]

It is also worth noting that a registered investment adviser that provides both securities advice and commodities advice may charge its clients fees based on the capital appreciation in the value of the commodities in the clients' account without complying with the Advisers Act provisions relating to performance fees. [250]

p. 16-56

p. 16-57

The Advisers Act proscriptions may also extend to other compensation practices that may not be prohibited or, in fact, may be expressly permitted under an adviser's home country practices. For example, the antifraud provisions of the Advisers Act [251] have been interpreted by the staff, in cases addressing acceptable practices in U.S. financial markets, as requiring *pro rata* refunds for pre-paid advisory fees in the event an advisory contract is terminated by a client (particularly in the case of advisers providing advice tailored to the needs of particular clients), [252] and as prohibiting the imposition of an additional charge on a client for choosing to change his investment [253] or terminate his contract. [254] Such practices are commonly accepted in many other jurisdictions, and SEC staff positions suggest that these prohibitions may (subject to satisfaction of certain conditions) not be applicable in the case of the non-U.S. clients of a registered adviser located outside the United States, except to the extent that the practices in question involve conduct or have effects in the United States or on the adviser's U.S. clients. [255]

An advisory service that has experienced explosive growth over the past two decades is the so-called "wrap fee" arrangement, which can take a variety of forms. Under a common arrangement, a client retains a brokerage firm that assists the client in selecting an adviser from the firm's "approved" list of money managers that may include affiliates of the broker. The broker charges the client a single "wrap fee" that includes fees payable to the adviser for the client's account, as well as custodial and brokerage and other transactional charges. The SEC has provided a "nonexclusive safe harbor from the definition of investment company" for certain wrap accounts, [256] but has not taken any official position regarding the propriety under the Advisers Act of wrap accounts. [257] The SEC

p. 16-57

p. 16-58

staff has indicated, however, that the arrangements raise numerous issues under the Advisers Act, as well as other federal and state securities laws. [258] Among the issues raised by wrap programs under the Advisers Act is whether the arrangement constitutes an abusive compensation practice in that the fee charged exceeds the sum of the fees that would otherwise be payable for each of the services provided in the program. [259] It is also uncertain whether a wrap program that contemplates the use of a single broker for execution services will satisfy the adviser's obligation to obtain the "best execution" for clients in the program. [260] The payment of a portion of the "wrap fee" to the sponsoring broker may also require compliance with Rule 206(4)-3 under the Advisers Act relating to the payment of fees by advisers to others in exchange for client referrals. [261] Finally, the applicability to wrap programs of the restrictions on principal and agency cross transactions in § 206(3) of the Advisers Act is uncertain. [262]

Footnotes

232 The SEC staff has held that the Advisers Act also prohibits an investment adviser from entering into contingent advisory fee arrangements, such as agreements under which fees are waived or refunded if a client's account does not meet a certain specified level of performance. *See* SEC Release No. IA-721 (May 16, 1980). The staff has also stated that the Advisers Act does not prohibit the voluntary, noncontractual refund of advisory fees by an investment adviser so long as the client had no original understanding with the adviser regarding a fee refund or waiver related to investment performance. *Investment Advisors, Interpretive Matters* (avail. July 18, 1995).

233 § 205(a) of the Advisers Act. The prohibition appears not to apply to an existing contract that does not require renewal or extension.

234 Pub. L. No. 104-290, 110 Stat. 3416 (1996).

235 § 205(b) of the Advisers Act.

236 *See*, *e.g.*, *Commodity Management Service Corp.* (avail. May 19, 1974).

237 *See*, *e.g.*, *Equitable Communications* (avail. Feb. 26, 1975); *Consultant Publications, Inc.* (avail. Jan. 29, 1975).

238 "Investment performance" of an investment company for any period is defined in Rule 205-1(a) under the Advisers Act as "the sum of: (1) The change in its net asset value per share during such period; (2) The value of its cash distributions per share accumulated to the end of such period; and (3) The value of capital gains taxes per share paid or payable on undistributed realized long-term capital gains accumulated to the end of such period; expressed as a percentage of its net asset value per share at the beginning of such period." For these purposes, the amount of certain distributions, dividends and provisions for taxes are deemed to be reinvested in the investment company as described in the rule.

239 Rule 205-1(b) under the Advisers Act defines "investment record" of such an index for any period as "the sum of: (1) The change in the level of the index during such period; and (2) The value, computed consistently with the index, of cash distributions made by companies whose securities comprise the index accumulated to the end of such period; expressed as a percentage of the index level at the beginning of such period." Cash distributions on the indexed securities are considered reinvested in the index as provided in the rule.

240 § 205(c) of the Advisers Act provides that an index of securities will be deemed appropriate unless the SEC by order determines otherwise. *See* SEC Release No. IC-7113 (Apr. 6, 1972) (stating the SEC staff's view on factors to be considered in determining the appropriateness of an index); *see also James R. Waters, CFP* (avail. June 1, 1995).

241 § 205(c) of the Advisers Act. Rule 205-2 under the Advisers Act provides that the specified period during which the asset value of the company or fund is averaged for purposes of determining the fulcrum fee may vary from that during which asset value is averaged for purposes of determining the performance component of the adviser's fee only if certain conditions are met.

242 SEC Release No. IA-4421 (June 14, 2016).

243 SEC Release No. IA-4421 (June 14, 2016).

244 Rule 205-3(d)(1) under the Advisers Act. For purposes of this exemption, each investor in a registered investment company, a private investment company (*i.e.*, a fund operating pursuant to the exception from investment company registration provided under § 3(c)(1) of the Investment Company Act) or a business development company must be counted as a client of the adviser seeking to charge a performance fee.

245 § 202(a)(22) of the Advisers Act.

246 § 205(b)(3) of the Advisers Act.

247 § 205(b)(4) of the Advisers Act.

248 § 418 of the Dodd-Frank Act; SEC Release No. IA-3372 (Feb. 15, 2012).

249 § 205(e) of the Advisers Act.

250 *John W. Henry & Co., Inc.* (avail. Sept. 20, 1996); *see also EQK Partners* (avail. July 13, 1988) (registered investment adviser may charge fees based on capital appreciation in the value of real estate without complying with § 205 of the Advisers Act and Rule 205-3 thereunder).

251 *See* § 206 of the Advisers Act; §§ 16.07 and 16.08.

252 *See*, *e.g.*, *Churchill Management Corp.* (avail. May 30, 1974); *cf. Wellington Financial Corp.* (avail. Jan. 7, 1983) (no-action relief permitting an investment adviser to enter into an agreement with an affiliated limited partnership to publish a uniform publication without giving existing subscribers an opportunity to terminate their subscription agreements); *Daily Graphs* (avail. Dec. 13, 1978) (failure to provide *pro rata* refund on cancellation or termination would not violate § 206 of the Advisers Act where advisory services were only provided through uniform publications distributed to subscribers pursuant to contracts for "reasonable periods" and adequate disclosure of "no refund" policy was made in advance of execution of subscription agreement); *Anametrics, Inc.* (avail. Oct. 21, 1976). *But see Stephenson and Co.* (avail. Dec. 29, 1980) (termination fee reasonably related to actual services performed would, subject to disclosure and certain other limitations, not necessarily violate § 206 of the Advisers Act).

253 *National Deferred Compensation* (avail. Aug. 31, 1987).

254 *National Deferred Compensation* (avail. Aug. 31, 1987).

255 *The National Mutual Group* (avail. Mar. 8, 1993). *See* Hedge Fund Release.

256 *See* Rule 3a-4 under the Investment Company Act.

257 SEC Release No. IA-1623 (Mar. 24, 1997). The SEC staff has taken the position that a mutual fund wrap fee program may defer, and eventually excuse, the payment of certain broker's fees for those clients that participate in the program for a specified period (and charge the deferred fees to those clients who terminate early), as long as proper disclosure is provided. *Constellation Financial Management L.L.C.* (avail. Jan. 9, 2003); *BISYS Fund Services, Inc.* (avail. Sept. 2, 1999).

258 SEC Release No. IA-1510 (July 27, 1995).

259 To improve disclosure about wrap fee programs, the SEC has adopted rules that require an adviser that sponsors a program (other than managed account programs and mutual fund asset allocation programs) to deliver a separate narrative brochure to prospective clients describing the programs, fees and services. SEC Release No. IA-1411 (Apr. 19, 1994); *see* § 16.05.

260 *See* § 16.09.

261 *See* § 16.08[3]. Another issue raised by wrap accounts is whether clients are in fact accorded individualized investment advisory services or are instead "investors" in an unregistered investment company. *See* § 18.02. Wrap programs can also raise special issues for regulated entities, such as pension plans subject to ERISA. *See, e.g.*, Department of Labor, Opinion 82-26 A (June 9, 1982).

262 SEC Release No. IA-1623 (Mar. 24, 1997). The SEC staff has indicated, however, that they would not recommend enforcement action under § 206(3) of the Advisers Act where an entity registered as both an adviser and a broker-dealer received fees pursuant to a wrap program for executing trades directed to it by another investment adviser, provided that the dual registrant did not recommend, select or participate in the selection of particular securities to be purchased for, or sold on behalf of, clients of the program. *See*

Morgan, Lewis & Bockius LLP (avail. Apr. 16, 1997).

U.S. Regulation of the International Securities and Derivatives Markets, § 16.07, PROHIBITED RELATIONSHIPS WITH AFFILIATES

U.S. Regulation of the International Securities and Derivatives Markets
1 Edward F. Greene, Alan L. Beller, Edward J. Rosen, Leslie N. Silverman, Daniel A. Braverman, Sebastian R. Sperber, Nicolas Grabar & Adam E. Fleisher, U.S. Regulation of the International Securities and Derivatives Markets § 16.07 (11th and 12th Editions 2014-2017)
11th and 12th Editions

Click to open document in a browser

The Advisers Act prohibits an investment adviser, whether or not subject to registration requirements, from engaging in any principal [263] or agency

p. 16-59

cross [264] transaction with an advisory client unless at or before the completion [265] of the transaction the adviser provides written disclosure to the client of the capacity in which the adviser is acting and obtains the consent of the client to the transaction. [266] This provision, contained in § 206(3) of the Advisers Act, is also interpreted as applying to transactions involving an affiliate of an investment adviser. The SEC staff has taken the position that the prohibition would also bar an adviser from acting as broker in connection with a sale to its advisory clients of interests in an entity controlled by the adviser (in a situation where a controlled entity is also the seller), [267] and has expressed doubt that a "riskless principal" transaction would not be prohibited by § 206(3) of the Advisers Act. [268] The client's consent to a principal or agency cross transaction need not be in writing, although prudence dictates to the contrary; [269] consent must be made on a transaction-by-transaction basis in the context of a principal transaction, whereas a blanket consent is acceptable in the context of an agency cross transaction. [270] The requirement would appear to apply to advisers (whether

p. 16-59

p. 16-60

subject to registration or not) to hedge funds or other investment vehicles that are not registered under the Investment Company Act in respect of transactions with an adviser's dealer affiliate. The way in which a fund would give the transaction consent in those circumstances is a matter of some uncertainty, but could depend on the structure and manner of governance of the vehicle.

In addition to disclosure of the capacity in which the adviser is acting in relation to the transaction, the adviser may be required to make additional disclosures to the client, depending on the facts and circumstances. In the first pronouncement on the practical application of § 206(3) of the Advisers Act, the director of the former SEC Division of Trading and Exchange stated that the purpose of § 206(3) was to ensure that the client has all information in his possession to determine whether to enter into a transaction. [271] In the director's opinion, the minimum information that must be disclosed (although not necessarily in writing) would include, in addition to the adviser's capacity:

- the cost to the adviser of any security to be sold to the client;
- in the case of securities to be purchased by the adviser from the client, the price at which the securities will be resold by the adviser, if known by the adviser;
- in the case of an agency cross transaction, the total commission to the broker; [272] and
- the best price at which the transaction could be effected by or for the client elsewhere if that price would be more advantageous for the client. [273]

The staff has taken the position that other information necessary to the client's appreciation of the merits of the investment in question may also be required to be disclosed, including for example the tax consequences to the client of owning a security to be purchased from the adviser. [274] Moreover, the staff

p. 16-60

p. 16-61

has suggested that § 206 is intended not only to ensure appropriate disclosure but also to prevent an adviser from "dumping" undesirable securities in client accounts. [275] In any event, the SEC has provided a nonexclusive safe harbor for compliance with § 206(3) in the case of agency cross transactions. [276]

The prohibition of § 206(3) of the Advisers Act is not applicable to a transaction with a broker-dealer that is not acting as an investment adviser in relation to the transaction. [277] Moreover, Rule 206(3)-1 under the Advisers Act provides that a broker-dealer will not be required to obtain a client's consent if it is acting as an investment adviser in relation to the transaction solely by reason of:

- having publicly distributed or made written or oral statements; [278]

p. 16-61

p. 16-62

- having issued written materials or made oral statements that do not purport to meet the investment objectives of any individual client; or
- having issued statistical information that contains no opinion as to the merits of any particular security (or any combination of the foregoing activities).

Like the safe harbor provided in Rule 206(3)-2 under the Advisers Act, the availability of the exemption does not affect the applicability of the other antifraud provisions contained in § 206 of the Advisers Act.

As in the case of many of the substantive provisions of the Advisers Act and related regulations, no-action positions taken by the SEC staff suggest that, subject to satisfaction of certain conditions, a registered adviser located outside the United States need not comply with the limitations of § 206(3) with respect to its non-U.S. clients. [279]

Footnotes

263 While a principal transaction includes any sale of a security to, or purchase of a security from, a client by the adviser or its affiliates, the SEC staff has indicated that an investment adviser would not be engaging in a sale of a security to, or a purchase of a security from, an advisory client if the client grants a security interest to the adviser for purposes of maintaining a margin account, the adviser liquidates securities in the margin account or the adviser transfers or loans securities on behalf of a client to facilitate a short sale. *Goldman, Sachs & Co.* (avail. Feb. 22, 1999).

264 An "agency cross" transaction is one in which an adviser or its affiliate acts as broker on behalf of the other party in a transaction involving an adviser's advisory client. Rule 206(3)-2(b) under the Advisers Act.

265 The SEC has stated that "completion" means settlement of the transaction. SEC Release No. IA-1732 (July 17, 1998).

266 Depending on the nature of the client, other prohibitions or restrictions on transactions with affiliates may apply. Investment companies subject to the Investment Company Act and employee benefit plans subject to ERISA are, for example, subject to numerous restrictions on their ability to deal with their advisers and the affiliated persons of such advisers. Transactions in security futures products may be subject to additional restrictions under the CEA. *See* U.S. REGULATION OF THE INTERNATIONAL SECURITIES AND DERIVATIVES MARKETS, TWELFTH EDITION, DERIVATIVES MARKETS, §§ 2.16 and 4.07.

