24 B e f o r e : WALKER, CABRANES, Circuit Judges, and KOELTL,  
25 District Judge.\*

26 Appeal from a judgment of the United States District Court  
27 for the Southern District of New York (Colleen McMahon, Judge)  
28 reversing an order of the United States Bankruptcy Court for the  
29 Southern District of New York (Arthur J. Gonzalez, Bankruptcy  
30 Judge) and remanding with instructions to enter summary judgment  
31 in favor of Appellees Alfa, S.A.B. de C.V., ING VP Balanced  
32 Portfolio, Inc., and ING VP Bond Portfolio, Inc. Appellant Enron  
33 Creditors Recovery Corp. challenges the district court's

---

1 \* The Honorable John G. Koeltl, of the United States District  
2 Court for the Southern District of New York, sitting by  
3 designation.

1 conclusion that 11 U.S.C. § 546(e) protects from avoidance pre-  
2 petition payments Enron Corp. made to redeem, prior to maturity,  
3 commercial paper it had issued. It argues that Enron Corp.'s  
4 payments did not constitute "settlement payments" within the  
5 meaning of § 546(e)'s safe harbor both because they were  
6 repayments of debt and because they were not common in the  
7 securities industry. We hold that Enron Corp.'s payments were  
8 "settlement payments" and thus were protected from avoidance  
9 under § 546(e). We therefore AFFIRM the judgment of the district  
10 court.

11 Judge KOELTL dissents in a separate opinion.

1 MICHAEL SCHATZOW (Robert L.  
2 Wilkins, Mitchell Y. Mirviss,  
3 Colleen M. Mallon, Richard L.  
4 Wasserman, on the brief), Venable  
5 LLP, Baltimore, MD, for Appellant  
6 Enron Creditors Recover Corp.  
7

8 MICHAEL L. COOK (Brian C. Tong, on  
9 the brief), Schulte Roth & Zabel  
10 LLP, New York, NY, for Appellee  
11 Alfa, S.A.B. de C.V.  
12

13 SABIN WILLETT (Mark M. Elliott,  
14 Eric Heining, on the brief),  
15 Bingham McCutchen LLP, Boston, MA,

33 curiae Securities Industry and  
34 Financial Markets Association.  
35  
36  
37

38 JOHN M. WALKER, JR., Circuit Judge:

39 This appeal raises an issue of first impression in the  
40 courts of appeals: whether 11 U.S.C. § 546(e), which shields  
41 "settlement payments" from avoidance actions in bankruptcy,  
42 extends to an issuer's payments to redeem its commercial paper

1 prior to maturity. Enron Creditors Recovery Corp. ("Enron")<sup>1</sup>  
2 seeks to avoid and recover payments Enron made to redeem its  
3 commercial paper prior to maturity from Appellees Alfa, S.A.B. de  
4 C.V. ("Alfa"), ING VP Balanced Portfolio, Inc., and ING VP Bond  
5 Portfolio, Inc. (collectively, "ING"), whose notes were redeemed  
6 by Enron. Alfa and ING argue that § 546(e) protects these  
7 payments from avoidance.

8 The Bankruptcy Court for the Southern District of New York  
9 (Arthur J. Gonzalez, Bankruptcy Judge) concluded that § 546(e)'s  
10 safe harbor does not protect Enron's payments from avoidance  
11 because they were made to retire debt, not to purchase  
12 securities, and because they were extraordinary. The District  
13 Court for the Southern District of New York (Colleen McMahon,  
14 Judge) held that Enron's payments do fall within the safe harbor,  
15 reversed the Bankruptcy Court's decision, and remanded with  
16 instructions to enter summary judgment in favor of Alfa and ING.

17 On appeal, Enron challenges the district court's conclusion  
18 that the safe harbor protects Enron's redemption payments whether  
19 or not they were made to retire debt or were unusual. Because we  
20 agree with the district court that Enron's proposed exclusions  
21 from the reach of § 546(e) have no basis in the Bankruptcy Code,  
22 we AFFIRM its decision and order.

---

1 <sup>1</sup> This opinion will refer to Enron Corp. and the reorganized  
2 entity, Enron Creditors Recovery Corp., collectively as "Enron."

1  
2 **BACKGROUND**

3 After a series of events in the latter half of 2001,  
4 including the resignation of its CEO, Jeffery Skilling, its  
5 announcement of \$600 million in third-quarter losses, the  
6 commencement of an SEC investigation into its practices, and the  
7 correction of four years' worth of financial statements, Enron, a  
8 Houston-based energy company, collapsed. See, e.g., David S.  
9 Hilzenrath, Early Warnings of Trouble at Enron, Wash. Post, Dec.  
10 30, 2001, at A10.

11 On December 2, 2001, Enron petitioned for Chapter 11  
12 bankruptcy. This appeal arises out of Enron's attempt to avoid  
13 and recover pre-petition payments it made to redeem, prior to  
14 maturity, commercial paper it had issued.

15 **I. Facts**

16 Between October 25, 2001 and November 6, 2001, Enron drew  
17 down on its \$3 billion revolving lines of credit and paid out  
18 more than \$1.1 billion to retire certain of its unsecured and  
19 uncertificated commercial paper prior to the paper's maturity.  
20 Enron redeemed the commercial paper at the accrued par value,  
21 calculated as the price originally paid plus accrued interest.  
22 This price was considerably higher than the paper's market value.

23 The offering memoranda that accompanied the issuance of the  
24 commercial paper provided that the "Notes are not redeemable or

1 subject to voluntary prepayment by the Company prior to  
2 maturity." This provision prohibited calls and puts: Enron could  
3 not force investors to surrender the notes and the investors  
4 could not require Enron to prepay them.

5 The Depository Trust Company (the "DTC"), a clearing agency,  
6 maintained bookkeeping entries that tracked ownership of Enron's  
7 commercial paper. This is the customary tracking method in the  
8 industry. Every issuer of commercial paper has an issuing and  
9 paying agent ("IPA") within the DTC to issue commercial paper and  
10 to pay at maturity or at an early redemption.

11 Three broker-dealers, J.P. Morgan, Goldman, Sachs & Co., and  
12 Lehman Brothers Commercial Paper, Inc., participated in Enron's  
13 redemption. They received the commercial paper from the  
14 individual noteholders and paid them the redemption price. The  
15 mechanics of these transfers were as follows. The DTC debited  
16 the redemption price from each broker-dealer's account and  
17 credited it to the noteholder's DTC account. The broker-dealers  
18 then transferred the notes to the DTC account of Enron's issuing  
19 and paying agent, Chase IPA, and received payment from Enron  
20 through the DTC. Immediately after the broker-dealer received  
21 payment, the commercial paper Enron redeemed was extinguished in  
22 the DTC system. Confirmations of these transactions referred to  
23 them as securities trades, termed them "purchases" from the  
24 holders, and referenced a "trade date" and "settlement date."

1 Prior to these transactions, ING and Alfa owned Enron  
2 commercial paper in the amount, respectively, of \$48,200,000 and  
3 \$5,667,255. They both agreed to transfer their commercial paper  
4 to broker-dealer J.P. Morgan in exchange for the redemption  
5 price.

6 The parties dispute the circumstances and motives  
7 surrounding Enron's redemption. Enron argues that it made the  
8 redemption payments under pressure from noteholders seeking to  
9 recover on their investments amidst rumors of Enron's imminent  
10 implosion. Alfa and ING argue that Enron redeemed its commercial  
11 paper to "calm the irrational markets" and leave a favorable  
12 impression that would allow it to reenter the commercial paper  
13 market once "bad publicity" about the company's stability "had  
14 blown over." They argue that the redemption was an economically  
15 rational move that allowed Enron to refinance its existing  
16 commercial paper debt with debt at a lower interest rate.

## 17 **II. Procedural History**

18 In November 2003, two years after Enron filed for  
19 bankruptcy, the reorganized entity brought adversary proceedings  
20 against approximately two hundred financial institutions,  
21 including appellees Alfa and ING, seeking to avoid and recover  
22 the redemption payments. It alleged that the payments were  
23 recoverable as (1) preferential transfers under 11 U.S.C. §  
24 547(b), because they were made on account of an antecedent debt

1 within ninety days prior to bankruptcy, and (2) constructively  
2 fraudulent transfers under 11 U.S.C. § 548(a)(1)(B), because the  
3 redemption price exceeded the commercial paper's fair market  
4 value.