267 *Haven Investments, Ltd.* (avail. June 1, 1981); *see also Interplan Securities Corp.* (avail. Feb. 23, 1978) (interrelationships between broker-dealer and adviser required that they be collapsed and treated as a single dually registered entity for purposes of § 206(3)).

The SEC has, however, granted no-action relief under § 206(3) of the Advisers Act to permit a registered investment adviser to invest client funds in mutual funds sponsored, advised and distributed by affiliates of the investment adviser. *Merrill Lynch Trust Co., FSB* (avail. July 6, 2000).

268 *See Municipal Investment Group* (avail. Jan. 5, 1989) (agreeing that an adviser may establish a broker-dealer to transmit orders in municipal securities for execution in "riskless principal" transactions with a

clearing broker through an omnibus customer account in the name of the adviser, provided adequate disclosure of commissions and other compensation is made, but declining to agree that riskless principal transactions were not principal transactions within the meaning of § 206(3) of the Advisers Act).

269 SEC Release No. IA-40 (Jan. 5, 1945); *see also Dillon Read & Co., Inc.* (avail. Aug. 6, 1975).

270 SEC Release No. IA-40 (Jan. 5, 1945); *see also Dillon Read & Co., Inc.* (avail. Aug. 6, 1975); *Alan R. Gordon* (avail. July 6, 1982). Rule 206(3)-2 under the Advisers Act allows for the blanket consent of certain agency cross transactions effected in accordance with specified restrictions under the Rule. *See infra* Note 276.

In connection with a court decision regarding the treatment of certain fee-based accounts of broker-dealers under the Advisers Act, the SEC has also adopted a temporary rule, Rule 206(3)-3T under the Advisers Act, that provides an "alternative basis" for complying with the consent requirement for certain principal transactions. *See* SEC Release No. IA-2653 (Sept. 24, 2007); § 16.03[2][b]. However, the rule, which was originally effective through December 31, 2009 but has been extended through December 31, 2016, does not provide relief from any transaction-by-transaction consent requirements (although the rule explicitly allows such consent to be provided orally). *See* SEC Release No. IA-3522 (Dec. 20, 2012); SEC Release No. IA-3984 (Dec. 17, 2014).

271 SEC Release No. IA-40 (Jan. 5, 1945).

272 An adviser would not be acting as a broker under § 206(3) of the Advisers Act if it receives no compensation other than its advisory fee for effecting an agency transaction between advisory clients. SEC Release No. IA-1732 (July 17, 1998).

273 SEC Release No. IA-40 (Jan. 5, 1945). The basis for the additional disclosure would be the general antifraud provisions contained in subsections (1) and (2) of § 206, rather than § 206(3) itself. *See*, *e.g.*, *Grover J. Rees* (avail. June 19, 1976).

274 *Edward D. Jones & Co.* (avail. Oct. 29, 1975); *see also Yankee Management of Boston* (avail. June 5, 1974) (registered investment adviser who is also an employee of a registered broker-dealer must disclose all conflicts of interest arising from the dual registration and association). An obligation to disclose material information regarding a security recommended by an adviser may also arise under the general antifraud prohibition of § 206 of the Advisers Act. *See*, *e.g.*, *Dennis M. Hardaker* (avail. Sept. 17, 1977) (adviser may have obligation to disclose risks of investment in foreign securities recommended by the adviser).

275 *Salomon Brothers Asset Management Inc.* (avail. Oct. 10, 1990) (citing Investment Trusts and Investment Companies: Hearing On S. 3580 Before A Subcomm. Of The Senate Comm. On Banking And Currency, 76th Cong., 3d Sess., 322 (1940)).

276 Rule 206(3)-2 under the Advisers Act. In adopting the safe harbor, the SEC expressly rejected requests that similar relief be extended in the case of principal transactions. Rule 206(3)-2 permits an adviser, subject to satisfaction of certain conditions, to comply with the consent requirement of § 206(3) by obtaining a client's prospective blanket consent to such transactions. The safe harbor is not available for any agency cross transaction in which the adviser, or any person controlling, controlled by or under common control with the adviser, has advised both the buyer and seller, and for these purposes, an investment adviser that exercises investment discretion with respect to a client account will be deemed to have "advised" such client. The rule also requires that the adviser provide specified disclosures to its client, including information concerning the potential for conflicts of interest and price, compensation and other details of agency cross transactions effected in reliance on the rule. Each written disclosure required to be made under the rule must also contain a conspicuous statement that the client's consent may be revoked at any time by written notice to the investment adviser or to any other person relying on the rule. The rule does not derogate from the adviser's general obligations as a fiduciary to act in the best interests of its clients and to obtain the best price and execution for its clients, nor does it otherwise relieve the adviser from the applicability of the other antifraud provisions of § 206 of the Advisers Act.

277 § 206(3) of the Advisers Act. The SEC staff has taken the position that a dual registrant, *i.e.*, a firm registered as both a broker-dealer and an investment adviser, would not be deemed to be acting as an

investment adviser for purposes of § 206(3) if a trade had been directed to the dual registrant by another registered investment adviser. *Morgan, Lewis & Bockius LLP* (avail. Apr. 16, 1997).

278 Rule 206(3)-1(b) under the Advisers Act defines such "publicly" distributed items as those distributed or made to 35 or more persons who pay for access thereto. To avail itself of this exemption, the broker-dealer must include in the written or oral statements in question a statement that if the recipient uses the facilities of the broker-dealer to execute any transaction in a security that was discussed by the broker-dealer, the broker-dealer may be acting as principal or as agent for another person.

279 *The National Mutual Group* (avail. Mar. 8, 1993); *see also Murray Johnstone Holdings Ltd.* (avail. Oct. 7, 1994); *Mercury Asset Management* (avail. Apr. 16, 1993); *Unibanco* (avail. July 28, 1992); *see* Hedge Fund Release.

U.S. Regulation of the International Securities and Derivatives Markets, § 16.08, GENERAL ANTIFRAUD PROVISIONS

U.S. Regulation of the International Securities and Derivatives Markets
1 Edward F. Greene, Alan L. Beller, Edward J. Rosen, Leslie N. Silverman, Daniel A. Braverman, Sebastian R. Sperber, Nicolas Grabar & Adam E. Fleisher, U.S. Regulation of the International Securities and Derivatives Markets § 16.08 (11th and 12th Editions 2014-2017)
11th and 12th Editions

In addition to the specific prohibition of § 206(3) of the Advisers Act against dealing with an advisory client, § 206 contains the general antifraud provisions of the Advisers Act. [280] Although originally directed solely at registered investment advisers, § 206 is now applicable to all persons within the statutory definition of "investment adviser," whether or not registered or required to be registered. In the case of advisers located outside the United States, no-action positions taken by the SEC staff suggest that the specific prohibitions under § 206(3) are not applicable with respect to a foreign adviser's non-U.S. clients, subject to conditions substantially similar to those set out in *Unibanco*, except to the extent that any otherwise prohibited practice involves conduct or has effects in the United States or has effects on the adviser's U.S. clients; however, the general antifraud provisions apply to a foreign adviser's interactions

p. 16-63

with all its clients. [281] In response to the court decision vacating the SEC's adoption of a rule that treated investors in hedge funds and other pooled investment vehicles as "clients" for purposes of § 206, the SEC adopted Rule 206(4)-8 under the Advisers Act, which prohibits advisers to such vehicles from defrauding investors and prospective investors in such vehicles. [282]

Although similar in wording to other antifraud provisions of the federal securities laws, the antifraud prohibitions of the Advisers Act have a somewhat different application. For example, unlike § 10(b) of the Exchange Act and Rule 10b-5 thereunder, [283] § 206 of the Advisers Act extends beyond the purchase or sale of a security to encompass the entire relationship of an adviser with its client. In addition, *scienter* [284] is not an element necessary to prove a violation of § 206. [285] However, § 206 has been interpreted as not providing a private right of action for damages, except for rescission and restitution of fees under an advisory agreement, against an adviser for violating its obligations under the Advisers Act. [286]

The prohibitions of § 206 have been applied in a variety of circumstances. The U.S. Supreme Court has found that the provision is violated if an adviser engages in "scalping," that is, recommending purchases of a security that the adviser purchased for its own account shortly before making the recommendation. [287] The SEC staff has also taken the position that § 206 may be violated if an adviser receives both an advisory fee and a fee for advising an investment company in which its clients invest, unless the fees are netted or the adviser's services fully justify the additional cost. [288] Similarly, the staff has stated that

p. 16-63

p. 16-64

"hedge" clause provisions included in advisory agreements to limit the liability of the adviser to cases of negligence or intentional misconduct may constitute a breach of the adviser's fiduciary obligations to its clients by suggesting that a client may have waived a nonwaivable cause of action. [289] Many investment advisers, however, continue to include such clauses in their advisory contracts.

The staff has used § 206 to regulate the method by which investment advisers can aggregate client orders for the purchase and sale of securities. [290] The staff has also used § 206 to hold investment advisers accountable for failing to disclose a number of practices and issues, including market timing and late trading arrangements, conflicts of interest, violations of codes of ethics, principal transactions, fees and allocations of expenses. [291]

The staff has even addressed the matter of time limitations on the ability of an advisory client to terminate its contract. In *Robert D. Brown Investment Counsel, Inc.*, the staff stated that a provision in an advisory contract permitting clients to terminate only on the contract anniversary date was not consistent with the adviser's fiduciary duty, since the provision would require a client to accept and pay for services even when the services were unsatisfactory. [292]

p. 16-64

p. 16-65

At least one court has refused to terminate an advisory contract on the basis of fraud and violation of fiduciary duty in the context of a complex transaction that was carefully negotiated for the protection of many interested parties. [293] While the court agreed that the adviser owed a fiduciary duty to the plaintiffs and as an equitable principle a party to whom a fiduciary duty is owed may terminate its relationship with that fiduciary as of right, notwithstanding contractual provisions that provide otherwise, it held that "carefully negotiated, highly specific rights should not be overridden by a court armed only with general equitable principles, particularly at the behest of entities who may not be the only ones to whom the fiduciary is obligated and who may not have the greatest economic stake in the matter." [294]

In addition to the practices addressed in responses to requests for no-action relief and enforcement actions, the SEC is also authorized to address specific acts or practices that violate § 206 through rulemaking. [295] The SEC has exercised this authority by adopting rules, applicable to registered investment advisers only, that govern compliance programs, advertising practices, custody of client funds and securities, client solicitations and disclosure of an adviser's disciplinary history. [296] Again, the SEC staff has taken the position that a foreign adviser need not, subject to satisfaction of certain conditions, comply with these rules with respect to its non-U.S. clients. [297]

[1] Advertisements

p. 16-65

p. 16-66

Rule 206(4)-1 under the Advisers Act prescribes limits on the ability of registered investment advisers to advertise. [298] In addition to including a general prohibition against the use of any advertisement "which contains any untrue statement of a material fact, or which is otherwise misleading," [299] the rule contains a number of specific proscriptions. The principal matter covered by the rule is an adviser's advertisement of its investment results. The rule prohibits a registered adviser from referring, directly or indirectly, to past "specific recommendations" [300] of the adviser that were or would have been profitable for any person, unless the adviser satisfies the conditions of the rule. Those conditions require that the adviser set out or offer to furnish a list of all recommendations made by the adviser for the most recent 12-month period that contains a cautionary legend and specifies: (i) the name of the security, (ii) the recommendation and related details, such as the market price of the security when recommended, (iii) the price at which the recommendation was to be followed and (iv) the current market price of the security. [301]

p. 16-66

p. 16-67

In addition to satisfying these conditions, performance data must also not be so misleading as to violate the general antifraud prohibition of the rule. [302] The SEC staff has repeatedly stated that information concerning performance would be misleading:

> if it implies something about, or is likely to cause an inference to be drawn concerning, the experience of advisory clients, the possibilities of a prospective client's having an investment experience similar to that which the performance data suggest was enjoyed by the adviser's clients, or the adviser's competence, when there are additional facts which the adviser knew or ought to have known, which if also disclosed would prevent the implication from arising or the

inference from being drawn. [303]

An advertisement thus may not, for example, include performance figures for a "nonrepresentative" sample of accounts or provide comparisons of an adviser's performance with any other index, unless the differences between the adviser's performance as presented and the index are explained in the presentation. [304] The staff has also questioned the use of advertisements showing percentage gains over time as presenting a misleading view of actual gains realized

p. 16-67

p. 16-68

(particularly in the case of low-priced securities), the use of a hypothetical portfolio [305] and the use of performance data that does not reflect deductions for all charges for advisory fees and brokerage and other commissions. [306] The staff has, however, taken a no-action position with respect to disclosure of gross performance results to be presented to certain sophisticated clients (including high net worth individuals, pension funds and institutional clients) in "one-on-one" client presentations, if the adviser makes certain disclosures to the client concerning its fees. [307] The staff has also taken a narrow no-action position with respect to disclosure of gross performance results if the adviser also presents net performance results with equal prominence in a format designed to facilitate ease of comparison and the advertisement is not otherwise misleading. [308]

The staff has likewise taken no-action positions with respect to newly registered investment advisers that present performance information for accounts managed by another advisory entity so long as the persons responsible for investment management of those accounts at the other advisory entity are the same persons who will be responsible for investment management at the new firm. Such positions are typically based upon representations that:

- the person or persons who manage accounts at the current adviser were also those primarily responsible for achieving the prior performance at the other adviser;
- the accounts managed at the predecessor advisory entity are similar to the accounts currently under management;

p. 16-68

p. 16-69

- all similarly managed accounts are included in the performance information; and
- the advertisement discloses that the performance results were from accounts managed at another entity. [309]

Rule 206(4)-1 also prohibits the use of any advertisement that refers, directly or indirectly, to any testimonial concerning the adviser or any of its services [310] or that states that any service will be provided free of charge unless the service will in fact be furnished free of charge and without any condition or obligation. [311] Finally, under the rule an adviser may not in any advertisement state that any graph, chart, formula or other device can, in and of itself, be used to determine which securities to buy or sell or when to buy or sell them or can assist any person in making those determinations, unless the limitations of the device in question are also set out. [312]

[2] Custody of Client Funds and Securities

A registered investment adviser that has custody of client funds or securities is subject to special limitations prescribed in Rule 206(4)-2 under the Advisers Act, which prohibits the adviser from taking any action with respect to

p. 16-69

p. 16-70

a client's property unless the conditions of the rule are satisfied. [313] The SEC staff has taken the position that the rule's requirements are not applicable to the non-U.S. clients of a foreign adviser, subject to the adviser's compliance with certain conditions. [314]