5 In 2004, the defendants in the adversary proceedings moved  
6 to dismiss Enron's complaint for failure to state a claim. They  
7 argued that the redemption payments were "settlement payments"  
8 protected from avoidance under 11 U.S.C. § 546(e)'s safe harbor.

9 Section 546(e) provides, in relevant part, that

10 [n]otwithstanding sections . . . 547 [and] 548(a)(1)(B)  
11 . . . of this title, [which empower the trustee to  
12 avoid preferential and constructively fraudulent  
13 transfers,] the trustee may not avoid a transfer that  
14 is a . . . settlement payment, as defined in section .  
15 . . . 741 of this title, made by or to (or for the  
16 benefit of) a . . . stockbroker, financial institution,  
17 financial participant, or securities clearing agency .  
18 . . . that is made before the commencement of the case,  
19 except under section 548(a)(1)(A) of this title[, which  
20 empowers the trustee to avoid transfers made with  
21 actual intent to hinder, delay, or defraud creditors].  
22

23  
24 Section 741(8) of Title 11, in turn, defines a "settlement  
25 payment" as "a preliminary settlement payment, a partial  
26 settlement payment, an interim settlement payment, a settlement  
27 payment on account, a final settlement payment, or any other  
28 similar payment commonly used in the securities trade."

29 The bankruptcy court denied the motion to dismiss. It held  
30 that the phrase "commonly used in the securities trade" in  
31 § 741(8) modifies all the terms in the section's definition and  
32 thereby limits protected "settlement payments" to those that are

1 common in the industry. In re Enron Corp., 325 B.R. 671, 685-86  
2 & n.7 (Bankr. S.D.N.Y. 2005) ("Enron I"). The bankruptcy court  
3 held that evidence was necessary to determine whether the  
4 redemption payments were commonly used, rather than, as Enron  
5 alleged, extraordinary because they resulted from coercion by  
6 holders of the commercial paper. Id. at 686. It also held that  
7 a factual issue existed over whether Enron's redemption payments  
8 were made to retire debt or to purchase the commercial paper, and  
9 that this distinction could affect whether the payments  
10 constituted settlement payments. Id. Most of the defendants  
11 settled with Enron after Judge Gonzalez denied their motions to  
12 dismiss.

13 Following discovery, Alfa and ING, relying on § 546(e)'s  
14 safe harbor, moved for summary judgment. The bankruptcy court  
15 denied the motions. In re Enron Creditors Recovery Corp., 407  
16 B.R. 17, 45 (Bankr. S.D.N.Y. 2009) ("Enron II"). Concluding that  
17 "the transfer of 'ownership' of a security is an integral element  
18 in the securities settlement process," it held that "settlement  
19 payments" include only payments made to buy or sell securities  
20 and not payments made to retire debt. Id. 37-41. The bankruptcy  
21 court relied on our decision in SEC v. Sterling Precision Corp.,  
22 393 F.2d 214 (2d Cir. 1968), in which we held that "a maker's  
23 paying a note prior to maturity in accordance with its terms  
24 would not be regarded as a 'purchase'" under the Investment

1 Company Act of 1940. Enron II, 407 B.R. at 38 (quoting Sterling  
2 Precision, 393 F.2d at 217). The bankruptcy court concluded that  
3 Alfa and ING had not demonstrated that Enron's payments were  
4 settlement payments as defined in § 741(8), because they had  
5 failed to establish that the payments were made to acquire title  
6 to the commercial paper rather than to retire debt. Id. at 37-  
7 41. At several points in its opinion, the bankruptcy court, to  
8 buttress its denial of summary judgment, emphasized facts (most  
9 of which are disputed) regarding the allegedly unusual nature of  
10 Enron's redemption. These include the above-market price Enron  
11 paid, the alleged insistence of the broker-dealers to act as  
12 intermediaries instead of principals, and the supposed rarity of  
13 commercial paper prepayments in general. See, e.g., id. at 37-  
14 38.

15 Alfa and ING sought, and were granted by the district  
16 court, interlocutory review of the bankruptcy court's decision  
17 denying summary judgment. See In re Enron Creditors Recovery  
18 Corp., No. 01-16034, 2009 WL 3349471 (S.D.N.Y. Oct. 16, 2009)  
19 ("Enron III"). The district court limited the scope of review to  
20 the question whether the § 546(e) safe harbor applies to an  
21 issuer's redemption of commercial paper prior to maturity,  
22 effected through the customary mechanism of transacting in  
23 commercial paper through the Depository Trust Company, without  
24 regard to extrinsic facts, such as the motives and circumstances

1 of the redemption. See In re Enron Creditors Recovery Corp., 422  
2 B.R. 423, 424 (S.D.N.Y. 2009) ("Enron IV").

3 The district court reversed the bankruptcy court. It  
4 concluded that § 546(e)'s safe harbor protects Enron's redemption  
5 payments, and directed entry of summary judgment in favor of Alfa  
6 and ING. Id. at 442. The district court held (1) that  
7 § 741(8)'s definition of "settlement payment" is not limited to  
8 payments that are "commonly used," and, therefore, that the  
9 circumstances of a particular payment do not bear on whether that  
10 payment fits within the definition, id. at 429-34; (2) that a  
11 "settlement payment is any transfer that concludes or consummates  
12 a securities transaction," id. at 436; and (3) that Enron's  
13 redemption constitutes a securities transaction regardless of  
14 whether Enron acquired title to the commercial paper, because the  
15 redemption involved "the delivery and receipt of funds and  
16 securities," id. at 435-42.

17 Enron appealed to this court.

#### 18 **DISCUSSION**

19 On appeal, Enron argues that the bankruptcy court's  
20 decision was correct and that the district court erred by holding  
21 that settlement payments under § 741(8) are not limited to those  
22 that are commonly used in the securities trade and that involve  
23 the transfer of title to a security.

24 "A district court's order in a bankruptcy case is subject to

1 plenary review, meaning that this Court undertakes an independent  
2 examination of the factual findings and legal conclusions of the  
3 bankruptcy court.” In re Duplan Corp., 212 F.3d 144, 151 (2d  
4 Cir. 2000). Here, we review only the issue the district court  
5 agreed to hear on appeal:

6 whether the § 546(e) ‘safe harbor’ . . . extends to  
7 transactions in which commercial paper is redeemed by the  
8 issuer prior to maturity, using the customary mechanism of  
9 the Depository Trust Company . . . for trading in commercial  
10 paper . . . , without regard to extrinsic facts about the  
11 nature of the [transactions], the motive behind the  
12 [transactions], or the circumstances under which the  
13 payments were made.

14  
15 Enron IV, 422 B.R. at 424. As several of our sister circuits have  
16 held, the meaning of “settlement payment” under § 741(8) is a  
17 matter of statutory construction and thus a question of law we  
18 review de novo. See, e.g., In re Comark, 971 F.2d 322, 324-25  
19 (9th Cir. 1992) (citing In re Kaiser Steel Corp., 952 F.2d 1230  
20 (10th Cir. 1991); Kaiser Steel Corp. v. Charles Schwab & Co., 913  
21 F.2d 846 (10th Cir. 1990); Bevill, Bresler, & Schulman Asset  
22 Mgmt. Corp. v. Spencer Sav. & Loan Ass'n, 878 F.2d 742, 745 (3d  
23 Cir. 1989)).

#### 24 **I. Judicial Interpretation of the Safe Harbor**

25 Congress enacted § 546(e)’s safe harbor in 1982 as a means  
26 of “minimiz[ing] the displacement caused in the commodities and  
27 securities markets in the event of a major bankruptcy affecting  
28 those industries.” Kaiser Steel Corp. v. Charles Schwab & Co.,  
29 Inc., 913 F.2d 846, 849 (10th Cir. 1990) (quoting H.R. Rep. 97-

1 420, at 2 (1982), reprinted in 1982 U.S.C.C.A.N. 583, 583). If a  
2 firm is required to repay amounts received in settled securities  
3 transactions, it could have insufficient capital or liquidity to  
4 meet its current securities trading obligations, placing other  
5 market participants and the securities markets themselves at  
6 risk.