"Custody" for purposes of Rule 206(4)-2 means "holding, directly or indirectly, client funds or securities, or having any authority to obtain possession of them." [315] Rule 206(4)-2 also includes the following examples of activities that constitute custody:

- possession of client funds or securities (but not of checks drawn by clients and made payable to third parties) unless the adviser receives them inadvertently and returns them to the sender promptly but in any case within three business days of receiving them; [316]
- any arrangement (including a general power of attorney) under which the adviser is authorized or permitted to withdraw client funds or securities maintained with a custodian upon the adviser's instruction to the custodian; [317] and

p. 16-70

p. 16-71

- any capacity (such as general partner of a limited partnership, managing member of a limited liability company or a comparable position for another type of pooled investment vehicle, or trustee of a trust) that gives the adviser or its supervised person legal ownership of or access to client funds or securities. [318]

The SEC amended the custody rules in 2009 to increase the obligations of advisers holding client assets. [319] An adviser is deemed to have custody of any client assets held directly or indirectly by a "related person" in connection with advisory services provided by the adviser to the client. [320] A "related person" for purposes of Rule 206(4)-2 means any person, directly or indirectly, "controlling or controlled by" or that is "under common control with" the adviser. [321]

To comply with Rule 206(4)-2, a registered adviser who has custody of client funds and securities must maintain them with a "qualified custodian." "Qualified custodians" under Rule 206(4)-2 include the types of financial institutions that clients and advisers ordinarily use for custodial services, such as banks and savings associations and registered broker-dealers. [322] The term also includes registered futures commission merchants in the case of security futures or other securities incidental to transactions in commodity futures and options thereon, and foreign financial institutions that customarily hold customer assets, so long as the customer assets are held in segregated customer accounts. [323]

The adviser must have a reasonable belief that the qualified custodian provides account statements at least quarterly to the adviser's clients whose funds and securities the custodian holds. [324] If a client does not wish to receive

p. 16-71

p. 16-72

custodial reports directly, it may choose to have an "independent representative" receive account statements on its behalf. [325]

The rules require that advisers with custody of client assets undergo a surprise examination at least once during each calendar year by an independent public accountant to verify client assets. [326] However, an adviser will not be subject to the surprise examination requirement if it is deemed to have custody of client assets either (i) solely as a result of its authority to deduct advisory fees from client accounts, [327] or (ii) solely because of custody by a related person from whom it is "operationally independent." [328] The accountant must notify the SEC within one business day of the finding of any material discrepancies during the course of the examination. [329]

An adviser or a related person that maintains client funds as a qualified custodian is subject to additional restrictions, including a requirement to obtain within six months of becoming the qualified custodian and each year thereafter an internal control report by independent public accountants. [330]

Advisers need not comply with the custody rules with respect to clients that are registered investment companies. [331] Advisers also need not comply with the notice to clients and account statement requirements of the rule and are deemed to have complied with the surprise independent verification of the client assets for which the adviser has custody with respect to any pooled investment vehicle that (i) is audited at least annually and (ii) distributes its audited GAAP financial statements to all limited partners (or other beneficial owners) within 120 days of the end of its fiscal year. [332]

[3] Client Solicitation

p. 16-72
p. 16-73

For many years, the SEC staff took the position that paid client solicitation was a practice so fraught with conflicts of interest that it was *per se* fraudulent and not susceptible of cure through disclosure. [333] Such arrangements were approved by the staff in no-action letters only in cases where the solicitor was an employee or otherwise under the control of a registered adviser. [334] With the adoption of Rule 206(4)-3 under the Advisers Act, the SEC clarified its approach to payment of referral fees, which the rule prohibits except in limited circumstances upon compliance with various disclosure and supervisory obligations set out in the rule. Rule 206(4)-3 is available only to registered investment advisers and, accordingly, would be unavailable to an adviser not otherwise subject to registration. [335] The SEC staff has taken the position that the rule's requirements are not applicable to the non-U.S. clients of an adviser located outside the United States, subject to the adviser's compliance with certain conditions. [336] The rule also does not apply to payments made to a broker or other person paid to solicit investors in a fund. SEC guidance made clear that Rule 206(4)-3 applies to an adviser's solicitation of *clients*, not investors. [337] The rule would also not apply to a referral program where the individuals who access the program are provided with a list of randomly selected advisers and the annual charge is a flat fee unrelated to the number of referrals to, or clients obtained by, the adviser. [338]

p. 16-73
p. 16-74

Rule 206(4)-3 applies only to payment of cash referral fees and would not extend, for example, to compensation paid in the form of directed brokerage. [339] Such compensation would continue, in the absence of relief to the contrary, to be governed by the earlier positions of the staff finding such arrangements to be severely restricted, if not altogether prohibited, under the antifraud provisions of the Advisers Act.

[4] Disclosure of Disciplinary History

Although the Advisers Act imposes no special requirements concerning competence or financial responsibility of investment advisers, Part 2 of Form ADV does require a registered adviser to disclose to its clients any material financial, legal or disciplinary events. [340] Such disciplinary disclosure is subject to the "Brochure Rule" discussed in § 16.05. Any subsequent reportable events must be communicated promptly to all existing clients. If an adviser has custody of client funds and securities, it must also inform the client of any matter that could impair its ability to meet contractual commitments.

[5] Proxy Voting

p. 16-74
p. 16-75

Rule 206(4)-6 under the Advisers Act addresses an adviser's fiduciary obligation to its clients when the adviser has authority to vote their proxies. [341] The rule provides that it is a "fraudulent, deceptive or manipulative act, practice or course of business" within the meaning of § 206(4) of the Advisers Act for a registered investment adviser to exercise voting authority with respect to client securities unless:

- the adviser has adopted and implemented written policies and procedures that are reasonably designed to ensure that the adviser votes proxies in the best interest of its clients and that describe how the adviser addresses material conflicts between its interests and those of its clients with respect to proxy voting; [342]

- the adviser describes its voting procedures to its clients and provides copies on request; and
- the adviser discloses to its clients how they may obtain information on the adviser's vote.

[6] "Pay to Play" Regulations

Following a number of scandals in which investment advisers allegedly made campaign contributions to elected officials or others with the intention of influencing their selection of public pension fund asset managers, the SEC adopted new rules effectively banning the influence of so-called "pay to play" practices by investment advisers, significantly curtailing an adviser's ability to make political contributions to elected officials who have a decision making role over public pension fund assets. [343]

Rule 206(4)-5 under the Advisers Act directly prohibits an investment adviser from receiving any compensation for advisory services provided to a government entity, including any public pension plan, for two years after the

p. 16-75

p. 16-76

advisory firm or certain of its executives or employees makes a contribution to certain elected officials, candidates or political action committees. [344] The rule encompasses donations made to any "official" (*e.g.*, an incumbent, candidate, or successful candidate for elective office in a U.S. state or political subdivision of a state) with a responsibility for or influence over the selection of an investment adviser. [345] There is, however, a *de minimis* exception for contributions up to $350 per candidate per election, if the donor is eligible to vote for the candidate, or up to $150, if the donor is ineligible. [346] Furthermore, investment advisers are prohibited from "bundling" political contributions, which means soliciting or coordinating contributions from others on behalf of an elected official or political action committee. [347]

Lastly, Rule 206(4)-5 prohibits an investment adviser from hiring a third-party placement agent, such as a consultant, solicitor or other intermediary, to attempt to obtain government business on its behalf, unless the third party is itself an SEC-registered investment adviser or broker-dealer subject to similar "pay to play" regulations. [348]

The SEC has adopted a few amendments to the recently enacted pay to play rules in response to the Dodd-Frank Act:

- The scope of the pay to play rules has been expanded to cover Exempt Reporting Advisers and foreign private advisers; and
- The rule adds municipal advisers to the categories of "regulated persons" who are permitted to solicit advisory business from government entities on their own behalf and on behalf of other advisers (*i.e.*, third-party solicitation). [349]

[7] Compliance Programs

Rule 206(4)-7 under the Advisers Act requires all registered investment advisers to create and maintain compliance programs. [350] In particular, the rule requires advisers to:

p. 16-76

p. 16-77

- adopt and implement policies and procedures designed to prevent violations of the federal securities laws;
- review the policies and procedures at least annually for adequacy and effectiveness of implementation and maintain records of the reviews in accordance with the recordkeeping rules under the Advisers Act; and
- designate a chief compliance officer responsible for administering the policies and procedures.

While the rule does not require compliance programs to contain any specific elements, the following issues, at a minimum, should be addressed to the extent that they are applicable to the adviser:

- portfolio management processes (*e.g.*, processes for allocating investment opportunities and maintaining consistency of portfolios with clients' investment objectives);
- trading practices (*e.g.*, procedures for best execution, soft dollar arrangements and allocating aggregated trades among clients);
- proprietary trading by the adviser and personal trading by supervised persons;
- accuracy of disclosures to investors, clients and regulators (including account statements and advertisements);
- safeguarding client assets;
- accurate creation and protective storage of records;
- marketing advisory services (including the use of solicitors);
- processes used to value client holdings and assess client fees based on those valuations;
- safeguarding client privacy; and
- business continuity plans. [351]

p. 16-77
p. 16-78

Compliance policies and procedures of advisers need not be contained in one document. In addition, entities that are registered as both investment advisers and broker-dealers are not required under Rule 206(4)-7 to have separate compliance policies and procedures for their advisory and broker-dealer businesses.

[8] Code of Ethics

Rule 204A-1 under the Advisers Act requires all registered investment advisers to adopt and enforce a code of ethics detailing standards of conduct for advisory personnel. [352] An adviser's code of ethics must include the following minimum provisions:

- standards of business conduct that reflect the fiduciary obligations of the adviser and its supervised employees;
- requirements to comply with federal securities laws;
- reporting of personal securities transactions conducted by "access persons" and review of such transactions; [353]

p. 16-78
p. 16-79

- safeguards for material nonpublic information about client transactions;
- pre-approval of certain transactions;
- reporting of code violations; and
- review and enforcement of the code by the adviser's chief compliance officer, to whom personal securities transaction reports will be submitted. [354]

Footnotes

280 Section 206 of the Advisers Act provides that it is unlawful for any investment adviser using U.S. jurisdictional means:

> (1) to employ any device, scheme, or artifice to defraud any client or prospective client;
>
> (2) to engage in any transaction, practice, or course of business which operates as a fraud or deceit upon any client or prospective client;
>
> (3) to engage in any act, practice, or course of business which is fraudulent, deceptive, or manipulative.

290 The staff has agreed to permit aggregation if (i) the practice of aggregating orders will be fully disclosed in the adviser's Form ADV and separately to each of the adviser's existing clients and (ii) no advisory client, including those clients in which the adviser or person associated with the adviser has a direct or indirect beneficial interest, will be favored by the adviser over any other client, and each client who participates in an aggregated order will participate at the average share price, with all transaction costs shared on a *pro rata* basis. *SMC Capital, Inc.* (avail. Sept. 5, 1995); *see also SEC v. Moran*, 922 F. Supp. 867, 885–86 (S.D.N.Y. 1996) (concluding that the defendant violated § 206 of the Advisers Act by allocating stock to his personal and family accounts at a lower price than that paid by his clients).

291 *See, e.g., In re JPMorgan Chase Bank, N.A. and J.P. Morgan Securities LLC*, SEC Release No. IA-4295 (Dec. 18, 2015) (failure to disclose conflict in investing client funds in firm's proprietary products); *In re JH Partners, LLC*, SEC Release No. IA-4276 (Nov. 23, 2015) (failure to disclose adviser's loans that were senior interests to fund clients' portfolio companies); *In re Fenway Partners, LLC, et al.*, SEC Release No. IA-4253 (Nov. 3, 2015) (failure to disclose change in fee arrangements that ended an offsetting arrangement, thereby increasing fees); *In re Guggenheim Partners Investment Management, LLC*, SEC Release No. IA-4163 (Aug. 10, 2015) (failure to disclose a loan from a client to an executive of the adviser in violation of code of ethics); *In re Parallax Investments, LLC, et al.*, SEC Release No. IA-4159 (Aug. 6, 2015) (failure to disclose or receive consent for principal transactions); *In re Banc of America Capital*

Management, LLC, SEC Release No. IA-2355 (Feb. 9, 2005) (market timing and late trading); *In re Columbia Management Advisors, Inc.*, SEC Release No. IA-2531 (Feb. 9, 2005) (market timing and late trading).

292 *Robert D. Brown Investment Counsel, Inc.* (avail. July 19, 1984). The *Brown* letter is by its terms limited to restrictions on termination of advisory contracts for the provision of advice and services tailored to the investment objectives of particular clients, and the staff has not addressed whether the same conclusion would be reached, as a result of an adviser's fiduciary obligations or otherwise, in the case of an advisory contract for the provision of impersonal services. *See also BISYS Mutual Fund Asset Allocation Program* (avail. Sept. 2, 1999) (expressing the view that, although the imposition of fees upon termination of an advisory relationship may be inconsistent with the adviser's fiduciary duty, a contingent fee paid to an adviser by a client for services previously rendered to the client would not violate § 206 solely because such fee was payable upon the termination of a client's investment in the program, if at all); *Constellation Financial Management LLC* (avail. Jan. 9, 2003) (reaching the same conclusion as in BISYS Mutual Fund letter in a substantively similar contingent fee scenario); *supra* Notes 252–254 and accompanying text.

293 *Beacon Hill CBO II, Ltd. v. Beacon Hill Asset Management Limited Liability Company*, 249 F. Supp. 2d 268 (S.D.N.Y. 2003).

294 *Beacon Hill CBO II, Ltd. v. Beacon Hill Asset Management Limited Liability Company*, 249 F. Supp. 2d 268, 275 (S.D.N.Y. 2003).

295 § 206(4) of the Advisers Act.

296 *See* SEC Release No. IA-2204 (Dec. 17, 2003); SEC Release No. IA-1633 (May 15, 1997); *see also* SEC Release No. IA-1406 (Mar. 16, 1994) (proposing rules regarding suitability of investment advice). Although no further action has been taken with respect to this proposed rulemaking regarding suitability, the SEC has considered recommendations of unsuitable investments to constitute a breach of an adviser's fiduciary duty in certain circumstances. *See In the Matter of Grey Financial Group, Inc.*, SEC Release No. IA-4094 (May 21, 2015).

297 *The National Mutual Group* (avail. Mar. 8, 1993); *see also Murray Johnstone Holdings Ltd.* (avail. Oct. 7, 1994); *Mercury Asset Management* (avail. Apr. 16, 1993); *Unibanco* (avail. July 28, 1992); Hedge Fund Release.

298 Rule 206(4)-1(b) defines "advertisement" as including:

> any notice, circular, letter or other written communication addressed to more than one person, or any notice or other announcement in any publication or by radio or television, which offers (1) any analysis, report, or publication concerning securities, or which is to be used in making any determination as to when to buy or sell any security, or which security to buy or sell, or (2) any graph, chart, formula or other device to be used in making any determination as to when to buy or sell any security, or which security to buy or sell, or (3) any other investment advisory service with regard to securities.

Rule 204-2 under the Advisers Act requires advisers to maintain all advertisements, as well as supporting materials (*e.g.*, with respect to performance data included in any advertisement), for a period of five years from the end of the fiscal year in which the advertisement was published or otherwise disseminated.

299 Rule 206(4)-1(a)(5) under the Advisers Act.

300 In this regard, in 1977 the SEC staff stated its position that the recommendations referred to in the rule are recommendations made by the adviser as an adviser during a period of not less than one year in which the adviser was either registered as an investment adviser or, if the adviser was not registered because of an

applicable exemption from registration, a period during which the adviser made his recommendations for compensation. *John Warner Seder* (avail. June 10, 1977). Thus, the rule would not be complied with by the furnishing of information about the adviser's personal transactions and those of his family trust. *John Warner Seder* (avail. June 10, 1977); *see also Conway Asset Management, Inc.* (avail. Jan. 27, 1989).

301 Rule 206(4)-1(a)(2) under the Advisers Act. The SEC staff has stated that it would not recommend enforcement action under the rule where an adviser discussed specific securities bought and sold in periodic reports if: (i) the selection criteria were objective and nonperformance based, (ii) the same selection criteria would be used for each quarter for each particular investment category, (iii) reports would not discuss the amount of profit or loss of any particular security recommended by the adviser and (iv) the adviser maintained certain records relating to the selected securities. *Franklin Management, Inc.* (avail. Dec. 10, 1998).

302 In addition to the SEC's requirements under the Advisers Act, FINRA-member broker-dealers distributing marketing material on behalf of hedge funds must comply with NASD Rule 2210, which governs members' communications with the public, even if a nonmember, such as a hedge fund adviser, prepared the marketing material. *See also* Interpretive Letter from Gary L. Goldsholle, NASD, to Michael D. Udoff, Securities Industry Association (Oct. 2, 2003) (interpretive guidance concerning the sale of hedge funds and NASD Rule 2210).

303 *See*, *e.g.*, *Dow Theory Forecasts, Inc.* (avail. Aug. 26, 1983) and letters cited therein; *see also Clover Capital Management, Inc.* (avail. Oct. 28, 1986) (recognizing that whether an advertisement is misleading may also depend on the sophistication of the prospective client).

304 *See*, *e.g.*, *In re Harvest Financial Group, Inc.*, SEC Release No. IA-1155 (Feb. 21, 1989); *Covato/Lipsitz, Inc.* (avail. Oct. 23, 1981). In *Clover Capital Management, Inc.*, the SEC staff enumerated a nonexclusive list of 11 specific practices relating to advertisements of model or actual results that in its view would be deemed to be inappropriate under Rule 206(4)-1(a)(5), including failure to disclose: (i) the effect of material market or economic conditions on the results presented, (ii) the extent to which results reflected reinvestment of earnings, (iii) limitations inherent in model results or (iv) that the adviser's clients experienced investment performance materially different from that portrayed in the model. *Clover Capital Management, Inc.* (avail. Oct. 28, 1986); *see also Investment Company Institute* (avail. Aug. 24, 1987). Whether a successor to an adviser may use the adviser's performance data may also raise an issue under Rule 206(4)-1(a)(5). *Great Lakes Advisors, Inc.* (avail. Apr. 3, 1992).

305 *Donaldson, Lufkin & Jenrette Securities Corp.* (avail. Mar. 2, 1977); *S.H. Dike & Co., Inc.* (avail. Apr. 20, 1975); *see also Morrill-Stanfill & Co.* (avail. Apr. 13, 1978).

306 *See*, *e.g.*, *Investment Company Institute* (avail. Aug. 24, 1987) (confirming that although advisory fees must be reflected, custodian fees for safe-keeping client funds and securities need not be reflected); *In the Matter of Bond Timing Services, Inc.*, SEC Release No. IA-920 (July 23, 1984) (administrative proceeding for failure of investment adviser to include in advertisements of annualized returns information regarding advisory fees, sales loads and transfer fees); *Morrill-Stanfill & Co.* (avail. Apr. 13, 1978) (stating that account performance figures not reflecting commissions, advisory fees and other expenses and charges may convey an impression or give rise to an inference concerning the experience of existing accounts that is misleading); *see also Securities Industry Association* (avail. Nov. 27, 1989) (providing temporary no-action relief permitting deduction of a model fee from advertisements of historical net performance data).

307 *Investment Company Institute* (avail. Sept. 23, 1988); *see also Anametrics Investment Management* (avail. May 5, 1977) (among the factors relevant in determining whether an advertisement is false or misleading is the sophistication of the prospective client).

308 *Association for Investment Management and Research* (avail. Dec. 18, 1996); *see also J.P. Morgan Investment Management Inc.* (avail. May 7, 1996) (adviser may advertise the composite performance of accounts for which it employs a particular investment strategy by deducting a model fee equal to the highest fee charged to any account employing that strategy during the performance period).

309 *See Horizon Asset Management, LLC* (avail. Sept. 13, 1996); *Bramwell Growth Fund* (avail. Aug. 7, 1996).

The SEC staff has also taken the position that § 206 of the Advisers Act would not prohibit mutual funds from including in their prospectuses, advertisements or sales literature information about the performance of private accounts or other registered investment companies with the same adviser that have similar investment objectives, policies and strategies, as long as the information was not presented in a misleading manner or as a substitute for the funds' own performance. *See Nicholas-Applegate Mutual Funds* (avail. Feb. 7, 1997); *ITT Hartford Mutual Funds* (avail. Feb. 7, 1997); *GE Funds* (avail. Feb. 7, 1997). The SEC staff has stated that it would not recommend enforcement action under § 206 if a newly registered open-end investment company used performance results from an existing class of shares of a separate investment company in its prospectus, advertisements or sales literature, where such shares were spun off to the newly registered entity pursuant to a reorganization. *Janus Adviser Series* (avail. Aug. 28, 2000).

310 Rule 206(4)-1 under the Advisers Act; *see also Multi-Financial Securities Corp.* (avail. Nov. 9, 1995); *Gallagher and Associates, Ltd.* (July 10, 1995); *Amherst Financial Services* (avail. May 23, 1995). The SEC staff has held that a partial client list that merely identifies certain clients of an investment adviser is not a testimonial. *Cambiar Investors, Inc.* (avail. Aug. 28, 1997). In addition, the staff has indicated that an investment adviser rating system would not be subject to enforcement under Rule 206(4)-1(a)(1), where the system does not emphasize favorable or ignore unfavorable responses, the rating represents the responses in a fair manner, the questionnaire is unbiased in presentation and the rating system operator does not perform any subjective analysis of the results. *See DALBAR, Inc.* (avail. Mar. 24, 1998).

311 Rule 206(4)-1(a)(4) under the Advisers Act.

312 *See*, *e.g.*, *S.H. Dike & Co., Inc.* (avail. Apr. 20, 1975).

313 Voluntary registration under the Advisers Act will subject the adviser to all of the requirements of Rule 206(4)-2 under the Advisers Act. *Brighton Pacific Realty Asset Management* (avail. Feb. 10, 1992).

314 *The National Mutual Group* (avail. Mar. 8, 1993); Hedge Fund Release.

315 Rule 206(4)-2(d)(2) under the Advisers Act.

316 In amending Rule 206(4)-2, the SEC made clear that an adviser has custody when it has possession of client funds or securities, even briefly. *See* SEC Release No. IA-2176 (Sept. 25, 2003); *see also New England Asset Management Corp.* (avail. May 1, 1976) (custody exists where an adviser received client funds and securities on opening an advisory account, even though the funds were immediately turned over to a custodian); *Piedmont Financial Company, Inc.* (avail. May 30, 1990); *Denver Investment Advisers* (avail. Jan. 10, 1986). The staff has also found custody to exist where an adviser did not generally retain physical possession of client property but received nominal amounts of client funds as a result of interest rate changes on commercial paper. *Omni Management Corp.* (avail. May 10, 1979).

317 An adviser authorized to deduct advisory fees or other expenses directly from a client's account has access to, and therefore has custody of, the client funds and securities in that account. SEC Release No. IA-2176 (Sept. 25, 2003). Note, however, that for purposes of Form ADV, an adviser that has custody solely because it deducts advisory fees or other expenses may answer "no" to Item 9 of the Form, which asks whether the adviser has custody of client funds or securities. SEC Release No. IA-2176 (Sept. 25, 2003).

An adviser's authority to issue instructions to a broker-dealer or a custodian to effect or to settle trades does not constitute custody. SEC Release No. IA-2176 (Sept. 25, 2003); *see also Piette and Associates, Ltd.* (avail. Sept. 17, 1981) (custody will not result if an adviser is authorized to effect client transactions only on a "delivery versus payment" basis). The SEC staff has determined that an adviser does not have custody solely by reason of its use of a registered clearing agency, such as The Depository Trust Company, where client securities are transferred into nominee name in denominations reflecting their respective ownership interests in a security. *Gardner and Preston Moss, Inc.* (avail. Feb. 18, 1983); *see also Newton Growth Fund* (avail. June 13, 1984).

318 Rule 206(4)-2(d)(2) under the Advisers Act.

319 SEC Release No. IA-2968 (Dec. 30, 2009).

320 Rule 206(4)-2(d)(2) under the Advisers Act.

321 Rule 206(4)-2(d)(7) under the Advisers Act.

322 Rule 206(4)-2(d)(6) under the Advisers Act. The adviser must notify the client in writing of the qualified custodian's name, address and the manner in which the client's funds or securities are maintained, as well as changes to this information. Rule 206(4)-2(a)(2) under the Advisers Act.

323 Rule 206(4)-2(d)(6) under the Advisers Act. The rule contains special provisions for custody of mutual fund shares and privately offered uncertificated securities. *See* Rule 206(4)-2(b)(1) and (2). In the case of the former, an adviser may use a mutual fund transfer agent in lieu of a qualified custodian. In the case of the latter, an adviser is excepted from the rule if ownership of the securities is recorded only on the books of the issuer (or a transfer agent) in the name of the client and transfers are subject to prior consent of the issuer or the holders of the issuer's outstanding securities. This exception applies for privately offered uncertificated securities held for the account of a limited partnership only if the limited partnership is audited annually and its audited financial statements are distributed to its investors as described in the rule. *See* SEC Release No. IA-2176 (Sept. 25, 2003).

324 Rule 206(4)-2(a)(3) under the Advisers Act.

325 Rule 206(4)-2(a)(7) under the Advisers Act. An "*independent representative*" means a person that acts for the advisory client, is not in a control relationship with the adviser and does not have, and has not had within the past two years, a material business relationship with the adviser. Rule 206(4)-2(d)(4) under the Advisers Act. With respect to pooled investment vehicles for which the adviser acts as general partner (or in a similar capacity), the rule requires that account statements be sent directly to the investors in the vehicle.

326 Rule 206(4)-2(a)(4) under the Advisers Act.

327 Rule 206(4)-2(b)(3) under the Advisers Act.

328 Rule 206(4)-2(b)(6) under the Advisers Act. An adviser is presumed not to be "operationally independent" from a related person unless certain conditions are met: (i) client assets in custody of the related person may not be subject to claims of the adviser's creditors, (ii) adviser personnel may not have authority over the client assets of which the related person has custody, (iii) advisory personnel and personnel of the related person who have access to client advisory assets may not be under common supervision, and (iv) advisory personnel may not hold any position with the related person or share premises with the related person. Rule 206(4)-2(d)(5) under the Advisers Act.

329 Rule 206(4)-2(a)(4)(ii) under the Advisers Act.

330 Rule 206(4)-2(b)(6) under the Advisers Act.

331 Rule 206(4)-2(b)(5) under the Advisers Act.

332 Rule 206(4)-2(b)(4) under the Advisers Act.

333 *See*, *e.g.*, *Argus Securities Management Corp.* (avail. July 1, 1971).

334 *See*, *e.g.*, *Rhodes, King, Ruman & Farber* (avail. Nov. 2, 1972); *Mericka & Co., Inc.* (avail. July 28, 1972).

335 Rule 206(4)-3 under the Advisers Act generally provides that a registered investment adviser may pay a cash referral fee to a person who is not subject to a statutory disqualification specified in § 203 of the Advisers Act (or exempted from application of the disqualification) pursuant to a written agreement that, in the case of an unaffiliated solicitor or an adviser providing other than impersonal advisory services: (i) describes the solicitor's activities and related compensation, (ii) contains an undertaking by the solicitor to perform its activities in accordance with the adviser's instructions and the requirements of the Advisers Act, and (iii) requires the solicitor to deliver to any prospective client a copy of the adviser's "brochure" (*see* § 16.05) and a separate disclosure document describing the solicitor's relationship with the adviser. An adviser relying on the rule is also required to keep certain records relating to such arrangements and to disclose such arrangements in its "brochure." Upon application to the SEC, the requirement that the solicitor not be subject to certain statutory disqualifications may in appropriate circumstances be waived. *See, e.g., Oppenheimer & Co.* (avail. June 5, 1992); *see also Merchants Capital Management* (avail. Oct. 4, 1991) (no-action relief denied where required written contract would not be executed by each soliciting employee).

336 *The National Mutual Group* (avail. Mar. 8, 1993); Hedge Fund Release.

337 *See Mayer Brown LLP* (avail. July 28, 2008).

338 *International Association for Financial Planning* (avail. June 1, 1998); *see also National Football League Players Association* (avail. Jan. 25, 2002) (Rule 206(4)-3 would not apply to the party arranging and operating a program whereby individuals were provided with a list of pre-screened investment advisers that were charged only a flat fee for participation in the program).

339 *See supra* Note 116; § 16.09. *But see Lincoln National Investment Management* (avail. Mar. 26, 1992) (in granting no-action relief under Rule 206(4)-3 with respect to solicitors not receiving cash compensation, SEC staff relied in part on representation that no noncash compensation would be paid to solicitors).