7 The safe harbor limits this risk by prohibiting the  
8 avoidance of "settlement payments" made by, to, or on behalf of a  
9 number of participants in the financial markets. By restricting  
10 a bankruptcy trustee's power to recover payments that are  
11 otherwise avoidable under the Bankruptcy Code, the safe harbor  
12 stands "at the intersection of two important national legislative  
13 policies on a collision course—the policies of bankruptcy and  
14 securities law." In re Resorts Int'l, Inc., 181 F.3d 505, 515  
15 (3rd Cir. 1999) (internal quotation marks omitted).

16 Section 741(8), which § 546(e) incorporates, defines  
17 "settlement payment" rather circularly as "a preliminary  
18 settlement payment, a partial settlement payment, an interim  
19 settlement payment, a settlement payment on account, a final  
20 settlement payment, or any other similar payment commonly used in  
21 the securities trade." The parties, following our sister  
22 circuits, agree that courts should interpret the definition, "in  
23 the context of the securities industry," as "the transfer of cash  
24 or securities made to complete [a] securities transaction."

1 Contemporary Indus. Corp. v. Frost, 564 F.3d 981, 985 (8th Cir.  
2 2009) (quoting In re Resorts Int'l, Inc., 181 F.3d at 515).

3 Although our circuit has not yet addressed the scope of  
4 § 741(8)'s definition, other circuits have held it to be  
5 "extremely broad." In re QSI Holdings, Inc., 571 F.3d 545, 549  
6 (6th Cir. 2009) (quoting Contemporary Indus. Corp., 564 F.3d at  
7 985). Several circuits, for example, have rejected limitations  
8 on the definition that would exclude transactions in privately  
9 held securities or transactions that do not involve financial  
10 intermediaries that take title to the securities during the  
11 course of the transaction. See, e.g., In re Plassein Int'l  
12 Corp., 590 F.3d 252, 258-59 (3rd Cir. 2009); In re QSI Holdings,  
13 Inc., 571 F.3d at 549-50; Contemporary Indus. Corp., 564 F.3d at  
14 986. No circuit has yet addressed the safe harbor's application  
15 to an issuer's early redemption of commercial paper.

16 Alfa and ING argue that Enron's redemption payments are  
17 settlement payments within the meaning of § 741(8) because they  
18 completed a transaction involving the exchange of money for  
19 securities. The SEC and the Securities Industry and Financial  
20 Markets Association, a trade group representing the interests of  
21 securities firms, banks, and asset managers, have filed amicus  
22 briefs in support of Alfa and ING's interpretation of the  
23 statute.

24 Enron proposes three limitations on the definition of

1 settlement payment in § 741(8), each of which, it argues, would  
2 exclude the redemption payments. First, it contends that the  
3 final phrase of § 741(8)—“commonly used in the securities  
4 trade”—excludes all payments that are not common in the  
5 securities industry, including, Enron argues, Enron’s redemption.  
6 Second, Enron argues that the definition includes only  
7 transactions in which title to the securities changes hands.  
8 Because, Enron argues, the redemption payments here were made to  
9 retire debt and not to acquire title to the commercial paper,  
10 they are not settlement payments within the meaning of § 741(8).  
11 Finally, Enron argues that the redemption payments are not  
12 settlement payments because they did not involve a financial  
13 intermediary that took title to the transacted securities and  
14 thus did not implicate the risks that prompted Congress to enact  
15 the safe harbor.

16 Because we find nothing in the Bankruptcy Code or the  
17 relevant caselaw that supports Enron’s proposed limitations on  
18 the definition of settlement payment in § 741(8), we reject them.  
19 We hold that Enron’s redemption payments fall within the plain  
20 language of § 741(8) and are thus protected from avoidance under  
21 § 546(e).

## 22 **II. “Commonly Used in the Securities Trade”**

23 Section 741(8) defines “settlement payment” as “a  
24 preliminary settlement payment, a partial settlement payment, an

1 interim settlement payment, a settlement payment on account, a  
2 final settlement payment, or any other similar payment commonly  
3 used in the securities trade." Enron argues that the phrase  
4 "commonly used in the securities trade" modifies all the  
5 preceding terms and thereby excludes from the definition all  
6 uncommon payments. We disagree.

7 First, as the district court held, the grammatical structure  
8 of the statute strongly suggests that the phrase "commonly used  
9 in the securities trade" modifies only the term immediately  
10 preceding it: "any other similar payment." Under the "rule of  
11 the last antecedent, . . . a limiting clause or phrase . . .  
12 should ordinarily be read as modifying only the noun or phrase  
13 that it immediately follows." Barnhart v. Thomas, 540 U.S. 20,  
14 26 (2003); see also Stepnowski v. Comm'r, 456 F.3d 320, 324 n.7  
15 (3d Cir. 2006) ("Under the last-antecedent rule of construction,  
16 . . . the series 'A or B with respect to C' contains two items:  
17 (1) 'A' and (2) 'B with respect to C.'"). Enron seizes on a  
18 corollary rule of construction under which "a modifier . . . set  
19 off from a series of antecedents by a comma . . . should be read  
20 to apply to each of those antecedents." Kahn Lucas Lancaster,  
21 Inc. v. Lark Int'l Ltd., 186 F.3d 210, 215 (2d Cir. 1999),  
22 abrogated on other grounds as recognized by Sarhank Grp. v.  
23 Oracle Corp., 404 F.3d 657, 660 n.2 (2d Cir. 2005). For example,  
24 in the phrase "no person shall be deprived of life, liberty, or

1 the pursuit of happiness, without due process of law," the phrase  
2 "without due process of law" modifies all three terms. This  
3 rule, however, does not apply to the series in § 741(8) because  
4 the modifier is not set off from its antecedents by a comma.  
5 Because both the modifier and its immediate antecedent are set  
6 off from the preceding terms in the series, the last-antecedent  
7 rule applies. The phrase "commonly used in the securities  
8 industry" thus is properly read as modifying only the term "any  
9 other similar payment." The phrase is not a limitation on the  
10 definition of settlement payment, but rather, as our sister  
11 circuits have held, it is "a catchall phrase intended to  
12 underscore the breadth of the § 546(e) exemption." In re QSI  
13 Holdings, Inc., 571 F.3d at 550 (quoting Contemporary Indus.  
14 Corp., 564 F.3d at 986 (emphasis in original)).

15 Moreover, Enron's proposed reading would make application of  
16 the safe harbor in every case depend on a factual determination  
17 regarding the commonness of a given transaction. It is not clear  
18 whether that determination would depend on the economic  
19 rationality of the transaction, its frequency in the marketplace,  
20 signs of an intent to favor certain creditors—as suggested by the  
21 facts on which the bankruptcy court relied, such as the alleged  
22 coercion by Enron's commercial paper noteholders, Enron II, 407  
23 B.R. at 31—or some other factor. This reading of the statute  
24 would result in commercial uncertainty and unpredictability at

1 odds with the safe harbor's purpose and in an area of law where  
2 certainty and predictability are at a premium.

3 Accordingly, we hold that the phrase "commonly used in the  
4 securities industry" limits only the phrase immediately preceding  
5 it; it does not limit the other transactions that § 741(8)  
6 defines as settlement payments.

### 7 **III. Redemption of Debt Securities**

8 Enron next argues that the redemption payments are not  
9 settlement payments because they involved the retirement of debt,  
10 not the acquisition of title to the commercial paper. We find no  
11 basis in the Bankruptcy Code or the relevant caselaw to interpret  
12 § 741(8) as excluding the redemption of debt securities. Because  
13 Enron's redemption payments completed a transaction in  
14 securities, we hold that they are settlement payments within the  
15 meaning of § 741(8).

16 The bankruptcy court agreed with Enron's position, relying  
17 in large part on our decision in SEC v. Sterling Precision Corp.,  
18 393 F.2d 214 (2d Cir. 1968). See Enron II, 407 B.R. at 37-40. In  
19 Sterling Precision Corp., we held that an issuer's redemption of  
20 bonds and preferred stock was not a "purchase" within the meaning  
21 of the Investment Company Act of 1940. 393 F.2d at 217. We  
22 based this conclusion, in part, on the fact that the issuer "did  
23 not acquire title to its Debentures or Preferred Stock; it  
24 discharged them." 393 F.2d at 216-18. Drawing on this

1 conclusion, the bankruptcy court held that Enron's redemption  
2 payments do not constitute settlement payments under § 741(8)  
3 because Enron did not acquire title to the commercial paper it  
4 redeemed. Enron II, 407 B.R. at 38-40.

5 Alfa and ING argue that Sterling Precision Corp. is not  
6 relevant to this case because it interpreted the Investment  
7 Company Act, not the Bankruptcy Code. Setting aside this  
8 argument, reliance on Sterling Precision Corp.'s interpretation  
9 of the term "purchase" still makes sense only if we read a  
10 purchase or sale requirement into § 741(8). For the following  
11 reasons, we decline to do so.

12 Nothing in the text of § 741(8) or in any other provision of  
13 the Bankruptcy Code supports a purchase or sale requirement.  
14 Enron argues that a "settlement payment" must involve a  
15 transaction in securities, which, in turn, must involve a  
16 purchase or sale. While we, like our sister circuits, agree that  
17 in the context of the securities industry a "'settlement' refers  
18 to 'the completion of a securities transaction,'" Contemporary  
19 Indus. Corp., 564 F.3d at 985 (quoting Kaiser Steel Corp. v.  
20 Charles Schwab & Co., 913 F.2d 846, 849 (10th Cir. 1990)), we  
21 find little support for the contention that a securities  
22 transaction necessarily involves a purchase or sale. Several of  
23 the industry definitions of "settlement payment" on which other  
24 courts of appeals have relied define the term as an exchange of

1 money or securities that completes a securities transaction;  
2 these definitions make no mention of a requirement that title to  
3 the securities changes hands. See, e.g., Kaiser Steel Corp., 913  
4 F.2d at 849 (citing, inter alia, D. Brownstone & I. Franck, The  
5 VNR Investor's Dictionary 279 (1981) (defining "settlement" as  
6 "finishing up of a transaction or group of transactions"); Group  
7 of Thirty, Clearance and Settlement Systems in the World's  
8 Securities Markets 86 (1989) (defining "settlement" as "[t]he  
9 completion of a transaction, wherein securities and corresponding  
10 funds are delivered and credited to the appropriate accounts");  
11 A. Pessin & J. Ross, Words of Wall Street: 2000 Investment Terms  
12 Defined 227 (1983) (defining "settlement" as "the completion of a  
13 securities transaction"). While, as the dissent notes, see  
14 Dissent at 8-9, Kaiser Steel Corp. also cites industry  
15 definitions that reference a purchase or sale of securities, 913  
16 F. 2d at 849, the range of definitions that the decision cites  
17 suggests that the securities industry does not universally  
18 consider a purchase or sale of securities to be a necessary  
19 element of a settlement payment.

20 Enron argues, and the dissent agrees, see Dissent at 11, 19-  
21 20, that applying the safe harbor to Enron's commercial paper  
22 redemption would contradict "uniform case law spanning two  
23 decades" that allows "avoidance of debt-related payments." The  
24 cases on which Enron relies, however, involve non-tradeable bank

1 loans, not widely issued debt securities. See, e.g., Union Bank  
2 v. Wolas, 502 U.S. 151, 152-53 (1991); Ray v. City Bank & Trust  
3 Co., 899 F.2d 1490, 1491-93 (6th Cir. 1990); Breedon v. L.I.  
4 Bridge Fund, LLC, 220 B.R. 739, 740 (B.A.P. 2d Cir. 1998); CEPA  
5 Consulting, Ltd. v. N.Y. Nat'l Bank, 187 B.R. 105, 106-07  
6 (S.D.N.Y. 1995). Concluding that the safe harbor protects  
7 payments made to redeem tradeable debt securities does not  
8 contradict caselaw permitting avoidance of payments made on  
9 ordinary loans. Interpreting the term "settlement payment" in  
10 the context of the securities industry will exclude from the safe  
11 harbor payments made on ordinary loans.

12       Indeed, it is not clear that a purchase or sale requirement  
13 would necessarily exclude all payments made on ordinary loans.  
14 For example, what if parties structured the early repayment of a  
15 loan evidenced by a promissory note as a repurchase of that  
16 promissory note? The note's terms could prohibit voluntary early  
17 redemption. If the borrower were to buy back the promissory note  
18 at a negotiated price, it would be difficult to characterize this  
19 transaction as a redemption rather than a repurchase in order to  
20 exclude it from the safe harbor.

21       The payments at issue in this case demonstrate the  
22 difficulty with and the absence of a statutory foundation for a  
23 purchase or sale requirement. Assume, for example, that the  
24 terms of Enron's commercial paper-like the terms of the

1 hypothetical promissory note discussed above—prohibited early  
2 redemption. Enron could reacquire the paper only by agreeing  
3 with the paper holders on a particular reacquisition price. This  
4 transaction would appear to be a repurchase,<sup>2</sup> cf. Sterling  
5 Precision Corp., 393 F.2d at 217 (“[A] maker's paying a note  
6 prior to maturity in accordance with its terms would not be  
7 regarded as a ‘purchase.’” (emphasis added)), and would thus  
8 trigger safe-harbor protection under the rule Enron and the  
9 dissent espouse. It is difficult to see, however, why this  
10 transaction should warrant safe harbor protection while a  
11 transaction identical in every respect, except that the  
12 commercial paper's terms did not prohibit early redemption,  
13 should not. Avoidance of the transactions in either scenario  
14 would present the same threat of systemic risk in the  
15 marketplace, and limiting safe-harbor protection to transactions  
16 in the first scenario would not prevent an issuer from making  
17 payments to reacquire commercial paper during the preference  
18 period. Contrary to the dissent's contention, see Dissent at 18-  
19 19, a purchase or sale requirement would thus not prevent Enron

---

1 <sup>2</sup> Whether the reacquisition of commercial paper at issue in  
2 this appeal is properly characterized as a redemption or a  
3 repurchase remains an open issue. See Enron II, 407 B.R. at 45.  
4 Because the district court addressed on appeal only whether the  
5 safe harbor protects an issuer's premature redemption of  
6 commercial paper, we do not have occasion to address the  
7 distinction between a premature redemption and an issuer's  
8 repurchase of commercial paper.

1 from favoring commercial-paper holders over other creditors.

2 Because we find no basis in the Bankruptcy Code or the  
3 caselaw for a purchase or sale requirement, and because we do not  
4 think such a requirement is necessary to exclude from the safe  
5 harbor repayment of ordinary loans, we decline to impose a  
6 purchase or sale requirement on § 741(8).

#### 7 **IV. Involvement of a Financial Intermediary**

8 Enron also argues that the redemption of debt does not  
9 constitute a protected settlement payment because it did not  
10 involve a financial intermediary that took a beneficial interest  
11 in the securities during the course of the transaction. Enron  
12 argues that the redemption thus did not implicate the systemic  
13 risks that motivated Congress's enactment of the safe harbor.  
14 Although the role of the broker-dealers that participated in  
15 Enron's redemption is a disputed issue of fact, see Enron IV, 422  
16 B.R. at 426, Enron is correct that the DTC acted as a conduit and  
17 recordkeeper rather than a clearing agency that takes title to  
18 the securities during the course of the transaction.