340 When the SEC released its new Form ADV requirements, it withdrew Rule 206(4)-4 under the Advisers Act, which required an adviser to disclose its disciplinary history, because it was duplicative of the new Form ADV requirements. SEC Release No. IA-3060 (July, 28, 2010). Rule 206(4)-4 created a rebuttable presumption that various events were "material" within the meaning of the rule. Included among those events were: (i) regulatory proceedings before any federal or state agency if the adviser or a management official of the adviser was found to have been involved in a violation of securities, commodities, banking, insurance or real estate laws and was the subject of an agency order denying, suspending or revoking authority to act or associate with an investment-related business or significantly limiting investment-related business activities or to have caused another entity to lose its license or to have been involved in such a violation, (ii) certain proceedings before self-regulatory organizations, and (iii) certain criminal and civil actions determined adversely to the defendant, including actions relating to fraud, wrongful taking of property, bribery, forgery, counterfeiting and extortion. Other events not specifically identified in Rule 206(4)-4 could have also subjected the adviser to a reporting obligation, although the staff generally declined to provide any guidance in this area. *See*, *e.g.*, *Whitaker Capital Management* (avail. June 7, 1990); *Douglas Capital Management, Inc.* (avail. Jan. 11, 1988). The staff has also required persons receiving cash payments for soliciting clients on behalf of a registered investment adviser to disclose remedial sanctions to which they are subject. *See*, *e.g.*, *Dougherty & Company LLC* (avail. Mar. 21, 2003).

341 SEC Release No. IA-2106 (Jan. 31, 2003); *see also In re Deutsche Asset Management, Inc.*, SEC Release No. IA-2160 (Aug. 19, 2003) (Order finding that an investment adviser had violated § 206(2) of the Advisers Act by failing to disclose to its clients a material conflict of interest before it voted the clients' proxies in favor of the merger of Hewlett-Packard Company and Compaq Computer Corporation).

342 The SEC did not adopt any specific policies or procedures, nor did it provide a list of approved procedures. Rather, recognizing that investment advisory activities are "varied," Rule 206(4)-6 permits advisers the flexibility to develop procedures suitable to their businesses and the conflicts they face. SEC Release No. IA-2106 (Jan. 31, 2003).

343 SEC Release No. IA-3043 (July 1, 2010).

344 Rule 206(4)-5(a)(1) under the Advisers Act. Note that the prohibition under this rule can apply in certain cases to a newly hired employee and contributions made up to six months prior to the employee being hired.

345 Rule 206(4)-5(f)(5) and (6) under the Advisers Act.

346 Rule 206(4)-5(b)(1) under the Advisers Act.

347 Rule 206(4)-5(a)(2)(ii) under the Advisers Act.

348 Rule 206(4)-5(a)(2)(i) under the Advisers Act.

349 SEC Release No. IA-3221 (June 22, 2011).

350 SEC Release No. IA-2204 (Dec. 17, 2003). A separate rule adopted in the same release imposes a similar requirement on registered investment companies.

351 SEC Release No. IA-2204 (Dec. 17, 2003). Currently, as noted above, the SEC has stated in guidance that investment advisers should address business continuity planning as part of their compliance programs to the extent that it is applicable to the adviser. In June 2016, the SEC issued a notice of proposed rulemaking

that would impose business continuity plan and transition plan requirements on investment advisers. *See* SEC Release No. IA-4439 (June 28, 2016). If enacted, the proposed new Rule 206(4)-4 would require registered investment advisers to adopt business continuity plans with certain prescribed components. The plans would be required to address critical internal and third-party operations and systems, data protection, alternate physical locations, and communications procedures. Transition plans would be required to include policies and procedures to safeguard client assets and information, information on the corporate governance and material financial resources of the adviser, and an assessment of legal issues implicated by a transition.

In addition, although the SEC has not amended the compliance program rule to explicitly require that an adviser adopt policies regarding cybersecurity, the SEC has been increasingly focused on the importance of cybersecurity as a compliance matter for investment advisers issuing guidance recommending that funds and advisers consider conducting periodic assessments of cybersecurity threats, developing a strategy to prevent, detect, and respond to such threats, and preparing written policies and procedures including training and guidance to officers and employees to implement the strategy. *See* SEC, Division of Investment Management, Cybersecurity Guidance, IM Guidance Update 2015-02 (Apr. 2015).

352 SEC Release No. IA-2256 (July 2, 2004).

The SEC adopted in the same release corresponding amendments to the recordkeeping requirements of Rule 204-2 under the Advisers Act, Form ADV and the code of ethics requirements of Rule 17j-1 under the Investment Company Act. *See* Rule 204-2(a)(12)–(13) under the Advisers Act and Form ADV, Part 2. Recordkeeping requirements under the Advisers Act are discussed in § 16.11.

353 An "access person" is defined under Rule 204A-1(e)(1) as a supervised person who has access to non-public information regarding any client's purchase or sale of securities, is involved in making securities recommendations to clients or who has access to such recommendations that are nonpublic. The definition also includes a presumption that all directors, officers and partners of a firm will be presumed to be access persons if the firm's primary business is providing investment advice. Rule 204A-1(e)(1) under the Advisers Act.

The access persons of an adviser that is required to have a code of ethics pursuant to both Rule 204A-1 under the Advisers Act and Rule 17j-1 under the Investment Company Act (*i.e.*, an adviser or sub-adviser to a registered investment company) will not be required to report under Rule 17j-1 regarding their personal securities holdings to the extent that any such report will duplicate information required by Rule 204-2. Rule 17j-1(d)(2)(iv) under the Investment Company Act.

354 Rule 204A-1 under the Advisers Act. Supervised employees of an adviser must acknowledge in writing that they have received a copy of the adviser's code of ethics. Rule 204A-1 under the Advisers Act.

U.S. Regulation of the International Securities and Derivatives Markets, § 16.09, “SOFT DOLLAR” ARRANGEMENTS

U.S. Regulation of the International Securities and Derivatives Markets
1 Edward F. Greene, Alan L. Beller, Edward J. Rosen, Leslie N. Silverman, Daniel A. Braverman, Sebastian R. Sperber, Nicolas Grabar & Adam E. Fleisher, U.S. Regulation of the International Securities and Derivatives Markets § 16.09 (11th and 12th Editions 2014-2017)
11th and 12th Editions

Click to open document in a browser

As a fiduciary, an investment adviser must obtain the "best execution" for a transaction effected on behalf of an advisory client. In connection with the abolition of fixed brokerage commissions for exchange transactions pursuant to amendments to the Exchange Act adopted in 1975, [355] concern arose about fiduciaries paying more than the lowest available brokerage commissions. Under general fiduciary principles prohibiting a fiduciary from using trust assets to benefit himself, it is questionable whether an investment adviser would be permitted to pay commissions in excess of the lowest available unless it could demonstrate that any services it received were of corresponding value to the account in question. In addition, there was concern that even where, for example, research services purchased with commission dollars were for the benefit of the account that paid the commissions, the transaction could be viewed as for the benefit of the fiduciary since the use of commissions to pay for such services relieved the fiduciary of the need to develop or pay for such services itself. [356] To alleviate these concerns, in 1975 Congress also adopted § 28(e) of the Exchange Act, which provides a limited safe harbor for fiduciaries that "pay up" in order to obtain brokerage or research services. [357] In addition to permitting in certain circumstances

p. 16-80

the practice of "paying up," and permitting a fiduciary to pay amounts for brokerage and research that (if determined in good faith) are "reasonable" (rather than the lowest available), the safe harbor obviates the need for an adviser to demonstrate that a particular client's commission dollars were used to obtain services directly benefiting that client. [358]

Registered investment advisers are required to disclose on Form ADV their brokerage selection practices, including the circumstances surrounding any "soft dollar" arrangements in which they engage, even if the arrangements would fall within the scope of § 28(e). [359] While a detailed discussion of the impact of

p. 16-80

p. 16-81

§ 28(e) on activities of advisers and other fiduciaries and of broker-dealers is beyond the scope of this book, some of the basic principles of the safe harbor as interpreted by the SEC are worth enunciating. [360]

First, the safe harbor is applicable only if the services provided constitute brokerage or research services. The SEC describes "brokerage services" as products and services that relate to the execution of a trade, from the point at which the money manager communicates with the broker-dealer for the purpose of transmitting an order for execution through the point at which funds or securities are delivered or credited to the advised account. [361] "Research services" consist solely of advice, analysis and reports that have substantive intellectual or informational content. [362] The 2006 release confirms that research services related to the market for securities, trade analytics, advice on market color and execution are eligible for the safe harbor. The release also explains that market, financial, economic and similar data could also be eligible for the safe harbor, provided that the data relate to the subject matters set forth in the safe harbor (*e.g.*, data concerning the value of securities or concerning issuers or industries). Physical items (*e.g.*, computer hardware) and mass-marketed publications will not be eligible for the safe harbor.

Second, this safe harbor has been interpreted by the SEC to require that the service provide lawful and appropriate assistance to the adviser in the discharge of its responsibilities. The SEC has also stated that whether the test is satisfied requires a fact-intensive inquiry and has generally refused to provide specific

p. 16-81

p. 16-82

guidance in this area. [363] An adviser may rely on the safe harbor only if it exercises discretion with respect to the accounts whose commission dollars are being used to obtain the brokerage or research services. As a result, in the case of a pension fund or trust the trustees of which have delegated investment discretion to an adviser, the safe harbor would be available to the adviser, although not to the trustees of the underlying account if they attempted to direct to which brokers the adviser should send business. [364]

Third, the adviser must make a "good faith determination" that the commission to be paid is "reasonable" in relation to the value of the brokerage or research services to be obtained. If the soft dollar arrangement has been negotiated on an arm's-length basis, this standard ordinarily does not present any issues. If, on the other hand, an adviser intends to pay a higher rate of commission to an affiliated broker-dealer, the adviser may be subject to a heightened burden of proof to demonstrate the *bona fides* of its determination. [365]

Finally, § 28(e) requires that the broker-dealer or exchange member provide the research to the adviser. The SEC has stated that research prepared by third parties but provided to the fiduciary by the broker in the transaction falls within the purview of the section if the broker itself has a direct obligation to pay for the research and does not merely reimburse the adviser for the adviser's own expenses and the broker controls and is familiar with the types of research provided to the adviser. However, the SEC commenced a private investigation of, and obtained consents to remedial action (albeit without admissions of wrongdoing) from, investment advisers acting as fiduciaries and participating broker-dealers in a situation where the broker-dealers paid a portion of their commissions received from the fiduciaries to a third party. The third-party administered accounts for fiduciaries and provided services selected by the fiduciaries directly to them. Fees owing to the third party could be paid by the fiduciary either by way of directed commission dollars to the executing broker (who in turn would pay the third party) or in cash paid directly to the third party by the fiduciary. The broker executing the trade was not involved in and indeed did not know which services were selected. The SEC viewed this arrangement as involving impermissible "give-ups" by broker-dealers in return for the direction of brokerage by fiduciaries rather than the permissible providing of brokerage

p. 16-82

p. 16-83

and research services. [366] The SEC has also stated that § 28(e) is available to an adviser that obtains research from an introducing broker that clears its transactions through an executing broker only if there is a legitimate correspondent relationship between the two brokers. An introducing broker that does no more than provide research and direct brokerage to an executing broker would not satisfy this test. [367]

In its 1990 correspondence with the Department of Labor, [368] the SEC determined that the § 28(e) safe harbor is applicable only in the case of "commissions" paid—that is, where the broker, dealer or exchange member acts as agent—and not in the case of "mark-ups" or "mark-downs" payable in connection with principal transactions. As a result of the SEC's interpretation, transactions conducted in the over-the-counter market, which are typically executed on a principal basis, including most transactions in debt securities, are not within the scope of § 28(e). Moreover, the SEC clarified that transactions in exchange-listed equity securities are covered by the safe harbor only to the extent that the broker acts as agent and would not be covered if the broker filled the customer order using securities from its inventory. The correspondence also confirmed that § 28(e) is applicable only to transactions in "securities" within the meaning of the Exchange Act, thus excluding transactions in futures and commodity options from safe harbor coverage. [369] In a subsequent no-action letter, the SEC confirmed that safe harbor coverage is available to transactions in fixed-income securities conducted on an agency basis. [370]

Footnotes

355 § 6(e) of the Exchange Act.

356 SEC Release No. 34-23170 (Apr. 23, 1986).

357 Section 28(e) of the Exchange Act provides in pertinent part that:

> No person using the mails, or any means or instrumentality of interstate commerce, in the exercise of investment discretion with respect to an account shall be deemed to have acted unlawfully or to have breached a fiduciary duty under State or Federal law unless expressly provided to the contrary by a law enacted by the Congress or any State subsequent to the date of enactment of the Securities Acts Amendments of 1975 solely by reason of his having caused the account to pay a member of an exchange, broker, or dealer an amount of commission for effecting a securities transaction in excess of the amount of commission another member of an exchange, broker, or dealer would have charged for effecting that transaction, if such person determined in good faith that such amount of commission was reasonable in relation to the value of the brokerage and research services provided by such member, broker, or dealer, viewed in terms of either that particular transaction or his overall responsibilities with respect to the accounts as to which he exercises investment discretion.

The CFMA amended § 28(e) to provide that the provisions of § 28(e) do not apply to transactions in security futures products. § 28(e)(4) of the Exchange Act.

358 Securities Acts Amendments of 1975, Report of the Senate Comm. on Banking, Housing and Urban Affairs to Accompany S. 249, S. Rep. No. 75, 94th Cong., 1st Sess., 71 (1975). Notwithstanding the availability of § 28(e), special issues may be raised in the case of investment companies registered under the Investment Company Act, *see* SEC Release No. 34-23170 (Apr. 23, 1986), and if the account is a pension plan, additional limitations may be imposed under ERISA.

359 *See* Form ADV, Part 2, Item 12; *see also Kingsley, Jennison, McNulty & Morse*, SEC Admin. Proc. File No. 3-7446 (Nov. 14, 1991). When the SEC overhauled Part 2 of Form ADV, it did not change the substance of the disclosure related to "soft dollar" arrangements. The SEC's rules in response to the Dodd-Frank Act require disclosure of conflicts related to "soft dollar" arrangements in Part 1 of Form ADV in addition to Part 2. SEC Release No. IA-3221 (June 22, 2011). In addition, an adviser that is also a broker-dealer is required to make certain disclosures in its customer confirmations about its soft dollar and payment for order flow practices. See Rule 10b-10 under the Exchange Act. In 1998, the SEC undertook an investigation of soft dollar practices and published its findings in a report entitled INSPECTION REPORT ON THE SOFT DOLLAR PRACTICES OF BROKER-DEALERS, INVESTMENT ADVISERS AND MUTUAL FUNDS (Sept. 22, 1998).