19 Nevertheless, we do not think the absence of a financial  
20 intermediary that takes title to the transacted securities during  
21 the course of the transaction is a proper basis on which to deny  
22 safe-harbor protection. The Third, Sixth, and Eighth Circuits  
23 rejected similar arguments in affirming application of the safe  
24 harbor to leveraged buyouts of private companies that involved

1 financial intermediaries who served only as conduits. See In re  
2 Plassein Int'l Corp., 590 F.3d at 257-59; In re QSI Holdings,  
3 Inc., 571 F.3d at 549-50; Contemporary Indus. Corp., 564 F.3d at  
4 986. In reasoning that provides an analog for us, these courts  
5 explained that undoing long-settled leveraged buyouts would have  
6 a substantial impact on the stability of the financial markets,  
7 even though only private securities were involved and no  
8 financial intermediary took a beneficial interest in the  
9 exchanged securities during the course of the transaction.<sup>3</sup> See  
10 In re Plassein Int'l Corp., 590 F.3d at 258; In re QSI Holdings,  
11 Inc., 571 F.3d at 550; Contemporary Indus. Corp., 564 F.3d at  
12 987. We see no reason to think that undoing Enron's redemption  
13 payments, which involved over a billion dollars and approximately  
14 two hundred noteholders, would not also have a substantial and  
15 similarly negative effect on the financial markets.

---

1 <sup>3</sup> The dissent characterizes these decisions as "stand[ing] for  
2 the proposition that, if Section 546(e) applies to a particular  
3 type of transaction-namely, purchases of equity securities-an  
4 individual transaction does not lose safe-harbor protection  
5 simply because it does not involve a central counterparty."  
6 Dissent at 15. We have difficulty understanding the import of  
7 this characterization. We rely on these decisions as support for  
8 rejecting Enron's argument that a transaction must involve a  
9 central counterparty to receive safe-harbor protection. The  
10 dissent argues that Congress enacted the safe harbor out of  
11 "concern for the stability of central counterparties that  
12 guarantee both sides of a securities transaction." But the  
13 dissent does not appear to dispute our, or the Third, Sixth, and  
14 Eighth Circuits', rejection of a restriction on the safe harbor  
15 that would limit it to transactions involving central  
16 counterparties.

1           Moreover, § 546(e) applies to settlement payments made "by  
2 or to (or for the benefit of)" a number of participants in the  
3 financial markets. It would appear inconsistent with this  
4 language for courts to limit the safe harbor circuitously by  
5 interpreting the definition of "settlement payment" to exclude  
6 payments that do not involve a financial intermediary that takes  
7 title to the securities during the course of the transaction.

8           In sum, we decline to adopt Enron's proposed exclusions from  
9 the definition of settlement payment and the safe harbor. The  
10 payments at issue were made to redeem commercial paper, which the  
11 Bankruptcy Code defines as a security. 11 U.S.C.

12 § 101(49)(A)(i).<sup>4</sup> They thus constitute the "transfer of cash . . .  
13 . made to complete [a] securities transaction" and are settlement  
14 payments within the meaning of § 741(8). See Contemporary Indus.  
15 Corp., 564 F.3d at 985 (quoting In re Resorts Int'l, Inc., 181  
16 F.3d at 515 (3rd Cir. 1999)). Because we reach this conclusion  
17 by looking to the statute's plain language, we decline to address  
18 Enron's arguments regarding legislative history, which, in any  
19 event, would not lead to a different result. See Lamie v. U.S.

---

1           <sup>4</sup> We reject, as the district court did, Enron's attempt to  
2 supplant the Bankruptcy Code's definition of "security" with the  
3 definition in the Securities Exchange Act of 1934, which excludes  
4 short-term commercial paper. 15 U.S.C. § 78c(a)(10). This case  
5 calls on us to interpret a provision of the Bankruptcy Code. It  
6 makes little sense to look to a definition from a different  
7 statutory scheme, particularly when that definition contradicts  
8 the Bankruptcy Code's.

1 Trustee, 540 U.S. 526, 534 (2004) (“It is well established that  
2 when the statute's language is plain, the sole function of the  
3 courts—at least where the disposition required by the text is not  
4 absurd—is to enforce it according to its terms.” (internal  
5 quotation marks omitted)).

#### 6 **CONCLUSION**

7 For the foregoing reasons, we AFFIRM the district court's  
8 decision reversing the decision of the Bankruptcy Court and  
9 directing entry of summary judgment in favor of Alfa and ING.

1 John G. Koeltl, District Judge, dissenting:

2 The Court today concludes that Section 546(e) of the  
3 Bankruptcy Code, 11 U.S.C. § 546(e), which exempts a "settlement  
4 payment" from a bankruptcy trustee's avoidance powers, extends  
5 to every transaction in which commercial paper is redeemed by an  
6 issuer prior to maturity using the customary mechanism of the  
7 Depository Trust Company. Op. at 26-27.

8 The issue resolved in this case has never been decided  
9 previously by any court of appeals. To capture a premature  
10 commercial paper redemption within the definition of "settlement  
11 payment" in the Bankruptcy Code, the Court broadly defines  
12 "settlement payment" to include a payment that "complete[s] a  
13 transaction in securities." Op. at 19. A "security" is, in  
14 turn, broadly defined under the Bankruptcy Code to include  
15 various types of debt such as a note, bond, or debenture. 11  
16 U.S.C. § 101(49)(A). The Court's holding is not required by the  
17 opaque definition of "settlement payment" in the Bankruptcy  
18 Code, and is inconsistent with the legislative history of that  
19 provision. Moreover, the breadth of the Court's definition  
20 threatens routine avoidance proceedings in bankruptcy courts.  
21 The Bankruptcy Court correctly concluded in this case that the  
22 definition of "settlement payment" should include a requirement  
23 that there be a purchase or sale of a security to trigger a

1 "settlement payment." See In re Enron Creditors Recovery Corp.,  
2 407 B.R. 17, 38-40 (Bankr. S.D.N.Y. 2009). The redemption of  
3 commercial paper indisputably is not the purchase or sale of  
4 that commercial paper. Because I disagree with the Court's  
5 conclusion eliminating this requirement, I respectfully dissent.

6

7

**I.**

8

9 Section 547(b) of the Bankruptcy Code, 11 U.S.C. § 547(b),  
10 provides that the trustee of a bankruptcy estate may recover,  
11 among other things, money or property transferred by an  
12 insolvent debtor in the 90 days preceding bankruptcy, where the  
13 transfer (1) was made to or for the benefit of a creditor; (2)  
14 was made for or on account of an antecedent debt owed by the  
15 debtor; and (3) enabled the creditor to receive more than it  
16 otherwise would have under the provisions of the Bankruptcy  
17 Code. 11 U.S.C. § 547(b).

18 Section 546(e) of the Bankruptcy Code, 11 U.S.C. § 546(e),  
19 carves out a limited exception to the trustee's avoidance  
20 powers, including its power to avoid preferential transfers  
21 under Section 547(b). It provides, in relevant part, that:

22 Notwithstanding sections 544, 545, 547, 548(a)(1)(B),  
23 and 548(b) of this title, the trustee may not avoid a  
24 transfer that is a . . . settlement payment, as  
25 defined in section . . . 741 of this title, made by or

1 to (or for the benefit of) a commodity broker, forward  
2 contract merchant, stockbroker, financial institution,  
3 financial participant, or securities clearing agency  
4 . . . .  
5

6 11 U.S.C. § 546(e). Section 741 in turn defines "settlement  
7 payment" in an ambiguous fashion as "a preliminary settlement  
8 payment, a partial settlement payment, an interim settlement  
9 payment, a settlement payment on account, a final settlement  
10 payment, or any other similar payment commonly used in the  
11 securities trade." 11 U.S.C. § 741(8).

12 The question the Court confronts today is whether an issuer's  
13 redemption of commercial paper prior to maturity is a  
14 "settlement payment" within the meaning of Sections 546(e) and  
15 741(8). Op. at 12.<sup>1</sup> It answers this question in the  
16 affirmative, based on what it terms "the plain language of  
17 § 741(8)." Op. at 16; see also Op. at 26-27. The text of  
18 Section 741(8), however, provides virtually no guidance as to  
19 the types of transfers that might qualify as settlement  
20 payments. The Court understates the severity of this problem by

---

<sup>1</sup>As the Bankruptcy Court noted, commercial paper is a note evidencing a debt, "with a corporation borrowing the money in the marketplace instead of from a bank." Enron, 407 B.R. at 37, 38. Commercial paper with a maturity at the time of issuance of nine months or less is excluded from the definition of a "security" under the Securities Exchange Act of 1934. See 15 U.S.C. § 78c(a)(10).

1 describing the definition as "rather circular[]." Op. at 14.  
2 It is in fact difficult to imagine a more circular, less clear  
3 statute than one that defines "settlement payment" by exclusive  
4 reference to a variety of types of "settlement payment," and  
5 then concludes with a catch-all that refers back to the  
6 undefined "settlement payment," namely "any other similar  
7 payment commonly used in the securities trade." Thus, while it  
8 may be true, as the Court notes, that no provision of the  
9 Bankruptcy Code clearly indicates that the redemption of  
10 commercial paper is beyond the scope of Section 741(8), see,  
11 e.g., Op. at 16, 19, neither does any provision of the  
12 Bankruptcy Code clearly indicate that such transactions are  
13 within its scope. In other words, the statute is ambiguous.

14 In light of this statutory ambiguity, other courts of  
15 appeals have construed "settlement payment" as a "term . . . of  
16 art in the securities trade," which "should be given its  
17 established meaning in that industry." Contemporary Indus.  
18 Corp. v. Frost, 564 F.3d 981, 985 (8th Cir. 2009) (citing  
19 McDermott Int'l, Inc. v. Wilander, 498 U.S. 337, 342-46 (1991)).  
20 "Specifically, 'settlement' refers to 'the completion of a  
21 securities transaction,' and a 'settlement payment is generally  
22 the transfer of cash or securities made to complete [the]  
23 securities transaction.'" Id. (quoting Kaiser Steel Corp. v.

1 Charles Schwab & Co., 913 F.2d 846, 849 (10th Cir. 1990); In re  
2 Resorts, Int'l, Inc., 181 F.3d 505, 515 (3d Cir. 1999)  
3 (alteration in original)); see also In re Comark, 971 F.2d 322,  
4 325 (9th Cir. 1992). The parties agree that this is the  
5 approach the Court should follow in interpreting "settlement  
6 payment," see Op. at 14, but disagree as to whether an issuer's  
7 redemption of its commercial paper is a "securities  
8 transaction." This question is one of first impression in the  
9 courts of appeals.

10

11

## II.

12

13 Enron argues persuasively that a "securities transaction"  
14 is a term of art in the securities industry that requires a  
15 purchase or sale of securities. This industry understanding is  
16 reflected in numerous business dictionaries. See, e.g.,  
17 Barron's Financial Guides, Barron's Dictionary of Finance and  
18 Investment Terms 641, 745 (7th ed. 2006) (defining "settlement"  
19 as the "conclusion of a securities transaction in which a  
20 broker/dealer pays for securities bought . . . or delivers  
21 securities sold and receives payment from the buyer's broker");  
22 Thomas P. Fitch, Barron's Dictionary of Banking Terms 423-24  
23 (5th ed. 2006) ("[t]he delivery of securities by a selling

1 broker, and payment by a buying broker"); Group of Thirty,  
2 Global Clearing and Settlement: A Plan of Action 13 (2003) ("the  
3 process by which the ownership interest in securities is  
4 transferred from one investor to another, generally in exchange  
5 for a corresponding transfer of funds"); New York Stock  
6 Exchange, Language of Investing Glossary 30 (1981)  
7 ("[c]onclusion of a securities transaction when a customer pays  
8 a broker/dealer for securities purchased or delivers securities  
9 sold and receives from the broker the proceeds of a sale"); Bank  
10 for International Settlements, Committee on Payment and  
11 Settlement Systems & Technical Committee of the International  
12 Organization of Securities Commissions, Recommendations for  
13 Securities Settlement Systems 48 (2001) ("[t]he completion of a  
14 transaction through final transfer of securities and funds  
15 between the buyer and the seller").

16       The existence of a purchase or sale requirement also finds  
17 support in case law. See, e.g., In re Bevill, Bresler &  
18 Schulman Asset Mgmt. Corp., 878 F.2d 742, 751 (3d Cir. 1989)  
19 ("[T]he transfer of record ownership of securities is an  
20 integral element in the securities settlement process."). Among  
21 the definitions of "settlement payment" that the Kaiser Steel  
22 Court relied on was the definition from the New York Stock  
23 Exchange's Language of Investing Glossary: The "[c]onclusion of

1 a securities transaction when a customer pays a broker/dealer  
2 for securities purchased or delivers securities sold and  
3 receives from the broker the proceeds of a sale." Kaiser Steel,  
4 913 F.2d at 849 (quoting New York Stock Exchange, Language of  
5 Investing Glossary 30 (1981)). See also 17 C.F.R. 240.17f-  
6 1(a)(5) ("The term securities-related transaction shall mean a  
7 purpose [sic], sale or pledge of investment securities, or a  
8 custodial arrangement for investment securities.").

9       There appears to be no dispute that an issuer's redemption  
10 of its commercial paper does not involve the purchase or sale of  
11 a security. Commercial paper is a note evidencing the issuer's  
12 debt. As the Court recognizes, this Court has found that an  
13 issuer's redemption of its bonds and preferred stock is not a  
14 "purchase" within the meaning of the Investment Company Act of  
15 1940. SEC v. Sterling Precision Corp., 393 F.2d 214, 217 (2d  
16 Cir. 1968) (Friendly, J.). While the Court reached that  
17 conclusion in the context of the Investment Company Act, the  
18 Court's reasoning was based on, among other factors, the common  
19 understanding of an issuer's repayment of its debt. As Judge  
20 Friendly explained, "in common speech a maker's paying a note  
21 prior to maturity in accordance with its terms would not be  
22 regarded as a 'purchase.'" Id. at 217. Judge Friendly  
23 continued: "[T]he normal discourse of lawyers sets redemptions

1 apart from purchases. The distinction is recognized in  
2 corporation statutes, . . . ; by judicial decision, . . . ; and  
3 by writers on corporation law." Id. The Court today does not  
4 dispute this conclusion, but argues that it is irrelevant  
5 because the Court declines to "read a purchase or sale  
6 requirement into § 741(8)." Op. at 20.

7 The Court states that it finds little support for a  
8 purchase or sale requirement and explains that cases "make no  
9 mention of a requirement that title to the securities changes  
10 hands." Op. at 21. The Court cites Kaiser Steel and its  
11 citation to definitions of "settlement" that make no reference  
12 to a change in title to securities. However, Kaiser Steel  
13 concerned whether a leveraged buyout transaction was included in  
14 the definition of a "settlement payment" in § 741(8). There was  
15 no question that the transaction involved the purchase of  
16 securities. Moreover, as the Court notes, Kaiser Steel  
17 specifically cited other source materials that make clear that a  
18 change of title is an integral element of the settlement of a  
19 securities transaction. See Kaiser Steel, 613 F.2d at 849  
20 (citing New York Stock Exchange, Language of Investing Glossary  
21 30 (1981) (quoted above); D. Scott, Wall Street Words 320 (1988)  
22 (defining "settlement" as the "[t]ransfer of the security (for  
23 the seller) or cash (for the buyer) in order to complete a

1 security transaction"))). Kaiser Steel cannot stand for the  
2 proposition that no purchase or sale is required for a  
3 securities transaction when the transaction at issue did include  
4 a purchase and when the Court cited to source materials that  
5 identified a purchase as an essential element of a settlement  
6 payment.

7       The Court today points to no case that holds that there is  
8 no purchase or sale requirement for a securities transaction,  
9 and provides no source that indicates that there is a common  
10 industry understanding that the redemption of commercial paper  
11 is the completion of a securities transaction.<sup>2</sup>

12

---

<sup>2</sup>The Court downplays Enron's argument that applying the safe harbor to the redemption of commercial paper would undermine uniform case law that allows the avoidance of debt-related payments. Op. at 21-22. But this is not an argument that a purchase or sale requirement is not part of a "securities transaction." Rather, it is an effort to downplay the significance of the Court's holding. As explained in Part IV, the Court's distinction is unpersuasive, and the decision will in fact undo decades of well-established law. It is sufficient at this point to note that the Court's attempt to distinguish prior case law is not an argument why the Court's definition of a securities transaction is in fact correct.