In 1995, the SEC proposed a rule and form under the Advisers Act that would require each registered adviser that has the discretion to direct client brokerage transactions and receives services other than execution in exchange for that brokerage to provide its clients with an annual report that would contain information about its use of client brokerage. The report would disclose for the adviser's most recently completed fiscal year: (i) the 20 brokers to which the adviser directed the largest amounts of commissions, (ii) the three largest execution-only brokers utilized by the adviser, (iii) the aggregate amount of commissions directed by the adviser to each broker listed and the percentage of the adviser's total discretionary brokerage this amount represents, (iv) the average commission rate paid to each broker listed, and (v) for each broker other than an execution-only broker, information concerning products or services obtained from the broker. The report would also disclose the percentages of the adviser's total commissions that are directed to execution-only brokers, to other brokers and at the request of clients. The report would require information only about the adviser's use of client brokerage on an aggregate basis. *See* SEC Release No. IA-1469 (Feb. 14, 1995). No further action has been taken with respect to this proposed rulemaking.

In 2004, the NASD Mutual Fund Task Force submitted recommendations to the SEC regarding improvements in the transparency of mutual fund costs and distribution arrangements, including with respect to mutual fund portfolio transaction costs and soft dollar arrangements. The Mutual Fund Task Force recommended that the SEC narrow the types of research services that may be obtained with soft dollars to brokerage services described in § 28(e)(3) of the Exchange Act and the "intellectual content" of research (*i.e.*, not the means by which such content is provided). *See* NASD Mutual Fund Task Force, *Report of the Mutual Fund Task Force on Soft Dollars and Portfolio Transaction Costs* (Nov. 11, 2004).

360 In 2006, the SEC issued an interpretive release to address developments in industry practices and technology since its last major interpretive release in 1986. SEC Release No. 34-54165 (July 18, 2006). The 1986 interpretive release regarding § 28(e) of the Exchange Act set out the SEC's views regarding the nature of brokerage and research services within the safe harbor, the purchase by fiduciaries from brokers of research prepared by third parties (so-called "*third-party research*"), the disclosure obligations of investment advisers regarding soft dollar arrangements, special requirements applicable to soft dollar arrangements where the account for which the fiduciary is acting is an investment company registered under the Investment Company Act and a number of other matters. SEC Release No. 34-23170 (Apr. 23, 1986). That release replaced an earlier release that covered some of the same subjects, but had a more restrictive standard for brokerage and research services falling within the safe harbor. SEC Release No. 34-12251 (Mar. 24, 1976). In 2008, the SEC issued additional proposed guidance to boards of directors of registered investment companies to assist them in fulfilling their fiduciary responsibilities with respect to overseeing fund advisers' satisfaction of "best execution" obligations, including the use of brokerage commissions. SEC Release No. 34-58264 (July 30, 2008). In addition, the SEC has issued a large number of no-action letters providing guidance regarding various issues raised under § 28(e) of the Exchange Act.

361 SEC Release No. 34-54165 (July 18, 2006).

362 SEC Release No. 34-54165 (July 18, 2006).

363 Securities Acts Amendments of 1975, Report of the Comm. on Banking, Housing and Urban Affairs, S. Rep. No. 75, 94th Cong., 1st Sess., 71 (1975); *see also* SEC Release No. 34-54165 (July 18, 2006); SEC Release No. 34-23170 (Apr. 23, 1986).

364 *See Foley & Lardner* (avail. Dec. 3, 1976). Similarly, "directed brokerage" arrangements, whereby a person other than the investment adviser routes trades to a particular broker, are outside the safe harbor. *See* SEC Release No. 34-23170 (Apr. 23, 1986).

365 SEC Release No. 34-23170 (Apr. 23, 1986); *see also* SEC Release No. 34-54165 (July 18, 2006).

366 SEC Release No. 34-16679 (Mar. 19, 1980).

367 *See*, *e.g.*, *Data Exchange Securities* (avail. May 20, 1981).

368 *See* Letter from Richard Ketchum, Director, SEC Division of Market Regulation, to Charles Lerner, Director of Enforcement, Pension and Welfare Benefit Administration (July 25, 1990).

369 Section 28(e) does not apply to transactions in security futures products. *See supra* Note 360.

370 *See Carolina Capital Markets, Inc*. (avail. July 30, 2013).

U.S. Regulation of the International Securities and Derivatives Markets, § 16.10, ASSIGNMENT OF ADVISORY CONTRACTS

U.S. Regulation of the International Securities and Derivatives Markets
1 Edward F. Greene, Alan L. Beller, Edward J. Rosen, Leslie N. Silverman, Daniel A. Braverman, Sebastian R. Sperber, Nicolas Grabar & Adam E. Fleisher, U.S. Regulation of the International Securities and Derivatives Markets § 16.10 (11th and 12th Editions 2014-2017)
11th and 12th Editions

Click to open document in a browser

The Advisers Act prohibits an adviser from entering, extending or renewing any advisory contract that fails to prohibit assignment without the consent of the client. [371] This requirement can be of considerable importance in planning overall corporate strategy for a group of affiliated companies, since the most routine of corporate reorganizations theoretically constitutes an assignment. The

p. 16-84

SEC staff has taken the position, however, that an adviser located outside the United States is not subject to the requirement in the case of its non-U.S. clients, subject to the satisfaction of certain conditions. [372]

"Assignment" is defined under the Advisers Act to include "any direct or indirect transfer or hypothecation of an investment advisory contract by the assignor or of a controlling block of the assignor's outstanding voting securities." [373] Change in the ownership of an adviser can thus constitute an assignment that triggers a client consent requirement. [374] Where partnerships are concerned, the death, withdrawal or admission to partnership of persons representing a minority of the partners having only a minority interest in an adviser will not constitute an assignment. [375]

Recognizing that the purpose of the prohibition is to prevent "trafficking" in advisory contracts in order to protect clients from having new or different

p. 16-84

p. 16-85

investment advisers imposed upon them without their knowledge, [376] the SEC adopted Rule 202(a)(1)-1 under the Advisers Act. The rule provides that "a transaction which does not result in a change of actual control or management" of an adviser will not constitute an assignment under § 202(a)(2) of the Advisers Act. The rule essentially codifies prior staff no-action advice in a variety of corporate reorganization transactions, in which the staff has taken the position that no assignment will result if: (i) subsequent to the transfer, the new advisory entity will have the same directors, officers, advisory and other professional support staff, (ii) the business of the adviser will continue to be conducted in the same manner, and (iii) persons having ultimate control of the new adviser are the same as those controlling the transferor, which would include, in the case of publicly held companies, a shifting base of public owners. [377] With the adoption of Rule 202(a)(1)-1, the SEC indicated that it will no longer respond to inquiries as to whether a specific transaction is within the rule. [378]

When consent to an assignment is required, it is the general position of the staff that mere failure of the client to object to the assignment is not sufficient to constitute consent and, moreover, can constitute a fraudulent and deceptive practice in violation of the Advisers Act antifraud provisions. [379] Indeed, the staff has

p. 16-85

p. 16-86

stated that an adviser's failure to describe to the client the arrangements that will be made if the client fails to consent to the assignment also constitutes a fraudulent and deceptive practice. [380]

In *Funds Inc. Investment Advisory Co.*, the staff refused to grant no-action relief where, in connection with a proposed spin-off of the shares of a registered adviser, the adviser proposed to notify its clients that (i) the spin-off could constitute an assignment requiring client consent, (ii) advisory services would continue for a period of 30 days after such notice, and (iii) in the absence of written notice to the contrary after such period, the advisory client "will be considered to wish to continue the relationship." [381] The staff explained that it had insufficient facts to conclude that the 30-day period was reasonable in those circumstances. [382] Although relief was refused, and the staff reaffirmed its position that silence is generally insufficient to constitute consent, the staff also explained that it generally raises no question if the customer is informed that the prospective assignee would continue the advisory services of the assignor for a specified reasonable period of time and that if the customer continues to accept such services without objection during the specified period, the assignee could, on that basis, assume the customer's consent to the assignment. [383]

The staff did not specify any guidelines as to the length of period that it might consider "reasonable," but suggested that the determination of the reasonableness of a given period would depend on the circumstances.

Footnotes

371 § 205(a)(2) of the Advisers Act. The Advisers Act also prohibits an adviser organized as a partnership from entering into, extending or renewing any advisory contract that fails to provide that the adviser will notify the client of any change in the membership of the partnership. § 205(a)(3) of the Advisers Act. The staff has held, however, that an adviser organized as a limited partnership does not need to include in its advisory contracts a provision obligating it to notify its clients whenever there is a change in the identity of the adviser's limited partners. *The Ayco Company, L.P.* (avail. Dec. 14, 1995).

It is important to note that while § 205(a)(2) prohibits an adviser from entering into an advisory contract that fails to prohibit assignment without the client's consent, it does not prohibit an adviser's assignment of an advisory contract without client consent. Thus, the assignment of an advisory contract without client consent could constitute a breach of the advisory contract or, in egregious circumstances, a breach of the adviser's fiduciary duty, but would not be a violation of § 205(a)(2). *American Century Cos., Inc.* (avail. Dec. 23, 1997); *see also JPMorgan Chase; Bear Stearns Asset Management I* (avail. Mar. 16, 2008) (revised July 14, 2008).

372 *The National Mutual Group* (avail. Mar. 8, 1993); *see also Murray Johnstone Holdings Ltd.* (avail. Oct. 7, 1994); *Mercury Asset Management* (avail. Apr. 16, 1993); *Unibanco* (avail. July 28, 1992); Hedge Fund Release. Nevertheless, where a non-U.S. adviser's contracts with its non-U.S. clients provide for client consent to assignments—even if the provision was included solely for purposes of compliance with § 205(a)(2) of the Advisers Act—the adviser should comply with the contractual provision.

373 § 202(a)(1) of the Advisers Act. The permissibility of sub-advisory contracts is subject to § 15(a) of the Investment Company Act, which provides that no person may serve as an investment adviser to a registered fund except pursuant to a written contract approved by a majority vote of the fund's shareholders. The SEC staff has agreed not to recommend enforcement action, however, where a new advisory contract was created from a pre-existing contract or fees were reallocated between the primary adviser and a sub-adviser, provided that the new contract or arrangement did not constitute a material change. *See*, *e.g.*, *Wells Fargo Bank, N.A.* (avail. Mar. 31, 1998).

374 The SEC has stated, however, that "the transfer or issuance of a block of stock in connection with a merger involving two issuers generally would not by itself cause an assignment of the advisory contracts of their advisory subsidiaries, for purposes of the Investment Company Act or the Advisers Act, unless (1) a person who had control of either issuer prior to the transaction does not have control of the surviving entity after the transaction, (2) a person who did not have control of either issuer prior to the transaction gains control of the surviving entity, or (3) the transaction results in an advisory subsidiary being merged out of existence." *Dean Witter, Discover & Co; Morgan Stanley Group Inc.* (avail. Apr. 18, 1997). But the SEC has informally cast doubt on the application of this no action letter beyond its facts, suggesting a narrow view of the change of control provisions. *See JPMorgan Chase; Bear Stearns Asset Management I* (avail. Mar. 16, 2008); Adviser and Broker-Dealer Study.

375 § 202(a)(1) of the Advisers Act.

376 SEC Release No. IA-1034 (Sept. 9, 1986); *see also* SEC Release No. IC-10809 (Aug. 6, 1979).

377 In *Investors Research Corp.*, for example, the staff granted no-action relief in the context of a proposed share exchange by affiliated companies, one of which was a registered adviser, such that the ownership interests of shareholders in each company would be the same. *Investors Research Corp.* (avail. Sept. 10, 1984). In addition, the adviser planned to continue to manage the portfolios of its clients using the same management and professional staff. The purpose of the reorganization was to "arrange the corporate structure in a manner which will assure the continuity and stability of the management of the enterprise both during the lifetime of [the principal stockholder] and at his death." *Investors Research Corp.* (avail. Sept. 10, 1984); *see also Nikko International Capital Management Co., Ltd.* (avail. June 1, 1987) (assumption by majority-owned subsidiary of parent's sub-advisory agreement was within Rule 202(a)(1)-1); *Equitable Life Assurance Society of the United States* (avail. Jan. 11, 1984) (incorporation of unincorporated advisory division did not result in assignment). *But see United Asset Management Corp.* (avail. Nov. 2, 1981) (refusing to agree that transfers, each of less than a controlling block of voting securities of an adviser's parent, did not constitute an "assignment" since such transfers, if coordinated, could result in transfer of a controlling interest).

378 SEC Release No. IA-1034 (Sept. 9, 1986); *Zurich Insurance Company, Scudder Kemper Investments, Inc.* (avail. Aug. 31, 1998) (whether change in control or management occurred as a result of a merger between two financial services providers, where no material change in services, fees, board of directors or executive committee would result, could be determined under Rule 202(a)(1)-1, but staff took no position as to whether the merger itself might involve a change in control or management).

379 *See*, *e.g.*, *Funds Inc. Investment Advisory Co.* (avail. Mar. 3, 1972); *In the Matter of Bridwell & Co., Inc.*, SEC Release No. IA-180 (Dec. 18, 1964). *But see Equitable Life Assurance Society of the United States* (avail. Jan. 11, 1984) (although counsel opined that no assignment would result from incorporation of unincorporated division of company, notice to certain accounts was provided and, if client did not notify company of intent to terminate contract, company would assume consent to transfer to newly incorporated division).

380 *Funds Inc. Investment Advisory Co.* (avail. Mar. 3, 1972).

381 *Funds Inc. Investment Advisory Co.* (avail. Mar. 3, 1972).

382 *Funds Inc. Investment Advisory Co.* (avail. Mar. 3, 1972).

383 *Funds Inc. Investment Advisory Co.* (avail. Mar. 3, 1972).

U.S. Regulation of the International Securities and Derivatives Markets, § 16.11, MAINTENANCE OF BOOKS AND RECORDS

U.S. Regulation of the International Securities and Derivatives Markets
1 Edward F. Greene, Alan L. Beller, Edward J. Rosen, Leslie N. Silverman, Daniel A. Braverman, Sebastian R. Sperber, Nicolas Grabar & Adam E. Fleisher, U.S. Regulation of the International Securities and Derivatives Markets § 16.11 (11th and 12th Editions 2014-2017)
11th and 12th Editions

Click to open document in a browser

The Advisers Act and the SEC's related regulations impose detailed recordkeeping requirements on registered investment advisers. [384] Included among the records that the adviser must maintain are:

- financial ledgers (including trial balances and internal audit papers), checkbooks, bank statements, cancelled checks and the like;

p. 16-87

- detailed trade orders, client instructions regarding transactions, trade confirmations and all other written communications relating to the placing or execution of any order;
- paid and unpaid bills;
- records of discretionary accounts managed by the adviser and all related powers of attorney granted to the adviser by its clients;
- copies of all advisory and related contracts;
- copies of all notices, advertisements and the like recommending the purchase or sale of a specific security;
- copies of the adviser's statements satisfying the "Brochure Rule";
- any records or documents necessary to demonstrate the calculation of performance in any advertisement circulated to ten or more persons; [385]
- a copy of the adviser's code of ethics, records of code of ethics violations and any actions taken as a result of those violations, and supervised employees' written acknowledgements of having received the adviser's code of ethics; [386]
- securities holding reports and securities transaction reports of the adviser's access persons and related records; [387] and
- records pertaining to the adviser's compliance with restrictions on political contributions pursuant to Rule 206(4)-5 under the Advisers Act, including documentation of direct or indirect political contributions made by the adviser or any of its "covered associates." [388]

p. 16-87

p. 16-88

Under the Private Fund Advisers Act and the related SEC rules, Exempt Reporting Advisers are required to maintain records of certain information with respect to the funds they manage. [389]

An adviser that renders "investment supervisory" or "investment management" services is also required to keep records showing separately for each client the securities purchased and sold, the date, amount and price of each purchase and sale and the current positions held in the client's account. [390] An adviser that has custody of client funds and securities is subject to additional requirements, including a requirement to maintain a separate ledger account for each client showing all purchases, sales, receipts and deliveries of securities, as well as details concerning the prices of transactions. [391]

Subject to satisfaction of certain conditions, a foreign adviser need not comply with all of the recordkeeping requirements of the Advisers Act in the case of its non-U.S. clients. [392] A foreign adviser must, in any event, maintain at a designated place within the United States correct, complete and current copies of the books and records maintained under the Advisers Act, unless the adviser files a written undertaking to furnish the SEC upon demand with copies of any required books and records and in fact provides such material at its own expense within 14 days subsequent to a written demand of the SEC. [393] In addition, where a foreign adviser's parent or affiliates provide the adviser with research, staff or other

p. 16-88

p. 16-89

advisory services, or services relating to transactions effected by the adviser on behalf of its clients, the SEC staff has taken the position that the parent or affiliates must comply with certain of the recordkeeping requirements under the Advisers Act in order to avoid registration under the Advisers Act. [394]

Footnotes

384 § 204 of the Advisers Act and Rule 204-2 thereunder. In 2001, the SEC amended Rule 204-2 to permit electronic retention of required books and records. *See* SEC Release No. IA-1945 (May 24, 2001). The SEC staff has suggested that it may soon consider how to modernize the books and records rule requirements in light of, among other things, developments in recordkeeping technology. *See* Andrew J. Donohue, Director, SEC Division of Investment Management, Remarks at the Tenth Annual Investment Adviser Compliance Best Practices Summit (Mar. 21, 2008).

385 Rule 204-2(a) under the Advisers Act. The SEC has indicated in no-action relief that advisers can facilitate examinations of performance claims if they maintain (i) custodial or brokerage statements that confirm the accuracy of the account statements and other internally generated documents and (ii) reports prepared by an independent auditor that verify performance claims. *See Jennison Associates LLC* (avail. July 6, 2000).

Investment advisers, whether or not registered, may also have reporting requirements to the SEC under provisions of the U.S. securities laws not tied to the Advisers Act. For example, advisers having investment discretion for institutional investors that in the aggregate, together with the adviser's proprietary holdings, hold more than $100 million of publicly traded equity securities designated by the SEC pursuant to § 13(f) of the Exchange Act are required to file quarterly reports on Form 13F. Rule 13f-1 under the Exchange Act. In addition, advisers with investment discretion over accounts holding more than 5% of a class of voting equity securities of an issuer that is registered under the Exchange Act are required to make filings on Schedule 13D or 13G. *See* § 6.02[2].

386 Rule 204-2(a)(12) under the Advisers Act.

387 Rule 204-2(a)(13) under the Advisers Act.

388 Rule 204-2(a)(18) under the Advisers Act.

389 *See* §§ 404, 407 and 408 of the Private Fund Advisers Act; SEC Release No. IA-3221 (June 22, 2011); § 16.03[3][d].

390 Rule 204-2(c) under the Advisers Act. "Investment supervisory services" is defined in § 202(a)(13) of the Advisers Act as the "giving of continuous advice as to the investment of funds on the basis of the individual needs of each client," and the SEC has described "investment management services" as the "management of accounts where either the individual needs of the client are not considered or where the management services are not continuous." SEC Release No. IA-1000 (Dec. 3, 1985), 50 Fed. Reg. 49,835, 49,838 (Dec. 5, 1985). All of the records required to be maintained under the Advisers Act must be preserved in an easily accessible place for at least five years from the end of the fiscal year during which the last entry was made, and during the first two of these years they must be maintained in an office of the investment adviser. Even subsequent to the termination of an adviser's business, the Advisers Act requires retention of the corporate records (including such documents as the minute books, share certificate books and bylaws of an adviser organized in corporate form) for a period of at least three years. Records may, however, be maintained on microfilm or by computer. *See* Rule 204-2(g) under the Advisers Act. In certain circumstances, principally

investment adviser subscriptions to electronic document provider services, records may even be maintained solely on the computer system of a third-party document provider. *See Disclosure Incorporated* (avail. Aug. 22, 1996); *First Call Corporation* (avail. Sept. 6, 1995); *Oppenheimer Management Corporation* (avail. Aug. 28, 1995).

391 Rule 204-2(b) under the Advisers Act.

392 *The National Mutual Group* (avail. Mar. 8, 1993); Hedge Fund Release.

393 Rule 204-2(j)(3)(i) under the Advisers Act specifies that such undertaking be in the following form:

> The undersigned hereby undertakes to furnish at its own expense to the [SEC] at its principal office in Washington, DC, or at any Regional Office of [the SEC] specified in a demand for copies of books and records made by or on behalf of [the SEC], true, correct, complete and current copies of any or all, or any part, of the books and records which the undersigned is required to make, keep current or preserve pursuant to any provision of any rule or regulation of the [SEC] under the Investment Advisers Act of 1940. This undertaking shall be suspended during any period when the undersigned is making, keeping current, and preserving copies of all said books and records at a place within the United States in compliance with Rule 204-2(j) under the Investment Advisers Act of 1940. This undertaking shall be binding upon the undersigned and the heirs, successors and assigns of the undersigned, and the written irrevocable consents and powers of attorney of the undersigned, its general partners and managing agents filed with the [SEC] shall extend to and cover any action to enforce same.

394 *Murray Johnstone Holdings Ltd.* (avail. Oct. 7, 1994); *Kleinwort Benson Investment Management Ltd.* (avail. Dec. 15, 1993); *Mercury Asset Management* (avail. Apr. 16, 1993); *Unibanco* (avail. July 28, 1992).

U.S. Regulation of the International Securities and Derivatives Markets, § 16.12, ENFORCEMENT

U.S. Regulation of the International Securities and Derivatives Markets

[1] SEC Enforcement

The Advisers Act, as amended by the Securities Enforcement Remedies and Penny Stock Reform Act of 1990, [395] provides for broad SEC enforcement powers. These include:

- authority to bring suit to enjoin any actual or threatened violation of the Advisers Act by any person, including persons aiding and abetting any such violation and certain supervisory personnel;
- subpoena power to compel the production of witnesses and documents;
- authority to order a party to cease and desist from further violations;
- power to require an accounting and disgorgement of profits; and

p. 16-90

- authority to bar an investment adviser convicted of securities fraud from associating with other investment advisers. [396]

Both administrative and civil fines can be imposed by the SEC in amounts ranging up to $178,156 in the case of a natural person or $890,780 in the case of any entity. [397] In addition, violators are subject to criminal prosecution by the Department of Justice upon referral by the SEC, with potential penalties in the case of willful violations of up to five years in prison and/or a fine of up to $10,000. [398]

[2] Private Right of Action

The Advisers Act does not expressly provide for a private right of action by advisory clients to sue for damages resulting from an adviser's violations of the Advisers Act. [399] For many years a legal controversy existed as to whether such a private right could properly be implied under certain provisions of the Advisers Act—particularly under the antifraud provisions of § 206 of the Advisers Act. [400] The controversy was settled in 1979 with the U.S. Supreme Court's decision in *Transamerica Mortgage Advisors, Inc. (TAMA) v. Lewis*. [401] In that case, the Court found an implied private right of action for rescission and restitution of fees under an advisory agreement under § 215 of the Advisers

p. 16-90

p. 16-91

Act, [402] but declined to recognize an implied private right of action for additional damages under § 206. The Court reasoned that in declaring in § 215 that contracts made in violation of the Advisers Act were void, Congress "intended that the customary legal incidents of voidness would follow, including the availability of a suit for rescission or for an injunction against continued operation of the contract, and for restitution." [403] Section 206, on the other hand, "simply proscribes certain conduct, and does not in terms create or alter any civil liabilities," [404] and thus provides no basis for inferring a damages remedy. [405]

[3] SEC Oversight

Registered investment advisers are also subject to SEC oversight. Under § 204 of the Advisers Act, the SEC has the authority to make such "reasonable, special, or other examinations by representatives of the SEC as it deems necessary or appropriate in the public interest or for the protection of investors." The SEC staff uses risk-based methodologies to identify activity that may warrant examination and thus to determine which registered investment advisers will be subject to routine examinations in a given year. [406] In particular, the staff divides all registered investment advisers into two groups—high-risk and low-risk—based on certain criteria. [407] In 2008 the SEC staff indicated that it would "zero in" on (i) firms that are of such size that, if anything went wrong, a significant number of investors would be affected, (ii) firms and areas within firms where compliance controls or supervision appears to be weak, and (iii) firms that are involved in activities that may present increased compliance risk, if not controlled adequately, such as dealing in structured products and illiquid securities. [408] Since 2015, SEC staff has aggregated and analyzed data concerning all registrants to identify activity that may warrant examination, identifying operational red flags, such as firms with aberrant swings in reported assets under management, changes in key individuals, business activities, and affiliates, and other possible indicia of heightened risk. [409]

In response to market turmoil and the effect of a significant number of Ponzi schemes and other fraudulent activities detected during the 2008 financial crisis, the SEC has implemented significant improvements to its surveillance efforts. As a result of the SEC's efforts to improve its risk-based methodologies, there was a significant increase in the number of firms identified by the SEC as "high-risk" by 2009. [410] The SEC missed its goal of examining "high-risk" advisers at least once every three years for the three-year period ending in 2013. [411] However, it exceeded its goals for the percentage of all advisers examined in both 2014 and 2015. [412]

In 2012, the SEC completed the restructuring of its enforcement division and launched a reorganization of its inspection unit with the intention of more aggressively and effectively spotting violations and pursuing fraud. As a result of the enforcement division restructuring, the SEC created specialized units to concentrate on high-priority areas of enforcement, one of which focuses on asset management (hedge funds and investment advisers). [413] In 2010, the SEC Office

p. 16-92

p. 16-93

of Inspector General conducted an investigation into the SEC's response to Robert Allen Stanford's alleged Ponzi scheme and delivered a report recommending certain changes. [414] In light of the report's recommendations, the SEC implemented changes regarding the agency's leadership, its internal procedures and its culture of collaboration and continues to consider additional reforms as necessary for effective investor protection. [415]

In 2010, the staff generally sought to examine each registered investment adviser in the high-risk group once every three years. Registered investment advisers that were rated in the low-risk category did not receive routine examinations on a regularly scheduled basis. Instead, the firms within the low-risk group were subject to cause examinations resulting from tips, complaints and referrals and special purpose reviews such as risk-targeted examination sweeps and risk assessment reviews. [416] In 2013, the SEC conducted routine inspections of advisers with high-risk profiles (the examined "high-risk" advisers have assets under management that represent approximately 25% of the overall assets under management for currently registered advisers). The SEC examined 9% of the entire population of registered advisers in 2013. The percentage of advisers examined each year generally decreased over the period 2004–2013. While 18% of advisers were examined in 2004, only 8–9% of advisers were examined in each of 2011, 2012 and 2013. [417] However, the trends reversed in 2014 and 2015, when the SEC increased its percentage of advisers examined and exceeded its planned percentage. [418] In March 2016 the SEC's Office of Inspector General reviewed the Office of Compliance Inspections and Examinations ("OCIE")’s goals for investment adviser examination coverage, concluding that OCIE's risk-based examination prioritization was key to meeting the SEC's examination

p. 16-93

p. 16-94

goals, and that OCIE has worked to increase its exam coverage. [419] The report recommended that OCIE improve by considering metrics other than the percentage of investment advisers examined each year. [420]

Investment advisers (other than investment advisers specifically exempted from registration under § 203(b) of the Advisers Act) are subject to Section 204A of the Advisers Act, [421] which imposes liability on firms and individuals who supervise [422] or employ persons who are found to have violated the insider trading prohibitions contained in the Advisers Act or the Exchange Act. [423] Pursuant to amendments made to the Exchange Act, liability under the Insider Trading Act can take the form of civil penalties of $1.425 million or more or SEC disciplinary action. [424] In addition, the Insider Trading Act also creates an express private right of action for damages against supervisory personnel, as well as against violators of the act's provisions. [425]

The Advisers Act requires an adviser to implement written policies and procedures to prevent the misappropriation and misuse of material nonpublic information by the adviser or its associated persons. [426] Neither the Advisers Act nor its legislative history provides specific guidance as to the appropriate scope

p. 16-95

of such procedures, [427] which will of course depend on the nature of the adviser's business and its affiliations (if any) with a registered broker-dealer. At a minimum, however, such procedures should include identification of specific personnel to monitor dissemination of information and ongoing monitoring of the procedures and establishment of reporting and other mechanisms to aid in detection of insider trading violations. These mechanisms may include, for example, employee education, certifications from employees that they have reviewed and understood the policies and procedures, the use of restricted lists, watch lists and information barriers to isolate certain of the entity's operations, other proprietary and employee trading restrictions to limit transactions in securities concerning which the entity is in possession of material nonpublic information, blackout periods to prevent "trading ahead" of clients based on the adviser's research recommendations and limitations on the dissemination of sensitive information. [428]

In addition to policies and procedures required to prevent insider trading, the Advisers Act also imposes recordkeeping requirements on registered advisers with respect to trading by "access persons." [429] Records under these provisions must be maintained for prescribed periods and are subject to inspection by the SEC at any time that the SEC deems necessary or appropriate in the public interest or for the protection of investors. [430] In particular, registered advisers are required to keep a record of the names of their access persons, the securities holdings and transaction reports made by access persons and records of

p. 16-95

p. 16-96

decisions approving access persons' acquisition of securities in initial public offerings and limited offerings (*i.e.*, offerings exempt from registration under § 4(a)(2) or § 4(a)(6) of the Securities Act or Regulation D under the Securities Act). [431] Advisers to investment companies registered under the Investment Company Act are subject to special rules governing the conduct of their employees. Trading practices of such advisers and their personnel have been the subject of public and industry scrutiny favoring increased limitations on the ability of such persons to engage in securities transactions that may result in conflicts of interest with their investment company clients. [432]

421 *See* Insider Trading and Securities Fraud Enforcement Act of 1988, Pub. L. No. 100-704, 102 Stat. 4677 (1988); *see also* § 15(g) of the Exchange Act (analogous provision applicable to broker-dealers).