**III.**

**A.**

The relevant legislative history supports the conclusion that redemptions of commercial paper are not protected by Section 546(e)'s safe harbor. In 1975, Congress amended the Securities Exchange Act of 1934 ("the 1934 Act" or "the Act"), 48 Stat. 881, codified at 15 U.S.C. § 78a et seq., to create a national system for the clearance and settlement of securities transactions. Bradford Nat'l Clearing Corp. v. SEC, 590 F.2d 1085, 1091-92 (D.C. Cir. 1978). The predecessor of Section 546(e) was first enacted in 1978, and applied only to commodities markets. See Kaiser Steel, 913 F.2d at 848-49; H.R. Rep. No. 97-420, at 1-3 (1982). This left open the possibility that the avoidance provisions of Section 547(b) could be applied to the settlement of securities transactions, and the failure to include securities transactions in the settlement safe harbor lent force to the argument that the clearing agencies were not entitled to protection from preference avoidance when they cleared securities transactions. This anomaly inadvertently jeopardized the national settlement system. See Bankruptcy of Commodity and Securities Brokers: Hearings Before the Subcomm.

1 on Monopolies and Commercial Law of the H. Comm. on the  
2 Judiciary, 97th Cong. 238-67 (1981) (statement of Bevis  
3 Longstreth, Comm'r, SEC). Clearing agencies were exposed to  
4 risk because they were "the critical link between the buyer's  
5 broker and the seller's broker"; they "simultaneously  
6 guarantee[d]" the delivery of securities to the buyer and the  
7 delivery of the purchase price to the seller. Id. at 245.<sup>3</sup> In  
8 response to this concern, in 1982, Congress adopted  
9 substantially the current version of Section 546(e), which more  
10 broadly covered settlement payments. H.R. Rep. No. 97-420, at 2  
11 (1982).<sup>4</sup>

---

<sup>3</sup> The Court's reading of the legislative purpose behind Section 546(e) at times appears substantially broader. It writes: "If a firm is required to repay amounts received in settled securities transactions, it could have insufficient capital or liquidity to meet its current securities trading obligations, placing other market participants and the securities markets themselves at risk." Op. at 13 (emphasis added). However, this concern could likewise be invoked for refusing to apply the Bankruptcy Code's preference provisions in any context; there is always a risk that the transferee of an avoided transfer will be negatively affected and destabilized by the trustee's exercise of its avoidance powers. The legislative history indicates that Congress intended to eliminate only a particular subset of claims: those that might jeopardize the stability of clearing agencies.

<sup>4</sup> In 2006, Congress adopted amendments to Section 546(e) that were "technical changes" designed to "update the language to reflect current market and regulatory practices" and to "clarify [] the treatment of certain financial products." H.R. Rep. 109-

1           These concerns were not implicated by the market for  
2 commercial paper at the time of Section 546(e)'s enactment, and  
3 cannot justify the application of the safe harbor to redemptions  
4 of commercial paper today. As an initial matter, the 1934 Act  
5 did not, and does not, apply to commercial paper, which is not a  
6 "security" for purposes of the Act. See 15 U.S.C. § 78c(a)(10).<sup>5</sup>

7           Moreover, Congress's concern for the stability of central  
8 counterparties that guarantee both sides of a securities  
9 transaction would not justify sweeping redemptions of commercial  
10 paper within Section 546(e)'s safe harbor, because transactions  
11 in commercial paper are not cleared through such a central  
12 counterparty. As the Court notes, "the DTC acted as a conduit  
13 rather than a clearing agency that takes title to the securities  
14 during the course of the transaction." Op. at 24. Unlike the  
15 National Securities Clearing Corporation ("NSCC"), which clears  
16 transactions in equity and debt securities covered by the 1934  
17 Act, the DTC does not act as an intermediary for trades by

---

648, at 2 (2006). The amendments do not shed any light on whether the premature redemption of commercial paper is covered by the exclusion for a "settlement payment."

<sup>5</sup> The 1934 Act exempts from the definition of security "any note, draft, bill of exchange, or banker's acceptance which has a maturity at the time of issuance of not exceeding nine months, exclusive of days of grace, or any renewal thereof the maturity of which is likewise limited." 15 U.S.C. § 78c(a)(10).

1 undertaking independent obligations to deliver securities to the  
2 buyer and payment to the seller. See Pet Quarters, Inc. v.  
3 Depository Trust and Clearing Corp., 559 F.3d 772, 776-77 (8th  
4 Cir. 2009). Rather than act as such a central counterparty, the  
5 DTC serves as an electronic bookkeeper that processes payments;  
6 it does not guarantee the performance (and assume the risk of  
7 non-performance) of any other party. See id. (explaining that  
8 the DTC "tracks transfers of indirect security entitlement  
9 positions among its members, eliminating the need to transfer  
10 the physical stock certificates," while "NSCC acts as the  
11 intermediary between buyer and seller . . . and assumes the  
12 rights and obligations of buyers and sellers to receive, pay  
13 for, and deliver securities"). Because the DTC does not  
14 guarantee the obligations of its members, and does not take  
15 title to the securities or funds it clears, it is not exposed to  
16 any risk on account of a transaction that is challenged by a  
17 bankruptcy trustee.

18 The Court acknowledges this distinction between the DTC and  
19 the NSCC, but rejects it as immaterial on the theory that "the  
20 absence of a financial intermediary that takes title to the  
21 transacted securities during the course of the transaction is  
22 [not] a proper basis on which to deny safe-harbor protection."  
23 Op. at 24-25. In support of this conclusion, it relies on cases

1 from other courts of appeals that have applied Section 546(e)'s  
2 safe harbor to leveraged buyouts of companies that "involved  
3 financial intermediaries who served only as conduits." Op. at  
4 25 (citing In re Plassein Int'l Corp., 590 F.3d 252, 257-59 (3d  
5 Cir. 2009); In re QSI Holdings, Inc., 571 F.3d 545, 549-50 (6th  
6 Cir. 2009); Frost, 564 F.3d at 986). Accepting the reasoning of  
7 the courts of appeals in those cases, however, does not militate  
8 in favor of extending Section 546(e)'s safe harbor to  
9 transactions in commercial paper. Those cases stand for the  
10 proposition that, if Section 546(e) applies to a particular type  
11 of transaction - namely, purchases of equity securities - an  
12 individual transaction does not lose safe-harbor protection  
13 simply because it does not involve a central counterparty, and  
14 thus does not directly implicate the concerns that led Congress  
15 to enact the section.<sup>6</sup> The leveraged buyout cases do not resolve  
16 the question the Court must answer in the first instance:  
17 whether a different type of transaction - a redemption of  
18 commercial paper - is covered by Section 546(e).<sup>7</sup>

---

<sup>6</sup> As the Court points out, the issue on this appeal concerns only an issuer's premature redemption of commercial paper. Opinion at 23 n.2.

<sup>7</sup> The Court questions any reliance on the fact that Congress enacted the safe harbor out of concern for the stability of central counterparties when various courts of appeals have rejected a restriction on the safe harbor in leveraged buyout

1 **B.**

2  
3 The conclusion that redemptions of commercial paper are not  
4 covered by Section 546(e) is further supported by subsequent  
5 legislative history.<sup>8</sup> Section 547(c)(2) of the Bankruptcy Code  
6 provides that a trustee may not avoid under Section 547 a  
7 transfer

8 to the extent that such transfer was in payment of a  
9 debt incurred by the debtor in the ordinary course of  
10 business or financial affairs of the debtor and the  
11 transferee, and such transfer was (A) made in the  
12 ordinary course of business or financial affairs of  
13 the debtor and the transferee; or (B) made according  
14 to ordinary business terms.  
15

---

transactions that do not involve such counterparties. Op. at 25  
n.3. That is not a basis to ignore the legislative history,  
which reveals that Congress was primarily concerned with  
upsetting the securities settlement process. That settlement  
process involves the purchase and sale of securities that are  
ordinarily cleared through a clearing agency. The fact that  
some transactions that do not involve a clearing agency -  
leveraged buyouts - are protected by the safe harbor because  
they were not carved out by Congress is not a basis for  
disregarding the legislative history and its focus on  
transactions involving the purchase and sale of securities. The  
Court points to nothing in the legislative history of the  
ambiguous "settlement payment" provision that indicates that it  
was intended to cover the redemption of commercial paper.