422 *See* § 203(e)(6) of the Advisers Act, which provides that a failure to supervise will not be deemed to have occurred if:

> (A) there have been established procedures, and a system for applying such procedures, which would reasonably be expected to prevent and detect, insofar as practicable, any such violation by such other person, and (B) such person has reasonably discharged the duties and obligations incumbent upon him by reason of such procedures and system without reasonable cause to believe that such procedures and system were not being complied with.

423 *See* §§ 14.07[1][b] and 14.08.

424 § 21A of the Exchange Act; 17 C.F.R. § 201.1004 and Table IV to Subpart E of Part 201.

425 § 20A of the Exchange Act. Whether an individual constitutes a "supervisor" for these purposes "depends on whether, under the facts and circumstances of a particular case, that person has a requisite degree of responsibility, ability or authority to affect the conduct of the employee whose behavior is at issue." *In the Matter of George J. Kolar*, SEC Release No. 34-46127 (June 26, 2002) (citing *In the Matter of John H. Gutfreund*, SEC Release No. 34-31554 (Dec. 3, 1992)).

426 Section 204A of the Advisers Act provides in pertinent part that every investment adviser, other than those specifically exempted from registration under § 203(b) of the Advisers Act,

> [S]hall establish, maintain, and enforce written policies and procedures reasonably designed, taking into consideration the nature of such investment adviser's business, to prevent the misuse in violation of [the Advisers Act or the Exchange Act], or the rules or regulations thereunder, of material, nonpublic information by such investment adviser or any person associated with such investment adviser.

427 As reported in the U.S. House of Representatives,

> [T]he Committee expects that institutions subject to the requirements of this provision will adopt policies and procedures appropriate to restrict communication of nonpublic information and to monitor its dissemination, such as restraining access to files likely to contain such information; providing continuing education programs concerning insider trading; restricting or monitoring trading in securities relating to which the firm's employees possess nonpublic information; and vigorously monitoring and reviewing trading for the account of the firm or individuals.

H.R. Rep. 910, 100th Cong., 2d Sess., 21, 22 (1988).

As described in § 16.02[1][a], the Coordination Act, together with the Private Fund Advisers Act, provides for a division in supervisory responsibility with respect to investment adviser regulation between the SEC and the state securities regulatory authorities—with small advisory firms under state supervision and large advisory firms under SEC supervision. The Private Fund Advisers Act created a new category of "mid-sized" advisers with assets under management [433] of between $25 million and $100 million that generally may not register with the SEC unless the adviser would be required to register with 15 or more states or is an adviser to a registered investment company or a business development company. [434] The Advisers Act gives the SEC primary responsibility for the regulation of advisers that remain registered with the SEC by preempting certain state laws with respect to those advisers. The states may not impose their own registration requirements on such SEC-registered advisers or "supervised persons" of such advisers, although states may license, register or otherwise qualify any investment adviser representative that has a place of business located within that state. [435] Those advisers with less than $25 million in assets under management and mid-sized advisers will be subject to state regulation and must continue to register with their home state and any other state where they may conduct business.

p. 16-97

Each state of the United States, as well as the District of Columbia and Puerto Rico, has the authority to require that persons who provide investment advisory services, whether from or to persons within that state or jurisdiction, register with the appropriate state or local authorities. [436]

Generally, all states and other jurisdictions that regulate investment advisory operations require that an adviser consent to service of process within the state or jurisdiction for state securities law violations. In addition, certain states impose minimum capital requirements, which may not be satisfied through the posting of a bond or the maintenance of insurance. These requirements are usually applicable only to advisers with custody of client funds or securities. [437] The majority of states require that the adviser post a surety bond or otherwise maintain professional liability insurance with respect to its operations. However, the Advisers Act provides that the states may not impose recordkeeping, minimum net capital and bonding requirements on an adviser that differ from those imposed by the state where it maintains its principal office and place of business. [438] Many states also require that persons employed by registered investment advisers be separately registered as agents or representatives. [439] The Advisers Act further provides that the states may require those investment adviser representatives who are employed by SEC-registered investment advisers but have a place of business in the state to register under the state's securities laws. [440] In addition, the Advisers Act sets forth a *de minimis* standard whereby states may not require registration of any adviser that does not have a place of business in the state and has fewer than six clients in the state during the previous 12-month period. [441]

The Coordination Act preserved the authority of the states to require SEC-registered advisers to file with the state (for notice purposes) any documents filed with the SEC, together with a consent to service of process and filing fee, [442] and the Private Fund Advisers Act and related SEC rules do not alter this authority of the states. The states retain their authority to investigate and bring enforcement actions with respect to fraud claims against advisers and their associated persons. [443]

p. 16-97

p. 16-98

Most state Regulation D erives from the Uniform Securities Act (1956), adopted at one time or another, in whole or in part, by 37 jurisdictions, and its successor, the Revised Uniform Securities Act. As both of these acts were preempted in part by NSMIA, the Uniform Securities Act (2002) was drafted and approved by the National Conference of Commissioners on Uniform State Laws as a "new" Uniform Securities Act. [444] The North American Securities Administrators Association (the "NASAA") has also provided a model form of regulation for investment advisers consisting of a set of administrative rules incorporating many of the federal securities law requirements. Although most states have adopted some version of the foregoing models, many state legislatures and securities authorities have adjusted the model provisions in light of their own regulatory schemes, as state regulation can vary substantially from jurisdiction to jurisdiction. SEC rulemaking has, however, created a central registration procedure through the Investment Advisers Registration Depositary ("IARD") for filings of state-registered advisers. [445] The SEC has re-programmed the IARD system to function under the Private Fund Advisers Act regime, but the IARD will still serve as a database for SEC-registered and state-registered advisers. [446]

Notwithstanding the substantial variations that can exist among state investment adviser regulations, most state initiatives closely follow the federal scheme. Form ADV has been, for example, the uniform form of application used for registration under the laws of most states, although a number have required supplementary information. [447] In addition, most state securities statutes provide for exclusions and exemptions from registration requirements, which in some cases are broader than those provided under the Advisers Act. For example, the definition of "investment adviser" under the Uniform Securities Act (1956)

p. 16-98

p. 16-99

excludes "savings institutions" and "trust companies" in addition to those entities covered by the similar provision contained in § 202(a)(11)(A) of the Advisers Act. Another example is the elimination by a number of states of the requirement, in connection with the exclusion for broker-dealers, [448] that the advisory activities be "solely incidental" to the broker-dealer's securities trading business. [449] Moreover, the definition of "investment adviser" in many state statutes provides for an "institutional" exclusion for advisers that do not have any place of business within the state and only advise "financial institutions," which would generally include banks, thrifts, investment companies and insurance companies. [450] Nevertheless, states that have adopted the Revised Uniform Securities Act or the Uniform Securities Act (2002) have eliminated the "institutional adviser" and the *de minimis* exclusions from the definition of investment adviser and treated such advisers as being exempt from registration. As in the case of the federal liability provisions, the effect of the change is to bring such advisers within the ambit of state antifraud provisions applicable to all advisers, regardless of registration status. [451]

State substantive regulation of investment advisers generally incorporates all of the requirements applicable to advisers under the Advisers Act. Currently, the most significant difference between federal and state regulation of advisers relates to compensation: most states have not updated applicable regulations to permit the limited performance-based compensation arrangements permitted under Rules 205-1, 205-2 and 205-3 under the Advisers Act. [452] In addition, those states that have used the NASAA-proposed regulations as a basis for their regulatory scheme impose certain additional restrictions, including prohibitions against an adviser's engaging in trading that is excessive in size or frequency in view of the financial resources and character of a client's account. [453] Such states may also require that an adviser have reasonable grounds to believe that a recommendation is suitable for a client, on the basis of information furnished by the client after reasonable inquiry concerning the client's investment objectives, financial situation and needs. Finally, as in the case of current federal regulation, many states do not provide for any express private right of action for damages against investment advisers, although the Uniform Securities Act (2002) creates such a right.

Footnotes

433 R-AUM is used for purposes of determining whether an adviser is a "mid-sized" adviser. *See* § 16.03[3][a][i] for discussion of R-AUM.

434 The addition of the mid-sized adviser category was the principal change the Private Fund Advisers Act made to the regime imposed by the Coordination Act. The Private Fund Advisers Act also changed references in the related sections from "principal place of business" to "principal office and place of business," but otherwise left the Coordination Act regime intact.

435 § 203A(b)(1) of the Advisers Act.

436 Currently, the only state that does not regulate investment advisory activities is Wyoming.

437 *See*, *e.g.*, CAL. CORP. CODE § 25237, CAL. CODE REGS. tit. 10, § 260.237.2; CONN. GEN. STAT. § 36b-5(c), CONN. AGENCIES REGS. § 36b-31-9c; FLA. STAT. § 517.12, FLA. ADMIN. CODE ANN. r.69W-600.016; KY. REV. STAT. ANN. § 292.330, 808 KY. ADMIN. REGS. 10:200; WASH. REV. CODE ANN. § 21.20.060, WASH. ADMIN. CODE § 460-24A-170; WIS. STAT. § 551.406, WIS. ADMIN. CODE DFI-SEC 5.02.

438 §§ 222(b) and 222(c) of the Advisers Act.

439 *See*, *e.g.*, GA. CODE ANN. § 10-5-33; R.I. GEN. LAWS § 7-11-203.

440 § 203A(b)(1) of the Advisers Act.

441 § 222(d) of the Advisers Act.

442 §§ 307(a) and 307(b) of the Coordination Act.

443 § 203A(b)(2) of the Advisers Act.

444 The Uniform Securities Act (2002) has been adopted by Hawaii, Idaho, Indiana, Iowa, Kansas, Maine, Minnesota, Missouri, Oklahoma, South Carolina, South Dakota, Vermont, Wisconsin and the U.S. Virgin Islands.

445 SEC Release No. IA-1897 (Sept. 12, 2000). All states are required to accept filing of Forms ADV and ADV-W (the form used to withdraw an adviser registration) through the IARD. Most states have adopted legislation and/or regulations that require state-registered advisers to use the IARD. *See also* § 16.04.

446 SEC Release No. IA-3221 (June 22, 2011). The SEC envisions the IARD as a tool to identify whether particular advisers meet the requirements to register with the SEC under the Private Fund Advisers Act and related SEC rules.

447 The SEC has adopted rules overhauling Form ADV. The new Form ADV requires additional information, in particular with respect to advisers to private funds, and a reorganization of information provided in order to standardize presentation of information across all advisers. *See* §§ 16.04, 16.05. States that adopted the SEC's Form ADV prior to the Private Fund Advisers Act have generally adopted the amended Form ADV. The NASAA has also adopted amendments to its model rules to reflect SEC changes to the brochure rule and Form ADV.

448 § 202(a)(11)(C) of the Advisers Act.

449 *See, e.g.*, N.J. STAT. ANN. § 49:3-49(g); 70 PA. STAT. ANN. § 1-102.

450 *See* N.J. STAT. ANN. § 49:3-49(g); 70 PA. STAT. ANN. § 1-102.

451 *See* § 16.03[2].

452 The Revised Uniform Securities Act contains no prohibition on performance-based compensation, and the NASAA's regulations permit performance-based fees that are calculated essentially as provided in Rule 205-3 under the Advisers Act.

453 *See*, *e.g.*, IOWA ADMIN. CODE r. 191-50.38(502); MONT. ADMIN. R. 6.10.402; OR. ADMIN. R. 441-205-0145.

U.S. Regulation of the International Securities and Derivatives Markets, § 16.15, ANTI-MONEY LAUNDERING COMPLIANCE

U.S. Regulation of the International Securities and Derivatives Markets
1 Edward F. Greene, Alan L. Beller, Edward J. Rosen, Leslie N. Silverman, Daniel A. Braverman, Sebastian R. Sperber, Nicolas Grabar & Adam E. Fleisher, U.S. Regulation of the International Securities and Derivatives Markets § 16.15 (11th and 12th Editions 2014-2017)
11th and 12th Editions

p. 16-100

Investment advisers have not traditionally been regulated as "financial institutions" under the Bank Secrecy Act of 1970 (the "BSA") [454] and therefore have not been subject to anti-money laundering compliance regulations issued by the Financial Crimes Enforcement Network ("FinCEN"). [455] In May 2003, FinCEN issued a proposal to require certain investment advisers that offer asset management services to adopt an anti-money laundering program under the USA Patriot Act. [456] While the 2003 proposal was withdrawn in October 2008, in August 2015, FinCEN again issued a notice of proposed rulemaking that would impose anti-money laundering ("AML") compliance obligations on investment advisers under the BSA. The proposed AML regulations would require registered investment advisers to establish an AML program consistent with the requirements of the BSA, including risk-based policies, procedures and controls; independent testing; designation of an AML compliance officer or committee, and appropriate employee training. It would also require advisers to file suspicious activity reports and currency transactions reports. [457] The proposed AML regulations would not subject investment advisers to the customer due diligence rules applicable to broker-dealers and others summarized in § 14.07[4][e]. However, subsequent rulemaking is expected to extend these requirements to investment advisers.

Footnotes

454 Bank Secrecy Act of 1970, Pub. L. No. 91-508, 84 Stat. 1118 (1970).

455 However, investment advisers have been and continue to be subject to criminal anti-money laundering laws.

456 *See* FinCEN, Anti-Money Laundering Programs for Investment Advisers, 68 Fed. Reg. 23,646 (May 5, 2003); FinCEN, Withdrawal of the Notice of Proposed Rulemaking; Anti-Money Laundering Programs for Investment Advisers, 73 Fed. Reg. 65,568 (Nov. 4, 2008).

457 FinCEN, Anti-Money Laundering Program and Suspicious Activity Report Filing Requirements for Registered Investment Advisers, 80 Fed. Reg. 52,680 (Sept. 1, 2015).