<sup>8</sup> Subsequent legislative history is not entitled to the same  
weight as contemporaneous legislative history, but it may  
provide "some guidance" as to the legislative intent for a prior  
congressional act. See Davis v. United Air Lines, Inc., 662  
F.2d 120, 123-24 (2d Cir. 1981).

1 11 U.S.C. § 547(c) (2). As originally enacted in 1978, the  
2 "ordinary course" defense was restricted to preference actions  
3 involving short-term debts of a duration of 45 days or less.  
4 See Fidelity Sav. & Inv. Co. v. New Hope Baptist, 880 F.2d 1172,  
5 1175-76 (10th Cir. 1989). In 1984, two years after the passage  
6 of Section 546(e), the "ordinary course" defense was amended to  
7 eliminate this restriction. A discussion between Senators Dole  
8 and DeConcini, as part of the debate surrounding passage of the  
9 amendment, makes clear that Congress was primarily concerned  
10 with ensuring that "ordinary course" redemptions of commercial  
11 paper with longer maturities would come within Section  
12 547(c) (2)'s safe harbor. Id. If, as the Court concludes,  
13 Section 546(e) protects every redemption of commercial paper,  
14 "without regard to . . . the motives and circumstances of the  
15 redemption," Op. at 11, then this amendment was unnecessary  
16 because any redemption of commercial paper - whether made in the  
17 ordinary course of business or not - would be protected by the  
18 "settlement payment" exclusion that Congress had adopted two  
19 years before.

**IV.**

Enron's reading of Section 546(e) finds further support in the policies reflected in the Bankruptcy Code. In Union Bank v. Wolas, 502 U.S. 151 (1991), the Supreme Court discussed the congressional priorities that motivated enactment of Section 547, and concluded that preference actions under that section are "intended to serve two basic policies":

A preference is a transfer that enables a creditor to receive payment of a greater percentage of his claim against the debtor than he would have received if the transfer had not been made and he had participated in the distribution of the assets of the bankruptcy estate. The purpose of the preference section is two-fold. First, by permitting the trustee to avoid prebankruptcy transfers that occur within a short period before bankruptcy, creditors are discouraged from racing to the courthouse to dismember the debtor during his slide into bankruptcy. The protection thus afforded the debtor often enables him to work his way out of a difficult financial situation through cooperation with all of his creditors. Second, and more important, the preference provisions facilitate the prime bankruptcy policy of equality of distribution among creditors of the debtor. Any creditor that received a greater payment than others of his class is required to disgorge so that all may share equally. The operation of the preference section to deter "the race of diligence" of creditors to dismember the debtor before bankruptcy furthers the second goal of the preference section - that of equality of distribution.

502 U.S. at 160-161 (citing H. R. Rep. No. 95-595 177-178 (1977)).

1           These goals - preventing a "race to the courthouse" and  
2 ensuring equality of distribution among creditors - are severely  
3 undermined by the interpretation of Section 546(e) adopted by  
4 the Court. What Enron alleges happened in this case, according  
5 to the Court's interpretation of its papers, is instructive:  
6 "it made the redemption payment under pressure from noteholders  
7 seeking to recover on their investments amidst rumors of Enron's  
8 imminent implosion." Op. at 7. That is, under intense pressure  
9 from certain creditors, Enron extinguished its debt by paying to  
10 them funds in excess of what they would have received on the  
11 open market and, more importantly, far in excess of what they  
12 would have received pursuant to the provisions of the Bankruptcy  
13 Code. See 11 U.S.C. § 547(b). The scenario depicted by the  
14 appellees is no less troubling. They assert, according to the  
15 Court, that "Enron redeemed its commercial paper to 'calm the  
16 irrational markets' and leave a favorable impression that would  
17 allow it to reenter the commercial paper market once 'bad  
18 publicity' about the company's stability 'had blown over.'" Op.  
19 at 7. Those voluntary debt payments are no different from other  
20 efforts of a debtor shortly before bankruptcy to prefer some  
21 creditors over others. Such transfers, which result in  
22 creditors of equal priority being treated unequally, and which  
23 decrease the liquidity of a corporation attempting to avoid a

1 slide into bankruptcy, are at the very core of the trustee's  
2 avoidance powers under Section 547.

3 The Court's holding that a settlement payment requires only  
4 the transfer of cash to complete a securities transaction,  
5 without any purchase or sale of a security, is indeed  
6 extraordinarily broad. In fact, the Court's definition of a  
7 settlement payment would seem to bring virtually every  
8 transaction involving a debt instrument within the safe harbor  
9 of Section 546(e), thus allowing the settlement payment  
10 exception to swallow up the Section 547(b) avoidance provision.

11 The Court concludes that its holding poses no threat to the  
12 viability of the Bankruptcy Code's preference provisions on the  
13 ground that this case involves "widely issued debt securities,"  
14 and not "non-tradeable bank loans." Op. at 22. The Court,  
15 however, offers no basis for distinguishing between the two  
16 types of debts, and under 11 U.S.C. § 101(49)(A), there is none;  
17 notes, bonds, and debentures are "securities" under the  
18 Bankruptcy Code irrespective of whether they are widely issued  
19 or tradeable. The Court's reasoning thus applies equally to any  
20 payment on account of a debt evidenced by a writing, and does  
21 indeed imperil decades of cases that allow the avoidance of  
22 debt-related payments. See, e.g., Wolas, 502 U.S. at 162  
23 (remanding to determine whether payments of long-term debt were

1 within the ordinary course of business exception to avoidance  
2 under Section 547(c)(2)).

3 The Court does not dispute that the payment of any ordinary  
4 loan evidenced by a note would fall within its definition of a  
5 settlement payment, but the Court finds that "the context of the  
6 securities industry will exclude from the safe harbor payments  
7 made on ordinary loans." Opinion at 22. The Court cites no  
8 authority for this proposition, and the terms of its definition  
9 would cover such payments.

10 The Court's holding is wholly unnecessary. The issue  
11 presented in this case is a narrow one - whether the premature  
12 redemption of commercial paper by the issuer falls within the  
13 safe harbor of a "settlement payment" under section 546(e). The  
14 issue is an unusual one, as reflected by the fact that it has  
15 never arisen in any prior decision of any court of appeals.  
16 However, by eliminating the "purchase or sale" requirement that  
17 would exclude such payments, the Court undermines the ability of  
18 bankruptcy trustees to avoid preferential payments on account of  
19 ordinary debts. The Court argues that including a "purchase or  
20 sale" requirement would not "necessarily exclude all payments  
21 made on ordinary loans." Opinion at 22. It is not clear why  
22 this is an argument against a "purchase or sale requirement,"  
23 which should be required by the common industry understanding

1 and legislative history of section 546(e). The Court does not  
2 dispute that recognizing such a requirement in fact excludes the  
3 premature redemption of commercial paper from the scope of the  
4 "settlement payment" safe harbor of section 546(e), and does so  
5 without imperiling the regular avoidance powers of bankruptcy  
6 trustees for ordinary loans. The Court appears to object that  
7 the "purchase or sale" requirement would not exclude various  
8 ways in which an issuer might deal with its commercial paper.  
9 The Court hypothesizes that companies could protect their  
10 premature redemptions of commercial paper by turning them into  
11 repurchases rather than redemptions, if there is a "purchase or  
12 sale" requirement. Opinion at 22-24. But, under the Court's  
13 approach, such repurchases would still be covered by the  
14 "settlement payment" safe harbor, and, in addition, the Court's  
15 approach imperils the ordinary repayment of loans. The fact  
16 that the "purchase or sale" requirement would not address all of  
17 the ways in which a company might deal with its commercial paper  
18 is not a reason to find that premature redemptions of commercial  
19 paper do not fall within the "settlement payment" safe harbor.

20

21

**CONCLUSION**

22

23

For the reasons explained above, I respectfully dissent.
